

Mass Spectrometry for Microbial Proteomics

Editors

Haroun N. Shah and Saheer E. Gharbia

 WILEY

Contents

<i>Preface</i>	xix
<i>List of Contributors</i>	xxi
Part I Microbial Characterisation; the Transition from Conventional Methods to Proteomics	1
1 Changing Concepts in the Characterisation of Microbes and the Influence of Mass Spectrometry	3
<i>Haroun N. Shah, Caroline Chilton, Lakshani Rajakaruna, Tom Gaulton, Gillian Hallas, Hristo Atanassov, Ghalia Khoder, Paulina D. Rakowska, Eleonora Cerasoli and Saheer E. Gharbia</i>	
1.1 Background and Early Attempts to Use Mass Spectrometry on Microbes	3
1.2 Characterisation of Microorganisms by MALDI-TOF-MS; from Initial Ideas to the Development of the First Comprehensive Database	6
1.3 Characterisation of Microorganisms from Their Intracellular/Membrane Bound Protein Profiles Using Affinity Capture with Particular Reference to Surface-Enhanced Laser Desorption/Ionisation (SELDI)-TOF-MS	9
1.3.1 A Protein Fingerprinting Platform to Replace SDS-PAGE	9
1.3.2 A Species-Specific Diagnostic Method	11
1.3.3 A Biomarker Search Tool	13
1.4 Comparative Analysis of Proteomes of Diverse Strains within a Species; Use of 2D Fluorescence Difference Gel Electrophoresis (DIGE)	18
1.4.1 2D GE	18
1.4.2 The DIGE Technique	21
1.5 Nanoparticles as an Alternative Approach in the Analysis and Detection of Low Abundance and Low Molecular Weight Proteins Using MALDI-TOF-MS	25
References	29
2 Microbial Phylogeny and Evolution Based on Protein Sequences (The Change from Targeted Genes to Proteins)	35
<i>Radhey S. Gupta</i>	
2.1 Introduction	35
2.2 Bacterial Phylogeny: Overview and Key Unresolved Issues	35

2.3	New Protein-Based Molecular Markers for Systematic and Evolutionary Studies	37
2.4	Molecular Markers Elucidating the Evolutionary Relationships among α -Proteobacteria	41
2.5	Molecular Markers for the <i>Bacteroidetes-Chlorobi</i> Phyla	45
2.6	Branching Order and Interrelationships among Bacterial Phyla	46
2.7	Importance of Protein Markers for Discovering Unique Properties for Different Groups of Bacteria	48
2.8	Concluding Remarks	49
	Acknowledgements	50
	References	50
Part II Proteomics Tools and Biomarker Discovery		55
3	Overview of Proteomic Tools and Their Links to Genomics	57
	<i>Raju Misra</i>	
3.1	Introduction	57
3.2	Protein Identification	58
3.2.1	Peptide Mass Fingerprint (PMF)	58
3.2.2	Peptide Fragment Fingerprint	60
3.2.3	Peptide Sequencing	62
3.2.4	False Discovery Rate (FDR)	62
3.2.5	Validating Protein Identifications	63
3.2.6	Reference Database	64
3.2.7	Data Storage	65
3.3	Applications	65
3.3.1	Biomarker Discovery	65
3.3.2	Integrating Genomics with Proteomics	67
	References	68
4	Tandem Mass Spectrometry-Based Proteomics, Protein Characterisation and Biomarker Discovery in Microorganisms	73
	<i>Min Fang</i>	
4.1	Introduction	73
4.2	Mass Spectrometry	74
4.2.1	MALDI Versus ESI	74
4.2.2	Tandem Mass Spectrometry and Hybrid Mass Spectrometers	75
4.2.3	Fragmentation in Tandem Mass Spectrometry	76
4.3	Proteomic Strategies for Protein Identification	79
4.3.1	Bottom-Up Proteomics	79
4.3.2	Top-Down Proteomics	80
4.4	Multidimensional Protein Identification	81
4.5	Mass Spectrometry-Based Targeted Protein Quantification and Biomarker Discovery	82
4.5.1	Selected Reaction Monitoring	84

4.6	Conclusions	86
	References	86
5	MALDI Mass Spectrometry Imaging, a New Frontier in Biostructural Techniques: Applications in Biomedicine	91
	<i>Simona Francese and Malcolm R. Clench</i>	
5.1	Introduction	91
5.2	Practical Aspects of MALDI-MSI	93
5.2.1	Instrumentation for MALDI-MSI	93
5.3	Applications	94
5.3.1	Pharmaceuticals	94
5.3.2	MALDI-MSI and Medicine	95
5.3.3	Biotechnology	101
5.4	Microbial Molecular Investigation by MALDI-TOF-MS	104
5.4.1	Microbial MALDI-TOF-MSI	104
5.4.2	Microbial Proteomic Characterisation and Classification via MALDI-TOF-MS and MS/MS	107
5.5	Conclusions	112
	References	113
