Mastering Autodesk® 3ds Max® Design 2011

Contents

<i>Introduction</i>	<i>xix</i>
Chapter 1 • Getting to Know 3ds Max Design 2011	1
Introducing the New 3ds Max Design 2011 Features.	1
What Was New in 3ds Max Design 2010	5
Getting Started with 3ds Max	7
Touring the Interface	8
The Menu Bar	8
The Quick Access Toolbar	10
The Information Center Toolbar	10
The Main Toolbar	11
Docked and Floating Toolbars	12
Toolbar Flyouts	16
The Viewports	16
Tools for Working with the Viewports	17
Getting to Know the Command Panel	20
Understanding 3ds Max's Tools	21
Working with Objects	27
Selecting and Moving Objects	27
Rotating and Scaling Objects	30
Copying an Object	34
Selecting Multiple Objects	36
Naming Selection Sets	41
Editing Named Selection Sets	42
Getting the View You Want	44
Understanding the Perspective Viewing Tools	44
Using Multiple Viewports	51
Changing the Viewport Display and Configuration	53
Working with the Custom UI and Defaults Switcher	59
3ds Max Design 2011 Quick-Start	62
The Bottom Line	64
Chapter 2 • Introducing 3ds Max Objects	65
Understanding Standard Primitives	65
Adjusting an Object's Parameters	67
Accessing Parameters	73
Introducing the Standard Primitive Objects	74
Modeling Standard Primitives with Modifiers	78
Adding a Modifier	78
Accessing Modifier Parameters	81

Placing Modifiers Where You Want Them	84
Using the Modifier Stack Tools	86
How 3ds Max Sees Objects	88
Making Clones That Share Properties	89
Creating an Instance Clone	89
Creating a Reference Clone	91
Scaling and Rotating Objects with Transform Tools	93
Making a Clone Unique	97
Cloning a Modifier	98
Introducing Extended Primitives	100
Modeling a Couch	101
Working with Groups	108
Grouping the Components of the Couch	108
Working within Groups	110
Disassembling Groups	112
The Bottom Line	113
Chapter 3 • Creating Shapes with Splines	115
Drawing with Splines	116
Drawing Straight-Line Segments	117
Constraining Lines Vertically and Horizontally	119
Drawing Curves	119
Lathing a Spline	121
Modifying a Shape Using Sub-object Levels	123
Adjusting the Lathe Axis	124
Flipping Surface Normals	126
Smoothing Spline Corners	127
Adjusting Tangent Handles	131
Creating Thickness with a Spline	133
Detailing the Wineglass Base	136
Finishing the Wineglass	142
Outlining and Extruding Splines	143
Drawing Accurate Splines	143
Giving Walls Thickness	146
Using Grids and Snaps to Align Objects Accurately	147
Adjusting a Wall Location	153
Combining and Extruding Primitive Splines	156
Combining Splines	157
Joining Closed Splines with Boolean Tools	161
Creating a Solid Form with Splines	164
Introducing the Other Spline Types	167
Editing Splines	170
Placing and Beveling Text	172
The Bottom Line	176

Chapter 4 • Editing Meshes and Creating Complex Objects.....	177
Creating Openings in a Wall with Boolean Operations	177
Hiding Shapes That Get in the Way	178
Creating the Shape of the Opening	180
Subtracting the Opening from the Wall	181
Creating Multiple Openings in a Single Wall	184
Making Changes to the Opening.....	184
Tracing a Sketch	186
Using a Bitmap Image	187
Scaling the Image Plane to the Model's Size	191
Tracing the Image	193
Building Objects from Traced Lines	196
Editing Meshes.....	204
Creating a Tapered Wall	205
Converting the Spline to a Mesh	208
Moving a Single Mesh Vertex.....	211
Tapering the Top of the Wall.....	216
Using Instanced Clones to Create Symmetrical Forms	220
Adding a User Grid to Aid Tracing	220
Building the Tower Walls	221
Adding the Vaulted Ceiling	224
Creating the Smaller Towers.....	231
Drawing the Remaining Walls.....	234
Attaching Objects to a Mesh.....	238
Smoothing Meshes.....	240
Smoothing within a Mesh.....	240
The Smooth Modifier.....	243
Creating and Modifying Objects Using Box Modeling.....	244
Preparing a Box for Box Modeling.....	244
Using the Transform Toolbox	251
Creating Clones with Array and Snapshot	254
Creating a Pew Grid with Array	254
Creating a Multitransform Polar Array.....	257
Creating Multiple Clones Using Snapshot	259
The Bottom Line.....	261
 Chapter 5 • Working with External Design Data	 263
Creating Topography with Splines	263
Updating Changes from an AutoCAD File	268
Exploring Terrain Options	269
Setting Up an AutoCAD Plan for 3ds Max	272
Importing AutoCAD Plans into 3ds Max Design.....	277
Extruding the Walls	279
Extruding Exterior Wall Headers.....	280
Extruding the Mullions.....	281
Creating Interior Wall Headers	282

