

# Multifunctional Polymer Nanocomposites

*Edited by*

Jinsong Leng and Alan kin-tak Lau

# CONTENTS

|     |  |    |
|-----|--|----|
| 1.1 | Overview.....  | 1  |
| 1.2 | Classification of Nanomaterials and Nanostructure..... | 2  |
| 1.3 | Nanomaterials from Academia to Industry.....           | 4  |
| 1.4 | Nanocomposites.....                                    | 6  |
| 1.5 | Multifunctional Polymer Nanocomposites.....            | 7  |
| 1.6 | Fabrication of Polymer Nanocomposite .....             | 14 |
| 1.7 | Future Trends .....                                    | 17 |
|     | References.....  | 17 |

# CONTENTS

|     |  |    |
|-----|--|----|
| 2.1 | Structure of Carbon Nanotubes (CNTs) .....                                 | 19 |
| 2.2 | Dispersion Properties of CNT Nanocomposites .....                          | 22 |
| 2.3 | Interfacial Bonding Properties.....  | 26 |
| 2.4 | Mechanical Properties and Conductivity of Nanotube–Polymer Composites..... | 31 |
| 2.5 | Modeling of CNT Nanocomposites .....                                       | 34 |
| 2.6 | CNT Biocomposites .....  | 40 |
| 2.7 | Conclusion .....   | 42 |
|     | References.....  | 43 |

## CONTENTS

|         |   |    |
|---------|---|----|
| 3.1     | Overview.....   | 48 |
| 3.2     | Constitutive Relation and Electromechanical Stability<br>of Dielectric Elastomers .....                       | 50 |
| 3.2.1   | Constitutive Relation of Dielectric Elastomers .....  | 51 |
| 3.2.1.1 | Constitutive Relations of Dielastic Elastomer.....  | 51 |
| 3.2.1.2 | Constitutive Relations of Variable Dielectric<br>Constants.....   | 52 |
| 3.2.1.3 | Constitutive Relations of Composite Dielectric<br>Elastomers .....  | 53 |
| 3.2.2   | Electromechanical Stability of Ideal Dielectric Elastomers .....  | 55 |
| 3.2.2.1 | Method of Analyzing Electromechanical Stability<br>of Ideal Dielectric Elastomers .....                       | 55 |
| 3.2.2.2 | Electromechanical Stability of Neo-Hookean<br>and Mooney–Rivlin Type Dielectric Elastomers .....              | 57 |
| 3.2.2.3 | Electromechanical Stability Domain of<br>Neo-Hookean and Mooney–Rivlin Type<br>Dielectric Elastomer.....      | 59 |
| 3.3     | Electromechanical Stability of Linear and Nonlinear<br>Dielectric Elastomers.....                             | 61 |
| 3.3.1   | Method of Analyzing Electromechanical Stability of<br>Dielectric Elastomers Undergoing Large Deformation..... | 61 |
| 3.3.2   | Electromechanical Stability of Neo-Hookean and<br>Mooney–Rivlin Type Linear Dielectric Elastomer .....        | 63 |
| 3.3.3   | Electromechanical Stability of Nonlinear Dielectric<br>Elastomers .....                                       | 67 |
| 3.4     | Reinforced Functions for Dielectric Elastomer Nanocomposites .....  | 71 |
| 3.4.1   | Modification of Dielectric Elastomer Materials.....   | 72 |
| 3.4.1.1 | Ceramic Particles as Filler.....  | 72 |
| 3.4.1.2 | Conductive Particles as Filler .....  | 74 |
| 3.4.1.3 | Blending the Elastomer with a Highly Polarizable<br>Conjugated Polymer .....                                  | 80 |
| 3.4.2   | Dielectric Elastomer Sensors .....  | 82 |
| 3.4.3   | Applications of Dielectric Elastomers .....   | 85 |

