Contents

Foreword	xi
Preface	xiii
List of Abbreviations	xvii
1 The Vision of Personal Networks	1
1.1 Past, Present, and Future Telecommunication	1
1.2 Personal Networks	4
1.3 Some Typical PN Use-Case Scenarios	6
1.3.1 <i>Introducing Jane</i>	6
1.3.2 <i>The Traveling Saleswoman</i>	7
1.3.3 <i>Care for the Elderly</i>	8
1.3.4 <i>More Use-Case Scenarios</i>	10
1.4 Federations of Personal Networks	11
1.5 Early Personal Network Implementations	11
1.6 Expected Impact	11
1.7 Summary	13
2 Personal Networks User Requirements	15
2.1 Ubiquitous Networking	15
2.2 Heterogeneous Hardware Constraints	16
2.3 Quality of Service and Reliability	17
2.4 Name, Service, and Content Management	17
2.5 Context Awareness	18
2.6 Being Cognitive	18
2.7 Security and Trust	19
2.8 Privacy	19
2.9 Usability	20
2.10 Other Requirements	21
2.11 Jane Revisited	21
2.12 Summary	22
3 Trends in Personal Networks	23
3.1 Wireless Communications	23

3.2	Ad Hoc Networking	25
3.3	WWRF Book of Visions	26
3.4	Ubiquitous and Pervasive Computing and Communication	28
3.5	Ambient Networks	29
3.6	IST PACWOMAN and SHAMAN	29
3.7	Personal Distributed Environment	30
3.8	MyNet	32
3.9	P2P Universal Computing Consortium	32
3.10	More Trends	33
3.11	Personal Networks and Current Trends	34
3.12	Summary	35
4	The Personal Network Architecture	37
4.1	Terminology	38
4.2	Personal and Foreign Nodes	38
4.3	The Three Level Architecture View	38
4.3.1	<i>Connectivity Abstraction Level</i>	39
4.3.2	<i>Network Abstraction Level</i>	40
4.3.3	<i>Application and Service Abstraction Level</i>	43
4.3.4	<i>Interaction between the Levels</i>	44
4.3.5	<i>Distribution of Networking Functionality in PNs</i>	44
4.4	Personalization of Nodes	45
4.5	Cluster Organization	46
4.6	Personal Network Organization	48
4.7	Foreign Communication	49
4.8	Higher Layer Support Systems	50
4.9	Federations of Personal Networks	51
4.10	Discussion	52
4.10.1	<i>Why a Network Layer Overlay?</i>	52
4.10.2	<i>How Protected is a PN?</i>	53
4.10.3	<i>How Usable is the PN Security?</i>	54
4.10.4	<i>Do We Need to Manage Our PNs?</i>	54
4.10.5	<i>What About the Social Dimension?</i>	55
4.10.6	<i>More Issues?</i>	56
4.11	Summary	56
5	Cluster Formation and Routing	59
5.1	What is a Cluster?	59
5.2	Mobile Ad Hoc Network Technologies	62
5.3	Cluster Formation and Maintenance	64
5.3.1	<i>Multi-Hop Clusters</i>	64
5.3.2	<i>Link Layer Device Discovery</i>	65
5.3.3	<i>Discovery of Node Arrivals and Departures</i>	66
5.3.4	<i>Merging and Splitting of Clusters</i>	67
5.3.5	<i>Cluster Member List</i>	67

5.4	Intra-Cluster Routing	68
5.4.1	<i>Ad Hoc Routing Protocols</i>	68
5.4.2	<i>Link Quality Assessment</i>	69
5.4.3	<i>Unicast Routing</i>	72
5.4.4	<i>Cluster-Wide Broadcasting</i>	73
5.5	Summary	74
6	Inter-Cluster Tunneling and Routing	75
6.1	Inter-Cluster Tunneling Requirements	77
6.2	IP Mobility	78
6.2.1	<i>IETF Network Layer-Based Proposals</i>	78
6.2.2	<i>Other Network Layer-Based Proposals</i>	80
6.2.3	<i>Application Layer-Based Mobility Proposals</i>	80
6.3	PN Addressing	81
6.4	Infrastructure Support	81
6.4.1	<i>PN Agent</i>	82
6.4.2	<i>Edge Routers</i>	83
6.4.3	<i>PN Networking without Infrastructure Support</i>	85
6.5	Inter-Cluster Tunneling	86
6.5.1	<i>Mobility and Dynamic Tunneling</i>	86
6.5.2	<i>Always-Up and On-Demand Tunneling</i>	88
6.5.3	<i>Gateway Node Coordination</i>	89
6.5.4	<i>NAT Traversal</i>	90
6.5.5	<i>Tunneling and Signaling Security</i>	91
6.5.6	<i>Current Tunneling Protocols</i>	91
6.6	Inter-Cluster Routing	91
6.6.1	<i>PN Agent-Based Routing</i>	92
6.6.2	<i>Tunnel Quality Assessment</i>	93
6.6.3	<i>PN-Wide Broadcasting</i>	94
6.7	Summary	95
7	Foreign Communication	97
7.1	Requirements for Foreign Communication	98
7.2	Setting up Communication with Foreign Nodes	99
7.2.1	<i>Foreign Node Discovery</i>	100
7.2.2	<i>Accepting Connections from Foreign Nodes</i>	101
7.3	Bridging Inside and Outside Protocols	101
7.3.1	<i>At the Network Abstraction Level</i>	102
7.3.2	<i>At the Service Abstraction Level</i>	103
7.3.3	<i>Network versus Service Abstraction Level Approach</i>	105
7.4	Mobility and Gateway Node Handover	106
7.4.1	<i>Always Using the PN Agent</i>	106
7.4.2	<i>Using the Optimal Gateway Node</i>	107
7.4.3	<i>Using Service Proxies</i>	109
7.5	Summary	110

