Preface xv

## PART A FUNDAMENTALS 1

### 1 Overview 2

1.1	Introduction	2
1.2	Classification of Geologic Structures	4
1.3	Stress, Strain, and Deformation	6
1.4	Structural Analysis and Scales of Observation	8
1.5	Some Guidelines for Structural Interpretation	10
1.6	Closing Remarks	12
	Additional Reading	12

### 2 Primary and Nontectonic Structures 14

2.1	Introduction	14
2.2	Sedimentary Structures	14
2.2.1	The Use of Bedding in Structural Analysis	16
2.2.2	Graded Beds and Cross Beds	17
2.2.3	Surface Markings	19
2.2.4	Disrupted Bedding	19
2.2.5	Conformable and Unconformable Contacts	19
2.2.6	Compaction and Diagenetic Structures	23
2.2.7	Penecontemporaneous Structures	24
2.3	Salt Structures	26
2.3.1	Why Halokinesis Occurs	26
2.3.2	Geometry of Salt Structures and Associated Processes	27
2.3.3	Gravity-Driven Faulting and Folding	29
2.3.4	Practical Importance of Salt Structures	30
2.4	Igneous Structures	30
2.4.1	Structures Associated with Sheet Intrusions	31
2.4.2	Structures Associated with Plutons	32
2.4.3	Structures Associated with Extrusion	33
2.4.4	Cooling Fractures	35

2.5	Impact Structures	35
2.6	Closing Remarks	38
	Additional Reading	38

### 3 Force and Stress 40

3.1	Introduction	40
3.2	Units and Fundamental Quantities	42
3.3	Force	43
3.4	Stress	44
3.5	Two-Dimensional Stress: Normal Stress and Shear Stress	44
3.6	Three-Dimensional Stress: Principal Planes and Principal Stresses	45
3.6.1	Stress at a Point	46
3.6.2	The Components of Stress	46
3.6.3	Stress States	47
3.7	Deriving Some Stress Relationships	48
3.8	Mohr Diagram for Stress	49
3.8.1	Constructing the Mohr Diagram	50
3.8.2	Some Common Stress States	51
3.9	Mean Stress and Deviation Stress	52
3.10	The Stress Tensor	53
3.11	A Brief Summary of Stress	54
3.12	Stress Trajectories and Stress Fields	55
3.13	Methods of Stress Measurement	56
3.13.1	Present-Day Stress	56
3.13.2	Paleostress	57
3.13.3	Stress in Earth	57
3.14	Closing Remarks	60
	Additional Reading	60

### 4 Deformation and Strain 62

4.1	Introduction	62
4.2	Deformation and Strain	63
4.3	Homogenous Strain and the Strain Ellipsoid	65
4.4	Strain Path	66
4.5	Coaxial and Non-Coaxial Strain Accumulation	67

<b>4.6</b>	<b>Superimposed Strain</b>	<b>69</b>
<b>4.7</b>	<b>Strain Quantities</b>	<b>70</b>
4.7.1	Longitudinal Strain	70
4.7.2	Volumetric Strain	71
4.7.3	Angular Strain	71
4.7.4	Other Strain Quantities	71
<b>4.8</b>	<b>The Mohr Circle for Strain</b>	<b>73</b>
<b>4.9</b>	<b>Strain States</b>	<b>75</b>
<b>4.10</b>	<b>Representation of Strain</b>	<b>75</b>
4.10.1	Orientation	75
4.10.2	Shape and Intensity	76
<b>4.11</b>	<b>Finite Strain Measurement</b>	<b>78</b>
4.11.1	What Are We Really Measuring in Strain Analysis	79
4.11.2	Initially Spherical Objects	81
4.11.3	Initially Nonspherical Objects	82
4.11.3.1	Center-to-Center Method	83
4.11.3.2	$R_p/\Phi$ method	83
4.11.4	Objects with Known Angular Relationships or Lengths	84
4.11.4.1	Angular Changes	84
4.11.4.2	Length Changes	85
4.11.5	Rock Textures and Other Strain Gauges	86
4.11.6	What Do We Learn from Strain Analysis?	87
<b>4.12</b>	<b>Closing Remarks</b>	<b>89</b>
	<b>Additional Reading</b>	<b>89</b>
<b>5</b>	<b>Rheology</b>	<b>90</b>
<b>5.1</b>	<b>Introduction</b>	<b>90</b>
5.1.1	Strain Rate	91
<b>5.2</b>	<b>General Behavior: The Creep Curve</b>	<b>92</b>
<b>5.3</b>	<b>Rheologic Relationships</b>	<b>93</b>
5.3.1	Elastic Behavior	93
5.3.2	Viscous Behavior	96
5.3.3	Viscoelastic Behavior	97
5.3.4	Elastico-Viscous Behavior	97
5.3.5	General Linear Behavior	98
5.3.6	Nonlinear Behavior	98
<b>5.4</b>	<b>Adventures with Natural Rocks</b>	<b>100</b>
5.4.1	The Deformation Apparatus	101
5.4.2	Confining Pressure	102
5.4.3	Temperature	103
5.4.4	Strain Rate	104
5.4.5	Pore-Fluid Pressure	105
5.4.6	Work Hardening—Work Softening	106
5.4.7	Significance of Experiments to Natural Conditions	107
<b>5.5</b>	<b>Confused by the Terminology?</b>	<b>108</b>
<b>5.6</b>	<b>Closing Remarks</b>	<b>111</b>
	<b>Additional Reading</b>	<b>112</b>

