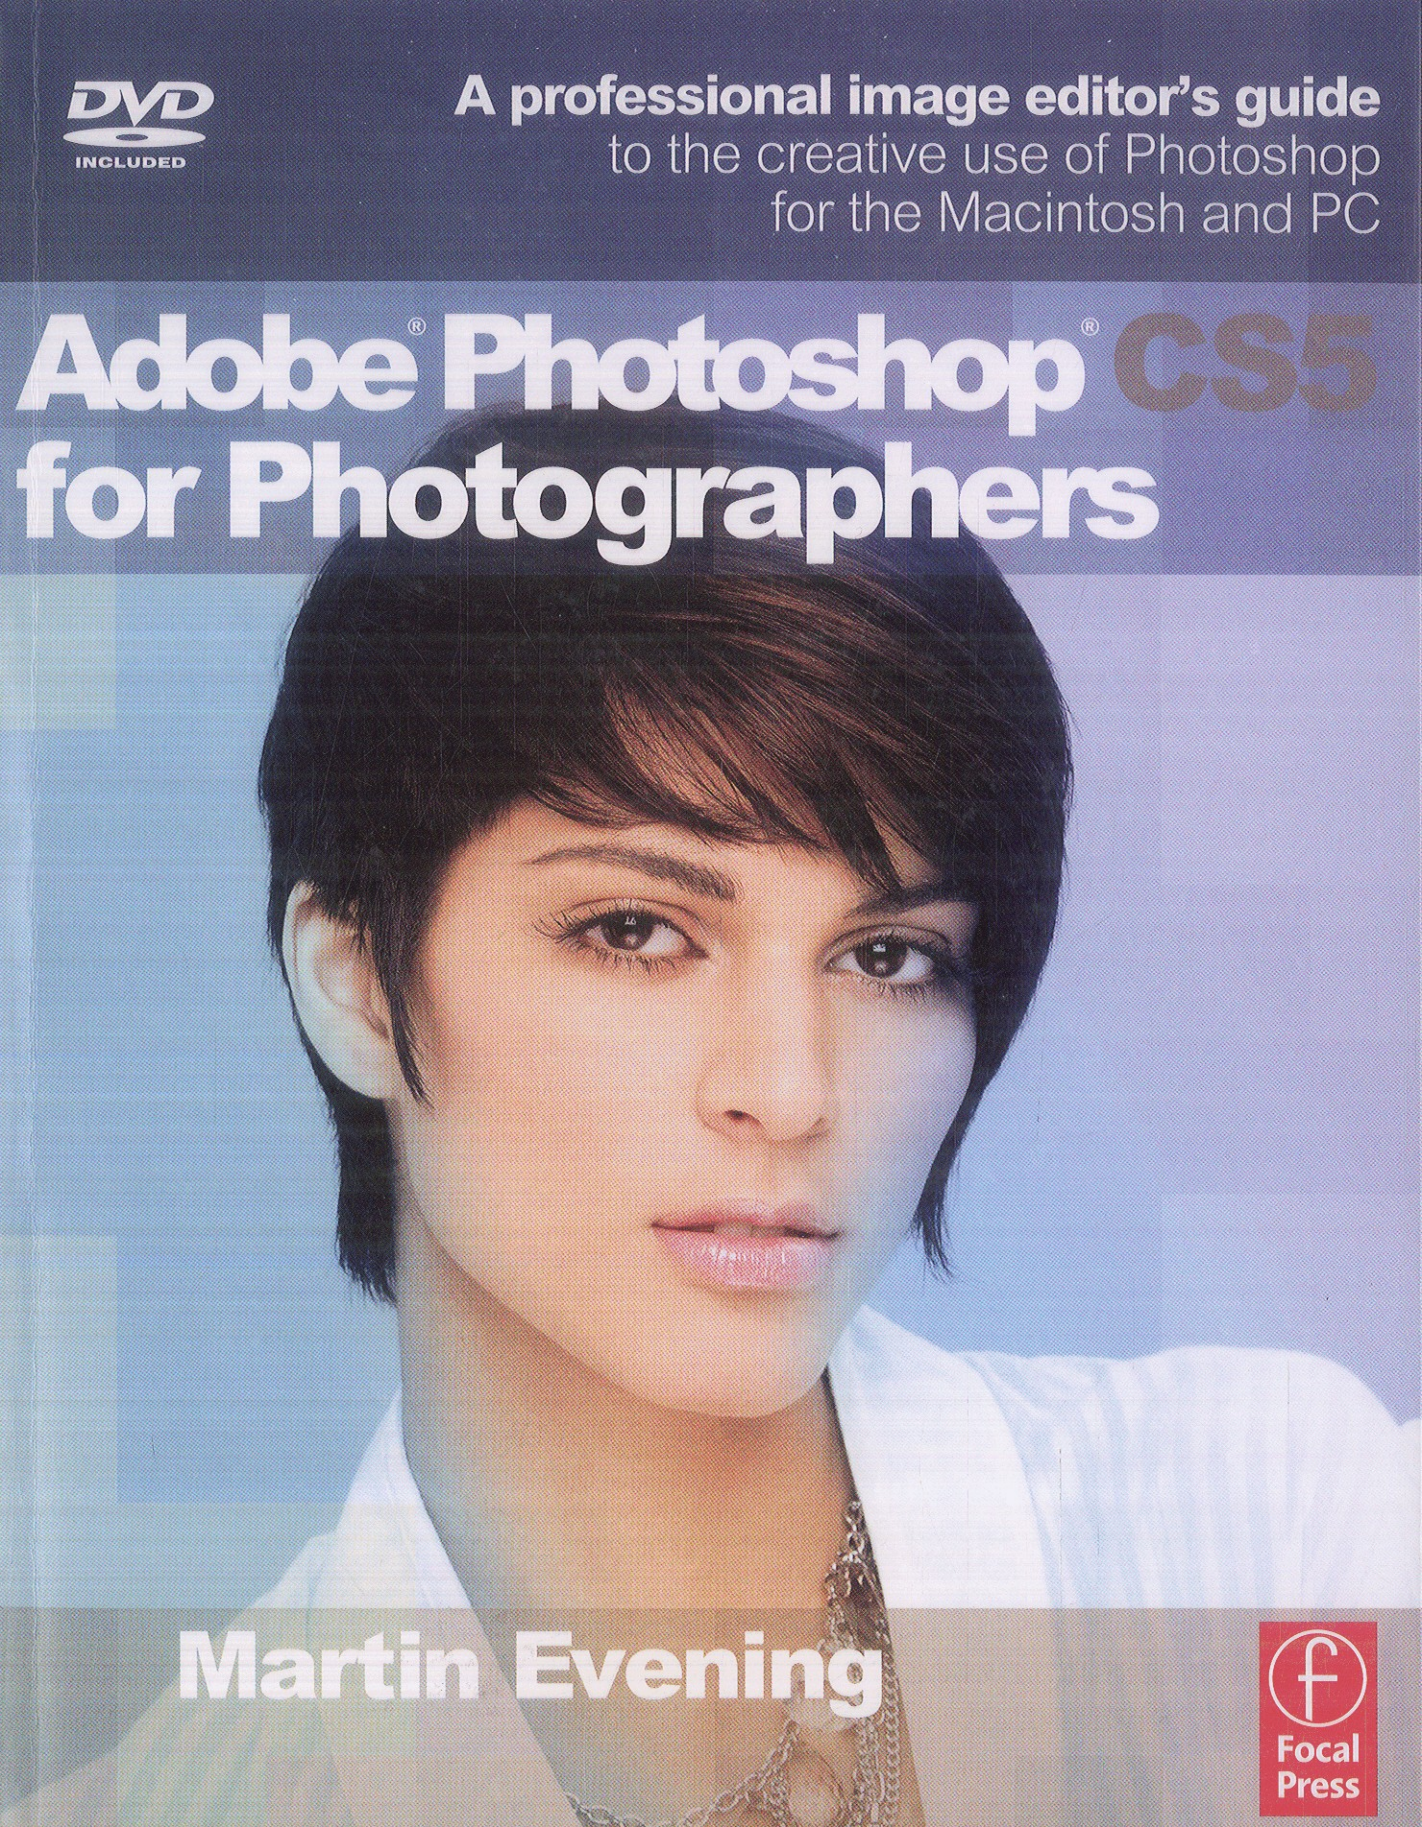
DVD INCLUDED

A professional image editor's guide to the creative use of Photoshop for the Macintosh and PC

