Preface xiii

UNIT 1 Foundations of Nursing Health Assessment 1

1 The Nurse's Role in Health Assessment 3
Role of the Professional Nurse 4
Direct and Indirect Caregiving 4
Advocacy 5
Scholarship and Research 5
Registered Nurse and Advanced Practice Nurse Roles 5
Purpose of Health Assessment 5
Wellness and Health Promotion 6
Healthy People 8
Health Promotion and Nursing Assessment 8
Sample Health History Taking Related to the Case Study 8
Risk Assessment and Health-Related Patient Teaching 9
Assessment in the Nursing Process 9
Parts of the Nursing Process 9
Assess 10
Diagnose 10
Plan Goals and Outcomes 10
Plan Care 10
Intervene 10
Evaluate 10
Critical Thinking 11
Diagnostic Reasoning 11
Types of Assessments 12
Emergency Assessment 12
Comprehensive Assessment 12
Focused Assessment 13
Priority Setting 13
Frequency of Assessment 13
Lifespan Issues 14
Cultural and Environmental Considerations 14
Components of the Health Assessment 14
Documentation and Communication 16
Frameworks for Health Assessment 17
Evidence-Based Critical Thinking 18

2 The Interview and Therapeutic Dialogue 22
Communication Process 23
Nonverbal Communication Skills 24
Verbal Communication Skills 25
Active Listening 25
Restatement 25
Reflection 25
Encouraging Elaboration (Facilitation) 26
Silence 26
Focusing 26
Clarification 26
Summarizing 26
Nontherapeutic Responses 26
False Reassurance 26
Sympathy 26
Unwanted Advice 27
Biased Questions 28
Changes of Subject 28
Distractions 28
Technical or Overwhelming Language 28
Interrupting 29
Professional Expectations 29
Phases of the Interview Process 29
Preinteraction Phase 29
Beginning Phase 30
Working Phase 30
Closing Phase 30
Intercultural Communication 31
Limited English 31
Working with an Interpreter 32
Gender and Sexual Orientation Issues 32
Lifespan Issues 33
Newborns and Infants 33
Children and Adolescents 33
Older Adults 34
Special Situations 34
Hearing Impairment 34
Low Level of Consciousness 35
Cognitive Impairment 35
Mental Health Illness 35
Anxiety 35
Crying 35
Anger 35
Alcohol or Drug Use 36
Personal Questions 36
Sexual Aggression 36

3	The Health History	39
	Primary and Secondary Data Sources	40
	Reliability of the Source	40
	Components of the Health History	40
	Demographical Data	40
	Reason for Seeking Care	41
	History of Present Illness	42
	Location	42
	Duration	42
	Intensity	42
	Quality/Description	42
	Aggravating/Alleviating Factors	42
	Pain Goal	42
	Functional Goal	42
	Past Health History	42
	Current Medications and Indications	44
	Family History	44
	Functional Health Assessment	44
	Growth and Development	45
	Review of Systems	47
	Psychosocial and Lifestyle Factors	48
	Social, Cultural, and Spiritual	
	Assessment	48
	Mental Health	49
	Human Violence	49
	Sexual History and Orientation	49
	Lifespan Considerations	49
	Pregnant Women	49
	Newborns, Children, and Adolescents	50
	Older Adults	50
	Cultural and Environmental Considerations	50
4	Techniques of Physical Examination and Equipment	53
	Precautions to Prevent Infection	54
	Hand Hygiene	54
	Standard Precautions	55
	Latex Allergy	55
	Skin Reactions	57
	Inspection	58
	Palpation	58
	Light Palpation	59
	Moderate to Deep Palpation	59
	Percussion	59
	Direct Percussion	59
	Indirect Percussion	60
	Percussion Sounds	60
	Auscultation	61
	Advanced Techniques	62
	Ophthalmoscope	62
	Otoscope	63
	Tuning Fork	63
	Equipment for a Complete Physical Assessment	64
	Lifespan Considerations	64
	Pregnant Women	64
	Newborns and Infants	64
	Children and Adolescents	64
	Older Adults	65
	Cultural Considerations	65

