PART I HETEROGENEOUS PLATFORMS: TAXONOMY, TYPICAL USES, AND PROGRAMMING ISSUES 1

1. Heterogeneous Platforms and Their Uses 3

1.1 Taxonomy of Heterogeneous Platforms 3
1.2 Vendor-Designed Heterogeneous Systems 4
1.3 Heterogeneous Clusters 6
1.4 Local Network of Computers (LNC) 8
1.5 Global Network of Computers (GNC) 9
1.6 Grid-Based Systems 10
1.7 Other Heterogeneous Platforms 11
1.8 Typical Uses of Heterogeneous Platforms 11
1.8.1 Traditional Use 11
1.8.2 Parallel Computing 12
1.8.3 Distributed Computing 12

2. Programming Issues 13

2.1 Performance 14
2.2 Fault Tolerance 17
2.3 Arithmetic Heterogeneity 19

PART II PERFORMANCE MODELS OF HETEROGENEOUS PLATFORMS AND DESIGN OF HETEROGENEOUS ALGORITHMS 23

3. Distribution of Computations with Constant Performance Models of Heterogeneous Processors 25

3.1 Simplest Constant Performance Model of Heterogeneous Processors and Optimal Distribution of Independent Units of Computation with This Model 25
3.2 Data Distribution Problems with Constant Performance Models of Heterogeneous Processors 29
3.3 Partitioning Well-Ordered Sets with Constant Performance Models of Heterogeneous Processors 31
3.4 Partitioning Matrices with Constant Performance Models of Heterogeneous Processors 38

4. Distribution of Computations with Nonconstant Performance Models of Heterogeneous Processors 60

4.1 Functional Performance Model of Heterogeneous Processors 60
4.2 Data Partitioning with the Functional Performance Model of Heterogeneous Processors 64
4.3 Other Nonconstant Performance Models of Heterogeneous Processors 77
4.3.1 Stepwise Functional Model 77
4.3.2 Functional Model with Limits on Task Size 78
4.3.3 Band Model 80

5. Communication Performance Models for High-Performance Heterogeneous Platforms 81

5.1 Modeling the Communication Performance for Scientific Computing: The Scope of Interest 81
5.2 Communication Models for Parallel Computing on Heterogeneous Clusters 83
5.3 Communication Performance Models for Local and Global Networks of Computers 97

6. Performance Analysis of Heterogeneous Algorithms 99

6.1 Efficiency Analysis of Heterogeneous Algorithms 99

6.2 Scalability Analysis of Heterogeneous Algorithms 104

PART III PERFORMANCE: IMPLEMENTATION AND SOFTWARE 109

7. Implementation Issues 111

7.1 Portable Implementation of Heterogeneous Algorithms and Self-Adaptable Applications 111
7.2 Performance Models of Heterogeneous Platforms: Estimation of Parameters 115
7.2.1 Estimation of Constant Performance Models of Heterogeneous Processors 115
7.2.2 Estimation of Functional and Band Performance Models of Heterogeneous Processors 119
7.2.3 Benchmarking of Communication Operations 132
7.3 Performance Models of Heterogeneous Algorithms and Their Use in Applications and Programming Systems 139
7.4 Implementation of Homogeneous Algorithms for Heterogeneous Platforms 147

8. Programming Systems for High-Performance Heterogeneous Computing 149

8.1 Parallel Programming Systems for Heterogeneous Platforms 149
8.2 Traditional Parallel Programming Systems 150
8.2.1 Message-Passing Programming Systems 151
8.2.2 Linda 156
8.2.3 HPF 157
8.3 Heterogeneous Parallel Programming Systems 158
8.4 Distributed Programming Systems 165
8.4.1 NetSolve 165
8.4.2 Nimrod 166
8.4.3 Java 166
8.4.4 GridRPC 166

PART IV APPLICATIONS 169

9. Numerical Linear Algebra Software for Heterogeneous Clusters 171

9.1 *HeteroPBLAS: Introduction and User Interface* 171
9.2 HeteroPBLAS: Software Design 178
9.3 Experiments with HeteroPBLAS 184

10. Parallel Processing of Remotely Sensed Hyperspectral Images on Heterogeneous Clusters 188

10.1 *Hyperspectral Imaging: Introduction and Parallel Techniques* 188
10.2 A Parallel Algorithm for Analysis of Hyperspectral Images and Its Implementation for Heterogeneous Clusters 191
10.3 Experiments with the Heterogeneous Hyperspectral Imaging Application 201
10.4 Conclusion 207

11. Simulation of the Evolution of Clusters of Galaxies on Heterogeneous Computational Grids 209

11.1 Hydropad: A Simulator of Galaxies' Evolution 210
11.2 Enabling Hydropad for Grid Computing 213
11.2.1 GridRPC Implementation of the Hydropad 215
11.2.2 Experiments with the GridSolve-Enabled Hydropad 217
11.3 SmartGridSolve and Hydropad 218
11.3.1 SmartGridSolve Implementation of the Hydropad 220
11.3.2 Experiments with the SmartGridSolve-Enabled Hydropad 221
11.4 Acknowledgment 225

PART V FUTURE TRENDS 227

12. Future Trends in Computing 229

12.1 Introduction 229

12.2 Computational Resources 231
12.2.1 Complex and Heterogeneous Parallel Systems 231
12.2.2 Intel-ization of the Processor Landscape 232
12.2.3 New Architectures on the Horizon 232
12.3 Applications 233
12.4 Software 234
12.5 Some Important Concepts for the Future 235
12.5.1 Heterogeneous Hardware Environments 235
12.5.2 Software Architecture 235
12.5.3 Open Source 235
12.5.4 New Applications 235
12.5.5 Verification and Validation 236
12.5.6 Data 236
12.6 2009 and Beyond 236

REFERENCES **239**

APPENDICES **251**

Appendix A Appendix to Chapter 3 **253**

A.1 Proof of Proposition 3.1 253
A.2 Proof of Proposition 3.5 253

Appendix B Appendix to Chapter 4 **256**

B.1 Proof of Proposition 4.1 256
B.2 Proof of Proposition 4.2 257
B.3 Proof of Proposition 4.3 257
B.4 Functional Optimization Problem with Optimal Solution, Locally Nonoptimal 261
