Fetal and Neonatal Physiology

FOURTH EDITION

VOLUME 1

ELSEVIER
SAUNDERS

CONTENTS

VOLUME 1

SECTION I

Genetics and Embryology 1

1 Basic Genetic Principles 1
Fred Levine

2 Advances in Molecular Genetics: Developmental and Clinical Implications 17
George A. Diaz and Kurt Hirschhorn

3 Prenatal Diagnosis 26
Louise Wilkins-Haug

4 Basic Embryology 33
David L. Bolender and Stanley Kaplan

5 Regulation of Embryogenesis 49
Matthew K. Lee, Yang Chai, David Warburton, and Harold C. Slavkin

6 The Extracellular Matrix in Development 59
Peter Lloyd Jones and Lawrence S. (Lance) Prince

7 Stem Cell Biology 64
Evan Y. Snyder and Stephen Yip

8 Homeobox Genes 78
Heber C. Nielsen and MaryAnn V. Volpe

9 Apoptotic Cell Death 93
Grisha Pirianov, Huseyin Mehmet, and Deanna T. Taylor

10 Angiogenesis 102
Jann Rhodes, Timothy Robert Hume Regnault, and Russell V. Anthony

SECTION II

Placenta and Intrauterine Environment 108

11 Placental Development 108
Hans-Georg Frank

12 Regulation of the Placental Circulation 121
Charles R. Rosenfeld

13 Pathophysiology of Preterm Birth 128
Shankari Arulkumaran and Phillip R. Bennett

14 Mechanisms of Transfer Across the Human Placenta 133
Rebecca L. Jones, Robert D.H. Boyd, and Colin P. Sibley

15 Endocrine and Paracrine Function of the Human Placenta 146
Theresa M. Siler-Khodr

16 Fetal and Maternal Responses to Intrauterine Infection 155
Roberto Romero, Francesca Gotsch, Offer Erez, Edi Vaisbuch, and Juan Pedro Kusanovic

17 Maternal Cardiovascular Disease and Fetal Growth and Development 172
Douglas A. Woelkers

18 Fetal Origins of Adult Disease 192
David J.P. Barker

19 Physiologic Effects of Multiple Pregnancy on Mother and Fetus 197
Jane Cleary-Goldman and Mary E. D'Alton

SECTION III

Developmental Pharmacology and Pharmacokinetics 211

20 Basic Pharmacologic Principles 211
Sylvain Chemtob

21 Basic Pharmacokinetic Principles 224
Ralph A. Lugo and Robert M. Ward

22 Physicochemical and Structural Properties Regulating Placental Drug Transfer 231
Sabine Luise Plonait and Heinz Nau

23 Pharmacogenetics 246
Denis M. Grant

24 Drug Distribution in Fetal Life 252
Marianne Garland

25 Developmental Pharmacology of Adrenergic Agents 263
James F. Padbury and Robert A. Berg

26 Maternal Drug Abuse: Effects on the Fetus and Neonate 269
Rada Boskovic, Ernest A. Kopecky, and Gideon Koren

27 Drug Excretion During Breast Feeding 291
Michael J. Rieder

SECTION IV

Intrauterine and Postnatal Growth 302

28 Circulatory and Metabolic Changes Accompanying Fetal Growth Restriction 302
Frederick C. Battaglia

29 Endocrine Factors Affecting Neonatal Growth 310
Dennis M. Styne

30 Human Milk Composition and Function in the Infant 323
Margit Hamosh

31 Physiology of Lactation 334
James L. McManaman and Margaret Cobb Neville

32 Nutritional Assessment 341
Gilberto R. Pereira

SECTION V

Perinatal Iron, Mineral, and Vitamin Metabolism 352

33 Calcium-Regulating Hormones 352
Jorge A. Prada

34 Calcium, Phosphorus, and Magnesium Transport Across the Placenta 364
Shahid M. Husain, M. Zulficar Mughal, and Reginald C. Tsang