Adding Glass.....	284
Creating a Floor with Openings.....	286
Exploring the File Link Manager.....	291
Editing Linked AutoCAD Files.....	293
Understanding the Block Node Hierarchy.....	294
Understanding the File Link Manager Options.....	296
Understanding File Link Settings.....	298
Using the Substitute Modifier with Linked Geometry.....	304
Importing a Truss.....	306
Importing Revit Files into 3ds Max.....	308
Export the Revit File.....	309
Link the Exported FBX File in 3ds Max.....	310
Using the Scene Explorer.....	312
The Bottom Line.....	315
Chapter 6 • Creating AEC Objects.....	317
Creating a Parametric Wall.....	317
Creating and Adjusting a Parametric Wall.....	318
Adjusting the Wall's Parameters.....	319
Adding Doors and Windows to Walls.....	320
Changing the Door's Parameters.....	322
Adding Doors to Existing Openings.....	323
Creating a Parametric Window.....	326
Changing Elevations with Stairs.....	328
Setting Boundaries with Railings.....	331
Adding Foliage to a Scene.....	335
The Bottom Line.....	337
Chapter 7 • Organizing and Editing Objects.....	339
Naming Objects.....	339
Renaming the Ceiling Fixtures.....	344
Organizing Objects by Layers.....	345
Setting Up Layers.....	346
Assigning Objects to Layers.....	347
Assigning Color to Layers.....	350
Understanding the Icons in the Layer Dialog Box.....	354
Lofting an Object.....	355
Setting Up the Shapes to Form the Pedestal.....	355
Lofting a Shape Along a Path.....	358
Using Different Shapes Along the Loft Path.....	359
Fine-Tuning a Loft Object.....	362
Using the Instance Clones to Edit the Loft.....	367
Using the Noise Modifier.....	370
Modeling with Soft Selection.....	371
Extruding with the Sweep Modifier.....	376
Aligning Objects.....	379
The Bottom Line.....	382

Chapter 8 • Light and Shadow	385
Lighting Your Model	385
Understanding the Types of Lights	385
Adding a Spotlight to Simulate the Sun	391
Moving a Light	393
Editing a Spotlight	395
Changing the Light Type	397
Rendering a View	398
Ambient Light	401
Faking Radiosity	403
Adding a Highlight with an Omni Light	407
Looking at Omni Light Options	410
Adding Shadow Effects	414
Softening Shadow Edges	415
Understanding Shadow Maps	416
Using Ray-Traced Shadows	420
Using Advanced Ray Traced and Area Shadows	422
Playing in the Shadows	424
Using Two Suns	424
Adding a Second Sun	426
Using Unseen Objects to Cast Shadows	429
Using a Clone to Cast Shadows	431
Using the Light Lister	433
Using Scene States	435
The Bottom Line	438
 Chapter 9 • Enhancing Models with Materials	 439
Understanding Bitmap Texture Maps	439
Diffuse Color Maps	440
Surface Properties	444
The Physical Qualities Rollout	445
The Special Effects Rollout	447
Adding Materials to Objects	448
Adding a Map Path to Help 3ds Max Find Bitmaps	448
Understanding Material Libraries	454
Editing Materials	455
Using Bump Maps	456
Creating a New Material	459
Adding Material Mapping Coordinates	460
Understanding Mapping Coordinates	465
What Happens When You Add the Mapping Coordinates	465
Adjusting the UVW Mapping Gizmo	466
Using the Standard Material	473
Map Scalar Modifiers	475
Spline Mapping	477

