

MARY JO BOYER

MATH FOR NURSES

**A Pocket Guide to
Dosage Calculation and
Drug Preparation**

7th
Edition

Wolters Kluwer
Health

Lippincott
Williams & Wilkins

- 4 Percent, Ratio, and Proportion 66**
Percents 67
Fractions and Percents 68
Decimals and Percents 72
Ratio and Proportion 75
Use of Ratio and Proportion: Solving for x 78
End of Unit 1 Review 87

UNIT 2

Measurement Systems 95

- 5 The Metric System 97**
Common Rules for Metric Notations 98
Meter—Length 99
Converting within the System 100
Liter—Volume 102
Gram—Weight 103
- 6 The Apothecary System and Household Measurements 107**
The Apothecary System 108
Household Measurements 110
Converting Within the Same System 115
- 7 Approximate Equivalents and System Conversions 120**
Dosage Problems for Medications: Converting
Between Systems 123
End of Unit 2 Review 127

UNIT 3

Dosage Calculations 133

- 8 Medication Labels 136**
Reading and Interpreting a Drug Label 137

- 9 Oral Dosage Calculations 147**
 - Calculating Oral Dosages 148
 - Dosage Calculations for Medications in the Same System and the Same Unit of Measurement 152
 - Dosage Calculations for Medications in the Same System but Having Different Units of Measurement 155
 - Dosage Calculations for Medications in Different Systems 157
- 10 Parenteral Dosage Calculations 167**
 - Packaging and Types of Syringes 168
 - Dosage Calculations for Medications in the Same System and the Same Unit of Measurement 171
 - Dosage Calculations for Medications in the Same System but Having Different Units of Measurement 174
 - Dosage Calculations for Medications in Different Systems 176
 - Penicillin 178
- 11 Intravenous Therapies 184**
 - Electronic Infusion Devices 187
 - Intravenous Fluids and Flow Rate 188
 - Intravenous Flow Rate 189
 - Calculating Infusion Time 191
 - Calculating Milliliters Per Hour for Manual or Electronic Regulation 193
 - Calculating Milliliters Per Hour for Manual or Electronic Regulation When the Infusion Is *Less Than 1 Hour* 194
 - Calculating Drops Per Minute 195
 - Constant Factors 200
- 12 Intravenous Therapies: Critical-Care Applications 207**
 - Calculating Drug Dosages and Flow Rates Using Either Ratio and Proportion or the Formula Method 208

Calculating Drug Dosages and Flow Rates Using Dimensional Analysis	213
Calculating Flow Rates and Drug Dosage Using Constant Factors	215
13 Insulin	223
Types of Insulin	224
Insulin Preparations	225
Insulin Syringes	227
Insulin Administration	228
Mixing Two Types of Insulin	229
14 Heparin Preparation and Dosage Calculations	237
Calculate Heparin for Subcutaneous Injection	239
Calculate Heparin for Intravenous Infusion	242
Heparin Flow Rate: Calculate Milliliters Per Hour	245
Heparin Flow Rate: Calculate Units Per Hour	247
Heparin Flow Rate: Calculating Weight-Based Heparin	249
15 Pediatric Dosage Calculations and Intravenous Therapy	255
Converting Weight in Pounds to Kilograms	257
Calculate Oral and Parenteral Dosages	258
Calculate Dosages Using Rule Based on Age	262
Calculate Pediatric Flow Rate	273
Calculate Intravenous Medication Dosages	274
16 Solutions	285
Reconstitution: Preparing Injectable Medications Packaged as Powders	287
Preparing an Oral or Enteral Feeding	291
Preparing Topical and Irrigating Solutions	292
End of Unit 3 Review	294
Answers	303
Appendices	
A. Roman Numerals	329
B. Rounding Off Decimals	332

xvi Contents

- C. Abbreviations and Symbols for Drug Preparation and Administration 334
- D. Intradermal Injections 338
- E. Subcutaneous Injections 340
- F. Intramuscular Injections 342
- G. Z-Track Injections 344
- H. Pediatric Intramuscular Injections 347
- I. Nursing Concerns for Pediatric Drug Administration 349
- J. Nursing Considerations for Critical-Care Drug Administration 351
- K. Nursing Concerns for Geriatric Drug Administration 353
- L. Needleless Intravenous System 356
- M. Temperature Conversions: Fahrenheit and Celsius Scales 358

Index 361
