

Stephen Krawetz
Editor

Bioinformatics for Systems Biology

 Humana Press

Contents

Part I Life of a Cell and Its Analysis	1
1 Structure and Function of the Nucleus and Cell Organelles	3
Jon Holy and Ed Perkins	
2 Transcription and the Control of Gene Expression	33
Nadine Wiper-Bergeron and Ilona S. Skerjanc	
3 RNA Processing and Translation	51
Christina Karamboulas, Nadine Wiper-Bergeron, and Ilona S. Skerjanc	
4 DNA Replication, Recombination, and Repair	67
Linda B. Bloom	
5 Cell Signaling	89
Daniel A. Rappolee and D. Randall Armant	
6 Epigenetics of Spermiogenesis – Combining <i>In Silico</i> and Proteomic Approaches in the Mouse Model	105
Sophie Rousseaux and Myriam Ferro	
7 Genomic Tools for Analyzing Transcriptional Regulatory Networks	119
John J. Wyrick	
Part II Statistical Tools and Their Application	137
8 Probability and Hypothesis Testing	139
Michael L. Kruger	
9 Stochastic Models for Biological Patterns	151
Gautam B. Singh	
10 Population Genetics	163
Jill S. Barnholtz-Sloan and Hemant K. Tiwari	
11 Statistical Tools for Gene Expression Analysis and Systems Biology and Related Web Resources	181
Chiara Romualdi and Gerolamo Lanfranchi	

Part III Transcriptome Analysis	207
12 What Goes in is What Comes Out: How to Design and Implement a Successful Microarray Experiment	209
Jeffrey A. Loeb and Thomas L. Beaumont	
13 Tools and Approaches for an End-to-End Expression Array Analysis	227
Adrian E. Platts and Stephen A. Krawetz	
14 Analysis of Alternative Splicing with Microarrays	267
Jingyi Hui, Shivendra Kishore, Amit Khanna, and Stefan Stamm	
Part IV Structural and Functional Sequence Analysis	281
15 An Introduction to Multiple Sequence Alignment — and the T-Coffee Shop. Beyond Just Aligning Sequences: How Good can you Make your Alignment, and so What?	283
Steven M. Thompson	
16 A Spectrum of Phylogenetic-Based Approaches for Predicting Protein Functional Sites	315
Dukka Bahadur K. C. and Dennis R. Livesay	
17 The Role of Transcription Factor Binding Sites in Promoters and Their <i>In Silico</i> Detection	339
Thomas Werner	
18 <i>In Silico</i> Discovery of DNA Regulatory Sites and Modules	353
Panayiotis V. Benos	
Part V Literature Mining for Association and Meaning	367
19 Mining the Research Literature in Systems Biology	369
Keir T. Reavie	
20 GoPubMed: Exploring PubMed with Ontological Background Knowledge	385
Heiko Dietze, Dimitra Alexopoulou, Michael R. Alvers, Liliana Barrio-Alvers, Bill Andreopoulos, Andreas Doms, Jörg Hakenberg, Jan Mönnich, Conrad Plake, Andreas Reischuck, Loïc Royer, Thomas Wächter, Matthias Zschunke, and Michael Schroeder	
21 BiblioSphere — Hypothesis Generation in Regulatory Network Analysis	401
Anton Epple and Matthias Sherf	
22 Biological Knowledge Extraction – A Case Study of iHOP and Other Language Processing Systems	413
Florian Leitner, Robert Hoffmann, and Alfonso Valencia	
Part VI Genomic Databases	435
23 Using KEGG in the Transition from Genomics to Chemical Genomics	437
Kiyoko F. Aoki-Kinoshita and Minoru Kanehisa	

24	Ensembl – Open-Source Software for Large-Scale Genome Analysis	453
	Anne Parker and Fiona Cunningham	
25	Management of Spatially Organized Biological Data using EMAGE	469
	Jeffrey H. Christiansen, Duncan R. Davidson, and Richard A. Baldock	
26	Equality of the Sexes? Parent-of-Origin Effects on Transcription and <i>de novo</i> Mutations*	485
	Rivka L. Glaser and Ian M. Morison	
	Part VII Biological Networks	515
27	Methods for Structural Inference and Functional Module Identification in Intracellular Networks	517
	Maria Manioudaki, Eleftheria Tzamali, Martin Reczko, and Panayiota Poirazi	
28	Methods for Dynamical Inference in Intracellular Networks	541
	Eleftheria Tzamali, Panayiota Poirazi, and Martin Reczko	
29	ASIAN: Network Inference Web Server	563
	Sachiyo Aburatani, Shigeru Saito, and Katsuhisa Horimoto	
	Part VIII Bridging the Gap	579
30	Bioinformatics for Metabolomics	581
	David S. Wishart	
31	Virtual Reality Meets Functional Genomics	601
	Andrei L. Turinsky and Christoph W. Sensen	
32	Systems Biology of Personalized Medicine	615
	Craig Paul Webb and David Michael Cherba	
	Index	631