Adding Entourage	481
Hiding Unwanted Surfaces with Opacity Maps	481
Adjusting an Object to a Bitmap Shape	489
Assigning Materials to Parts of an Object	490
Creating a Multi/Sub-Object Material	490
Applying a Submaterial to an Object's Surface	493
Exploring the Autodesk Materials	495
Adjust the Autodesk Material Parameters	497
Using the Material Explorer	498
The Material Utilities	500
Modeling with Displacement Maps	502
Using the Displace Modifier	503
Using the Material Editor to Create Displaced Geometry	506
Converting a Displacement Map into an Editable Mesh	510
Creating an Editable Mesh from a Displacement Map	511
Additional Mapping and Material Features	513
The Bottom Line	519
 Chapter 10 • Using the 3ds Max Camera	521
Understanding the 3ds Max Camera	521
Adding a Camera	522
3ds Max Viewport Improvements	526
Editing the Camera Location with the Viewport Tools	527
Setting Up an Interior View	532
Creating an Environment	534
Making Adjustments to the Background	536
Immersive Environments for Animation	542
Creating a Believable Background	542
Using a Texture Map and Hemisphere for the Sky	544
Using Render Types	548
Render Elements for Compositing	550
Matching Your Scene to a Background Image	552
Setting Up the Model and the Image	553
Adding the Background Image	554
Adding the Camera Match Points	556
Aligning the Camera Match Points to the Background Image	557
Fine-Tuning a Camera-Matched View	560
Matching the Design Image Quality to the Background	560
Standard Cinematic Terminology	561
The Bottom Line	562
 Chapter 11 • Organizing Objects and Scene Management	565
Gaining Access to Materials and Objects from Other Files	565
Arranging Furniture with XRefs and the Asset Browser	573
Replacing Objects with Objects from an External File	575
Substituting Objects for Faster Viewport Performance	577
Importing Files with the Asset Browser	579

Arranging Furniture with XRef Scenes	582
Using the Rendered Frame Window.....	587
Printing Images.....	588
Opening Multiple RFWs for Comparisons.....	588
Zooming, Panning, and Controlling Channels in the RFW	589
Obtaining Colors from External Bitmap Files	591
Using the Asset Browser on the Internet	592
Tracking and Locating a Scene's Assets	594
Creating Panoramas	596
Publishing a DWF File.....	601
The Bottom Line.....	603

Chapter 12 • Understanding Animation605

Understanding the World of Video Time.....	605
Creating a Quick-Study Animation	607
Adding Camera Motion.....	608
Adjusting the Camera Path.....	609
Viewing the Camera Trajectory	611
Controlling the Camera Trajectory Visibility.....	613
Creating a Preview Animation.....	613
Understanding Keyframes	615
Increasing the Number of Frames in an Animation Segment	618
Accelerating and Decelerating the Camera Motion Smoothly	619
Editing Keyframes	622
Adding More Frames for Additional Camera Motion.....	624
Adding Frames to the End of a Segment	624
Adjusting the Camera Motion Through a Keyframe	626
Compressing and Expanding Time.....	631
Adjusting the Camera Trajectory Using the Track View	636
Increasing the Number of Frames Between Selected Keys	641
Speeding Up the Preview Rendering Time	642
Adding Frames to the Beginning of a Segment	642
Other Options for Previewing Your Motion	644
Moving the Camera Target over Time	646
Controlling Lights over Time.....	647
The Bottom Line.....	650

Chapter 13 • Creating Animations.....651

Rendering the Animation.....	651
Creating a Study Animation.....	652
Creating a Quick Overall Study Animation.....	654
Adding a Moving Car	655
Automating Output of Multiple Still Images.....	659
Setting Up a Camera for Elevations.....	659
Setting Up the Four Elevations.....	661