## PART B BRITTLE STRUCTURES 113

<b>6</b>	<b>Brittle Deformation</b>	<b>114</b>
<b>6.1</b>	<b>Introduction</b>	<b>114</b>
<b>6.2</b>	<b>Vocabulary of Brittle Deformation</b>	<b>114</b>
<b>6.3</b>	<b>What Is Brittle Deformation?</b>	<b>117</b>
<b>6.4</b>	<b>Tensile Cracking</b>	<b>118</b>
6.4.1	Stress Concentration and Griffith Cracks	118
6.4.2	Exploring Tensile Crack Development	121
6.4.3	Modes of Crack-Surface Displacement	122
<b>6.5</b>	<b>Processes of Brittle Faulting</b>	<b>123</b>
6.5.1	Slip by Growth of Fault-Parallel Veins	123
6.5.2	Cataclasis and Cataclastic Flow	123
<b>6.6</b>	<b>Formation of Shear Fractures</b>	<b>124</b>
<b>6.7</b>	<b>Predicting Initiation of Brittle Deformation</b>	<b>126</b>
6.7.1	Tensile Cracking Criteria	126
6.7.2	Shear-Fracture Criteria and Failure Envelopes	127
<b>6.8</b>	<b>Frictional Sliding</b>	<b>132</b>
6.8.1	Frictional Sliding Criteria	132
6.8.2	Will New Fractures Form or Will Existing Fractures Slide?	133
<b>6.9</b>	<b>Effect of Environmental Factors in Failure</b>	<b>134</b>
6.9.1	Effect of Fluids on Tensile Crack Growth	134
6.9.2	Effect of Dimensions on Tensile Strength	136
6.9.3	Effect of Pore Pressure on Shear Failure and Frictional Sliding	136
6.9.4	Effect of Intermediate Principal Stress on Shear Rupture	136
<b>6.10</b>	<b>Closing Remarks</b>	<b>136</b>
	<b>Additional Reading</b>	<b>137</b>
<b>7</b>	<b>Joints and Veins</b>	<b>138</b>
<b>7.1</b>	<b>Introduction</b>	<b>138</b>
<b>7.2</b>	<b>Surface Morphology of Joints</b>	<b>140</b>
7.2.1	Plumose Structure	140
7.2.2	Why Does Plumose Structure Form?	141
7.2.3	Twist Hackle	144
<b>7.3</b>	<b>Joint Arrays</b>	<b>144</b>
7.3.1	Systematic versus Nonsystematic Joints	144
7.3.2	Joint Sets and Joint Systems	145
7.3.3	Cross-Cutting Relations Between Joints	146
7.3.4	Joint Spacing in Sedimentary Rocks	147
<b>7.4</b>	<b>Joint Studies in the Field</b>	<b>149</b>
7.4.1	Dealing with Field Data About Joints	150
<b>7.5</b>	<b>Origin and Interpretation of Joints</b>	<b>152</b>
7.5.1	Joints Related to Uplift and Unroofing	152
7.5.2	Formation of Sheeting Joints	153
7.5.3	Natural Hydraulic Fracturing	154