Adobe® Photoshop® CS5 for Photographers



Martin Evening

Focal Press

Contents

Foreword by John Nack xix
Introduction xx
Book and DVD contents xxi
Acknowledgments xxii

1 Photoshop Fundamentals 1

An overview of the book chapters 2
How to use this book 4
Photoshop installation 7
The Photoshop interface 8
Tabbed document windows 10
Managing document windows 12
Image document window details 14
Dynamic zoom views 14
Title bar proxy icons (Macintosh) 15
Rulers, Guides & Grid 16
'Snap to' behavior 17
Pixel Grid view 17
Application bar 18
The Photoshop panels 19
Panel arrangements and docking 20
Panel positions remembered in workspaces 21
Customizing the menu options 22
Customizing the keyboard shortcuts 23
Task-based workspaces 24
Working with a dual display setup 26
Adobe™ Configurator 2 application 27
Extensions panels 28
Photoshop CS5 Tools panel 30
Options bar 32
Tool Presets panel 33
Selection tools 34
Color Range 36
Modifier keys 38
Painting tools 40
On-the-fly brush changes 41
On-screen brush adjustments 42
Brush panel 43
Brush panel options 44
Pressure sensitive control 44
Brush tool presets 45
Mixer brush 45
Bristle shapes 47

Tools for filling 48
Tools for drawing 49
Image editing tools 50
Working with Layers 52
Automating Photoshop 53
Move tool 54
Layer selection using the move tool 54
Navigation and information tools 56
Flick panning 57
Bird's-eye view 57
Rotate view tool 58
Notes tool 59
Screen view modes 60
Preset Manager 61
History 62
The History panel 62
History settings and memory usage 63
History brush 65
Use of history versus undo 65
Snapshots 66
Non-linear history 67
When files won't open 68
Save often 69
Using Save As... to save images 70
File formats 71
Photoshop native file format 71
Smart PSD files 71
PSB (Large Document Format) 72
TIFF (Tagged Image File Format) 72
Pixel order 73
Byte order 74
Save Image Pyramid 74
TIFF compression options 74
Flattened TIFFs 74
Photoshop PDF 75
PDF security 75
Adobe Bridge CS5 76
The Bridge interface 78
Custom workspaces in Bridge 79
Slideshows 79
Mini Bridge 81
Opening files from Bridge 82
Opening photos from Bridge via Camera Raw 82
What's new in Camera Raw 6.0 83
Easter eggs 84

2 Configuring Photoshop 85

What you will need ... 86
Macintosh ... 86
Windows ... 86
The ideal computer setup ... 87
Choosing a display ... 88
Wide dynamic range displays ... 89
Video cards ... 89
Display calibration and profiling ... 90
Calibration hardware ... 90
The calibration/profiling procedure ... 92
White point ... 92
Gamma ... 93
Luminance ... 94
Device calibration and measurement ... 94
The profiling process ... 94
Do you want good color or just OK color? ... 96
Color management settings ... 97
Synchronizing the Color Settings ... 98
Extras ... 99
Backing up your image data ... 99
Photoshop preferences ... 100
General preferences ... 101
Interface preferences ... 103
File Handling preferences ... 105
File compatibility ... 106
Camera Raw preferences ... 106
TIFF and PSD options ... 108
Recent File list ... 109
Performance preferences ... 109
Memory usage ... 110
32-bit and 64-bit RAM limits ... 111
History & Cache ... 112
Scratch disks ... 113
Scratch disk performance ... 114
Interface connection ... 114
Hard drive speed ... 115
RAID setups ... 115
RAID 0 (striping) ... 116
RAID 1 (mirroring) ... 116
Internal RAID ... 116
External RAID ... 117
GPU settings ... 117
Cursors preferences ... 118

Transparency & Gamut ... 119
Color Picker gamut warning ... 119
Units & Rulers ... 120
Guides, Grid & Slices ... 122
Plug-ins ... 123
Type preferences ... 124

