Part I Basics of Valuation Methods and Shareholder Value Creation

Chapter 1

Shareholder Value Creation, Basic Concepts

1.1. Increase of Equity Market Value	4	
1.2. Shareholder Value Added	4	
1.3. Shareholder Return	6	
1.4. Required Return to Equity	7	
1.5. Created Shareholder Value	8	
1.6. The ROE is not the Shareholder Return	9	
1.7. Comparison of General Electric with Other Companies		10
1.8. Value Creation and Value Destruction of the S&P 500		19
1.9. What Should the Shareholder Return be Compared With?		19
Reference	20	

Chapter 2

Company Valuation Methods

2.1. Value and Price: What Purpose Does a Valuation Serve?	22
--	----

2.2. Balance Sheet-Based Methods	24
2.2.1. Book Value	24
2.2.2. Adjusted Book Value	25
2.2.3. Liquidation Value	25
2.2.4. Substantial Value	26
2.2.5. Book Value and Market Value	27
2.3. Income Statement-Based Methods: Relative Valuation	27
2.3.1. Value of Earnings, PER	28
2.3.2. Value of the Dividends	30
2.3.3. Sales Multiples	31
2.3.4. Other Multiples	32
2.3.5. Multiples Used to Value Internet Companies	32
2.4. Goodwill-Based Methods	33
2.4.1. The “Classic” Valuation Method	33
2.4.2. The Simplified “Abbreviated Goodwill Income” Method or the Simplified UEC Method	34
2.4.3. UEC Method	35
2.4.4. Indirect Method	35
2.4.5. Anglo-Saxon or Direct Method	36
2.4.6. Annual Profit Purchase Method	36
2.4.7. Risk-Bearing and Risk-Free Rate Method	36
2.5. Cash Flow Discounting-Based Methods	37
2.5.1. General Method for Cash Flow Discounting	37
2.5.2. Deciding the Appropriate Cash Flow for Discounting and the Company’s Economic Balance Sheet	38
2.5.3. Calculating the Value of the Company Using the Free Cash Flow	42
2.5.4. Calculating the Value of the Company as the Unlevered Value Plus the Discounted Value of the Tax Shield	43
2.5.5. Calculating the Value of the Company’s Equity by Discounting the Equity Cash Flow	44
2.5.6. Calculating the Company’s Value by Discounting the Capital Cash Flow	45
2.5.7. Basic Stages in the Performance of a Valuation by Cash Flow Discounting	45
2.6. Which is the Best Method to Use?	47
2.7. The Company as the Sum of the Values of Different Divisions: Break-Up Value	48
2.8. Valuation Methods Used Depending on the Nature of the Company	48

2.9. Key Factors Affecting Value: Growth, Return, Risk, and Interest Rates	50
2.10. Speculative Bubbles on the Stock Market	51
2.11. Most Common Errors in Valuations	55
References	56

Chapter 3

Price-Earnings Ratio, Profitability, Cost of Capital, and Growth

3.1. Evolution of the PER on the International Stock Markets	58
3.2. Factors Affecting the PER	60
3.2.1. Companies A and B	61
3.2.2. Companies C and D	62
3.2.3. Company E	62
3.2.4. Company F	63
3.3. Influence of Growth (g) on the PER	64
3.4. Influence of the ROE on the PER	66
3.5. Influence of the Required Return to Equity on the PER	66
3.6. Influence of Interest Rates on the PER	67
3.7. Growth Value and PER Due to Growth	67
Summary	69
Appendix 3.1: Price Per Share, Market Capitalization, Earnings Per Share (EPS), Dividend Yield and PER of the Companies Included in the Euro Stoxx 50 on 30 May 2001	70
Appendix 3.2: Breakdown of the Price Per Share Between No-Growth Price and Growth Value; and Breakdown of the PER (Companies Included in the Euro Stoxx 50 on 30 May 2001)	73
Appendix 3.3: Relationship Between the PER and Growth (g), Required Return to Equity (K_e) and Return on Equity (ROE) in a Company with Constant Growth	74

Chapter 4

Splitting the Price-Earnings Ratio: Franchise Factor, Growth Factor, Interest Factor, and Risk Factor

4.1. PER, Franchise Factor, and Growth Factor	78
--	-----------

4.2. PER*, Franchise Factor*, and Growth Factor	79
4.3. PER, Interest Factor, and Risk Factor	80
4.4. Value Generation Over Time in Companies with Growth	82
4.5. Influence of Growth on the Franchise Factor and on the Growth Factor	84
4.6. Influence of the ROE on the Franchise Factor	85
4.7. Influence of the Required Return to Equity on the Franchise Factor and on the PER	86
Appendix 4.1: Splitting the PER	88
Reference	90

