<b>Preface</b>	<b>xvii</b>
<b>Contributors</b>	<b>xxi</b>
<b>Acronyms</b>	<b>xxiii</b>
<b>1 WiMAX Standardization Overview</b>	<b>1</b>
<i>Kamran Etemad and Ming-Yee Lai</i>	
1.1 Introduction	1
1.2 IEEE 802.16 Working Group Structure and Standards	2
1.3 WiMAX Forum Overview	4
1.3.1 WiMAX Forum Organization	5
1.3.2 WiMAX Forum Specification Development Process	7
1.3.3 WiMAX Forum Certification	7
1.4 WiMAX Technology High-Level Road Map	11
1.5 Summary	14
1.6 References	14
<b>2 Overview of Mobile WiMAX Air Interface in Release 1.0</b>	<b>17</b>
<i>Kamran Etemad, Hassan Yaghoobi, and Masoud Olfat</i>	
2.1 Introduction	17
2.2 Overview of Mobile WiMAX PHY Layer (Release 1.0)	18
2.2.1 Channel Bandwidths and OFDMA Symbol Structure	18
2.2.2 TDD Frame Structure	20
2.2.3 Subcarrier Permutation, Zones, Segments, Tiles, and Bins	22
2.2.4 Fractional Frequency Reuse (FFR)	28
2.2.5 Modulation and Coding	28
2.2.6 Advanced Antenna and MIMO	30
2.2.7 DL Physical Channels	33
2.2.8 UL Physical Channels	39
2.2.9 PHY Control Sublayer	42
2.3 Overview of Mobile WiMAX MAC Layer (Release 1.0)	45
2.3.1 Convergence Sublayer	46

2.3.2	Common MAC Sublayer	48
2.3.3	Security Sublayer	49
2.3.4	MS States and MAC Procedures	50
2.3.5	Handover	54
2.3.6	Service Flows and QoS Support	55
2.4	WiMAX Forum System and Certification Profiles in Release 1.0	56
2.5	Summary	57
2.6	References	59
<b>3</b>	<b>WiMAX Air Interface Enhancements in Release 1.5</b>	<b>61</b>
	<i>Kamran Etemad and Hassan Yaghoobi</i>	
3.1	Introduction	61
3.2	Support for Frequency Division Duplexing (FDD HFDD)	62
3.3	Optional MIMO Enhancements	64
3.4	MAC Enhancements	65
3.4.1	MAP Efficiency and Persistent Assignments	65
3.4.2	Handover Enhancements	66
3.4.3	Load Balancing	67
3.4.4	Location Based Services	67
3.4.5	Enhanced Multicast and Broadcast Services	67
3.4.6	WiMAX/WiFi/Bluetooth Coexistence	68
3.5	System Profile and Certification Profiles in Release 1.5	69
3.6	Summary	71
3.7	References	71
<b>4</b>	<b>MIMO Technologies in WiMAX</b>	<b>73</b>
	<i>Qinghua Li, Jianzhong (Charlie) Zhang, Peiying Zhu, Wonil Roh, and Xintian Eddie Lin</i>	
4.1	Introduction	73
4.2	Single User MIMO	75
4.2.1	Open-Loop SU-MIMO	75
4.2.2	Closed-Loop SU-MIMO	78
4.3	Multuser MIMO	83
4.4	Distributed MIMO and Relay in IEEE 802.16j	85
4.5	Conclusions	86
4.6	References	86
<b>5</b>	<b>Overview of IEEE 802.16m Radio Access Technology</b>	<b>87</b>
	<i>Sassan Ahmadi</i>	
5.1	Introduction to IEEE 802.16m	87
5.2	IEEE 802.16m System Requirements and Evaluation Methodology	88
5.3	IEEE 802.16m Reference Model and Protocol Structure	92

