

SABINE LATTEMANN

**DEVELOPMENT OF AN ENVIRONMENTAL IMPACT
ASSESSMENT AND DECISION SUPPORT SYSTEM
FOR SEAWATER DESALINATION PLANTS**

Contents

Preamble	1
Problem setting	2
Research objectives	2
Research context	3
Thesis outline	4
I Potential environmental impacts of seawater desalination	5
1 Global desalination situation	7
1.1 Introduction	7
1.2 Historical development	8
1.3 Globally installed desalination capacity	9
1.4 Regionally installed desalination capacities	10
1.4.1 The Gulf	13
1.4.2 The Red Sea	13
1.4.3 The Mediterranean Sea	17
1.4.4 Other sea regions	17
1.5 Summary and conclusions	18
2 Seawater desalination processes	21
2.1 Introduction	21
2.2 Seawater intakes	21
2.3 Desalination processes	25
2.3.1 Reverse osmosis	25
2.3.2 Integrated membrane systems (IMS)	39
2.3.3 Distillation	44
2.3.4 Energy use	46
2.3.5 Water use	50
2.3.6 Material use	51
2.4 Outfalls	52

3	Marine environmental impacts	57
3.1	Introduction	57
3.2	Seawater intakes	57
3.3	Waste water disposal	59
3.3.1	Salinity, temperature and density	59
3.3.2	Residual biocides	64
3.3.3	Coagulants	71
3.3.4	Antiscalants	75
3.3.5	Metals	76
3.3.6	Cleaning chemicals	77
3.4	Potential cumulative impacts on sea regions	82
3.4.1	The Gulf	82
3.4.2	The Red Sea	84
3.4.3	The Mediterranean Sea	88
3.5	Summary and conclusions	89
4	Air quality impacts	91
4.1	Introduction	91
4.2	Energy demand in perspective	91
4.3	Emissions into the atmosphere	94
4.4	Other environmental impacts associated with energy use	99
4.5	Summary and conclusions	99
5	Summary and evaluation of impacts	103
5.1	Introduction	103
5.2	Ecological risk assessment	103
5.2.1	Risk matrix	104
5.2.2	Risk characterization	104
5.3	Results and conclusions	120
6	Impact mitigation measures	123
6.1	Introduction	123
6.2	The concept of green technology	124
6.3	The concept of best available techniques (BAT)	125
6.4	BAT approach for seawater desalination plants	126
6.4.1	Intakes	127
6.4.2	Pretreatment	129
6.4.3	Cleaning and maintenance	133
6.4.4	Desalination process	134
6.4.5	Disposal of the concentrate	138
6.5	Site selection	139
6.6	Summary and conclusions	142

II	Environmental impact assessment (EIA)	147
7	Concept and methodology	149
7.1	Introduction	149
7.2	EIA approach	150
7.3	General considerations for EIA studies	160
7.4	Summary and conclusions	161
8	Marine environmental monitoring	163
8.1	Introduction	163
8.2	The principles of environmental monitoring	164
8.3	Marine monitoring framework for desalination plants	167
8.3.1	Preliminary studies	167
8.3.2	Baseline and effects monitoring studies	168
8.3.3	Compliance monitoring (indicator approach)	173
8.3.4	Modeling studies	174
8.3.5	Bioassay studies	175
8.4	Assessment of data	177
8.5	Summary and conclusions	180
9	Multi-criteria analysis (MCA) as a decision support system (DSS) in EIA	183
9.1	Introduction	183
9.2	Multi-criteria analysis	184
9.2.1	Pros and cons	184
9.2.2	The role of MCA in EIAs	186
9.2.3	MCA procedure	186
9.3	Methodology and data input	192
9.3.1	Problem definition	192
9.3.2	Input data	198
9.4	MCA results	198
9.4.1	Graphical evaluation	198
9.4.2	Standardization	201
9.4.3	Weights	202
9.4.4	MCA models	205
9.4.5	Ranking	205
9.4.6	Sensitivity analysis	205
9.4.7	Revised scenarios	209
9.5	Summary and conclusions	217

III General conclusions and recommendations	225
10 Summary, conclusions and recommendations	227
10.1 Environmental impacts and measures for impact mitigation	227
10.2 EIA and DSS	233
10.3 Final remarks	236
 Appendices	 241
Executive summary	241
Samenvatting	243
Bibliography	247
List of abbreviations	267
Curriculum vitae	269
List of publications and presentations	271
Acknowledgements	275
