ANIMAL BEHAVIOR

CONTENTS

PREFACE.....	xi
CHAPTER 1 Of Cockroaches and Wolves: Framing Animal Behavior.....	1
1.1 Introduction: Animal Behavior.....	2
1.2 Wolves: Lessons in Social Behavior.....	4
1.3 Cockroaches: Models for Animal Behavior.....	7
1.4 The Four Questions Revisited.....	9
1.5 Evolution: A Review.....	11
1.6 The Study of Animal Behavior: Where Did It Come From?.....	17
1.7 <i>Umwelt</i> : The World in Which Animals Behave.....	22
Summary.....	22
Study Questions.....	23
CHAPTER 2 Neurobiology and Endocrinology for Animal Behaviorists.....	25
2.1 Neurobiology, Endocrinology, and Sensory Systems: An Overview.....	26
2.2 What Does an Animal Behaviorist Need to Know about Neurobiology?.....	27
2.3 What Does an Animal Behaviorist Need to Know about Endocrinology?.....	38
2.4 What Does an Animal Behaviorist Need to Know about Sensory Systems?.....	50
Summary.....	63
Study Questions.....	64
CHAPTER 3 Behavioral Genetics.....	67
3.1 Introduction: Principles of Behavioral Genetics and the Evolution of Behavior.....	68
3.2 The Nature versus Nurture Debate.....	71
3.3 Evolution and Behavior.....	74
3.4 The Behavioral Genetics Toolbox.....	74
Summary.....	95
Study Questions.....	96
CHAPTER 4 Homeostasis and Time Budgets.....	99
4.1 Introduction.....	100
4.2 Behavior and Homeostasis.....	102
4.3 Biological Clocks and Circadian Rhythms.....	109
4.4 Modern Concepts of Homeostatic Regulation.....	112
4.5 Time Budgets and Trade-Offs: Balancing Demands in How Animals Budget Their Time.....	118
Summary.....	122
Study Questions.....	122
CHAPTER 5 Learning.....	125
5.1 Introduction.....	126
5.2 Learning and Memory.....	127
5.3 Basic Models for Learning.....	131
5.4 Social Learning: Traditions and “Cultural” Transmission of Information in Animals.....	140
5.5 Play, Learning, and Development.....	143
Summary.....	146
Study Questions.....	147

Contents

CHAPTER 6	Cognition	151
6.1	Introduction: What Is Cognition?.....	152
6.2	The Concept of Self.....	159
6.3	Thought, Foresight, and Problem Solving	163
6.4	Intelligence and Social Cognition.....	170
6.5	Personality and Behavioral Syndromes.....	172
6.6	The Frontal Lobe and Impulse Control.....	174
6.7	Animal Emotions	175
6.8	Are Cognitive Abilities Under- or Over-Attributed to Animals?	177
	Summary.....	179
	Study Questions	179
CHAPTER 7	Communication	183
7.1	Introduction: Communication Theory.....	184
7.2	The Evolution of Communication	187
7.3	Modes of Communication	189
7.4	Multimodal Signaling and Encoding Complex Messages	205
7.5	Runaway Sexual Selection and Signaling.....	208
7.6	Deceit versus Honest Signaling.....	208
7.7	Game Theory and Communication	210
7.8	Interspecific Signaling.....	213
	Summary.....	214
	Study Questions	214
CHAPTER 8	Movement: Search, Navigation, Migration, and Dispersal	219
8.1	Introduction	220
8.2	Sources of Navigational Information	224
8.3	Sensing the Environment in Time and Space	226
8.4	How to Respond to Sensory Information: A Toolbox for Finding the Way	229
8.5	Search	235
8.6	Homing	236
8.7	Migration.....	238
8.8	Dispersal.....	246
	Summary.....	248
	Study Questions	249
CHAPTER 9	Foraging.....	253
9.1	Introduction	254
9.2	Diet Choice and Food Selection.....	255
9.3	How Animals Get Food.....	257
9.4	Willing Food	264
9.5	Manipulation of Prey.....	265
9.6	Parasitic Life Cycles	266
9.7	Foraging and Optimality Theory.....	268
9.8	Optimal Patch Choice	270
9.9	Optimal Prey Choice	274
9.10	Nutritional Constraints.....	275
	Summary.....	276
	Study Questions	277
CHAPTER 10	Self-Defense	281
10.1	Introduction	282
10.2	Cryptic Behavior: Camouflage.....	283
10.3	Vigilance and Alarm.....	289
10.4	Mimicry and Diversion	291
10.5	Evasion	295

10.6	Predator Deterrence and Fighting Back	296
10.7	Pathogen Avoidance/Deterrence and Sickness Behavior	299
	Summary.....	302
	Study Questions	302
CHAPTER 11	Mating Systems	307
11.1	Introduction	308
11.2	The Evolution of Sex: Why Some Animals Are Called Male and Others Female	309
11.3	Sexual Selection	314
11.4	Variance in Mating Success	318
11.5	Mate Choice	319
11.6	Mating Systems: How Many Males, How Many Females?.....	320
11.7	Hormones and Sexual Behavior.....	327
11.8	Hormones, Territoriality, and Aggression	329
11.9	Sperm Competition	329
11.10	Good Genes Models for Choosing a Mate	331
11.11	Forced Copulations	334
	Summary.....	335
	Study Questions	335
CHAPTER 12	Nesting, Parenting, and Territoriality	341
12.1	Introduction	342
12.2	Nests and Nesting	343
12.3	Parental Investment	347
12.4	Patterns of Parental Care.....	349
12.5	Hormones and Parental Behavior.....	353
12.6	Parenting and Conflicts of Interest.....	354
12.7	Begging and Weaning Conflict	355
12.8	Sibling Conflict	356
12.9	Infanticide	358
12.10	Aggression and Territoriality	359
	Summary.....	362
	Study Questions	363
CHAPTER 13	Social Behavior, Cooperation, and Kinship	367
13.1	Introduction	368
13.2	Altruism or Selfish Interests?.....	370
13.3	Schools, Flocks, Hordes, and Herds.....	371
13.4	Explaining Cooperation	378
13.5	Extreme Cooperation: Eusociality	384
13.6	Lack of Ecological Choice in Aid-Giving Decisions.....	388
13.7	Social Recognition, Kin Recognition, and Cooperation with Close Relatives	388
13.8	Social Symbioses.....	391
	Summary.....	394
	Study Questions	394
CHAPTER 14	Comparative Social Behavior	399
14.1	Introduction	400
14.2	Vertebrate Social Systems	401
14.3	Invertebrate Eusociality: Workers and the Division of Labor	408
14.4	Invertebrate Eusociality: Queens and Reproduction.....	414
14.5	Invertebrate Eusociality: Colony Defense.....	417
14.6	Eusocial Invertebrates	419
	Summary.....	428
	Study Questions	429

Contents

CHAPTER 15	Conservation and Behavior.....	433
15.1	Introduction: Conservation and the Future of Animal Behavior.....	434
15.2	Species Protection in Natural Habitats.....	436
15.3	Extinctions and Behavior.....	441
15.4	Reserve Design	445
15.5	Captive Breeding Programs and Reintroductions.....	452
15.6	The Human–Wildlife Interface in the Suburbs	459
	Summary: The Future and Conservation Behavior	463
	Study Questions	464
INDEX.....		469