5.4	IEEE 802.16m Mobile Station State Diagram	100
5.5	Overview of IEEE 802.16m Physical Layer	102
5.5.1	Multiple Access Schemes	102
5.5.2	Frame Structure	102
5.5.3	Physical and Logical Resource Blocks	104
5.5.4	Modulation and Coding	109
5.5.5	Pilot Structure	111
5.5.6	Control Channels	112
5.5.7	Downlink Synchronization (Advanced Preamble)	120
5.5.8	Multiantenna Techniques in IEEE 802.16m	120
5.6	Overview of the IEEE 802.16m MAC Layer	125
5.6.1	MAC Addressing	125
5.6.2	Network Entry	125
5.6.3	Connection Management	128
5.6.4	Quality of Service	128
5.6.5	MAC Management Messages	128
5.6.6	MAC Header	129
5.6.7	ARQ and HARQ Functions	129
5.6.8	Mobility Management and Handover	129
5.6.9	Power Management	131
5.6.10	Security	133
5.7	PHY and MAC Aspects of Multicarrier Operations	134
5.8	PHY and MAC Aspects of Multicast and Broadcast Services	140
5.9	Summary	144
5.10	References	145
<b>6</b>	<b>Overview of WiMAX Network Architecture and Evolution</b>	<b>147</b>
	<i>Kamran Etemad, Jicheol Lee, and Yong Chang</i>	
6.1	Introduction	147
6.2	WiMAX Basic Network Reference Model	150
6.2.1	Base Station (BS)	150
6.2.2	ASN Gateway (ASN-GW)	150
6.2.3	Connectivity Service Network (CSN)	152
6.3	WiMAX Network Roadmap: Release 1.0, 1.5, 1.6, and 2.0	157
6.3.1	Release 1.5 Network	158
6.3.2	Release 1.6 Network	158
6.3.3	Release 2.0 Network	159
6.4	Overview of Major Features in Release 1.0	159
6.4.1	Network Discovery and Selection (ND&S)	160
6.4.2	Mobility Support	162
6.4.3	IP address Management	163
6.4.4	Idle Mode and Paging Operations	163
6.4.5	Security Support	164
6.4.6	Quality of Service (QoS) Support	164

6.4.7	Radio Resource Management Support	165
6.4.8	Initial Network Entry Procedure	165
6.5	Overview of Major Features in Release 1.5	166
6.5.1	Over-the-Air (OTA) Activation and Provisioning	168
6.5.2	Location Based Services (LBS)	169
6.5.3	Multicast and Broadcast Services (MCBCS)	169
6.5.4	Emergency Services	169
6.5.5	IP Multimedia Subsystem Support	170
6.5.6	WiMAX Lawful Interception	170
6.5.7	Universal Services Interface (USI)	170
6.5.8	Miscellaneous Features Added in Release 1.5	172
6.6	Major Features in Network Release 1.6	173
6.6.1	Femtocell and Self-Organization Network (SON)	173
6.6.2	Architecture Evolution	174
6.6.3	WiFi–WiMAX Interworking	174
6.6.4	IPv4–IPv6 Transition	175
6.6.5	OTA Evolution and Device-Reported Metrics and Diagnostics	175
6.7	Comparison of Mobile WiMAX and 3GPP/SAE Network Architecture	176
6.8	Summary	177
6.9	References	177
<b>7</b>	<b>Over-the-Air (OTA) Provisioning and Activation</b>	<b>179</b>
	<i>Avishay Shraga</i>	
7.1	Introduction	179
7.2	OTA High-Level Overview	182
7.2.1	User Experience	182
7.2.2	OTA Logical Flow	182
7.3	WiMAX Network Architecture for OTA	183
7.4	OTA Protocol	185
7.4.1	Authentication (Network Entry)	186
7.4.2	Hotlining and Redirection	187
7.4.3	Bootstrapping	187
7.4.4	Subscription and Account Setup	189
7.4.5	Provisioning	189
7.5	OMA DM	190
7.6	OTA Usage Model Examples	192
7.6.1	Postpaid Account OTA Subscription	192
7.6.2	Prepaid Account OTA Subscription	192
7.6.3	Usage-Based Account—Prepaid Card Purchased in a Shop	193
7.6.4	Postpaid Account—Out-of-Band Subscription (Office/Phone)	193
7.6.5	Postpaid Account—Guest Subscription	194