7.5.4	Joints Related to Regional Deformation	155
7.5.5	Orthogonal Joint Systems	156
7.5.6	Conjugate Joint Systems	157
7.5.7	Joint Trend as Paleostress Trajectory	158
<b>7.6</b>	<b>Limits on Joint Growth</b>	<b>158</b>
<b>7.7</b>	<b>Veins and Vein Arrays</b>	<b>159</b>
7.7.1	Formation of Vein Arrays	160
7.7.2	Vein Fill: Blocky and Fibrous Veins	160
7.7.3	Interpretation of Fibrous Veins	162
<b>7.8</b>	<b>Lineaments</b>	<b>163</b>
<b>7.9</b>	<b>Closing Remarks</b>	<b>163</b>
	<b>Additional Reading</b>	<b>165</b>
<b>8</b>	<b>Faults and Faulting</b>	<b>166</b>
<b>8.1</b>	<b>Introduction</b>	<b>166</b>
<b>8.2</b>	<b>Fault Geometry and Displacement</b>	<b>169</b>
8.2.1	Basic Vocabulary	169
8.2.2	Representation of Faults on Maps and Cross Sections	172
8.2.3	Fault Separation and Determination of Net Slip	174
8.2.4	Fault Bends	176
8.2.5	Fault Terminations and Fault Length	177
<b>8.3</b>	<b>Characteristics of Faults and Fault Zones</b>	<b>179</b>
8.3.1	Brittle Fault Rocks	179
8.3.2	Slickensides and Slip Lineations	182
8.3.3	Subsidiary Fault and Fracture Geometries	184
8.3.4	Fault-Related Folding	184
8.3.5	Shear-Sense Indicators of Brittle Faults—A Summary	187
<b>8.4</b>	<b>Recognizing and Interpreting Faults</b>	<b>187</b>
8.4.1	Recognition of Faults from Subsurface Data	189
8.4.2	Changes in Fault Character with Depth	190
<b>8.5</b>	<b>Relation of Faulting to Stress</b>	<b>191</b>
8.5.1	Formation of Listric Faults	192
8.5.2	Fluids and Faulting	192
8.5.3	Stress and Faulting—A Continuing Debate	193
<b>8.6</b>	<b>Fault Systems</b>	<b>195</b>
8.6.1	Geometric Classification of Fault Arrays	195
8.6.2	Normal Fault systems	196
8.6.3	Reverse Fault Systems	196
8.6.4	Strike-Slip Fault Systems	197
8.6.5	Inversion of Fault Systems	197
8.6.6	Fault Systems and Paleostress	197
<b>8.7</b>	<b>Faulting and Society</b>	<b>198</b>
8.7.1	Faulting and Resources	199
8.7.2	Faulting and Earthquakes	199
<b>8.8</b>	<b>Closing Remarks</b>	<b>201</b>
	<b>Additional Reading</b>	<b>201</b>

## PART C DUCTILE STRUCTURES 203

<b>9</b>	<b>Ductile Deformation Processes</b>	<b>204</b>
<b>9.1</b>	<b>Introduction</b>	<b>204</b>
<b>9.2</b>	<b>Cataclastic Flow</b>	<b>206</b>
<b>9.3</b>	<b>Crystal Defects</b>	<b>207</b>
9.3.1	Point Defects	207
9.3.2	Line Defects or Dislocations	207
<b>9.4</b>	<b>Crystal Plasticity</b>	<b>210</b>
9.4.1	Dislocation Glide	210
9.4.2	Cross-Slip and Climb	210
9.4.3	Mechanical Twinning	213
9.4.4	Strain-Producing versus Rate-Controlling Mechanisms	216
9.4.5	Where Do Dislocations Come From?	216
<b>9.5</b>	<b>Diffusional Mass Transfer</b>	<b>217</b>
9.5.1	Volume Diffusion and Grain-Boundary Diffusion	218
9.5.2	Pressure Solution	218
<b>9.6</b>	<b>Constitutive Equations or Flow Laws</b>	<b>219</b>
<b>9.7</b>	<b>A Microstructural View of Laboratory Behavior</b>	<b>220</b>
<b>9.8</b>	<b>Imaging Dislocations</b>	<b>221</b>
<b>9.9</b>	<b>Deformation Microstructures</b>	<b>222</b>
9.9.1	Recovery	222
9.9.2	Recrystallization	225
9.9.3	Mechanisms of Recrystallization	226
9.9.4	Superplastic Creep	228
<b>9.10</b>	<b>Deformation Mechanism Maps</b>	<b>229</b>
9.10.1	How to Construct a Deformation Mechanism Map	232
9.10.2	A Note of Caution	233
<b>9.11</b>	<b>Closing Remarks</b>	<b>234</b>
	<b>Additional Reading</b>	<b>234</b>
	<b>Appendix: Dislocation Decoration</b>	<b>236</b>
<b>10</b>	<b>Folds and Folding</b>	<b>238</b>
<b>10.1</b>	<b>Introduction</b>	<b>238</b>
<b>10.2</b>	<b>Anatomy of a Folded Surface</b>	<b>239</b>
10.2.1	Fold Facing: Antiform, Synform, Anticline, and Syncline	241
<b>10.3</b>	<b>Fold Classification</b>	<b>243</b>
10.3.1	Fold Orientation	244
10.3.2	Fold Shape in Profile	245
<b>10.4</b>	<b>Fold Systems</b>	<b>246</b>
10.4.1	The Enveloping Surface	247
10.4.2	Folds Symmetry and Fold Vergence	248

