Contents

Improving cattle health: knowledge transfer and motivation	11
<i>T.J.G.M. Lam, J. Jansen, J.C.L. Van Veersen and C.D.M. Steuten</i>	
1. Introduction	11
2. Farmers' motivation and mindset	13
3. Different types of communication adapted to farmers' needs	16
4. The source of information	19
5. Discussion	21
Acknowledgements	23
References	23
 Managing calf health through nutrition	 25
<i>A.J. Heinrichs</i>	
1. Introduction	25
2. Colostrum	25
3. Colostrum management	27
4. Liquid and dry calf nutrition	28
5. Conclusion	29
References	29
 The influence of periparturient nutrition on early lactation pathologies of the dairy cow	 33
<i>E.J. Mulligan, R. Alibrahim and L. O'Grady</i>	
1. Introduction	33
2. Over-conditioning and fatty liver	35
3. Negative energy balance	41
4. Milk fever and subclinical hypocalcaemia	44
5. Gastrointestinal tract disorders	49
6. Conclusions	53
References	54

Nutritional impact on lameness in dairy cows	61
<i>J.R. Scaife and H. Galbraith</i>	
1. Introduction	61
2. Anatomy of the claw and biomechanical function	62
3. Cell and molecular biology of horn production	64
4. Dietary management and rumen acidosis	65
5. The impact of specific nutrients	67
6. Conclusions	75
References	76
 Role of mycotoxins in cow health and immunity	 83
<i>R.R. Santos and J. Fink-Gremmels</i>	
1. Introduction	83
2. Mycotoxins in the diet of dairy cows	84
3. Mycotoxicosis in dairy cattle	86
4. Mycotoxins and the immune system	89
5. Targets of intervention	89
6. Conclusions	90