7.7	Summary	194
7.8	References	195
<b>8</b>	<b>Mobility in WiMAX Networks</b>	<b>197</b>
	<i>Shahab Sayeedi and Joseph R. Schumacher</i>	
8.1	Introduction	197
8.2	Network Topology	198
8.3	Handover Modes	198
8.4	Scanning	200
8.5	Basic Handover Mechanics	201
8.6	WiMAX Network Support for Handovers (ASN Anchored Mobility)	203
	8.6.1 Controlled Handovers	204
	8.6.2 Uncontrolled Handovers	211
8.7	Security Considerations	212
8.8	Seamless Handover	213
8.9	Handover Optimizations	215
8.10	Interaction with Other Features	216
	8.10.1 Sleep Mode	216
	8.10.2 Idle Mode	217
8.11	Summary	218
8.12	References	218
<b>9</b>	<b>WiMAX End-to-End Security Framework</b>	<b>219</b>
	<i>Semyon B. Mizikovsky</i>	
9.1	General Overview	219
9.2	WiMAX Security Requirements	219
9.3	End-to-End Security Architecture	221
	9.3.1 Development Choices for WiMAX Security	222
	9.3.2 Security Protocol Stack	230
	9.3.3 Security Keys	231
	9.3.4 Security Algorithms	231
9.4	Security Zones	233
	9.4.1 Airlink Security	233
	9.4.2 Mobility Security	237
	9.4.3 Backhaul Security	242
9.5	Summary	243
9.6	References	244
<b>10</b>	<b>Quality of Service (QoS) in WiMAX Networks</b>	<b>245</b>
	<i>Mehdi Alasti and Behnam Neezad</i>	
10.1	Introduction	245
10.2	An Overview of QoS in Packet-Switched Networks	247

10.2.1	The Basic QoS Models	247
10.2.2	QoS Management, Control, and Enforcement	252
10.2.3	Service and Accounting Profiles	253
10.3	WiMAX QoS Architecture Overview	254
10.3.1	WiMAX QoS in Different Segments	256
10.4	WiMAX QoS and Protocol Stack	264
10.4.1	Application Layer	264
10.4.2	Transport Layer	266
10.4.3	Network (IP) Layer	267
10.4.4	Header Compression	267
10.4.5	IP Packet Fragmentation Issues	268
10.5	WiMAX QoS Framework	269
10.5.1	Preprovisioned QoS Framework	270
10.5.2	Preprovisioned QoS Framework Shortcomings	275
10.5.3	Dynamic QoS Framework	277
10.6	WiMAX Policy Control and Charging (PCC) Framework	277
10.6.1	Policy Control and Charging (PCC) Framework	277
10.6.2	WiMAX PCC Architecture	279
10.6.3	WiMAX PCC and Dynamic QoS Framework	279
10.6.4	WiMAX PCC and IMS	286
10.7	Improving WiMAX QoS Framework	287
10.7.1	Device- and Mobile-Station-Based Rate Capping	287
10.8	Summary	289
10.9	References	290
<b>11</b>	<b>Mobile WiMAX Integration with 3GPP and 3GPP2 Networks</b>	<b>291</b>
	<i>Pouya Taaghjol, Peretz Feder, and Ramana Isukapalli</i>	
11.1	Introduction	291
11.2	WiMAX–3GPP Interworking	293
11.2.1	Interworking with 3GPP Release-8	293
11.2.2	WiMAX–3GPP EPC Interworking Architecture	295
11.2.3	Access Network Discovery	296
11.2.4	Initial Network Entry	297
11.2.5	Dynamic QoS and Policy Control	299
11.2.6	Interoperator Roaming	299
11.2.7	WiMAX–3GPP Seamless Mobility	301
11.2.8	Interworking with Pre-Release-8 3GPP	307
11.3	WiMAX–3GPP2 Interworking	311
11.3.1	The 3GPP2 Network Architecture	311
11.3.2	WiMAX–3GPP2 Interworking Architecture	312
11.3.3	Protocol Stack	314
11.3.4	Integrated Dynamic Policy and QoS	314
11.3.5	WiMAX–3GPP2 Seamless Mobility	316
11.4	WiMAX–IMS Interworking	320