8	Personal Network Application Support Systems	111
8.1	Required PN Application Support	111
8.1.1	<i>Naming</i>	113
8.1.2	<i>Ubiquitous Access to Services</i>	113
8.1.3	<i>Pooling of Resources</i>	114
8.1.4	<i>Gathering and Exploiting Context</i>	114
8.1.5	<i>Ability to Optimize and Make Tradeoffs</i>	115
8.2	Design of a PN Application Support System	116
8.2.1	<i>Abstraction for the Application Programmer</i>	116
8.2.2	<i>Mechanisms for Supporting the Applications</i>	117
8.2.3	<i>Naming</i>	118
8.2.4	<i>Service Discovery and Management</i>	118
8.2.5	<i>Content Discovery and Management</i>	119
8.2.6	<i>Context Management</i>	120
8.2.7	<i>Mapping of Resources</i>	120
8.2.8	<i>User Agent, Authentication, and Access Control</i>	122
8.2.9	<i>PN Federation Management</i>	122
8.2.10	<i>Static Management of PNs</i>	122
8.3	Service Discovery and Management Implementation	123
8.3.1	<i>Service Tiers</i>	123
8.3.2	<i>Service Discovery Architecture</i>	125
8.3.3	<i>Service Session Management</i>	127
8.4	An Implementation of Context Management	127
8.5	Summary	128
9	Personal Network Security	129
9.1	Device Personalization	129
9.1.1	<i>Imprinting</i>	130
9.1.2	<i>Imprinting Using Location Limited Channels</i>	131
9.1.3	<i>Certified PN Formation Protocol</i>	132
9.1.4	<i>Eviction of Personal Nodes</i>	133
9.2	Establishment of Secure Communication	134
9.2.1	<i>Secure Unicast Communication</i>	134
9.2.2	<i>PN Awareness at the Connectivity Level</i>	135
9.2.3	<i>Secure Broadcast Communication</i>	136
9.2.4	<i>Secure Inter-Cluster Communication</i>	137
9.3	Secure Foreign Communication	137
9.4	Anonymity	138
9.4.1	<i>Anonymity in PNs</i>	138
9.4.2	<i>Anonymity in Foreign Communication</i>	139
9.5	Summary	140
10	Personal Network Federations	141
10.1	Examples	142
10.2	Types of Federations	146
10.3	Requirements	147

10.4	Architecture of a Federation	148
10.5	Life Cycle of a Federation	150
10.5.1	<i>Initialization</i>	150
10.5.2	<i>Discovery</i>	151
10.5.3	<i>Participation</i>	151
10.5.4	<i>Operation</i>	151
10.5.5	<i>Dissolution</i>	152
10.6	Federation Access Control	152
10.6.1	<i>First-Level Access Control</i>	152
10.6.2	<i>Second-Level Access Control</i>	152
10.7	Federation Implementation Approaches	154
10.7.1	<i>Network Overlay</i>	154
10.7.2	<i>Service Proxy</i>	155
10.8	Security	156
10.8.1	<i>Trust between the Creator and a New Member</i>	156
10.8.2	<i>Security Association between the Creator and a New Member</i>	157
10.8.3	<i>Security Association among Federation Members</i>	158
10.9	Summary	158
11	Personal Network Prototypes	159
11.1	The TU Delft Prototype	160
11.1.1	<i>Hardware Platform</i>	160
11.1.2	<i>Software Platform</i>	160
11.1.3	<i>Intra-Cluster Implementation</i>	161
11.1.4	<i>Sending and Receiving Intra-Cluster Traffic</i>	163
11.1.5	<i>Interface Output Queue</i>	165
11.1.6	<i>Intra-Cluster Flooding</i>	165
11.1.7	<i>Intra-Cluster Routing</i>	166
11.1.8	<i>PN Organization</i>	166
11.1.9	<i>Lessons Learned</i>	170
11.2	The PNP2008 Prototypes	171
11.2.1	<i>Early PNP2008 Prototypes</i>	171
11.2.2	<i>Final PNP2008 Prototypes</i>	173
11.3	The MAGNET Prototype	175
11.3.1	<i>Hardware and Software Platform</i>	176
11.3.2	<i>PN Networking</i>	177
11.3.3	<i>Security</i>	178
11.3.4	<i>Service Discovery</i>	178
11.3.5	<i>Context Management</i>	179
11.3.6	<i>PN Federations</i>	180
11.3.7	<i>Applications</i>	180
11.4	Summary	181
12	The Future of Personal Networks	183
12.1	Are We There Yet?	183
12.2	Future Directions	184

Appendix A Terminology	187
A.1 Connectivity Abstraction Level	187
A.2 Network Abstraction Level	187
A.3 Application and Service Abstraction Level	188
A.4 Personal Network Federations	189
