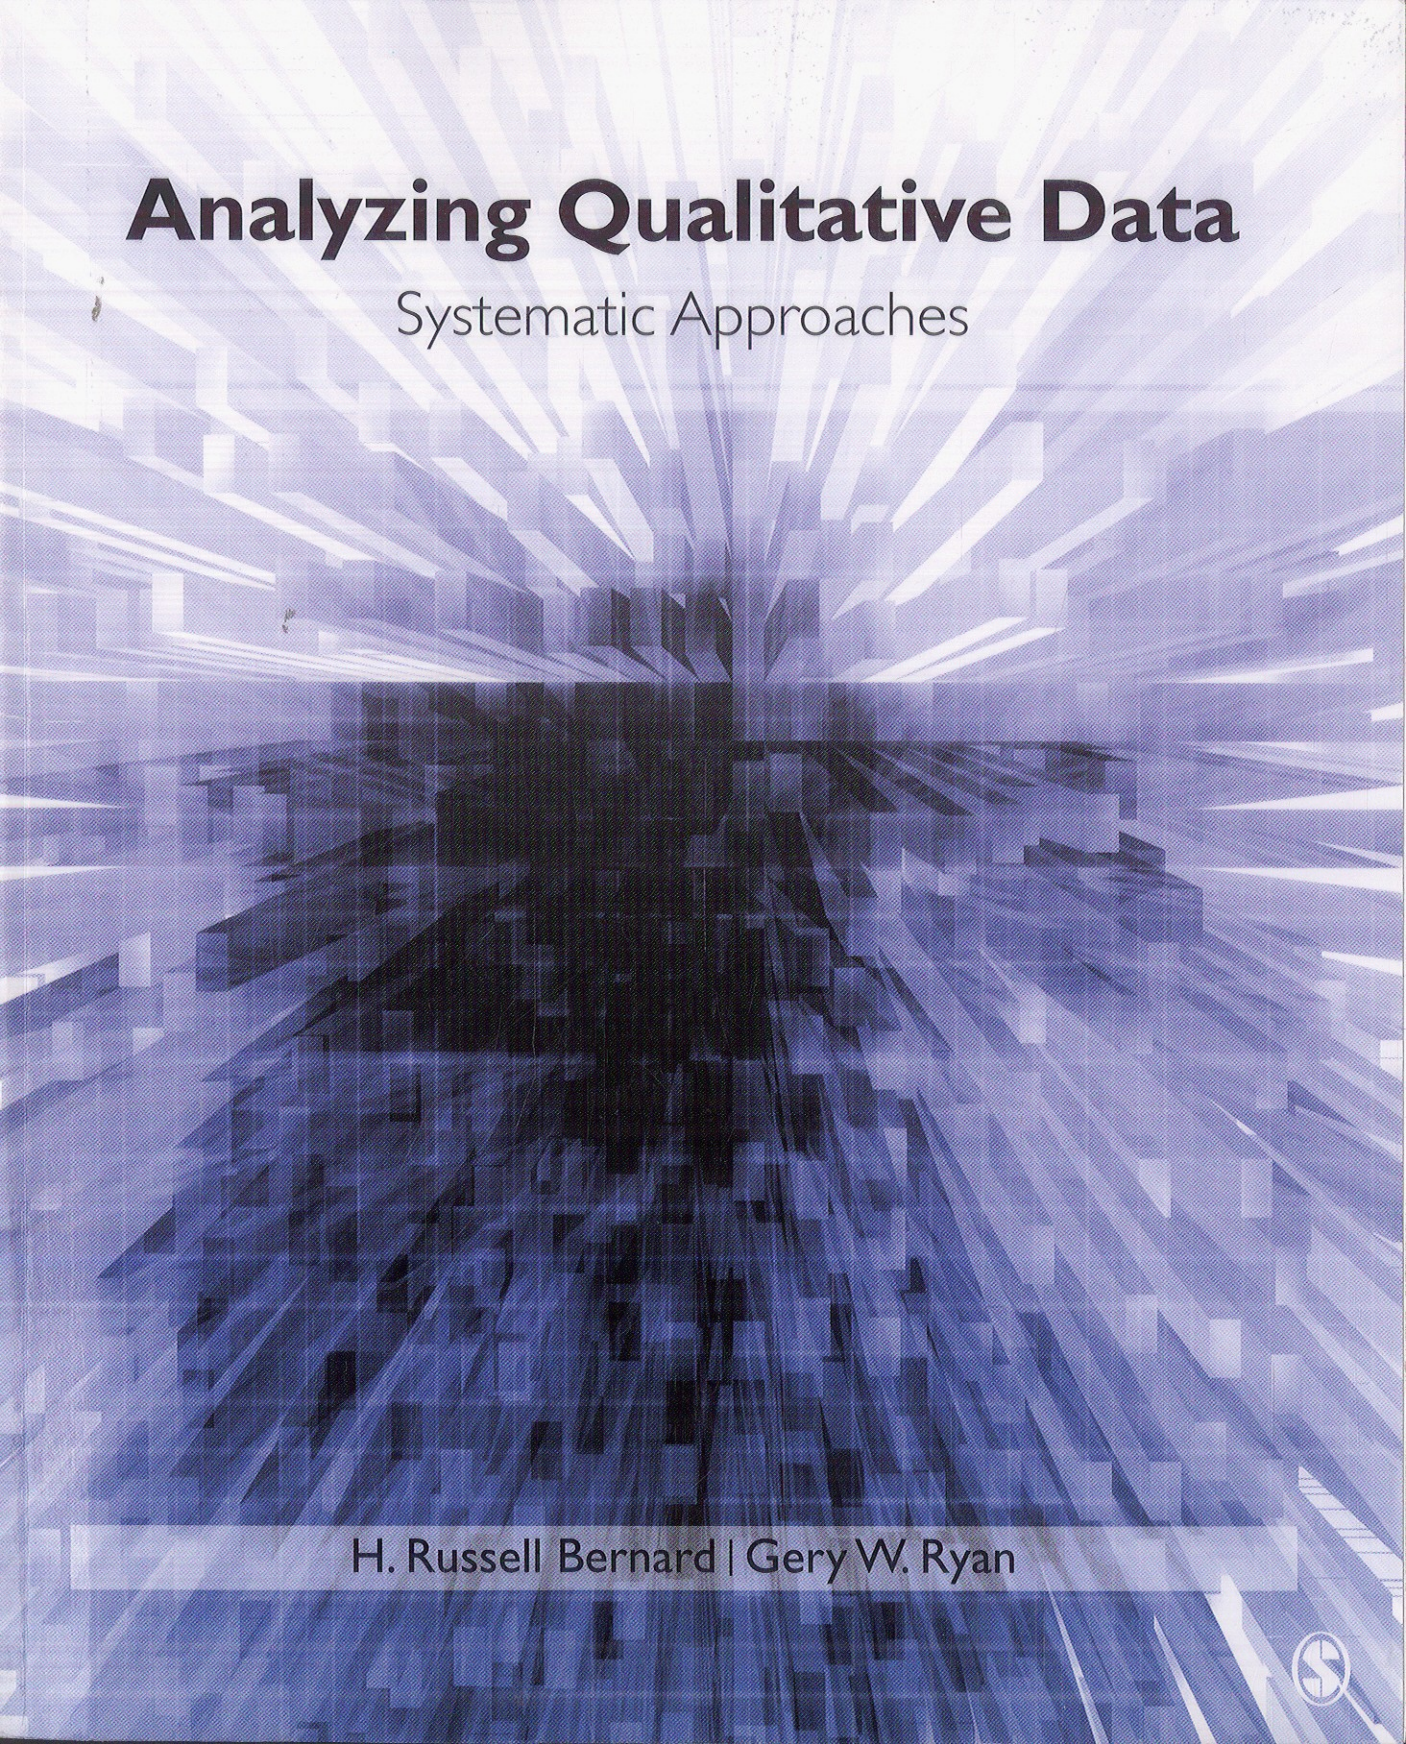
Analyzing Qualitative Data

Systematic Approaches



H. Russell Bernard | Gery W. Ryan

Detailed Contents

Preface xvii

Acknowledgments xx

PART I: THE BASICS 1

1. Introduction to Text: Qualitative Data Analysis 3
   - Introduction 3
   - What Is Qualitative Data Analysis? 4
   - What Are Data and What Makes Them Qualitative? 5
   - About Numbers and Words 6
   - Research Goals 8
     - 1. Exploration 8
     - 2. Description 9
     - 3. Comparison 9
     - 4. Testing Models 10
   - Five Kinds of Qualitative Data 10
     - 1. Physical Objects 11
     - 2. Still Images 13
     - 3. Sounds 14
     - 4. Moving Images: Video 14
     - 5. Texts 15
   - Further Reading 16

2. Collecting Data 17
   - Introduction 18
   - Data Collection Methods 18
   - Indirect Observation 19
     - Behavior Traces 19
     - Archival Data 20
     - Secondary Analysis 21
   - Direct Observation 22
     - Building Explicit Awareness 23
     - Spot Observation and Time Allocation Studies 25

Elicitation Methods 27
Unstructured Interviews: Informal and Ethnographic 28
Semistructured Interviews 29
Probing 31
Structured Interviews 33
Questionnaires and Response Effects 33
Accuracy 37
Reducing Errors: Jogging People's Memories 38
Eliciting Cultural Domains 38
Mixed Methods 39
Focus Groups 40
Participant Observation 41
Case Studies, Life Histories, and Case Histories 42
Ethnographic Decision Modeling 44
Choosing a Data Collection Strategy 44
Data Complexity 44
Data Distance 46
The Missing-Data Trap 47
Turning Audio and Video Into Other Forms of Data 48
Transcribing Interviews 48
Further Reading 50