Chapter 5

Market Value and Book Value

5.1. Market Value and Book Value on the North American Stock Market	91
5.2. Market-To-Book Ratio on the International Stock Markets	93
5.3. Market-To-Book Ratio and Interest Rates on the North American Stock Market	93
5.4. Relationship Between the Market-To-Book Ratio and the PER and the ROE	93
5.5. Value Creation and the Difference Between Market Value and Book Value	98
5.6. Equity Book Value may be Negative: The Case of Sealed Air	99
Summary	103
References	104
Appendix 5.1: Market Value (E) and Book Value (E _{bv}) of Selected U.S. Companies in December 1995 and July 2001 (\$ Million)	106

Chapter 6

Dividends and Market Value

6.1. Evolution of Dividends on the U.S. Stock Market	109
6.2. Increasingly Fewer Companies Distribute Dividends and More Buy Back Shares	109
6.3. Evolution of Dividends on the International Markets	112

6.4. The Share Value is the Present Value of the Expected Dividends	112
6.5. Share Value When Dividends have Constant Growth, Gordon and Shapiro Formula	114
6.6. Share Value when Dividends Grow at a Fixed Quantity Each Year	117
6.7. Binomial Valuation Model of Discounted Dividends	118
6.7.1. Additive Binomial Model	118
6.7.2. Additive Binomial Model with Probability of Bankruptcy	118
6.7.3. Geometric Binomial Model	119
6.7.4. Geometric Binomial Model with Probability of Bankruptcy	119
6.8. Trinomial Valuation Model of Discounted Dividends	120
6.8.1. Additive Trinomial Model	120
6.8.2. Additive Trinomial Model with Probability of Bankruptcy	120
6.8.3. Geometric Trinomial Model	121
6.8.4. Geometric Trinomial Model with Probability of Bankruptcy	121
6.9. The Share's Value when the Dividends have Two Growth Rates: The Two-Stage Growth Model	122
6.10. Stock Valuation when Dividends have Two Growth Rates: Model H	123
6.11. Stock Valuation with Three Periods of Dividend Growth	123
Appendix 6.1: Derivation of the Gordon and Shapiro Formula	124
Appendix 6.2: Derivation of the Share Value Formula when the Dividend Grows at a Fixed Quantity Every Year	125
Appendix 6.3: Derivation of the Share Value Formula in the Additive Binomial Model	126
Appendix 6.4: Derivation of the Share Value Formula in the Geometric Binomial Model	127
Appendix 6.5: Derivation of the Share Value Formula in the Geometric Trinomial Model	127
Appendix 6.6: Error Made with the Share Price Approximation when the Share's Dividends Grow at Two Different Rates	128
Appendix 6.7: Error Made with the Share Price Approximation Using the Model H	129

References 130

Chapter 7

Interest Rates: Their Importance in the Valuation

7.1. Evolution of Interest Rates	133	
7.2. Interest Rates with Different Maturities (Yield Curve)		134
7.3. Relationship Between Interest Rates and Share Prices		136
7.4. Relationship Between Interest Rates and the PER		136
7.5. Relationship Between Interest Rates and Dividend Yield in the United States	138	
7.6. Equity Duration	138	
7.7. Relationship Between the Yield of the S&P 500 and the Variation in Interest Rates	139	
7.8. Risk and Required Return to Different Debt Issues		140
7.9. Rates of the Federal Reserve (United States) and the European Central Bank (Germany Before 1998)		144
Reference	144	

Chapter 8

Valuation Using Multiples. How Do Analysts Reach their Conclusions?

8.1. Valuation Methods Used by the Analysts	145
8.2. Most Commonly Used Multiples	146
8.2.1. Multiples Based on Capitalization	147
8.2.1.a. <i>Price Earnings Ratio (PER)</i>	147
8.2.1.b. <i>Price to Cash Earnings (P/CE)</i>	147
8.2.1.c. <i>Price to Sales (P/S)</i>	147
8.2.1.d. <i>Price to Levered Free Cash Flow (P/LFCF)</i>	148
8.2.1.e. <i>Price to Book Value (P/BV)</i>	148
8.2.1.f. <i>Price to Customer</i>	149
8.2.1.g. <i>Price to Units</i>	149
8.2.1.h. <i>Price to Output</i>	149
8.2.1.i. <i>Price to Potential Customer</i>	149
8.2.2. Multiples Based on the Company's Value	149
8.2.3. Growth-Referenced Multiples	150
8.3. Relative Multiples	151