<b>10.5</b>	<b>Some Special Fold Geometries</b>	<b>250</b>	<b>12.3</b>	<b>Shear-Sense Indicators</b>	<b>298</b>
<b>10.6</b>	<b>Superposed Folding</b>	<b>252</b>	12.3.1	Plane of Observation	298
10.6.1	The Principle of Fold Superposition	252	12.3.2	Grain-Tail Complexes	299
10.6.2	Fold Interference Patterns	254	12.3.3	Fractured Grains and Mica Fish	299
10.6.3	Fold Style	255	12.3.4	Foliations: C-S and C-C'	
10.6.4	A Few Philosophical Points	257		Structures	302
<b>10.7</b>	<b>The Mechanics of Folding</b>	<b>257</b>	12.3.5	A Summary of Shear-Sense Indicators	303
10.7.1	Passive Folding and Active Folding	257	<b>12.4</b>	<b>Strain in Shear Zones</b>	<b>304</b>
10.7.2	Buckle Folds	259	12.4.1	Rotated Grains	304
10.7.3	Folded Multilayers	262	12.4.2	Deflected Foliation	305
<b>10.8</b>	<b>Kinematic Models of Folding</b>	<b>262</b>	<b>12.5</b>	<b>Textures or Crystallographic-Preferred Fabrics</b>	<b>307</b>
10.8.1	Flexural Slip/Flow Folding	262	12.5.1	The Symmetry Principle	308
10.8.2	Neutral-Surface Folding	263	12.5.2	Textures as Shear-Sense Indicators	310
10.8.3	Shear Folding	264	<b>12.6</b>	<b>Fold Transposition</b>	<b>311</b>
10.8.4	Fold Shape Modification	265	12.6.1	Sheath Folds	313
10.8.5	A Natural Example	265	<b>12.7</b>	<b>Closing Remarks</b>	<b>313</b>
<b>10.9</b>	<b>A Possible Sequence of Events</b>	<b>266</b>		<b>Additional Reading</b>	<b>315</b>
<b>10.10</b>	<b>Closing Remarks</b>	<b>268</b>			
	<b>Additional Reading</b>	<b>269</b>			
<b>11</b>	<b>Fabrics: Foliation and Lineations</b>	<b>270</b>	<b>13</b>	<b>Deformation, Metamorphism, and Time</b>	<b>316</b>
<b>11.1</b>	<b>Introduction</b>	<b>270</b>	<b>13.1</b>	<b>Introduction</b>	<b>316</b>
<b>11.2</b>	<b>Fabric Terminology</b>	<b>270</b>	<b>13.2</b>	<b>Field Observations and Study Goals</b>	<b>316</b>
<b>11.3</b>	<b>Foliation</b>	<b>272</b>	<b>13.3</b>	<b>Pressure and Temperature</b>	<b>319</b>
11.3.1	What is Cleavage?	273	13.3.1	Status Report I	321
11.3.2	Disjunctive Cleavage	274	<b>13.4</b>	<b>Deformation and Metamorphism</b>	<b>322</b>
11.3.3	Pencil Cleavage	277	13.4.1	Status Report II	324
11.3.4	Slaty Cleavage	278	<b>13.5</b>	<b>Time</b>	<b>325</b>
11.3.5	Phyllitic Cleavage and Schistosity	278	13.5.1	The Isochron Equation	325
11.3.6	Crenulation Cleavage	280	13.5.2	The Isotopic Closure Temperature	327
11.3.7	Gneissic Layering and Migmatization	282	13.5.3	Dating Deformation	328
11.3.8	Mylonitic Foliation	284	13.5.4	Status Report III	329
<b>11.4</b>	<b>Cleavage and Strain</b>	<b>284</b>	<b>13.6</b>	<b>D-P-T-t Paths</b>	<b>329</b>
<b>11.5</b>	<b>Foliation in Folds and Fault Zones</b>	<b>285</b>	13.6.1	Temperature-Time (T-t) History	331
<b>11.6</b>	<b>Lineations</b>	<b>288</b>	13.6.2	Pressure-Temperature (P-T) History	331
11.6.1	Form Lineations	288	13.6.3	Pressure-Time (P-t) History	331
11.6.2	Surface Lineations	289	13.6.4	The Geothermal Gradient	331
11.6.3	Mineral Lineations	290	13.6.5	The Deformational Setting	333
11.6.4	Tectonic Interpretation of Lineations	290	<b>13.7</b>	<b>Closing Remarks</b>	<b>333</b>
<b>11.7</b>	<b>Other Physical Properties of Fabrics</b>	<b>292</b>		<b>Additional Reading</b>	<b>333</b>
<b>11.8</b>	<b>Closing Remarks</b>	<b>292</b>			
	<b>Additional Reading</b>	<b>293</b>			
<b>12</b>	<b>Ductile Shear Zones, Textures, and Transposition</b>	<b>294</b>	<b>PART D</b>	<b>TECTONICS</b>	<b>335</b>
<b>12.1</b>	<b>Introduction</b>	<b>294</b>	<b>14</b>	<b>Whole-Earth Structure and Plate Tectonics</b>	<b>336</b>
<b>12.2</b>	<b>Mylonites</b>	<b>296</b>	<b>14.1</b>	<b>Introduction</b>	<b>336</b>
12.2.1	Type Mylonites	297	<b>14.2</b>	<b>Studying Earth's Internal Layering</b>	<b>337</b>
			<b>14.3</b>	<b>Seismically Defined Layers of the Earth</b>	<b>337</b>

