

SECOND EDITION

IMAGE ANALYSIS, CLASSIFICATION, and CHANGE DETECTION in REMOTE SENSING

With Algorithms for ENVI/IDL

Morton J. Canty

CRC Press
Taylor & Francis Group

Contents

Preface to the Second Edition.....	xi
Preface to the First Edition	xiii
1. Images, Arrays, and Matrices	1
1.1 Multispectral Satellite Images	2
1.2 Algebra of Vectors and Matrices	5
1.2.1 Elementary Properties	6
1.2.2 Square Matrices	8
1.2.3 Singular Matrices	10
1.2.4 Symmetric, Positive Definite Matrices	11
1.2.5 Linear Dependence and Vector Spaces	12
1.3 Eigenvalues and Eigenvectors	13
1.4 Singular Value Decomposition	16
1.5 Vector Derivatives	18
1.6 Finding Minima and Maxima	19
1.7 Exercises	25
2. Image Statistics	27
2.1 Random Variables	27
2.1.1 Discrete Random Variables	28
2.1.2 Continuous Random Variables	29
2.1.3 Normal Distribution	32
2.2 Random Vectors	34
2.3 Parameter Estimation	39
2.3.1 Sampling a Distribution	39
2.3.2 Interval Estimation	42
2.3.3 Provisional Means	43
2.4 Hypothesis Testing and Sample Distribution Functions	44
2.4.1 Chi-Square Distribution	48
2.4.2 Student- t Distribution	49
2.4.3 F -Distribution	50
2.5 Conditional Probabilities, Bayes' Theorem, and Classification	51
2.6 Ordinary Linear Regression	55
2.6.1 One Independent Variable	55
2.6.2 More Than One Independent Variable	57
2.6.3 Regularization, Duality, and the Gram Matrix	60
2.7 Entropy and Information	62
2.7.1 Kullback–Leibler Divergence	64
2.7.2 Mutual Information	64
2.8 Exercises	65

3. Transformations	69
3.1 Discrete Fourier Transform	69
3.2 Discrete Wavelet Transform	73
3.2.1 Haar Wavelets	75
3.2.2 Image Compression	79
3.2.3 Multiresolution Analysis	82
3.2.3.1 Dilation Equation and Refinement Coefficients	83
3.2.3.2 Cascade Algorithm	84
3.2.3.3 Mother Wavelet	85
3.2.3.4 Daubechies D4 Scaling Function	87
3.3 Principal Components	89
3.3.1 Primal Solution	91
3.3.2 Dual Solution	91
3.4 Minimum Noise Fraction	93
3.4.1 Additive Noise	93
3.4.2 Minimum Noise Fraction Transformation in ENVI	96
3.5 Spatial Correlation	98
3.5.1 Maximum Autocorrelation Factor	98
3.5.2 Noise Estimation	101
3.6 Exercises	103
4. Filters, Kernels, and Fields	107
4.1 Convolution Theorem	107
4.2 Linear Filters	111
4.3 Wavelets and Filter Banks	113
4.3.1 One-Dimensional Arrays	115
4.3.2 Two-Dimensional Arrays	120
4.4 Kernel Methods	122
4.4.1 Valid Kernels	124
4.4.2 Kernel PCA	127
4.5 Gibbs–Markov Random Fields	130
4.6 Exercises	135
5. Image Enhancement and Correction	139
5.1 Lookup Tables and Histogram Functions	139
5.2 Filtering and Feature Extraction	141
5.2.1 Edge Detection	141
5.2.2 Invariant Moments	145
5.3 Panchromatic Sharpening	150
5.3.1 HSV Fusion	151
5.3.2 Brovey Fusion	152
5.3.3 PCA Fusion	153
5.3.4 DWT Fusion	154
5.3.5 <i>À Trous</i> Fusion	155

5.3.6	Quality Index	157
5.4	Topographic Correction	159
5.4.1	Rotation, Scaling, and Translation	159
5.4.2	Imaging Transformations	160
5.4.3	Camera Models and RFM Approximations	161
5.4.4	Stereo Imaging and Digital Elevation Models	163
5.4.5	Slope and Aspect	167
5.4.6	Illumination Correction	170
5.5	Image-Image Registration	175
5.5.1	Frequency-Domain Registration	176
5.5.2	Feature Matching	177
5.5.2.1	High-Pass Filtering	178
5.5.2.2	Closed Contours	179
5.5.2.3	Chain Codes and Moments	179
5.5.2.4	Contour Matching	180
5.5.2.5	Consistency Check	180
5.5.2.6	Implementation in IDL	181
5.5.3	Resampling and Warping	182
5.6	Exercises	183
6	Supervised Classification: Part 1	187
6.1	Maximum <i>a Posteriori</i> Probability	188
6.2	Training Data and Separability	189
6.3	Maximum Likelihood Classification	193
6.3.1	ENVI's Maximum Likelihood Classifier	195
6.3.2	Modified Maximum Likelihood Classifier	196
6.4	Gaussian Kernel Classification	198
6.5	Neural Networks	202
6.5.1	Neural Network Classifier	207
6.5.2	Cost Functions	209
6.5.3	Backpropagation	212
6.5.4	Overfitting and Generalization	216
6.6	Support Vector Machines	219
6.6.1	Linearly Separable Classes	220
6.6.1.1	Primal Formulation	221
6.6.1.2	Dual Formulation	222
6.6.1.3	Quadratic Programming and Support Vectors	224
6.6.2	Overlapping Classes	225
6.6.3	Solution with Sequential Minimal Optimization	227
6.6.4	Multiclass SVMs	228
6.6.5	Kernel Substitution	230
6.6.6	Modified SVM Classifier	231
6.7	Exercises	232