8.4. The Problem with Multiples: Their Dispersion	152
8.4.1. Dispersion of the Utilities' Multiples	152
8.4.2. Dispersion of the Multiples of Construction and Hotel Companies	152
8.4.3. Dispersion of the Multiples of Telecommunications	156
8.4.4. Dispersion of the Multiples of Banks	157
8.4.5. Dispersion of the Multiples of Internet Companies	158
8.5. Volatility of the Most Widely Used Parameters for Multiples	158
8.6. Analysts' Recommendations: Hardly Ever Sell	159
8.7. Strange Multiples	161
References	166

Chapter 9

Cash Flow and Net Income

9.1. Net Income is just an Opinion, but Cash Flow is a Fact	169
9.2. Accounting Cash Flow, Equity Cash Flow, Free Cash Flow, and Capital Cash Flow	170
9.3. Calculating the Cash Flows	172
9.4. A Company with Positive Net Income and Negative Cash Flows	174
9.5. When is Profit after Tax a Cash Flow?	177
9.6. When is the Accounting Cash Flow a Cash Flow?	178
9.7. Equity Cash Flow and Dividends	179
9.8. Recurrent Cash Flows	180
Summary	181
Appendix 9.1: Attention to the Accounting and the Managing of Net Income	182
References	184

Chapter 10

Inflation and Value

10.1. Campa Spain and Campa Argentina	185
10.2. Analysis of the Differences Between Campa Spain and Campa Argentina	187
10.3. Adjustments to Correct for the Effects of Inflation	193

Summary	197
Reference	199

Chapter 11

Cost of Equity: Beta and Risk Premium

11.1. Betas and Volatilities	202
11.2. Volatility (σ) and Diversification	203
11.3. Beta (β)	203
11.4. Drawbacks of Betas and Volatilities: Instability and Period Dependence	205
11.5. Qualitative Calculation of the Beta	211
11.6. Market Risk Premium	212
11.7. Methods Proposed for Calculating the Market Risk Premium	214
11.7.1. Historical Differential Return of the Market Portfolio and the Risk-Free Rate	214
11.7.2. Using the Gordon and Shapiro Formula	215
11.7.3. Survey of Analysts and Investors	216
11.7.4. From the IRR of the Share Price and the Expected Dividends	217
11.7.5. From the Inverse of the PER	217
11.7.6. As the Difference Between Stock and Long-Term Bond Volatilities	217
11.7.7. More Recent Studies	217
11.7.8. Differences Between the Arithmetic Average and the Geometric Average	218
11.8. Historical Differential Return of the Market Portfolio and the Risk-Free Rate in the U.S.	219
11.8.1. Return	219
11.8.2. Volatility	219
11.9. Return of Stocks Over Bonds in the U.S.	221
11.9.1. The Period 1926–1999	221
11.9.2. The Period 1802–1925	224
11.10. Premium Over the Risk-Free Rate in Different Countries and Country Risk Premium	226
11.11. Premium of the North American Stock Market from the Gordon and Shapiro Equation	227
11.12. Recent Comparison of the Stock Market Evolution in Spain, Germany, Japan, and the U.S.	229

11.13. Has the Market Risk Premium Decreased or is the Market Overvalued?	230
11.14. Does the Market Risk Premium Exist?	232
11.12. The HMDYWD Method	234
Key Concepts	236
References	236

Chapter 12

Valuations of Internet Companies: The Case of Terra-Lycos

12.1. Twelve Valuations of Terra: Different Expectations	241
12.2. Some Comparisons Between the Projections and the Valuations	245
12.3. Valuation Performed by a Euroamerican Bank in April 2000: 104 Euros	245
12.4. Valuation Performed by a Spanish Bank in May 2000: 84.4 Euros	250
12.5. Valuation Performed by an American Broker in June 2000: 53 Euros	254
12.6. Valuation Performed by a Spanish Bank in September 1999: 19.8 Euros	257
12.7. How Should Terra be Valued	258
12.8. An Anecdote on the “New Economy”	260
Reference	261

Part II

Shareholder Value Creation

Chapter 13

Proposed Measures of Shareholder Value Creation: EVA[™], Economic Profit, MVA, CVA, CFROI, and TSR

13.1. Book Profit (EP) and MVA	266
13.2. EVA[™] and MVA	268
13.3. CVA and MVA	269
13.4. First Example: Investment Without Value Creation	269

13.5. Incorrect Interpretation of EVA, EP and CVA	273
13.6. Usefulness of EVA, EP, and CVA	274
13.7. CFROI, TSR, and TBR	275
13.8. Second Example: Investment with Value Creation	278
13.9. Conclusions	281
Appendix 13.1: Verification that the EP (Economic Profit) Discounted at the Rate (K_e) is the MVA (Market Value–Book Value)	282
Appendix 13.2: Obtainment of the Formulas for EVA and MVA from the FCF and WACC	285
Appendix 13.3: Verification that the CVA Discounted at the WACC is the MVA	287
Appendix 13.4: Adjustments Suggested by Stern Stewart & Co. for Calculating the EVA	288
References	289