Rendering a Shadow Study	665
Adjusting for True North.	665
Changing from IES Sun to a Standard Light	666
Creating a Walkthrough	667
Fine-Tuning the Camera's Orientation	669
Adjusting the Camera's Timing	671
Adjusting the Path	672
The Animation File Output Options.	673
True Color vs. 256 Colors.	676
File Naming in Animations	677
Choosing an Image Size.	677
The AVI Codecs.	678
Using reactor to Animate Objects	679
Assigning Properties to Simulation Objects.	679
Assigning Simulation Objects to a Collection	680
Setting Up and Running the Simulation.	681
Refining the Settings	683
Using Particle Systems	684
Creating the Initial Flow	685
Adding and Editing the Operators	687
Adding Materials and Space Warps	689
Adding Deflectors.	691
The Bottom Line.	694
Chapter 14 • Advanced Rendering Using mental ray	695
Understanding mental ray	695
Setting Up mental ray	698
The Material Editor and mental ray.	701
Using Photon Maps	705
Testing the Photon Map Effects	707
Final Gathering.	722
Reviewing the Basic mental ray Workflow.	725
Contour Renderings.	726
Using the mr MultiMap Material	730
Skylight Global Illumination	733
Image-Based Lighting and Skylight	736
Using High Dynamic Range Images.	739
Using mr Proxy Objects	741
Using IES Files	744
Using Lighting Analysis.	745
The Bottom Line.	752
Chapter 15 • Finishing It Off: Atmosphere, Effects, and Compositing	753
Adding Atmospheric Effects	753
Creating a Volume Light	754
Adjusting the Volume Light Parameters.	757
Adding Fog	758
Adding a Fire Effect	762

Using Hair and Fur to Add Grass	767
Adjusting the Hair and Fur Parameters	768
Refining the Ground with the Hair and Fur Parameters	769
Using Glare	771
Assigning the Glare Output Shader	771
Using Depth of Field	774
Creating Stereoscopic Renders in 3ds Max	778
Using Autodesk Composite 2011	780
The Bottom Line	792

Appendices 793

Appendix A • The Bottom Line 795

Chapter 1: Getting to Know 3ds Max Design 2011	795
Chapter 2: Introducing 3ds Max Objects	797
Chapter 3: Creating Shapes with Splines	800
Chapter 4: Editing Meshes and Creating Complex Objects	802
Chapter 5: Working with External Design Data	806
Chapter 6: Creating AEC Objects	809
Chapter 7: Organizing and Editing Objects	812
Chapter 8: Light and Shadow	817
Chapter 9: Enhancing Models with Materials	819
Chapter 10: Using the 3ds Max Camera	823
Chapter 11: Organizing Objects and Scene Management	826
Chapter 12: Understanding Animation	828
Chapter 13: Creating Animations	832
Chapter 14: Advanced Rendering Using mental ray	837
Chapter 15: Finishing It Off: Atmosphere, Effects, and Compositing	841

Appendix B • Modifiers, Maps, and Materials 847

Modifiers	847
Selection Modifiers	847
World-Space Modifiers	848
Object-Space Modifiers	851
Materials and Maps	867
The mental ray Materials	868
mental ray Shader Map Types	870
Materials (Blue Spheres)	873
Maps (Green Parallelogram)	876

Appendix C • Inverse Kinematics and MAXScript 881

Assembling an Articulated Luminaire	881
Transforming Pivot Points	881
Aligning the Light Source with the Fixture	883
Using Schematic View	884
3ds Max Scripting with MAXScript	896
Understanding MAXScript	896

Appendix D • The Autodesk 3ds Max Design 2011 Certification Exams	901
3ds Max Design 2011 Exam Preparation Road Map	901
Assessment Tests.	902
ATC® Instructor-Led Courses	902
Recommended Experience Levels for 3ds Max Design 2011 Certification Exams . .	902
Certification Study Icon	902
Exam Objectives	902
<i>Index</i>	907