5	Documentation and Interdisciplinary Communication	68
	Patient Medical Record	69
	Purposes of the Medical Record	69
	Legal Document	69
	Communication and Care Planning	69
	Quality Assurance	69
	Financial Reimbursement	70
	Education	70
	Research	70
	Components of the Medical Record	70
	Electronic Medical Record	71
	Principles Governing Documentation	72
	Confidential	72
	Accurate and Complete	73
	Organized	74
	Timely	74
	Concise	74
	Critical Thinking and Clinical Judgment	74
	Nursing Admission Assessment	75
	Flow Sheets	75
	Plan of Care/Clinical Pathway	75
	Progress Note	75
	Narrative Notes	81
	SOAP Notes	81
	PIE Notes	82
	Focus Note	82
	Charting by Exception	82
	Discharge Note	82
	Home Care Documentation	83
	Long-term Care Documentation	83
	Written Handoff Summary	83
	Verbal Communication	83
	Verbal Handoff	83
	Reporting	84
	Qualities of Effective Reporting	84
	SBAR	84
	Reporting to the Primary Health Care Provider	84
	Telephone Communication	85
	Patient Rounds and Conferences	86
	Critical Thinking and Clinical Judgment	86

UNIT 2 General Examinations 89

6	General Survey and Vital Signs Assessment	91
	Acute Assessment	92
	Objective Data Collection	92
	Preparation	92
	Common and Specialty or Advanced Techniques	92
	General Survey	93
	Physical Appearance	93
	Behavior	93
	Mobility	94
	Height	95
	Weight	95
	Anthropometric Measurements	95
	Vital Signs	96
	Temperature	98
	Pulse	101

Respirations	104	Supplements	150
Oxygen Saturation	105	Fluid and Electrolytes	150
Blood Pressure	106	Food Safety and Food Security	151
Risk Assessment and Health-Related Patient Teaching	108	Nutritional Guidelines	151
Vital Signs Monitor	112	Lifespan Considerations	151
Doppler Technique	113	Pregnant Women	151
Lifespan Variations	113	Infants, Children, and Adolescents	151
Infants and Children	113	Older Adults	152
Older Adults	113	Cultural Considerations	154
Infants and Children	114	Collecting Nutritional Data	154
Older Adults	118	Acute Assessment	154
Cultural Variations	119	Subjective Data Collection	154
Evidence-Based Critical Thinking	119	Areas for Health Promotion/ <i>Healthy People</i>	154
7 Pain Assessment	126	Assessment of Risk Factors	155
Neuroanatomy of Pain	127	Medical History	156
Peripheral Nervous System	127	Weight History	156
Central Nervous System	127	Family History	157
Gate Control Theory	128	Food and Fluid Intake Patterns	157
Nociception	128	Psychosocial Profile	157
Types of Pain	129	Medications and Supplements	158
Acute Pain	129	Risk Assessment and Health-Related Patient Teaching	159
Chronic Pain	130	Focused Health History Related to Common Symptoms	159
Neuropathic Pain	130	Changes in Body Weight	159
Lifespan Considerations	130	Change in Eating Habits	159
Newborns, Infants, and Children	130	Symptoms of Malnutrition	159
Older Adults	130	Comprehensive Nutritional History	160
Cultural and Environmental Considerations	131	Food Records	160
Risk Assessment and Health Related Patient Teaching		Direct Observation	160
Assessing Pain	131	Lifespan Considerations	161
Subjective Data Collection	132	Pregnant Women	161
Location	132	Newborns, Infants, and Children	162
Duration	132	Adolescents	163
Intensity	132	Older Adults	163
Quality/Description	132	Objective Data Collection	165
Alleviating/Aggravating Factors	132	Preparation	165
Pain Management Goal	132	Physical Assessment	165
Functional Goal	132	Body Type	165
Objective Data Collection	134	General Appearance	166
Pain Assessment Tools	134	Swallowing	166
One-Dimensional Pain Scales	135	Elimination	166
Multidimensional Pain Scales	135	Body Mass Index	166
Lifespan Considerations	139	Weight Calculations	166
Newborns, Infants, and Children	139	Percentage of Ideal Body Weight	167
Older Adults	140	Recent Weight Change	167
Special Situations	140	Percent Usual Body Weight	167
Patients Unable to Report Pain	140	Waist Circumference	167
Patients With Opioid Tolerance	140	Waist-to-Hip Ratio	168
Nursing Diagnoses, Outcomes, and Interventions	141	Skinfold Thickness	168
Reassessing and Documenting Pain	141	Mid Upper Arm Muscle Circumference	169
Barriers to Pain Assessment	143	Derived Measures (Using MAC and TSF)	169
Evidence-Based Critical Thinking	143	Lifespan Considerations	170
8 Nutrition Assessment	148	Pregnant Women	170
Nutritional Concepts	149	Infants, Children, and Adolescents	170
Primary Nutrients	149	Older Adults	171
Carbohydrates	149	Evidence-Based Critical Thinking	171
Proteins	149	Common Laboratory and Diagnostic Testing	171
Lipids	149	Serum Proteins	171
Vitamins and Minerals	150	Hemoglobin and Hematocrit	171
		Lymphocyte Count	171
		Creatinine Excretion	171