3 Camera Raw Image Processing 125

Camera Raw advantages ... 126
The new Camera Raw workflow ... 126
Does the order matter? ... 128
Raw capture ... 128
JPEG capture ... 129
Editing JPEGs and TIFFs in Camera Raw ... 129
Alternative Raw processors ... 130
A basic Camera Raw/Photoshop workflow ... 131
A Lightroom/Photoshop workflow ... 134
Camera Raw support ... 136
DNG compatibility ... 136
Getting raw images into Photoshop ... 137
Image ingestion ... 137
Importing images via Photo Downloader ... 138
Tethered shoot imports ... 143
Tethered shooting via Canon EOS Utility ... 144
Importing images via other programs ... 147
Lightroom imports ... 148
Importing photos via Lightroom 3 ... 149
Basic Camera Raw image editing ... 152
Working with Bridge and Camera Raw ... 152
General controls for single file opening ... 154
Full size window view ... 156
General controls for multiple file opening ... 156
Opening raw files as Smart Objects ... 158
Saving photos from Camera Raw ... 162
The histogram display ... 163
Image browsing via Camera Raw ... 164
Camera Raw preferences ... 166
Auto tone corrections ... 167
Camera-specific default settings ... 167
Camera Raw cache size ... 169
DNG file handling ... 169
Sharing XMP metadata ... 170
Opening TIFF and JPEGs ... 170
Process Versions ... 171
Camera Raw cropping and straightening ... 171

How to crop and straighten 172
Basic panel controls 174
White balance 174
Using the white balance tool 175
The tone adjustment controls 176
Exposure 176
Recovery 176
Blacks 176
Fill Light 177
Suggested order for the basic adjustments 177
Basic image adjustment procedure 178
Preserving the highlight detail 180
When to clip the highlights 182
How to clip the shadows 183
Shadow levels after a conversion 184
Digital exposure 186
Brightness 188
Contrast 190
Clarity 191
Negative Clarity 192
Vibrance and Saturation 194
Tone Curve panel 196
Correcting a high contrast image 198
HSL/Grayscale panel 200
Recovering out-of-gamut colors 201
Adjusting the Hue and Saturation 202
Lens Corrections panel 204
Defringe 205
Lens Vignetting control 206
Effects panel 208
Post Crop Vignetting control 208
Post Crop Vignetting style options 210
Highlights slider 212
Adding Grain effects 214
Camera Calibration panel 216
New Camera Raw profiles 216
Camera 'look settings' profiles 217
Custom camera profile calibrations 218
DNG Profile Editor 220
Spot removal tool 224
Synchronized spotting with Camera Raw 225
Red eye removal 226
Localized adjustments 227
Adjustment brush 227
Initial Adjustment brush options 228

Brush settings ... 228
Adding a new brush effect ... 229
Editing brush adjustments ... 230
Previewing the brush stroke areas ... 230
Auto masking ... 232
Hand-coloring in Color mode ... 234
Graduated filter tool ... 236
Angled gradients ... 239
Adding clarity and contrast ... 239
Camera Raw settings menu ... 241
Export settings to XMP ... 242
Update DNG previews ... 242
Load Settings... Save Settings... ... 242
Camera Raw defaults ... 243
Presets panel ... 243
Saving and applying presets ... 243
Copying and synchronizing settings ... 245
Working with Snapshots ... 246
DNG file format ... 248
The DNG solution ... 248
DNG compatibility ... 249
DNG Converter ... 250

4 Sharpening and Noise Reduction 251

When to sharpen ... 252
One-step sharpening ... 252
Capture sharpening ... 252
Capture sharpening for scanned images ... 253
Process Versions ... 254
Improvements to Camera Raw sharpening ... 254
Sample sharpening image ... 257
Detail panel ... 257
Sharpening defaults ... 258
The sharpening effect sliders ... 258
Amount slider ... 259
Radius slider ... 260
The suppression controls ... 261
Detail slider ... 261
Interpreting the grayscale previews ... 263
Radius and Detail grayscale preview ... 263
Masking slider ... 264
Masking slider example ... 265
Some real world sharpening examples ... 266
Sharpening portrait images ... 266