|         |  |     |
|---------|--|-----|
| 3.5     | Fabrication and Modeling of Shape Memory Polymers.....                             | 89  |
| 3.5.1   | Synthesis of Typical Shape Memory Polymers.....                                    | 90  |
| 3.5.1.1 | Thermoplastic Polyurethane Shape Memory Polymer.....                               | 90  |
| 3.5.1.2 | Thermosetting Styrene-Based Shape Memory Polymer.....                              | 91  |
| 3.5.1.3 | Thermosetting Epoxy Shape Memory Polymer .....                                     | 92  |
| 3.5.1.4 | Some Novel Shape Memory Polymers .....   | 93  |
| 3.5.2   | Constitutive Models for Shape Memory Polymers.....                                 | 93  |
| 3.5.2.1 | Models Based on Viscoelasticity.....   | 93  |
| 3.5.2.2 | Models Based on Phase Transition.....  | 97  |
| 3.6     | Multifunctional Shape Memory Polymers.....   | 99  |
| 3.6.1   | Electroactive Shape Memory Polymer Nanocomposites .....                            | 99  |
| 3.6.1.1 | Shape Memory Polymer Filled with Carbon Particles .....                            | 99  |
| 3.6.1.2 | Shape Memory Polymer Filled with Hybrid Fibers .....                               | 101 |
| 3.6.2   | Solution-Driven Shape Memory Polymers.....   | 103 |
| 3.6.3   | Light-Induced Shape Memory Polymers.....   | 108 |
| 3.6.4   | Magnetism-Induced Shape Memory Polymers .....                                      | 111 |
| 3.6.5   | Sensing Functions of Shape Memory Polymers .....                                   | 111 |
| 3.6.6   | Shape Memory Polymer Nanocomposites Incorporated with Carbon Nanofiber Paper ..... | 114 |
| 3.7     | Typical Applications of Shape Memory Polymers and Their Composites.....            | 120 |
| 3.7.1   | Deployable Structures .....  | 120 |
| 3.7.2   | Morphing Structures.....   | 121 |
| 3.7.3   | Shape Memory Polymer Textiles and Applications.....                                | 124 |
| 3.8     | Future of Shape Memory Polymers and Electroactive Polymers .....                   | 125 |
| 3.8.1   | Novel and Multifunctional Shape Memory Polymers.....                               | 126 |
| 3.8.2   | Perspectives of Electroactive Polymers.....  | 126 |
|         | References.....  | 126 |

## CONTENTS

|       |   |     |
|-------|---|-----|
| 4.1   | Introduction.....   | 135 |
| 4.2   | Magnetic Polymer Nanocomposite Fabrication and Processing ..... | 138 |
| 4.2.1 | Solution-Based Oxidation Method.....                            | 138 |
| 4.2.2 | Electropolymerization Method.....                               | 139 |
| 4.2.3 | Two-Step Deposition Method .....                                | 140 |
| 4.2.4 | UV-Irradiation Technique.....                                   | 141 |
| 4.2.5 | Electrospinning Method.....                                     | 141 |
| 4.3   | Physicochemical Property Analysis.....                          | 142 |
| 4.3.1 | FT-IR for Functional Groups .....                               | 142 |
| 4.3.2 | Scanning Electron Microscopy (SEM) for Surface Morphology ..... | 143 |
| 4.3.3 | Thermal Property Analysis by TGA/DSC.....                       | 145 |
| 4.3.4 | Magnetic Property Analysis .....                                | 147 |
| 4.3.5 | Mechanical Property Analysis by Rheology .....                  | 149 |
| 4.4   | Applications of Magnetic Polymer Nanocomposites .....           | 152 |
| 4.5   | Summary.....  | 155 |
|       | References.....   | 155 |

