Progress in Green Energy

Xianguo Li
Editor

Green Energy

Basic Concepts and Fundamentals

Springer

Contents

1 **Green Energy for Sustainability and Energy Security** 1
Xianguo Li
1.1 Introduction 1
1.2 Energy Systems: Their Composition 2
1.3 Energy Systems: Their Adverse Impacts 4
1.4 Energy Systems: The Dilemma 6
1.5 Green Energy and Sustainability: The Target and Solution 8
1.6 Diversification and Localization of Energy Systems: A Means to Sustainability and Energy Security 10
1.7 Summary and Outlook 15
References 16

2 **Exergy Analysis of Green Energy Systems** 17
Ibrahim Dincer and Marc A. Rosen
2.1 Introduction 17
2.2 Green Energy and Sustainable Development 18
2.3 Why Use Exergy Analysis? 22
2.4 Energy and Exergy Analyses 24
2.4.1 Balances for Mass, Energy and Entropy 24
2.4.2 Exergy of Systems and Flows 27
2.4.3 Exergy Consumption 30
2.4.4 Exergy Balance 30
2.4.5 Reference Environment 31
2.4.6 Efficiencies and Other Measures of Merit 33
2.4.7 Energy and Exergy Properties 35
2.4.8 Implications of Results of Exergy Analyses 36
2.4.9 Procedure for Energy and Exergy Analyses 37
2.5 Case Study 1: Exergy Analysis of Solar Ponds 37
2.5.1 Solar Pond Model 38
2.5.2 Energy Analysis 38

2.5.3 Exergy Analysis 41
2.5.4 Numerical Efficiency Values 45
2.6 Case Study 2: Exergy Analysis of Wind Energy Systems 48
2.6.1 Background 48
2.6.2 Analysis 49
2.6.3 Energy and Exergy Efficiencies 52
2.6.4 Application to Ontario 53
2.7 Closing Remarks 59
References 61

3 Wind Speed Distribution – A Theoretical Approach to Probability Density Function 67
Xianguo Li
3.1 Introduction 67
3.2 Analysis of the Wind Speed Data 70
3.2.1 Frequency Distribution of Wind Speed 70
3.2.2 Mean Wind Speeds 71
3.2.3 Wind Energy Potential 72
3.3 Empirical and Continuous Wind Speed Distribution Functions 73
3.3.1 Mean Wind Speeds and Wind Power Density 73
3.3.2 Empirical Distribution Functions 74
3.4 Maximum Entropy Principle – A Theoretical Approach 79
3.5 MEP-based Wind Speed Distribution 81
3.5.1 Mathematical Formulation 81
3.5.2 Fitting Criteria for Comparison 83
3.5.3 Comparison with the Measured Data and Weibull Distribution 84
3.5.4 Summary 96
3.6 MEP-type Wind Speed Distribution 96
3.6.1 Mathematical Formulation 97
3.6.2 Fitting Criteria for Comparison 98
3.6.3 Comparison with the Measured Data and Weibull Distribution 98
3.6.4 Summary 119
3.7 Summary and Outlook 119
References 120

4 Co-combustion and Gasification of Coal and Cattle Biomass: a Review of Research and Experimentation 123
Nicholas T. Carlin, Kalyan Annamalai, Hyukjin Oh, Gerardo Gordillo Ariza, Ben Lawrence, Udayasarathy Arcot V, John M. Sweeten, Kevin Heflin, and Wyatte L. Harman
4.1 Introduction 123
4.2 Background Information 126
4.2.1 Cattle Populations and Manure Production 126

4.2.2 Fuel Properties 128
4.2.3 Emissions from Coal and Biomass Combustion 132
4.3 Energy Conversion of Cattle Biomass 136
4.3.1 Biological Gasification of Cattle Biomass Through Anaerobic Digestion 137
4.3.2 Non-biological Gasification of Cattle Biomass 142
4.3.3 Co-firing Coal and Cattle Biomass in Primary Burn Zones 149
4.3.4 Reburning Coal with Cattle Biomass 155
4.3.5 Small-scale, On-the-Farm Combustion of Cattle Biomass 167
4.4 Summary 171
4.5 Notation 173
Acknowledgements 175

5 Polymer Electrolyte Fuel Cell Modeling – a Pore-scale Perspective 181
Partha P. Mukherjee and Chao-Yang Wang
5.1 Introduction 181
5.2 Pore-scale Modeling 186
5.3 Microstructure Reconstruction 188
5.3.1 CL Structure Generation 188
5.3.2 GDL Structure Generation 190
5.4 Two-phase Transport in the PEFC CL and GDL 191
5.5 Evaluation of Capillary Pressure–Saturation Relation 194
5.5.1 Lattice Boltzmann Model 194
5.5.2 Full Morphology Model 199
5.6 Evaluation of Relative Permeability–Saturation Relation 203
5.7 Effect of Liquid Water on CL and GDL Performance 205
5.7.1 CL Site Coverage and Pore Blockage Effects 206
5.7.2 GDL Pore Blockage Effect 210
5.7.3 CL Voltage Loss Prediction in the Presence of Liquid Water 214
5.8 Summary and Outlook 216
Acknowledgements 217
References 217

6 Nanostructured Hydrides for Solid State Hydrogen Storage for Vehicular Applications 223
Robert A. Varin, Tomasz Czujko and Zbigniew S. Wronski
6.1 Introduction 223
6.2 Thermodynamics 228
6.2.1 Pressure–Composition–Temperature Properties 229
6.2.2 Kinetics of Hydrogen Absorption/Desorption 232

6.3 Nanoprocessing of Solid State Hydrides by Ball Milling 233
6.3.1 Magneto Ball Mill 236
6.3.2 Microstructural Characterization of Ball Milled Hydrides 239
6.4 High Capacity Hydrides 240
6.4.1 Magnesium Hydride (MgH_2) 241
6.4.2 (Nano)composites of Magnesium Hydride (MgH_2) and Complex Hydrides 268
6.5 Summary and Conclusions 278
References 279
