

Citrus Mites

Identification, Bionomy and Control

Vincenzo Vacante

Contents

Preface	x
Acknowledgements	xiv
Part I Introduction	
1 Citriculture and Injurious Mites	3
1.1 Introduction	3
1.2 Citriculture	3
1.2.1 Species and varieties cultivated	4
1.2.2 World production	7
1.2.3 Fruit exports	7
1.2.4 Juice production	8
1.3 Citrus Mites and Their Economic Importance	9
2 Introduction to Acari	11
2.1 Introduction	11
2.2 Morphology and Structure	11
2.2.1 Body division and external morphology	11
2.2.2 Gnathosoma	14
2.2.3 Idiosoma	16
2.2.4 Legs	16
2.3 Classification	17
2.3.1 Higher classification	17
2.3.2 Suborder Prostigmata	19

3	Methods and Techniques	20
3.1	Collecting	20
3.1.1	Collecting from plants	20
3.1.2	Collecting in substrate	21
3.2	Preserving	21
3.3	Preparing	22
3.3.1	Clearing/maceration	22
3.3.2	Temporary mounts	22
3.3.3	Permanent mounts	23
3.4	Rearing	24
4	Plant Damage	25
4.1	Feeding Mechanisms	25
4.2	Feeding Symptoms	27
4.3	Plant Damage	28
4.3.1	Local damage	28
4.3.2	General alterations	30
5	Control	31
5.1	Chemical Control	33
5.2	Side Effects of Chemicals	33
5.3	Biological Control	35
5.4	Integrated Pest Management	36

Part II Citrus Mites

6	Key to the Identification of Families, Subfamilies, Tribes, Genera and Species	41
7	Phytoptidae Murray	55
7.1	Introduction	55
7.2	Morphological Characteristics and Systematic Outline	55
7.3	Phytoptinae Murray	56
8	Eriophyidae Nalepa	58
8.1	Introduction	58
8.2	Morphological Characteristics and Systematic Outline	58
8.3	Eriophyinae Nalepa	61
8.3.1	Aceriini Amrine <i>et</i> Stasny	61
8.4	Cecidophyinae Keifer	67
8.4.1	Colomerini Newkirk <i>et</i> Keifer	67
8.5	Nothopodinae Keifer	68
8.5.1	Nothopodini Keifer	68
8.6	Phyllocoptinae Nalepa	70
8.6.1	Anthocoptini Amrine <i>et</i> Stasny	70
8.6.2	Calacarini Amrine <i>et</i> Stasny	84
8.6.3	Phyllocoptini Nalepa	87

9	Diptilomiopidae Keifer	101
9.1	Introduction	101
9.2	Morphological Characteristics and Systematic Outline	101
9.3	Diptilomiopinae Keifer	102
10	Tarsonemidae Canestrini <i>et</i> Fanzago	104
10.1	Introduction	104
10.2	Morphological Characteristics and Systematic Outline	104
10.3	Pseudotarsonemoidinae Lindquist	107
10.3.1	Pseudotarsonemoidini Lindquist	107
11	Tenuipalpidae Berlese	113
11.1	Introduction	113
11.2	Morphological Characteristics and Systematic Outline	113
11.3	Brevipalpinae Mitrofanov	117
11.4	Tenuipalpinae Mitrofanov	155
12	Tuckerellidae Baker <i>et</i> Pritchard	163
12.1	Introduction	163
12.2	Morphological Characteristics and Systematic Outline	163
12.3	<i>Tuckerella</i> Womersley	166
13	Tetranychidae Donnadieu	172
13.1	Introduction	172
13.2	Morphological Characteristics and Systematic Outline	172
13.3	Bryobiinae Berlese	177
13.3.1	Bryobiini Reck	177
13.3.2	Hystrichonychini Pritchard <i>et</i> Baker	183
13.3.3	Petrobiini Reck	188
13.4	Tetranychinae Berlese	194
13.4.1	Tenuipalpoidini Pritchard <i>et</i> Baker	194
13.4.2	Eurytetranychini Reck	195
13.4.3	Tetranychini Reck	219
14	Conclusions	298
14.1	Systematics	298
14.2	Bio-ecology	299
14.3	Pest Status	299
14.4	Natural Enemies	300
14.5	Means of Control	301
14.6	Horticultural Practices	302
14.7	Prevention	302
14.8	Integrated Pest Management	303
	References	305
	Index	371