## CONTENTS

|         |   |     |
|---------|---|-----|
| 5.1     | Introduction.....   | 160 |
| 5.2     | Molecular Structural Mechanics Model of Nanotubes.....                  | 162 |
| 5.2.1   | Structural Characteristics of Carbon Nanotubes.....                     | 163 |
| 5.2.2   | Molecular Mechanics of Carbon Nanotubes .....                           | 165 |
| 5.2.3   | Structural Mechanic for Space Frame.....                                | 167 |
| 5.2.4   | Molecular Structural Mechanics .....                                    | 169 |
| 5.2.5   | Static Properties of Carbon Nanotubes .....                             | 172 |
| 5.2.5.1 | Young's Modulus of Carbon Nanotubes .....                               | 173 |
| 5.2.5.2 | Shear Modulus of Carbon Nanotubes .....                                 | 174 |
| 5.2.5.3 | Transverse Elastic Modulus of Carbon Nanotubes....                      | 176 |
| 5.2.6   | Dynamic Properties of Carbon Nanotubes .....                            | 178 |
| 5.2.7   | Thermal Properties of Carbon Nanotubes.....                             | 182 |
| 5.2.7.1 | Specific Heat.....  | 183 |
| 5.2.7.2 | Thermal Expansion.....  | 192 |
| 5.3.    | Electromechanical Behaviors of Carbon Nanotubes.....                    | 197 |
| 5.3.1   | Charge Distribution On Carbon Nanotubes .....                           | 197 |
| 5.3.2   | Electromechanical Actuation of Carbon Nanotubes.....                    | 203 |
| 5.3.3   | Charge-Induced Failure of Carbon Nanotubes.....                         | 205 |
| 5.4     | Constitutive Modeling of Carbon Nanotube-Based Composites .....         | 211 |
| 5.4.1   | Micromechanics of Nanotube-Based Composites .....                       | 212 |
| 5.4.1.1 | Nanotube Load Transfer Mechanism: Effective<br>Fiber Properties .....   | 212 |
| 5.4.1.2 | Structure–Property Relationship.....                                    | 214 |
| 5.4.1.3 | Nanotube Structure Influence: Volume Fraction<br>and Density.....       | 215 |
| 5.4.1.4 | Calculation of Nanocomposite Elastic Modulus .....                      | 216 |
| 5.4.2   | Model Nanocomposite System .....  | 218 |
| 5.4.2.1 | Structural Characterization of Model<br>Nanotube-Based Composites ..... | 218 |
| 5.4.2.2 | Modeling of Model Nanocomposite Properties .....                        | 223 |

|         |   |     |
|---------|---|-----|
| 5.5     | Multiscale Modeling of Carbon-Nanotube-Reinforced Composites..... | 225 |
| 5.5.1   | Modeling of Nanotube and Matrix .....                             | 228 |
| 5.5.2   | Modeling of Nanotube–Polymer Interface.....                       | 228 |
| 5.5.3   | Effective Modulus of Nanotube–Polymer Composites .....            | 230 |
| 5.5.4   | Stress Distributions in Nanotube–Polymer Composites .....         | 231 |
| 5.6     | Nanotube-Based Conductive Composites.....                         | 234 |
| 5.6.1   | Percolation Threshold .....                                       | 235 |
| 5.6.2   | Backbone of Percolating Network .....                             | 240 |
| 5.6.3   | Contact Resistance .....  | 245 |
| 5.6.4   | Electrical Conductivity of Nanotube-Based Composites.....         | 250 |
| 5.6.4.1 | Effect of Nanotube Content .....                                  | 250 |
| 5.6.4.2 | Effect of Nanotube Waviness .....                                 | 252 |
| 5.6.4.3 | Effect of Nanotube Alignment.....                                 | 254 |
| 5.7     | Defect Sensing Using Nanotube Networks.....                       | 258 |
| 5.7.1   | Processing of Nanotube–Fiber Composites.....                      | 259 |
| 5.7.2   | Piezoresistive Properties of Nanocomposites.....                  | 261 |
| 5.7.3   | Structure/Deformation Response to Specific Failure Modes .....    | 262 |
| 5.7.3.1 | In Situ Sensing of Delamination .....                             | 262 |
| 5.7.3.2 | In Situ Sensing of Transverse Microcracking .....                 | 263 |
| 5.7.3.3 | Damage Accumulation in Flexure.....                               | 264 |
| 5.7.4   | Sensing of Damage in Joint .....                                  | 266 |
| 5.7.5   | Damage Sensing Simulation of Nano/Micro Hybrid Composites.....    | 270 |
| 5.7.5.1 | Percolation of Nanotube Network .....                             | 271 |
| 5.7.5.2 | Electrical Resistance of Percolating Nanotube Network .....       | 271 |
| 5.7.5.3 | Damage Evolution in Composites .....                              | 272 |
| 5.7.5.4 | Damage Sensing by Electrical Resistance Method .....              | 274 |
| 5.8     | Concluding Remarks .....  | 277 |
|         | References.....   | 277 |