11.4.1	WiMAX IMS Architecture	321
11.4.2	P-CSCF Discovery	321
11.4.3	Emergency Services	322
11.5	Summary	323
11.6	References	324
<b>12</b>	<b>Multicast and Broadcast Services in WiMAX Networks</b>	<b>325</b>
	<i>Kamran Etemad and Limei Wang</i>	
12.1	Introduction	325
12.2	Basic Terms, Requirements, and Use Cases	326
12.3	MAC and PHY Support for MBS	328
12.3.1	Coordinated and Synchronized Transmissions in MBS Zones	328
12.3.2	MBS Service Flow Management	329
12.3.3	Tracking and Processing MBS Data Bursts	330
12.3.4	Intrazone and Interzone Session Continuity	332
12.4	MCBCS Network Architecture	333
12.4.1	Baseline MCBCS Network Reference Architecture	333
12.4.2	Service Initialization and Provisioning	336
12.4.3	Charging and Accounting for MCBCS	340
12.4.4	MBS Data Synchronization	341
12.5	MCBCS Application-Layer Approach	342
12.5.1	MCBCS Application-Layer Approach Network Architecture	342
12.6	Summary	343
12.7	References	344
<b>13</b>	<b>Location-Based Services in WiMAX Networks</b>	<b>345</b>
	<i>Wayne Ballantyne, Muthaiah Venkatachalam, and Kamran Etemad</i>	
13.1	Introduction	345
13.2	LBS Usage Models and Design Requirements	346
13.2.1	Location Security	346
13.2.2	Location QoS	347
13.3	Review of Location Methods for Wireless Devices	347
13.3.1	Assisted GPS (A-GPS)	347
13.3.2	Database Lookup Methods	352
13.3.3	Mobile-Scan Report-Based Methods	353
13.3.4	Location Accuracy and Representation	354
13.4	WiMAX Network Reference Architecture for LBS	355
13.4.1	Support for MS Managed Location in WiMAX	356
13.4.2	Support for Control Plane Methods in the Network Architecture	357
13.4.3	Support for User Plane Methods in the Network Architecture	358

13.4.4	Contrast of User Plane and Control Plane Methods	358
13.4.5	Support for Mixed Plane Methods in the Network Architecture	359
13.4.6	Support for Accounting	359
13.4.7	Support for Roaming	360
13.5	Summary	360
13.6	References	360
<b>14</b>	<b>WiMAX Accounting</b>	<b>361</b>
	<i>Avi Lior</i>	
14.1	Introduction	361
14.2	Accounting Architecture	362
14.3	Accounting Concepts	364
14.4	Accounting Operations	367
14.4.1	Single Accounting Session	368
14.4.2	Multiple Accounting Sessions	371
14.4.3	Anchor Authenticator Relocation	373
14.5	Accounting at the Home Agent	376
14.6	Processing of Accounting Records in the Visited NSP	377
14.6.1	Visited AAA Processing	377
14.6.2	BSS/OSS Processing at the Visited NSP	377
14.7	Processing of Accounting Records in the Home NSP	378
14.7.1	Home AAA Processing	378
14.7.2	BSS/OSS Processing	379
14.7.3	Billing	379
14.8	Error Handling by the AAA	380
14.9	Summary	380
14.10	References	381
<b>15</b>	<b>WiMAX Roaming</b>	<b>383</b>
	<i>John Dubois and Chirag Patel</i>	
15.1	Introduction	383
15.2	WiMAX Roaming Business Drivers and Stakeholders	384
15.3	Related Standards and Forums Activities	385
15.3.1	WiMAX Forum	385
15.4	WiMAX Roaming Model	386
15.5	WiMAX Roaming Agreement Overview	386
15.6	WiMAX Roaming Guideline Overview	387
15.7	WiMAX Roaming Interface Overview	387
15.7.1	AAA Proxy Service	387
15.7.2	Wholesale Rating	389
15.7.3	Clearing	389
15.7.4	Financial Settlement	391
15.7.5	Interconnection	391
15.7.6	Fraud Management	392

15.8	Summary	392
15.9	References	392
<b>16</b>	<b>WiMAX Network Management Framework</b>	<b>393</b>