- Nitrogen Balance 171
 - Skin Testing 171
 - Lipid Measurements 171
 - Other Laboratory Tests 171
 - Diagnostic Reasoning 172
 - Nursing Diagnosis, Outcomes, and Interventions 172
- 9 Assessment of Developmental Stages 179**
- Subjective Data Collection 180**
- Areas for Health Promotion/*Healthy People* 180
 - Psychosocial Development 180
 - Infant: Trust Versus Mistrust 180
 - Toddler: Autonomy Versus Shame and Doubt 180
 - Preschooler: Initiative Versus Guilt 180
 - School Age: Industry Versus Inferiority 182
 - Adolescent: Identity Versus Role Confusion 182
 - Early Adult: Intimacy Versus Isolation 182
 - Middle Adult: Generativity Versus Stagnation 182
 - Late Adult: Ego Integrity Versus Despair 182
 - Cognitive Development 183
 - Infant: Sensorimotor 183
 - Toddler and Preschooler: Preoperational 183
 - School-age Child: Concrete Operational 184
 - Adolescent: Formal Operations 185
 - Young Adult: Formal Operations 185
 - Middle Adult: Cognitive Expertise 186
 - Older Adult: Wisdom 186
 - Language Development 188
 - Cultural Considerations 188
- Objective Data Collection 190**
- Physical Growth 190
 - Motor Development 191
- Evidence-Based Critical Thinking 192**
- Diagnostic Reasoning 193
- 10 Mental Health Assessment 197**
- Role of the Nurse in Mental Health and Psychiatric Screening 198**
- Acute Assessment 198**
- Subjective Data Collection 198**
- Areas for Health Promotion/*Healthy People* 199
 - Assessment of Risk Factors 199
 - Biographical Data 199
 - Current Health Status 200
 - Medications 200
 - Past Health History 200
 - Family History 201
 - Psychosocial 201
 - Focused Healthy History Related to Common Symptoms 203
 - Suicidal Ideation 204
 - Homicidal Ideation and Aggressive Behavior 204
 - Altered Mood and Affect 205
 - Auditory Hallucinations 205
 - Visual Hallucinations 205
 - Other Hallucinations 205
- Lifespan Considerations 206
 - Pregnant Women 206
 - Children and Adolescents 206

- 12 Assessment of Human Violence 241**
- Types of Human Violence 242**
- Family Violence 242
 - Child Maltreatment 243
 - Sibling Violence 243
 - Intimate Partner Violence 243
 - Elder Abuse 244
 - Violence Against Adults with Disabilities 244
 - "Youth" and School Violence 244

- Punking and Bullying 244
- Sexual Violence 244
- Hate Crimes 245
- Human Trafficking 245
- War-Related and Military Violence 245