Sharpening landscape images 267
Sharpening a fine-detailed image 268
How to save sharpening settings as presets 269
Capture sharpening roundup 270
Selective sharpening in Camera Raw 271
Negative sharpening 271
Extending the sharpening limits 271
Noise removal in Camera Raw 274
Detail panel noise reduction sliders 274
Localized sharpening in Photoshop 278
Smart Sharpen filter 278
Basic Smart Sharpen mode 278
Advanced Smart Sharpen mode 280
Removing Motion Blur 281
Creating a depth of field brush 282
Removing noise in Photoshop 285
Third-party noise reduction 285
Reduce Noise filter 286
Advanced mode noise reduction 287
JPEG noise removal 288
Saving the Reduce Noise settings 288

8 Image Editing Essentials 289

Pixels versus vectors 290
Photoshop as a vector program 291
Image resolution terminology 291
ppi: pixels per inch 291
lpi: lines per inch 291
dpi: dots per inch 292
Desktop printer resolution 292
Choosing the right pixel resolution for print 293
The optimum number of pixels 293
Repro considerations 294
The relationship between ppi and lpi 295
But we always use 300 ppi! 296
Creating a new document 297
Altering the image size 298
Image interpolation 299
Nearest Neighbor 299
Bilinear interpolation 299
Bicubic interpolation 299
The advanced bicubic interpolation methods 300
Bicubic Smoother 300
Bicubic Sharper 300

Step interpolation 300
Basic pixel editing 302
The image histogram 302
Basic Levels editing and the histogram 305
Bit depth 306
8-bit versus 16-bit image editing 307
Comparing 8-bit with 16-bit editing 308
16-bit and color space selection 309
The RGB edit space and color gamut 310
Direct image adjustments 312
Adjustment layers and Adjustments panel 312
Adding an adjustment layer procedure 313
Keeping the focus on the panel fields 313
Adjustments panel controls 315
Levels adjustments 316
Analyzing the histogram 316
Using Levels to improve the contrast 318
Curves adjustment layers 320
On-image Curves editing 322
Direct Curves dialog 324
Saving and loading curves 324
Using Curves in place of Levels 326
Output levels adjustments 326
Using Curves to improve contrast 328
Curves luminance and saturation 328
Luminosity and Color blending modes 330
Curve presets 332
Locking down portions of the curve 334
Creating a dual contrast curve 335
Brightness and Contrast 336
Correcting shadow and highlight detail 338
Amount 338
Tonal Width 338
Radius 338
Color Correction 341
Midtone Contrast 341
Color corrections 342
Basic color balancing with Levels 343
Auto image adjustments 344
Color corrections using Levels or Curves 346
Precise color corrections using Curves 348
Hue/Saturation 352
Vibrance 355
Photo Filter 356

Multiple adjustment layers 357
Adjustment layer masks 358
Masks panel controls 358
Editing a mask using the Masks panel 360
Color Range adjustment layer masking 362
Blend mode adjustments 364
Cropping 366
Selection-based cropping 368
Perspective cropping 369
Image rotation 370
Canvas size 371
Content-aware scaling 372
How to protect skin tones 374
How to remove objects from a scene 375
Big data 376

6 Black and White 377

Converting color to black and white 378
The dumb black and white conversions 378
Smarter black and white conversions 378
Black & White adjustment presets 381
Split color toning with Color Balance 382
Curves adjustment split toning 384
Camera Raw black and white conversions 386
Pros and cons of the Camera Raw approach 387
Camera Raw Split Toning panel 388
Camera Raw color image split toning 389
Black and white output 390

7 Extending the Dynamic Range 391

Multiple raw conversions 392
Place-A-Matic script 395
High dynamic range imaging 396
HDR essentials 396
Fuji Super CCD 397
Alternative approaches 398
Bracketed exposures 398
Displaying deep-bit color 399
Capturing a complete scenic tonal range 400
HDR shooting tips 401
HDR file formats 402
How to fool Merge to HDR 402
Merge to HDR Pro 404

Tone mapping HDR images ... 406
Local Adaptation ... 406
Removing ghosts ... 408
How to avoid the 'HDR' look ... 408
Manual tone mapping ... 414

