

CELLULAR SIGNAL PROCESSING

An Introduction to the Molecular Mechanisms of Signal Transduction

Friedrich Marks
Ursula Klingmüller
Karin Müller-Decker

Contents

	Preface	vii
Chapter 1	The “Brain of the Cell”: Data Processing by Protein Networks	1
Chapter 2	Supplying the Network with Energy: Basic Biochemistry of Signal Transduction	25
Chapter 3	Evolution of Cellular Data Processing	79
Chapter 4	Basic Equipment: G-Proteins, Second Messengers, and Protein Kinases	129
Chapter 5	Signal Transduction by Receptors with Seven Transmembrane Domains	183
Chapter 6	Signal Transduction by Serine/Threonine Kinase-Coupled Receptors	219
Chapter 7	Signal Transduction by Tyrosine Kinase- and Protein Phosphatase-Coupled Receptors: A Late Invention of Evolution	239
Chapter 8	Gene Transcription: The Ultimate Target of Signal Transduction	283
Chapter 9	Signals Controlling mRNA Translation	325
Chapter 10	Signal Transduction by Small G-Proteins: The Art of Molecular Targeting	353
Chapter 11	Mitogen-activated Protein Kinase and Nuclear Factor κ B Modules	389
Chapter 12	Cancer and Regulation of Cell Division	419
Chapter 13	Signal Transduction by Proteolysis and Programmed Cell Death	455

Contents

Chapter 14	Signal Transduction by Ions	477
Chapter 15	Sensory Signal Processing	535
Chapter 16	Signaling at Synapses: Neurotransmitters and their Receptors	555
Chapter 17	Putting Together the Pieces: The Approach of Systems Biology	599
	Index	613