Importance of Violence/Safety Assessment 245

Subjective Data Collection 245

- Areas for Health Promotion/*Healthy People* 246
- Interviewing Patients About Human Violence 246

Objective Data Collection 249

- Documentation 250
- Mandated Reporting 250
- LifeSpan Considerations 250
 - Pregnant Women 250
 - Infants, Children, and Adolescents 251
 - Older Adults 251
- Cultural Considerations 251

Evidence-Based Critical Thinking 252

- Nursing Diagnoses, Outcomes, and Interventions 252

UNIT 3 Regional Examinations 259

13 Skin, Hair, and Nails Assessment 261

Structure and Function Overview 262

- Skin 262
 - Epidermis 262
 - Dermis 262
 - Subcutaneous Layer 263
- Hair 263
- Nails 264
- Sweat Glands 264
- LifeSpan Considerations 264
 - Pregnant Women 264
 - Newborns and Infants 264
 - Children and Adolescents 264
 - Older Adults 265
- Cultural Considerations 266

Acute Assessment 267

Subjective Data Collection 267

- Assessment of Risk Factors 267
 - Family History 268
 - Past History 268
 - Medications 270
 - Lifestyle, Occupational History, and Personal Behaviors 270

- Risk Assessment and Health-Related Patient Teaching 272

- Focused Health History Related to Common Symptoms 273

- Pruritis (Itching) 273
- Rash 274
- Single Lesion or Wound 274
- LifeSpan Considerations 275
 - Pregnant Women 275
 - Newborns, Infants, and Children 275
 - Adolescents 275
 - Older Adults 276
- Cultural Considerations 276

Objective Data Collection 278

- Preparation 278

- Common and Specialty or Advanced Techniques 278
- Comprehensive Skin Assessment 278
 - Inspection 279
 - Palpation 283

- LifeSpan Considerations 284

- Pregnant Women 284
- Newborns, Infants, Children, and Adolescents 284
- Older Adults 285

Evidence-Based Critical Thinking 285

- Common Laboratory and Diagnostic Testing 285
- Diagnostic Reasoning 286
- Nursing Diagnosis, Outcomes, and Interventions 286

14 Head and Neck with Lymphatics Assessment 319

Structure and Function Overview 320

- The Head 320
- The Neck 320
 - Trachea 321
 - Thyroid and Parathyroid Glands 322
- Lymphatics 322
- LifeSpan Considerations 322
 - Pregnant Women 322
 - Newborns, Infants, and Children 323
 - Older Adults 323
- Cultural Considerations 323

Acute Assessment 323

Subjective Data Collection 324

- Areas for Health Promotion/*Healthy People* 324
- Assessment of Risk Factors 324
- Risk Assessment and Health-Related Patient Teaching 326
- Focused Health History Related to Common Symptoms 326
 - Headache 326
 - Neck Pain 327
 - Limited Neck Movement 327
 - Facial Pain 327
 - Lumps or Masses 327
 - Hypothyroidism 327
 - Hyperthyroidism 327
- LifeSpan Considerations 328
 - Pregnant Women 328
 - Newborns and Infants 328
 - Children and Adolescents 328
 - Older Adult 328
- Cultural Considerations 328

Objective Data Collection 328

- Preparation 328
- Common and Specialty or Advanced Techniques 329
- Comprehensive Physical Examination 330
 - Inspection 330
 - Palpation 331
 - Auscultation 333
- LifeSpan Considerations 334
 - Pregnant Women 334
 - Infants and Children 334
 - Older Adult 334

- Evidence-Based Critical Thinking 334**
 - Common Laboratory and Diagnostic Testing 334
 - Diagnostic Reasoning 334
 - Nursing Diagnosis, Outcomes, and Interventions 334

15 Eyes Assessment 344

- Structure and Function Overview 345**
 - Extraocular Structures 345
 - Extraocular Muscle Function 345
 - Intraocular Structures 346
 - Vision 347
 - Lifespan Considerations 347
 - Pregnant Women 347
 - Newborns and Infants 348
 - Children and Adolescents 348
 - Older Adults 348
 - Cultural Considerations 348