## CONTENTS

|       |   |     |
|-------|---|-----|
| 6.1   | Development of Biomaterials.....                                  | 283 |
| 6.2   | Biodegradable Polymers .....                                      | 288 |
| 6.2.1 | PGA, PLA, and Their Copolymers .....                              | 289 |
| 6.2.2 | Other Biodegradable Polymers (PCL, PHB, and PPF) .....            | 292 |
| 6.3   | Natural Fiber Reinforcements.....                                 | 294 |
| 6.4   | Biocomposites for Biomedical and Bioengineering Applications..... | 299 |
| 6.4.1 | Plant-Based Natural Fiber Biocomposites .....                     | 300 |
| 6.4.2 | Animal-Based Natural Fiber Biocomposites.....                     | 301 |
| 6.5   | Summary.....  | 303 |
|       | Acknowledgment.....   | 304 |
|       | References.....   | 304 |

## CONTENTS

|                    |  |     |
|--------------------|--|-----|
| 7.1                | Introduction .....   | 309 |
| 7.2                | Laboratory Fire Testing .....  | 311 |
| 7.2.1              | Limited Oxygen Index (LOI).....  | 311 |
| 7.2.2              | UL 94 V.....   | 311 |
| 7.2.3              | Cone Calorimeter Test.....   | 312 |
| 7.2.4              | Microscale Combustion Calorimetry (MCC).....                                 | 312 |
| 7.3                | FR Polymer Nanocomposites .....  | 312 |
| 7.3.1              | Layered Silicates.....   | 312 |
| 7.3.2              | Polyhedral Oligomeric Silsequioxanes .....                                   | 313 |
| 7.3.3 <sup>c</sup> | Carbon Nanotubes.....  | 314 |
| 7.4                | FR Carbon Nanopaper and Nanocomposites .....                                 | 315 |
| 7.4.1              | Morphologies of Nanopapers and Nanocomposites .....                          | 316 |
| 7.4.2              | Thermal Stability of Nanopapers and Nanocomposites .....                     | 321 |
| 7.4.3              | Real-Time FTIR of Nanopapers and Nanocomposites .....                        | 326 |
| 7.4.4              | Cone Calorimeter Test of Composite Laminates Coated<br>with Nanopapers ..... | 329 |
| 7.4.5              | Morphologies of Char Materials after Cone Calorimeter<br>Tests.....          | 331 |
| 7.5                | Conclusions .....  | 333 |
|                    | References.....  | 333 |