35 Fetal and Neonatal Iron Metabolism 374
Raye-Ann Odegaard deRegnier and Michael K. Georgieff

36 Neonatal Calcium, Phosphorus, and Magnesium Homeostasis 384
Ran Namgung and Reginald C. Tsang

37 Zinc in the Fetus and Neonate 403
K. Michael Hambidge and Nancy F. Krebs

38 Vitamin A Metabolism in the Fetus and Neonate 409
Jayant P. Shenai

39 Vitamin E Metabolism in the Fetus and Newborn Infant 415
Lois H. Johnson and Vinod K. Bhutani

40 Vitamin K Metabolism in the Fetus and Neonate 435
Reidar Wallin and Susan M. Hutson

SECTION VI

Lipid Metabolism 441

41 Maternal-Fetal Transfer of Lipid Metabolites 441
Emilio Herrera and Miguel Angel Lasunción

42 Accretion of Lipid in the Fetus and Newborn 454
John E. Van Aerde, Michaelann S. Wilke, Miguel Feldman, and M. Thomas Clandinin

43 Brown Adipose Tissue: Development and Function 470
Jan Nedergaard and Barbara Cannon

44 Lipids as an Energy Source for the Premature and Full-Term Neonate 483
Sudha Kashyap and Guy Putet

45 Ketone Body Production and Metabolism in the Fetus and Neonate 487
Dermot H. Williamson and Paul S. Thornton

46 Long-Chain Fatty Acids in the Developing Retina and Brain 497
Carol L. Cheatham, John Colombo, and Susan E. Carlson

47 Lipoprotein Metabolism and Nutritional Programming in the Fetus and Neonate 509
Glen E. Mott

SECTION VII
Carbohydrate Metabolism 517

48 Metabolism of Glucose and Methods of Investigation in the Fetus and Newborn 517
Satish C. Kalhan and Prabhu S. Parimi

49 Carbohydrate Metabolism During Pregnancy 533
Edward S. Ogata

50 Oxygen Consumption and General Carbohydrate Metabolism of the Fetus 535
Anthony F. Philipps

51 Role of Glucoregulatory Hormones in Hepatic Glucose Metabolism During the Perinatal Period 550
Richard M. Cowett

52 Cell Glucose Transport and Glucose Handling During Fetal and Neonatal Development 560
Rebecca Anne Simmons

53 Pathophysiology of Hypoglycemia 568
Charles A. Stanley and Olga T. Hardy

SECTION VIII
Protein Metabolism 576

54 General Concepts of Protein Metabolism 576
Dwight E. Matthews and Johannes (Hans) B. van Goudoever

55 Fetal Requirements and Placental Transfer of Nitrogenous Compounds 585
William W. Hay, Jr., Timothy Robert Hume Regnault, and Laura D. Brown