<b>14.4</b>	<b>The Crust</b>	<b>342</b>	<b>16.3</b>	<b>Cordilleran Metamorphic Core Complexes</b>	<b>390</b>
14.4.1	Oceanic Crust	342	<b>16.4</b>	<b>Formation of a Rift System</b>	<b>394</b>
14.4.2	Continental Crust	342	<b>16.5</b>	<b>Controls on Rift Orientation</b>	<b>396</b>
14.4.3	The Moho	348	<b>16.6</b>	<b>Rocks and Topographic Features of Rifts</b>	<b>397</b>
<b>14.5</b>	<b>The Mantle</b>	<b>348</b>	16.6.1	Sedimentary-Rock Assemblages in Rifts	397
14.5.1	Internal Structure of the Mantle	348	16.6.2	Igneous-Rock Assemblage of Rifts	397
14.5.2	Mantle Plumes	350	16.6.3	Active Rift Topography and Rift-Margin Uplifts	399
<b>14.6</b>	<b>The Core</b>	<b>350</b>	<b>16.7</b>	<b>Tectonics of Midocean Ridges</b>	<b>402</b>
<b>14.7</b>	<b>Defining Earth Layers Based on Rheologic Behavior</b>	<b>350</b>	<b>16.8</b>	<b>Passive Margins</b>	<b>405</b>
14.7.1	The Lithosphere	351	<b>16.9</b>	<b>Causes of Rifting</b>	<b>408</b>
14.7.2	The Asthenosphere	353	<b>16.10</b>	<b>Closing Remarks</b>	<b>410</b>
14.7.3	Isostasy	353		<b>Additional Reading</b>	<b>410</b>
<b>14.8</b>	<b>The Tenets of Plate Tectonics Theory</b>	<b>355</b>	<b>17</b>	<b>Convergence and Collision</b>	<b>412</b>
<b>14.9</b>	<b>Basic Plate Kinematics</b>	<b>359</b>	<b>17.1</b>	<b>Introduction</b>	<b>412</b>
14.9.1	Absolute Plate Velocity	359	<b>17.2</b>	<b>Convergent Plate Margins</b>	<b>414</b>
14.9.2	Relative Plate Velocity	360	17.2.1	The Downgoing Slab	415
14.9.3	Using Vectors to Describe Relative Plate Velocity	361	17.2.2	The Trench	418
