

John G. Sommer

Engineered Rubber Products

Introduction to Design, Manufacture and Testing

HANSER

Contents

Acknowledgments	V
Preface and Disclaimer	VI
1 Introduction	1
2 Elastomers and Compounds	15
3 Compound Mixing and Processing	25
3.1 Calendering	29
3.2 Extrusion	29
3.3 Molding	32
3.3.1 Compression Molding	34
3.3.2 Transfer Molding	39
3.3.3 Injection Molding of TPEs	47
4 Testing and Properties	51
4.1 Measuring Viscosity and Scorch	52
4.2 Hardness	54
4.3 Stress-Strain Properties	54
4.3.1 Uniaxial Deformation	54
4.3.2 Biaxial Deformation	56
4.3.3 Triaxial Deformation	58
4.3.4 Triaxial Tension	60
4.4 Viscoelastic Properties	64
4.4.1 Creep	65
4.4.2 Stress Relaxation	65
4.4.3 Compression Set	65
4.5 Dynamic Properties	66
4.5.1 Fatigue and Cut Growth	68
4.5.2 Tensile Failure	69
4.5.3 Hysteresis and Resilience	69
4.5.4 Abrasion	70
4.5.5 Friction	70
4.6 Other Rubber Properties	71
4.6.1 Effect of Test Temperature	71
4.6.2 Conductivity	72
4.6.3 Adhesion	72
4.6.4 Permeability	73
4.7 Deterioration	73
4.7.1 Weather	73

4.7.2	Ozone	74
4.7.3	High-Energy Radiation	74
4.7.4	High Temperature	74
4.8	Rubber Ingredient Compatibility	75
4.9	Electrical Properties	77
4.10	Non-Destructive Testing	77
4.10.1	Testing and Computers	77
5	Product Design	83
5.1	Mountings	84
5.2	Hose	91
5.3	Belting	94
5.4	Constant Velocity Joint (CVJ) Boots	95
5.5	Mounts and Bearings	96
5.5.1	Shape Factor	96
5.5.2	Bridge Bearings	96
5.5.3	Earthquake Bearings	97
5.5.4	Testing and Quality Control	98
6	Use of Computers and FEA with Rubber	109
6.1	Compounding	111
6.1.1	Vulcanization	111
6.1.2	Compound Development	111
6.2	Stress in a Dumbbell Tensile Specimen	111
6.3	FEA and Thermal Considerations	113
6.4	Resistance of Rubber to Small Indentations	113
6.5	Use of FEA in Various Application Areas	113
7	Non-Tire Products	121
7.1	Adhesion	121
7.2	Hose and Belting	123
7.2.1	Hose	124
7.2.2	Belts	125
7.3	Mountings, Bearings, and Bushings	127
7.3.1	Mountings	127
7.3.2	Bearings	128
7.4	Energy Storage and Dissipation	131
7.5	Rolls	132
7.6	Seals	132
7.6.1	Pump Seal	133
7.6.2	Automotive Transmission Seals	134
7.6.3	Casket Seals	134
7.6.4	Automotive Door Seals	134
7.7	Other Applications	135

8 Tires	143
8.1 Introduction.....	143
8.2 Materials.....	144
8.3 Pneumatic Tires.....	145
8.3.1 Types of Tires.....	145
8.4 Tire Reinforcement.....	149
8.4.1 Bead Wire and Tire Cord.....	149
8.5 Tire Construction.....	150
8.6 Component Interdependence.....	152
8.7 Component Preparation and Tire Fabrication.....	153
8.7.1 Component Preparation.....	153
8.7.2 Fabrication.....	154
8.8 Tire Aging.....	158
8.9 In-Service Tire Damage and Safety.....	158
8.10 Run-Flat Tires.....	159
8.11 Passenger Tire Design.....	160
8.11.1 Aspect Ratio.....	160
8.12 Truck Tires.....	161
8.13 Very Large Tires.....	162
8.14 Aircraft Tires.....	162
8.15 Solid Tires.....	163
8.16 Semi-Pneumatic Tires.....	163
8.17 Non-Traditional Tires.....	163
Appendix 1: Conversion Factors	169
Appendix 2: Acronyms and Abbreviations	171
Subject Index	175