3. **Finding Themes** 53

Introduction 54
What's a Theme? 54
Where Do Themes Come From? 55
Eight Observational Techniques: Things to Look For 56
1. Repetitions 56
2. Indigenous Typologies or Categories 57
3. Metaphors and Analogies 57
4. Transitions 58
5. Similarities and Differences 58
6. Linguistic Connectors 60
7. Missing Data 62
8. Theory-Related Material 62
Four Manipulative Techniques:
Ways to Process Texts 63
9. Cutting and Sorting 63
10. Word Lists and Key-Words-in-Context (KWIC) 65
11. Word Co-occurrence 66
12. Metacoding 66

Selecting Among Techniques 67
1. Kind of Data 68
2. Skill 70
3. Labor 70
4. Number and Kinds of Themes 71
5. Reliability and Validity 71
And Finally. . . . 72
Further Reading 73

4. Codebooks and Coding 75

Introduction 75
Three Kinds of Codes 76
Building Codebooks 78
The Evolution of Codebooks I 79
The Evolution of Codebooks II 79
Using Existing Codes 81
Codebooks Continue to Develop 84
Hierarchical Organization of Codebooks 86
Applying Theme Codes to Text 86
Examples of the Three Kinds of Codes 87
The Mechanics of Marking Text 90
Coding Data About the Common Cold 91
Using a Text Management Program 91
Multiple Coders 94
Training Coders 96
How Many Coders Are Enough? 96
The Content of Codebooks 98
Mnemonics 98
Short Descriptions and Detailed Descriptions 100
List of Inclusion and Exclusion Criteria 100
Typical and Atypical Exemplars 100
Describing Themes: Bloom's Study of AIDS 101
Finding Typical Segments of Text 102
Further Reading 105

5. Introduction to Data Analysis 107

Introduction 107
Database Management 108
Using a Text Analysis Program 109
What Is Analysis? 109
The Constant Validity Check 110
Data Matrices 111

Profile Matrices 111
Profile Matrices With Qualitative Data I—Van Maanen's Study 112
Profile Matrices With Qualitative Data II—Fjellman and Gladwin's Study 114
Proximity Matrices 115
Seeing Patterns in Proximity Matrices—Visualization Methods 116
Presenting Results as Analysis 120
Further Reading 120

6. Conceptual Models 121
Introduction 121
Statistical Models and Text Analysis 122
Adding Weights to Directions 123
A Different Conceptual Model 124
Building Models 126
Step 1: Identifying Key Concepts 126
Getting a Handle on Things 127
Step 2: Linking Key Constructs 128
Conditional Matrices 128
Actor Interaction Models 130
Process Models 131
Decision Models 132
Transition Models 132
Activity Models 137
Taxonomies 139
Mental Maps 139
Step 3: Testing the Model 139
Further Reading 142

PART II: THE SPECIFICS 143

7. First Steps in Analysis: Comparing Attributes of Variables 145
Introduction 145
Fundamental Features of Comparisons 146
Units of Analysis 148
Attributes 148
Levels of Measurement 150
Nominal Variables 151
Ordinal Variables 152
Interval Variables 152

Converting Text to Variable Data 154
Levels of Aggregation 155
Pairwise Comparison 158
Within-Group Comparison 158
Cross-Group Comparison 158
Many Types of Comparisons 159
Comparing the Columns 160
And Finally. . . . 161
Further Reading 161

8. **Cultural Domain Analysis: Free Lists, Judged Similarities, and Taxonomies** 163

Introduction 164
What Are Cultural Domains? 164
CDA Is About Things 165
CDA Is Not About Preferences 165
Free Lists 165
Prompting 166
Plotting Free Lists 167
Selecting Items From a Free List for Further Study 168
Analyzing Free List Data 170
Pile Sorts 172
Recording the Data From Pile Sorts 172
Importing the Data From Pile Sorts 173
Analyzing Pile Sort Data: MDS 174
Analyzing Pile Sort Data: Cluster Analysis 176
Analyzing Pile Sort Data: Aggregate Matrices 178
MDS and Cluster Analysis of the Aggregate Matrix 180
Folk Taxonomies 184
How to Make a Taxonomy: Lists and Frames 185
Things to Look for in Folk Taxonomies 186
And Finally. . . . 188
Further Reading 189

9. **KWIC Analysis, Word Counts, and Semantic Network Analysis** 191

Introduction 191
KWIC—Key Word in Context 192
An Example of KWIC 192
Word Counts 193
Words and Matrices 196
Stop Lists 196
Results of Analyzing the Data in Figure 9.1 196