## CONTENTS

|         |  |     |
|---------|--|-----|
| 8.1     | Introduction.....  | 338 |
| 8.2     | Background: In-Flight Environments and Damage Modes—<br>Challenges and Opportunities in Aeronautical Engineering ..... | 340 |
| 8.2.1   | Interaction between Lightning and Aircraft .....   | 341 |
| 8.2.1.1 | Damage Mechanism.....  | 342 |
| 8.2.1.2 | Protection Methodology .....   | 343 |
| 8.2.2   | Rain, Sand, and Ice Particle Erosion.....  | 345 |
| 8.2.2.1 | Classification of Erosion Behavior.....  | 345 |
| 8.2.2.2 | Sand Abrasion Mechanism.....   | 347 |
| 8.2.2.3 | Rain Erosion Mechanism.....  | 348 |
| 8.2.2.4 | Protection Methodology .....   | 349 |
| 8.2.2.5 | Erosion-Testing Methods .....  | 350 |
| 8.2.3   | Ice Accretion .....  | 352 |
| 8.2.3.1 | Types of Ice.....  | 352 |
| 8.2.3.2 | Current Icing Solutions .....  | 352 |
| 8.2.4   | Environmental Corrosion.....   | 353 |
| 8.3     | Coating Material Systems.....  | 355 |
| 8.3.1   | Polyurethane Matrix .....  | 355 |
| 8.3.2   | Nanoscale Fillers.....   | 356 |
| 8.3.2.1 | Nanoclay.....  | 357 |
| 8.3.2.2 | Carbon Nanotubes.....  | 358 |
| 8.3.2.3 | Alumina and Silica .....   | 363 |
| 8.3.2.4 | Nanodiamond.....   | 365 |
| 8.3.3   | Techniques for the Production of PU Nanocomposite<br>Coatings.....   | 367 |
| 8.3.4   | The Need of a Roadmap .....  | 369 |
| 8.3.4.1 | Stage 1: Formulation of Coatings .....   | 370 |
| 8.3.4.2 | Stage-2: Routes to Application.....  | 370 |
| 8.3.4.3 | Stage-3: Evaluation of Coatings.....   | 370 |
| 8.3.4.4 | Stage 4: Demonstration Tests on Articles .....   | 371 |

|  |     |
|--|-----|
| 8.4 Recent Advances in Polymer Nanocomposite Coatings for Aerospace Composites ..... | 371 |
| 8.4.1 Lightning Strike Properties of Composite Structures .....                      | 371 |
| 8.4.2 Erosion-Resistance Coatings .....  | 373 |
| 8.4.3 Anti-Icing and De-Icing Coatings .....   | 375 |
| 8.4.4 Other Related Characteristic Properties .....                                  | 377 |
| 8.5 Concluding Remarks .....   | 378 |
| Acknowledgments .....  | 379 |
| References .....   | 379 |

## CONTENTS

|         |  |     |
|---------|--|-----|
| 9.1     | Introduction.....  | 390 |
| 9.2     | Surface Modification of CNTs.....                              | 391 |
| 9.2.1   | Chemical Modification.....                                     | 392 |
| 9.2.2   | Substitution Reactions.....                                    | 394 |
| 9.2.3   | Electrochemical Modification .....                             | 395 |
| 9.2.4   | Photochemical Modification .....                               | 398 |
| 9.2.5   | In Situ Polymerization.....                                    | 400 |
| 9.2.6   | Atom Transfer Radical Polymerization (ATRP) .....              | 405 |
| 9.2.7   | Grafting .....   | 405 |
| 9.2.7.1 | Preparation of MWNT-Graft-Poly TDI .....                       | 406 |
| 9.2.7.2 | Preparation of MWNT-Graft-PU .....                             | 406 |
| 9.2.7.3 | Preparation of MWNT-Graft-PU/Polyether Polyol Dispersion ..... | 406 |
| 9.2.7.4 | Preparation of MWNT-Graft-PU/PU Composites .....               | 406 |
| 9.2.8   | Oxygen Plasma Treatment.....                                   | 408 |
| 9.2.9   | Modifications with Water Soluble Polymers.....                 | 409 |
| 9.2.10  | Modification with Biomolecules .....                           | 411 |
| 9.2.11  | Modification with Engineering Polymers.....                    | 412 |
| 9.3     | Conclusions.....   | 412 |
|         | References.....  | 413 |

## CONTENTS

|  |     |
|--|-----|
| 10.1 Introduction .....                                | 423 |
| 10.2 Oceanic Environmental Effects on Composites ..... | 424 |
| 10.3 Marine Nanocomposite Sandwich Structures .....    | 425 |
| 10.4 Oceanic-Applied Nanomembrane.....                 | 427 |
| 10.5 Marine Nanocomposite Coating.....                 | 431 |
| References.....  | 434 |
