BIOMEDICAL ENGINEERING

Bridging Medicine and Technology

W. MARK SALTZMAN

Contents

Preface	page xiii
Acknowledgments	xvii
Abbreviations and Acronyms	xix

1 Introduction: What Is Biomedical Engineering?	1
1.1 Prelude	1
1.2 Engineering in modern medicine	4
1.3 What is biomedical engineering?	6
1.4 Biomedical engineering in the future	20
1.5 How to use this book	22
PROFILE OF THE AUTHOR: W. MARK SALTZMAN	24

PART 1. MOLECULAR AND CELLULAR PRINCIPLES

2 Biomolecular Principles	31
2.1 Prelude	31
2.2 Bonding between atoms and molecules	33
2.3 Water: The medium of life	36
2.4 Biochemical energetics	38
2.5 Importance of pH	44
2.6 Macromolecules: Polymers of biological importance	49
2.7 Lipids	62
PROFILES IN BME: VERONIQUE V. TRAN	70

3 Biomolecular Principles: Nucleic Acids	82
3.1 Prelude	82
3.2 Overview: Genetics and inheritance	86
3.3 Molecular basis of genetics	93
3.4 The central dogma: Transcription and translation	101
3.5 Control of gene expression	107
3.6 Recombinant DNA technology	110
PROFILES IN BME: TIFFANEE M. GREEN	126

4 Biomolecular Principles: Proteins	141
4.1 Prelude	141
4.2 Protein structure	143

4.3 Modification and processing of polypeptides	150
4.4 Enzymes	154
PROFILES IN BME: BRENDA K. MANN	161
5 Cellular Principles	168
5.1 Prelude	168
5.2 Cell structure and function	170
5.3 ECM	174
5.4 Molecules in the cell membrane	175
5.5 Cell proliferation	182
5.6 Cell differentiation and stem cells	186
5.7 Cell death	188
5.8 Cell culture technology	189
PROFILES IN BME: E.E. "JACK" RICHARDS II	194
 PART 2. PHYSIOLOGICAL PRINCIPLES	
6 Communication Systems in the Body	205
6.1 Prelude	205
6.2 Signaling fundamentals	210
6.3 The nervous system	214
6.4 The endocrine system	222
6.5 The adaptive immune system	227
6.6 Connections to biomedical engineering	234
PROFILES IN BME: DOUGLAS LAUFFENBURGER	237
7 Engineering Balances: Respiration and Digestion	247
7.1 Prelude	247
7.2 Introduction to mass balances	249
7.3 Respiratory physiology	260
7.4 Digestion and metabolism	276
8 Circulation	299
8.1 Prelude	299
8.2 The circulating fluid	300
8.3 The blood vessels	303
8.4 The heart	316
PROFILES IN BME: CURTIS G. NEASON	322
9 Removal of Molecules from the Body	329
9.1 Prelude	329
9.2 Examples of elimination of molecules from the body	331
9.3 Biotransformation and biliary excretion	334
9.4 Elimination of molecules by the kidneys	336

PART 3. BIOMEDICAL ENGINEERING

10 Biomechanics	361
10.1 Prelude	361
10.2 Mechanical properties of materials	362
10.3 Mechanical properties of tissues and organs	369
10.4 Cellular mechanics	378
11 Bioinstrumentation	389
11.1 Prelude	389
11.2 Overview of measurement systems	392
11.3 Types of sensors	395
11.4 Instruments in medical practice	402
11.5 Instruments in the research laboratory	416
11.6 Biosensors	420
11.7 Biomicroelectromechanical systems and lab-on-a-chip devices	421
PROFILES IN BME: BILL HAWKINS	425
12 Bioimaging	432
12.1 Prelude	432
12.2 X-rays and CT	436
12.3 Ultrasound imaging	443
12.4 Nuclear medicine	446
12.5 Optical bioimaging	451
12.6 MRI	456
12.7 Image processing and analysis	459
13 Biomolecular Engineering I: Biotechnology	472
13.1 Prelude	472
13.2 Drug delivery	474
13.3 Tissue engineering	482
13.4 Nanobiotechnology	492
13.5 Other areas of biomolecular engineering	495
PROFILES IN BME: ROBERT LANGER	497
14 Biomolecular Engineering II: Engineering of Immunity	507
14.1 Prelude	507
14.2 Antigens, Abs, and mAbs	509
14.3 What are Abs?	511
14.4 How can specific Abs be manufactured?	514
14.5 Clinical uses of Abs	516
14.6 Vaccines	519
PROFILES IN BME: ELIAH R. SHAMIR	532

15 Biomaterials and Artificial Organs	537
15.1 Prelude	537
15.2 Biomaterials	538
15.3 Hemodialysis	544
15.4 Membrane oxygenators	553
15.5 Artificial heart	554
15.6 Biohybrid artificial organs	558
16 Biomedical Engineering and Cancer	572
16.1 Prelude	572
16.2 Introduction to cancer	573
16.3 Surgery	574
16.4 Radiation therapy	576
16.5 Chemotherapy	584
16.6 Hormonal and biological therapies	589
16.7 Systems biology, biomedical engineering, and cancer	593
Appendix A Physiological Parameters	605
Appendix B Chemical Parameters	611
Appendix C Units and Conversion Factors	614
Index	617