7. Supervised Classification: Part 2	237
7.1 Postprocessing	237
7.1.1 Majority Filtering	238
7.1.2 Probabilistic Label Relaxation	238
7.2 Evaluation and Comparison of Classification Accuracy	240
7.2.1 Accuracy Assessment	241
7.2.2 Model Comparison	246
7.3 Adaptive Boosting	250
7.4 Hyperspectral Analysis	257
7.4.1 Spectral Mixture Modeling	259
7.4.2 Unconstrained Linear Unmixing	261
7.4.3 Intrinsic End-Members and Pixel Purity	261
7.5 Exercises	263
8. Unsupervised Classification	267
8.1 Simple Cost Functions	268
8.2 Algorithms That Minimize the Simple Cost Functions	270
8.2.1 K-Means Clustering	271
8.2.2 Kernel K-Means Clustering	271
8.2.3 Extended K-Means Clustering	273
8.2.4 Agglomerative Hierarchical Clustering	278
8.2.5 Fuzzy K-Means Clustering	280
8.3 Gaussian Mixture Clustering	282
8.3.1 Expectation Maximization	283
8.3.2 Simulated Annealing	286
8.3.3 Partition Density	286
8.3.4 Implementation Notes	287
8.4 Including Spatial Information	289
8.4.1 Multiresolution Clustering	289
8.4.2 Spatial Clustering	289
8.5 Benchmark	292
8.6 Kohonen Self-Organizing Map	295
8.7 Image Segmentation	297
8.7.1 Segmenting a Classified Image	299
8.7.2 Object-Based Classification	300
8.7.3 Mean Shift	303
8.8 Exercises	304
9. Change Detection	311
9.1 Algebraic Methods	311
9.2 Postclassification Comparison	313
9.3 Principal Components Analysis	313
9.3.1 Iterated PCA	313
9.3.2 Kernel PCA	314
9.4 Multivariate Alteration Detection	319

9.4.1	Canonical Correlation Analysis.....	320
9.4.2	Orthogonality Properties	322
9.4.3	Scale Invariance	324
9.4.4	Iteratively Reweighted MAD	325
9.4.5	Correlation with the Original Observations	327
9.4.6	Regularization	328
9.4.7	Postprocessing	330
9.5	Decision Thresholds and Unsupervised Classification of Changes	331
9.6	Radiometric Normalization.....	336
9.7	Exercises	338
Appendix A: Mathematical Tools.....		343
A.1	Cholesky Decomposition	343
A.2	Vector and Inner Product Spaces	345
A.3	Least Squares Procedures	347
A.3.1	Recursive Linear Regression	347
A.3.2	Orthogonal Linear Regression	350
Appendix B: Efficient Neural Network Training Algorithms.....		355
B.1	Hessian Matrix	355
B.1.1	R -Operator	356
B.1.1.1	Determination of $R_v\{\mathbf{n}\}$	358
B.1.1.2	Determination of $R_v\{\delta^o\}$	359
B.1.1.3	Determination of $R_v\{\delta^h\}$	359
B.1.2	Calculating the Hessian	360
B.2	Scaled Conjugate Gradient Training	360
B.2.1	Conjugate Directions	362
B.2.2	Minimizing a Quadratic Function	363
B.2.3	Algorithm	366
B.3	Kalman Filter Training	368
B.3.1	Linearization.....	371
B.3.2	Algorithm	372
B.4	A Neural Network Classifier with Hybrid Training.....	379
Appendix C: ENVI Extensions in IDL		381
C.1	Installation	381
C.2	Extensions	382
C.2.1	Kernel Principal Components Analysis	384
C.2.2	Discrete Wavelet Transform Fusion	386
C.2.3	<i>À Trous</i> Wavelet Transform Fusion	388
C.2.4	Quality Index.....	389
C.2.5	Calculating Heights of Man-Made Structures in High-Resolution Imagery	390
C.2.6	Illumination Correction	392

C.2.7	Image Registration	393
C.2.8	Maximum Likelihood Classification.....	394
C.2.9	Gaussian Kernel Classification	396
C.2.10	Neural Network Classification	397
C.2.11	Support Vector Machine Classification	399
C.2.12	Probabilistic Label Relaxation	399
C.2.13	Classifier Evaluation and Comparison.....	401
C.2.14	Adaptive Boosting a Neural Network Classifier	402
C.2.15	Kernel K-Means Clustering	404
C.2.16	Agglomerative Hierarchical Clustering.....	405
C.2.17	Fuzzy K-Means Clustering.....	406
C.2.18	Gaussian Mixture Clustering	407
C.2.19	Kohonen Self-Organizing Map	409
C.2.20	Classified Image Segmentation.....	410
C.2.21	Mean Shift Segmentation.....	411
C.2.22	Multivariate Alteration Detection.....	412
C.2.23	Viewing Changes	415
C.2.24	Radiometric Normalization	416
Appendix D: Mathematical Notation		419
References.....		421
