Barry McCleary

David Topping

Table of contents

Preface 7

Part 1. Definition and analysis

Codex definition of dietary fibre and issues requiring resolution 15
J.R. Lupton

Which physiological effects make extracted and synthetic non-digestible carbohydrates into dietary fibre? 25
A. Méheust, T. Hulshof and L. Pijls

Validating official methodology commensurate with dietary fibre research and definitions 29
J.W. DeVries

Development of an all-inclusive method for the measurement of total dietary fibre 49
B.V. McCleary, C. Mills and A. Draga

Part 2. Raw materials, processing and products

Improving the benefits of wheat as a source of dietary fibre 65
P.R. Shewry, L. Saulnier, F. Guillon, K. Gebruers, C. Courtin, J. Delcour, G. Toole, D. Boros, J. Salse, C. Ravel, E.N.C. Mills, J.L. Ward and G. Charmet

Combination of defatting and dry fractionation technologies to produce oat ingredients with high beta-glucan concentration 79
J. Sibakov, O. Myllymäki, V. Hietaniemi, J.-M. Pihlava, A. Kaukovirta-Norja, K. Poutanen and P. Lehtinen

An approach to structure-function relationships of polymeric dietary fibres in foods: significance in breadmaking applications 91
C. Collar and A. Angioloni

Impact of texture modification and dietary fibre content on the glycemic index and the acceptability of French bread 115
L. Saulnier, M. Ducasse, H. Chiron, G. Della Valle, C. Martin, S. Issanchou, X. Rouau and S.W. Rizkalla

Development of bakery foods enriched with insoluble fibres: functional properties required for its incorporation 121
D. Lebesi and C. Tzia

Interaction of insoluble oat fibre, dough conditioners and other dough constituents in optimising bread formula with high whole grain and fibre content 135
K. Matkovic and R. Mehta

Part 3. Dietary fibre and health

Dietary fibre: insights and opportunities 153
M.I. McBurney

Fibre, probiotics and the immune system in different life-stages 167
J. Romeo, E. Nova, J. Wärnberg, S. Gómez-Martínez, L.E. Díaz and A. Marcos

Fermentation patterns and short chain fatty acid profiles of wheat dextrin and other functional fibres 177
J. Slavin, M. Stewart, D. Timm, H. Grabitske and A. Hospattankar

Enzyme resistant dextrans from potato starch as potential prebiotic 193
J. Kapusniak, K. Jochym, R. Barczynska, K. Slizewska and Z. Libudzisz

Wheat bran derived arabinoxylan-oligosaccharides: a novel prebiotic concept? 215
J.A. Delcour, C.M. Courtin, E. Fierens, K. Verbeke and W.F. Broekaert

Arabinoxylans and inulin modulate the luminal and mucosa-associated bacteria *in vitro* and *in vivo* 233
P. Van den Abbeele, T. Van de Wiele, C. Grootaert, W. Verstraete, P. Gérard, A. Bruneau, S. Rabot and S. Possemiers

Investigations on the bile acid binding mechanisms of lupin dietary fibre 251
U. Schweiggert, C. Cornfine, P. Eisner and K. Hasenkopf

The effect of wheat bran on various measures of bowel function and regularity 261
Y. Papanikolaou and V.L. Fulgoni

Effects of native chicory inulin on constipation in elderly people 283
P. Marteau, H. Jacobs, B. Baril, C. Signoret and J.-M. Prevel

NUTRIOSE®, more than just a soluble fibre 295
C. Lefranc-Millot, D. Wils, L. Deremaux, V. Macioce and M.-H. Saniez-Degrave

Part 4. Resistant starch

- Resistant starch and human health 311
D.L. Topping, I. Segal, A. Regina, M.A. Conlon, B.H. Bajka S. Toden, J.M. Clarke, M.K. Morell and A.R. Bird
- Resistant starch and insulin resistance: input of metabolics 323
M.E. Díaz-Rubio, D. Dardevet, A. Mazur, A. Scalbert and B. Comte
- Fermentability of resistant starch preparations varies *in vitro* 339
M. Stewart, A. Becker and J. Slavin
- Occurrence of a 'very slowly digestible' starch fraction in different whole or dehulled cereal foods 351
C. Icard-Vernière, C. Mouquet-Rivier, D. Rablat and C. Moreau

Part 5. Dietary fibre and co-passengers

- Dietary fibre's co-passengers: is it the fibre or the co-passengers? 365
J.M. Jones
- Cereal fibres, antioxidant activity and health 379
P. Vitaglione and V. Fogliano
- Nutritional and technological aspects of wheat aleurone fibre: implications for use in food 395
F. Brouns, A. Adam-Perrot, B. Atwell and W. Von Reding
- Effects of commercial processing of barley on levels of phenolic acids and antioxidant activity: role of dietary phenolic acids on activation and inhibition of nuclear factor kappa b 415
S. Sahlström, A. Hole, K. Naterstad and S. Grimmer
- Metabolic profiling of plasma from pigs fed high rye fibre or high cellulosic fibre diets using a liquid chromatography-mass spectrometry (LC-MS) approach 431
M.S. Hedemann, H.N. Lærke and K.E. Bach Knudsen
- Antioxidant properties of cookies supplemented with sugar beet dietary fibre 441
M. Sakač, J. Gyura, A. Mišan, Z. Šereš and B. Pajin

Part 6. Glycemic response

- Effects of extrusion cooking and dietary fibre on the *in vitro* starch digestibility and technological performance of model foods 459
A.J. Alldrick
- TIM-Carbo: a rapid, cost-efficient and reliable *in vitro* method for glycemic response after carbohydrate ingestion 467
S. Bellmann, M. Minekus, E. Zeijdner, M. Verwei, P. Sanders, W. Basten and R. Havenaar
- The significant impact of a low viscous fibre on glycaemic response 475
G. Livesey and H. Tagami
- Dietary pulses alone or as part of high-fibre diets and glycemic control: a review of the clinical evidence 493
A.J. Carleton, J.L. Sievenpiper, A. Esfahani, J.M.W. Wong, H.Y. Jiang, R.P. Bazinet, E. Vidgen, D.J.A. Jenkins and C.W.C. Kendall
- Exploration of low-glycemic-impact sugars and polyols in cookie baking, using SRC, DSC, and RVA 513
M. Kweon, L. Slade and H. Levine

Part 7. Impact on appetite, satiety and obesity

- Fermentable fibres, appetite regulation and body composition 531
H. Ford, T. Arora and G. Frost
- Fermentation in the large intestine unravelled using C-labelled substrates: implications for obesity and gut health 539
K. Venema, A.A. de Graaf, A.J.H. Maathuis, P. Kovatcheva-Datchary and H. Smidt
- Dietary fibres in appetite regulation: importance of viscosity 555
M. Kristensen
- Dietary oligofructose increases gut peptides involved in satiety regulation in rats 571
S.J.M. ten Bruggencate and D. Meyer

- Keyword index** 583
