

Biologically-responsive Hybrid Biomaterials

A Reference for Material Scientists
and Bioengineers

E. Jabbari · A. Khademhosseini
editors

CONTENTS

Introduction:	Engineering the Tissue Extracellular Matrix with Hybrid Biomaterials <i>Esmail Jabbari</i>	1
SECTION 1: Synthesis, Characterization and Self-Assembly		
Chapter 1:	Bulk and Solution Properties of Peptide-Polymer Conjugates <i>Autumn Carlsen, Harm-Anton Klok and Sébastien Lecommandoux</i>	15
Chapter 2:	Polymer-Peptide Conjugate Networks: Formation, Swelling and Degradation <i>Donald L. Elbert</i>	61
Chapter 3:	Peptide Self-assembly Biomaterials Design and Application <i>Xiaojun Zhao, Songtao Wang, Yangrong Lu and Jingqiu Cheng</i>	83
Chapter 4:	Micropatterned Polymer Structures for Cell and Tissue Engineering <i>Kyung-Jin Jang, Deok-Ho Kim, Sun-Min Kim, Andre Levchenko and Kahp-Yang Suh</i>	101
Chapter 5:	Synthesis and <i>in vitro/in vivo</i> Response to Peptide-Polymer Conjugates <i>Amy S. Chung and Weiyuan John Kao</i>	121
SECTION 2: Hybrid Biomaterials in Drug Delivery and Molecular Recognition		
Chapter 6:	Synthesis of Multi-epitopic Glycopeptide-based Cancer Vaccines <i>Olivier Renaudet, Isabelle Bossu and Pascal Dumy</i>	147
Chapter 7:	Stimuli-sensitive Particles for Drug Delivery <i>Stephanie J. Grainger and Mohamed E. H. El-Sayed</i>	171

Chapter 8:	Design and Synthesis of Endosomolytic Conjugated Polyaspartamide for Cytosolic Drug Delivery <i>Kwangwon Seo and Dukjoon Kim</i>	191
Chapter 9:	Engineering of Cell-penetrating Peptide-conjugated Intracellular Delivery Systems <i>Rupa R. Sawant and Vladimir P. Torchilin</i>	213
SECTION 3: Cell Responsive Biomaterials in Tissue Engineering		
Chapter 10:	Biomimetic Matrices for Integrin-mediated Cell Adhesion <i>Keshia M. Ashe, Daron A. Lee, Kevin W.-H. Lo, Lakshmi S. Nair and Caço T. Laurencin</i>	247
Chapter 11:	Engineering Artificial Stem Cell Niches <i>Matthias P. Lutolf</i>	285
Chapter 12:	Engineering Peptides in Hydrogels for Cartilage Tissue Regeneration <i>Zhaoyang Ye and Jennifer Elisseeff</i>	311
Chapter 13:	Biomimetic Materials for Engineering of Neural Tissues: Control of Cell Adhesion and Guiding Neural Cell Outgrowth with Peptide-conjugated Polymer Structures <i>Jianming Li and Riyi Shi</i>	347
Chapter 14:	Hybrid Biomaterials for Engineering Vascular Tissues <i>Thomas C. Flanagan, Sebastian Olszewski, Julia Frese and Stefan Jockenhoevel</i>	373
Chapter 15:	Dynamic Cell Culture Methods for Functionalized Biomaterials <i>Bonnie C. Landy and Vassilios I. Sikavitsas</i>	389
Subject Index		419
