

The Digital Signal Processing Handbook

SECOND EDITION

Digital Signal Processing Fundamentals

EDITOR-IN-CHIEF
Vijay K. Madisetti

CRC Press
Taylor & Francis Group

Contents

Preface	ix
Editor	xi
Contributors	xiii

PART I Signals and Systems

Vijay K. Madisetti and Douglas B. Williams

1 Fourier Methods for Signal Analysis and Processing	1-1
<i>W. Kenneth Jenkins</i>	
2 Ordinary Linear Differential and Difference Equations	2-1
<i>B.P. Lathi</i>	
3 Finite Wordlength Effects	3-1
<i>Bruce W. Bomar</i>	

PART II Signal Representation and Quantization

Jelena Kovačević and Christine Podilchuk

4 On Multidimensional Sampling	4-1
<i>Ton Kalker</i>	
5 Analog-to-Digital Conversion Architectures	5-1
<i>Stephen Kosonocky and Peter Xiao</i>	
6 Quantization of Discrete Time Signals	6-1
<i>Ravi P. Ramachandran</i>	

PART III Fast Algorithms and Structures

Pierre Duhamel

7 Fast Fourier Transforms: A Tutorial Review and State of the Art	7-1
<i>Pierre Duhamel and Martin Vetterli</i>	

8	Fast Convolution and Filtering	8-1
	<i>Ivan W. Selesnick and C. Sidney Burrus</i>	
9	Complexity Theory of Transforms in Signal Processing	9-1
	<i>Ephraim Feig</i>	
10	Fast Matrix Computations	10-1
	<i>Andrew E. Yagle</i>	

PART IV Digital Filtering

Lina J. Karam and James H. McClellan

11	Digital Filtering	11-1
	<i>Lina J. Karam, James H. McClellan, Ivan W. Selesnick, and C. Sidney Burrus</i>	

PART V Statistical Signal Processing

Georgios B. Giannakis

12	Overview of Statistical Signal Processing	12-1
	<i>Charles W. Therrien</i>	
13	Signal Detection and Classification	13-1
	<i>Alfred Hero</i>	
14	Spectrum Estimation and Modeling	14-1
	<i>Petar M. Djurić and Steven M. Kay</i>	
15	Estimation Theory and Algorithms: From Gauss to Wiener to Kalman	15-1
	<i>Jerry M. Mendel</i>	
16	Validation, Testing, and Noise Modeling	16-1
	<i>Jitendra K. Tugnait</i>	
17	Cyclostationary Signal Analysis	17-1
	<i>Georgios B. Giannakis</i>	

PART VI Adaptive Filtering

Scott C. Douglas

18	Introduction to Adaptive Filters	18-1
	<i>Scott C. Douglas</i>	
19	Convergence Issues in the LMS Adaptive Filter	19-1
	<i>Scott C. Douglas and Markus Rupp</i>	
20	Robustness Issues in Adaptive Filtering	20-1
	<i>Ali H. Sayed and Markus Rupp</i>	
21	Recursive Least-Squares Adaptive Filters	21-1
	<i>Ali H. Sayed and Thomas Kailath</i>	

22 Transform Domain Adaptive Filtering 22-1
W. Kenneth Jenkins, C. Radhakrishnan, and Daniel F. Marshall

23 Adaptive IIR Filters 23-1
Geoffrey A. Williamson

24 Adaptive Filters for Blind Equalization 24-1
Zhi Ding

PART VII Inverse Problems and Signal Reconstruction

Richard J. Mammone

25 Signal Recovery from Partial Information 25-1
Christine Podilchuk

26 Algorithms for Computed Tomography 26-1
Gabor T. Herman

27 Robust Speech Processing as an Inverse Problem 27-1
Richard J. Mammone and Xiaoyu Zhang

28 Inverse Problems, Statistical Mechanics, and Simulated Annealing 28-1
K. Venkatesh Prasad

29 Image Recovery Using the EM Algorithm 29-1
Jun Zhang and Aggelos K. Katsaggelos

30 Inverse Problems in Array Processing 30-1
Kevin R. Farrell

31 Channel Equalization as a Regularized Inverse Problem 31-1
John F. Doherty

32 Inverse Problems in Microphone Arrays 32-1
A.C. Surendran

33 Synthetic Aperture Radar Algorithms 33-1
Clay Stewart and Vic Larson

34 Iterative Image Restoration Algorithms 34-1
Aggelos K. Katsaggelos

**PART VIII Time–Frequency and Multirate
Signal Processing**

Cormac Herley and Kambiz Nayebi

35 Wavelets and Filter Banks 35-1
Cormac Herley

36 Filter Bank Design 36-1
Joseph Arrowood, Tami Randolph, and Mark J.T. Smith

37	Time-Varying Analysis-Synthesis Filter Banks	37-1
	<i>Iraj Sodagar</i>	
38	Lapped Transforms	38-1
	<i>Ricardo L. de Queiroz</i>	
Index		I-1