Personal Ads 199
Describing Children 204
Elaborating the Analysis 207
Word Counts Are Only a Start 210
Semantic Network Analysis 210
Converting a Profile Matrix to Similarity Matrices 213
Jang and Barnett's Study of CEO Letters 215
Nolan and Ryan's Study of Horror Films 217
Some Cautions About All This 218
Further Reading 220

10. **Discourse Analysis: Conversation and Performance** 221
Introduction 221
Grammar Beyond the Sentence 222
Conversation Analysis 224
Transcriptions 225
Taking Turns 225
Adjacency Pairs 228
Taking Turns in a Jury 230
A Final Word About Conversation Analysis 233
Performance Analysis 233
The Chinookan Texts 233
Finding Patterns in Performance 234
Sherzer's Study of a Kuna Chant 235
Language in Use 235
Negrón's Study of Situational Ethnicity in New York 236
Dropping Hints and Doing Business 237
There's a Lot Going on Here 239
Critical Discourse Analysis: Language and Power 240
Gender and Discourse 240
Doctor-Patient Interaction 240
Coding Doctor-Patient Interactions 242
Further Reading 245

11. **Narrative Analysis** 247
Introduction 247
Sociolinguistics 248
Rubinstein's Study of Women's Reaction to Their Mother's Death 249
Comparing Narratives: Bletzer and Koss's Study 250

Bridger and Maines's Study of a Heritage Narrative 252
Mathews's Study 254
Hermeneutics 255
Herzfeld's Study of Greek Folk Songs 256
Fernández's Study of Sermons 257
Phenomenology 258
Steps in a Phenomenological Study 259
Bracketing 259
Selecting Quotes From Narratives 260
Garot's Study of Screeners for Subsidized Housing 261
Further Reading 262

12. Grounded Theory 265

Introduction 265
On Induction and Deduction 266
Overview of Grounded Theory 267
Where Do Grounded Theory Data Come From? 267
1. Coding and Theorizing 271
2. Memoing and Theorizing 273
3. Building and Refining Theories 275
A GT Project: Schlau's Study of Adjustment to Becoming Deaf as an Adult 279
Visualizing Grounded Theories 282
Verifying the Model 284
Further Reading 286

13. Content Analysis 287

Introduction 287
History of Content Analysis 288
Doing Content Analysis 289
Cunningham's Study of Media Bias 290
Hirschman's Study of People as Products 295
Intercoder Reliability 301
Adjusting for Chance 302
How Much Intercoder Agreement Is Enough? 304
A Real Example of Using Kappa: Carey et al.'s Study 305
How Many Coders Are Enough? 306
Automated Content Analysis: Content Dictionaries 306
Content Dictionaries Don't Have to Be Big to Be Useful 308

Cross-Cultural Content Analysis: HRAF 309
Doing Cross-Cultural Text-Based Research 309
Further Reading 310

14. **Schema Analysis** 311
Introduction 311
History of Schema Analysis 312
Mental Models 313
Abbreviating 314
Kinds of Schemas 315
Universal, Individual, and Cultural Schemas 316
Methods for Studying Schemas 316
1. Experiments 317
2. Interviewing: Schemas From Text 317
3. Analyzing Metaphors 320
Folk Theories: Kempton's Study of Home Thermostats 321
Further Reading 323

15. **Analytic Induction and Qualitative Comparative Analysis** 325
Introduction 325
Induction and Deduction—Again 326
The Induction Tradition 326
Analytic Induction 327
An Example: Cressey's Study of Embezzlers 329
Another Example: Manning's Study of Abortions 331
Critique of Analytic Induction 332
Qualitative Comparative Analysis—QCA 332
Haworth-Hoeppner's Study of Eating Disorders 333
Further Reading 340

16. **Ethnographic Decision Models** 341
Introduction 341
How to Build EDMs 342
Step 1. Selecting a Behavioral Choice to Model and Eliciting the Decision Criteria for Recycling 343
Step 2. Collecting Data for a Preliminary Model 343
Step 3. Building the Preliminary Model 347
Step 4. Testing the Model on an Independent Sample 351
Step 5. Assessing the Validity of Ethnographic Decision Models 353
Further Reading 356

17. Sampling 357
Introduction 357
Two Kinds of Samples 358
Sample Size in Probability Sampling 359
Sample Size in Nonprobability Sampling 360
Kinds of Nonprobability Samples 361
Quota Sampling 362
Purposive or Judgment Sampling 365
Convenience Sampling 366
Network Sampling: The Snowball and RDS Methods 367
Theoretical Sampling 369
Key Informants 370
Further Reading 374

Appendix: Resources for Analyzing Qualitative Data 375