8 Image Retouching 415

Basic cloning methods ... 416
Clone stamp tool ... 416
Clone stamp brush settings ... 416
Healing brush ... 418
Choosing an appropriate alignment mode ... 420
Clone Source panel and clone overlays ... 420
Upside-down cloning ... 422
Better healing edges ... 424
Spot healing brush ... 426
Clone and healing sample options ... 427
Patch tool ... 428
Spot healing in Content-Aware mode ... 430
Content-Aware filling ... 432
Alternative history brush spotting technique ... 434
Flat field calibration ... 436
Portrait retouching ... 438
Beauty retouching ... 440
Liquify ... 442
Liquify tool controls ... 444
Reconstructions ... 444
Mask options ... 445
View options ... 446
Saving the mesh ... 446
Straightening a fringe with Liquify ... 448

9 Layers, Selections and Masking 451

Selections and channels ... 452
Selections ... 452
Quick Mask mode ... 454
Creating an image selection ... 455
Modifying selections ... 456
Alpha channels ... 456
Adding to an image selection ... 457
Selections, alpha channels and masks ... 459
Anti-aliasing ... 460
Feathering ... 460

Layers 461
Layer basics 461
Image layers 461
Shape layers 462
Text layers 462
Adjustment layers 462
Layers panel controls 462
Layer styles 465
Adding layer masks 465
Viewing in Mask or Rubylith mode 466
Removing a layer mask 466
Adding an empty image layer mask 466
Creating a layer mask from Transparency 468
Masks panel 470
Refine Edge command 471
View modes 473
Edge detection 473
Adjust Edge section 474
Refine Edge output 475
Working with the quick selection tool 476
Combining a quick selection with Refine Edge 478
Color Range masking 484
Layer blending modes 488
Advanced Blending options 494
Knockout options 494
Blend Interior effects 494
Creating panoramas with Photomerge 496
Depth of field blending 498
Working with multiple layers 500
Color coding layers 500
Layer group management 500
Nested group layer compatibility 501
Managing layers in a group 502
Clipping masks 503
Ways to create a clipping mask 503
Masking layers within a group 504
Clipping layers and adjustment layers 504
Layer linking 506
Selecting all layers 506
Layer selection using the move tool 507
Layer mask linking 508
Layer locking 509
Lock Transparent Pixels 509
Lock Image Pixels 509
Lock Layer Position 509
Lock All 509

Transform commands 510
Repeat Transforms 512
Numeric Transforms 513
Transforming selections and paths 513
Transforms and alignment 514
Using transforms to create a kaleidoscope pattern 515
Warp transforms 518
Puppet Warp 520
Pin rotation 521
Pin depth 522
Multiple pin selection 522
Smart Objects 522
Drag and drop a document to a layer 526
Smart Objects 528
Photoshop paths 532
Path modes 533
Drawing paths with the pen tool 533
Pen path drawing tutorial 533
Pen tool shortcuts summary 535
Rubber Band mode 535
Vector masks 536
Isolating an object from the background 537

10 Essential Filters for Photo Editing 539

Filter essentials 540
16-bit filters 540
Blur filters 540
Adding a Radial Blur or Spin Blur to a photo 540
Average Blur 542
Gaussian Blur 542
Motion Blur 542
Surface Blur 545
Box Blur 545
Shape Blur 545
Lens Blur 546
Depth of field effects 546
Applying Lens Blur to a composite image 548
Smart Filters 550
Applying Smart Filters to pixel layers 551
Ragged borders with the Refine Edge adjustment 556
Lens Corrections 558
Custom lens corrections 558
Selecting the most appropriate profiles 562
Adobe Lens Profile Creator 563
Interpolating between lens profiles 563
Lens Correction profiles and Auto-Align 563
Filter Gallery 566

11 Image Management 567

The Bridge solution ... 568
Configuring the General preferences ... 568
Launching Bridge ... 570
Rotating the thumbnails and preview ... 570
Arranging the Bridge contents ... 572
Customizing the panels and content area ... 574
Bridge workspace examples ... 576
Working with multiple windows ... 578
Slideshow mode ... 579
Thumbnail settings ... 580
Cache management ... 581
Advanced and miscellaneous preferences ... 583
One-click previews ... 584
Deleting contents ... 584
Stacking images ... 584
Auto-stacking ... 586
Bridge panels ... 588
Folders panel ... 588
Favorites panel ... 588
Preview panel ... 589
Review mode ... 590
Managing images in Bridge ... 591
Image rating and labeling ... 592
Sorting images in Bridge ... 594
Filter panel ... 595
Metadata panel ... 596
Image metadata ... 597
File Info metadata ... 597
IPTC Extensions ... 598
Other types of metadata ... 600
Future uses of metadata ... 602
Edit history log ... 603
Hidden metadata ... 603
Keywording ... 604
Keywords panel ... 605
Image searches ... 606
Collections panel ... 608
Smart collections ... 609
Output to Web and PDF ... 610
Web output ... 611
Output gallery styles ... 612
Output gallery settings ... 612
Output preferences ... 616
PDF Output ... 617
The PDF Output panels ... 618