56 Protein and Amino Acid Metabolism and Requirements 603
Sudha Kashyap and William C. Heird

SECTION IX
Thermoregulation 615

57 Perinatal Thermal Physiology 615
Gordon G. Power and Arlin B. Blood

58 Temperature Control in Newborn Infants 624
Rakesh Sahni and Karl Schulze

59 Physics and Physiology of Human Neonatal Incubation 648
Gunnar Sedin

60 Responses of the Fetus and Neonate to Hypothermia 663
Alistair Jan Gunn and Laura Bennet

SECTION X
Skin 671

61 Structure and Development of Skin and Cutaneous Appendages 671
David H. Chu and Cynthia A. Loomis

62 Physiologic Development of the Skin 679
Steven B. Hoath

SECTION XI
Fetal and Neonatal Cardiovascular Physiology 696

63 Cardiovascular Development 696
Brian S. Snarr, Andy Wessels, and Tim C. McQuinn

64 Molecular Determinants of Embryonic Vascular Development 704
H. Scott Baldwin and Justin C. Grindley

65 Cardiomyopathies in Infants and Children 718
Jeffrey A. Towbin, John Lynn Jefferies, and Matteo Vatta

66 Developmental Electrophysiology in the Fetus and Neonate 733
Arthur S. Pickoff

67 Developmental Biology of the Pulmonary Vasculature 757
Marlene Rabinovitch

68 Development of the Gastrointestinal Circulation in the Fetus and Newborn 773
David A. Clark, Upender K. Munshi

69 Physiology of Congenital Heart Disease in the Neonate 777
Thomas J. Kulik

70 Neural Regulation of Blood Pressure During Fetal and Newborn Life 789
Jeffrey L. Segar

71 Developmental Effects on Fetal Circulation 798
Lucy R. Green and Mark A. Hanson

72 Physiology of Nitric Oxide in the Developing Lung 807
John P. Kinsella and Philip W. Shaul

73 Mechanisms Regulating Closure of the Ductus Arteriosus 821
Ronald I. Clyman

74 Regulation of Umbilical Blood Flow 827
S. Lee Adamson, Leslie Myatt, and Bridgette M.P. Byrne

75 Fetal and Placental Circulation During Labor 837
Karel Maršál

76 Physiology of Resuscitation 846
Ola Didrik Saugstad

77 Pathophysiology of Shock in the Fetus and Neonate 853
Shahab Noori, Philippe S. Friedlich, and Istvan Seri

SECTION XII

The Lung 864

78 Normal and Abnormal Structural Development of the Lung 864
Susan E. Wert

79 Regulation of Alveolarization 877
Jeanne M. Snyder

80 Physiologic Mechanisms of Normal and Altered Lung Growth Before and After Birth 885
Richard Harding and Stuart B. Hooper

81 Molecular Mechanisms of Lung Development and Lung Branching Morphogenesis 896
Martin Rutter, Minke Van Tuyl, and Martin Post

82 Regulation of Liquid Secretion and Absorption by the Fetal and Neonatal Lung 907
David P. Carlton

83 Upper Airway Structure: Function, Regulation, and Development 919
Thomas H. Shaffer and Marla R. Wolfson

84 Regulation of Lower Airway Function 929
Richard J. Martin and Musa A. Haxhiu

85 Functional Development of Respiratory Muscles 937
Carlos B. Mantilla, Mohamed Abdelmonem Fahim, and Gary C. Sieck

86 Mechanics of Breathing 953
Jacopo P. Mortola

87 Pulmonary Gas Exchange in the Developing Lung 960
William E. Truog

88 Oxygen Transport and Delivery 970
Maria Delivoria-Papadopoulos and Jane E. McGowan

89 Control of Breathing in Fetal Life and Onset and Control of Breathing in the Neonate 980
Ruben E. Alvaro and Henrique Rigatto

90 Basic Mechanisms of Oxygen Sensing and Response to Hypoxia 992
Dan Zhou and Gabriel G. Haddad

91 Pathophysiology of Apnea of Prematurity 998
Martha J. Miller and Richard J. Martin

92 Evaluation of Pulmonary Function in the Neonate 1011
Emidio M. Sivieri and Soraya Abbasi

93 Pathophysiology of Hyaline Membrane Disease (Excluding Surfactant) 1026
Robert B. Cotton

94 Mechanisms of Neonatal Lung Injury 1034
Richard L. Auten, Jr.

95 Impaired Lung Growth After Injury in Premature Lung 1039
Kurt H. Albertine and Theodore J. Pysher

96 Antenatal Factors That Influence Postnatal Lung Development and Injury 1047
Subas G. Kallapur and Alan H. Jobe

97 Pathophysiology of Bronchopulmonary Dysplasia 1054
Eduardo Bancalari

98 Liquid Ventilation 1063
Thomas H. Shaffer and Marla R. Wolfson

SECTION XIII

Surfactant 1082

99 Historical Perspective 1082
Mary Ellen Avery

100 Composition of Pulmonary Surfactant Lipids and Proteins 1084
Jeffrey A. Whitsett

101 Physicochemical Aspects of Pulmonary Surfactant 1094
Fred Possmayer

102 Structure of Alveolar Epithelial Cells and the Surface Layer During Development 1115
Scott H. Randell and Stephen L. Young

103 Regulation of Surfactant-Associated Phospholipid Synthesis and Secretion 1122
Seamus A. Rooney

104 Pathophysiology of Respiratory Distress Syndrome and Surfactant Metabolism 1137
Alan H. Jobe and Machiko Ikegami

105 Hormonal Therapy for Prevention of Respiratory Distress Syndrome 1150
Ian Gross and Philip L. Ballard

106 Surfactant Treatment 1156
Alan H. Jobe

107 Genetics and Physiology of Surfactant Protein Deficiencies 1168
Lawrence M. Nogee