PDF Output options 619
Bridge automation 620
Renaming images 621
Renaming schemes 622
Undoing a Batch Rename 622
Applying Camera Raw settings 622
Mini Bridge 623
The Mini Bridge interface 623
View options 624
Filter and Sort order menus 628
Navigator and Preview pods 628
Searching images 630

12 Color Management 631

The need for color management 632
The way things were 632
RGB devices 634
Why not all RGB spaces are the same 635
The versatility of RGB 635
Output-centric color management 636
Profiled color management 637
Color Management Modules 638
The Profile Connection Space 638
Choosing an ideal RGB workspace 640
Apple RGB 640
sRGB IEC-61966-2.1 640
ColorMatch RGB 641
Adobe RGB (1998) 641
ProPhoto RGB 641
Profiling the display 642
Calibration and profiling 643
Profiling the input 644
Profiling the output 645
Photoshop color management interface 647
The Color Settings 647
Color management policies 648
Preserve embedded profiles 648
Profile mismatches and missing profiles 649
Convert to Working space 649
Color Management Off 650
Profile conversions 651
Convert to Profile 652
Assign Profile 653
Profile mismatches when pasting 654
Saving a Color Setting 656

Reducing the opportunities for error 657
Working with Grayscale 660
Advanced Color Settings 661
Conversion options and rendering intents 662
Black Point Compensation 662
Use Dither (8-bit per channel images) 662
Blend RGB colors using gamma 663
Custom RGB and workspace gamma 664
RGB to CMYK 665
CMYK setup 665
Creating a custom CMYK setting 665
Ink Colors 666
Dot gain 667
Gray Component Replacement (GCR) 668
Black generation 668
Undercolor Addition (UCA) 669
Undercolor Removal (UCR) 669
Choosing a suitable RGB workspace 669
Rendering intents 670
Perceptual 670
Saturation (Graphics) 670
Relative Colorimetric 671
Absolute Colorimetric 671
Fine-tuning the CMYK end points 674
CMYK to CMYK 676
Lab color 676
Info panel 677
Keeping it simple 678

13 Print Output 679

Print sharpening 680
Judge the print, not the display 681
High Pass filter edge sharpening technique 681
Soft proof before printing 684
Making a print 686
Photoshop Print dialog 687
Printer selection and print scaling 688
Output settings 689
Color Management 690
Proof Setup in the Print dialog 693
Proof print or aim print? 693
Configuring the Print Settings (Mac and PC) 694
Saving the print presets 696
Print output scripting 696
Ensuring your prints are centered 697
Custom print profiles 698

14 Output for the Web 699

Sending images over the Internet 700
Email attachments 700
Uploading to a server 700
FTP software 701
File formats for the Web 703
JPEG 703
Choosing the right compression type 706
TIFF compression for FTP transfer 707
GIF 708
PNG (Portable Network Graphics) 708
Save for Web & Devices 709
Web browser previews 710
Optimize image settings 710
Save options 711
GIF Save for Web & Devices 712
Zoomify™ Export 714

15 Automating Photoshop 715

Working with actions 716
Playing an action 716
Recording actions 717
Troubleshooting actions 719
Limitations when recording actions 720
Actions only record changed settings 720
Background layers and bit depth 720
Action recording tips 721
Inserting menu items 721
Batch processing actions 722
Creating a droplet 724
Image Processor 725
Scripting 726
Script Event Manager 726
Automated plug-ins 727
Crop and Straighten Photos 727
Fit Image 727

Index 728

Remote profiling for RGB printers 744
Consultancy services 744
Pixel Genius PhotoKit plug-in 746