Chapter 14

EVA, Economic Profit, and Cash Value Added do not Measure Shareholder Value Creation

14.1. Accounting-Based Measures Cannot Measure Value Creation	291
14.2. EVA Does not Measure the Shareholder Value Creation by American Companies	292
14.3. The CVA Does not Measure the Shareholder Value Creation of the World's 100 Most Profitable Companies	299
14.4. The Economic Profit Does not Measure the Shareholder Value Creation	302
14.5. Usefulness of EVA, EP, and CVA	304
14.5.1. The EVA, the EP, and the CVA can be Used to Value Companies	304
14.5.2. EVA, EP, and CVA as Management Performance Indicators	305
14.6. Consequences of the Use of EVA, EP, or CVA for Executive Remuneration	305
14.7. Measures Proposed for Measuring Shareholder Return	307
14.8. What is Shareholder Value Creation?	308
14.9. An Anecdote about the EVA	309
References	311

Chapter 15

The RJR Nabisco Valuation

15.1. Background of the Company	314
15.2. Pre-Bid Strategy	315
15.3. The Management Group's Bid	318
15.4. Valuation of the Management Group's Strategy	321
15.5. KKR's Bid	325
15.6. Valuation of KKR's Strategy	325
15.7. Comparison of the Three Alternatives' FCF and CCF	330
15.8. EVA and the Two Alternatives' Value Creation	333
15.9. Final Bids and Outcome	334
15.10. Valuations Grouping all the Financial Instruments as Debt or Equity	336
15.11. Value Creation in Acquisitions and Mergers	339
References	339

Chapter 16

Valuation and Value Creation in Internet-Related
Companies

16.1. Some Examples of Value Creation and Destruction	342
16.2. Amazon	343
16.2.1. Spectacular Growth in Sales and Losses	343
16.2.2. Stock Market Evolution	346
16.2.3. On-Line Leadership: Barnes & Noble Versus Amazon	349
16.3. Valuations of Amazon	350
16.3.1. Valuation Made by an Analyst Using Cash Flow Discounting: \$87.3/Share	350
16.3.2. Damodaran's Valuation by Cash Flow Discounting: \$35/Share	352
16.3.3. Copeland's Valuation by Scenarios and Cash Flow Discounting: \$66/Share	352
16.3.4. Our Valuation by Simulation and Cash Flow Discounting: \$21/Share	354
16.3.5. Differences Between our Valuation and Those of Copeland and Damodaran	356
16.4. America Online	358
16.4.1. The Analysts' Recommendations	359

16.5. On-Line Brokers: ConSors, Ameritrade, E*Trade, Charles Schwab, and Merrill Lynch	360
16.5.1. ConSors Versus Ameritrade, E*Trade	363
16.6. Microsoft	366
16.7. A Final Comment on the Valuation of Internet Companies	369
References	370

Part III

Rigorous Approaches to Discounted Cash Flow Valuation

Chapter 17

Discounted Cash Flow Valuation Methods: Perpetuities, Constant Growth, and General Case

17.1. Introduction	375
17.2. Company Valuation Formulae, Perpetuities	376
17.2.1. Calculating the Company's Value from the ECF	376
17.2.2. Calculating the Company's Value from the FCF	377
17.2.3. Calculating the Company's Value from the CCFs	378
17.2.4. Adjusted Present Value (APV)	379
17.2.5. Use of the CAPM and Expression of the Levered Beta	380
17.3. DVTS in Perpetuities, Tax Risk in Perpetuities	380
17.4. Examples of Companies without Growth	383
17.5. Formulae for when the Debt's Book Value (N) is not the Same as its Market Value (D), ($r \neq K_d$)	387
17.6. Formula for Adjusted Present Value Taking into Account the Cost of Leverage	387
17.6.1. Impact on the Valuation of Using the Simplified Formulae for the Levered Beta	388
17.6.2. The Simplified Formulae as a Leverage-Induced Reduction of the FCF	389
17.6.3. The Simplified Formulae as a Leverage-Induced Increase in the Business Risk (K_u)	390

17.6.4. The Simplified Formulae as a Probability of Bankruptcy	390
17.6.5. Impact of the Simplified Formulae on the Required Return to Equity	391
17.7. Valuing Companies Using Discounted Cash Flow, Constant Growth	391
17.8. Company Valuation Formulae, Constant Growth	392
17.8.1. Relationships Obtained from the Formulae	392
17.8.2. Formulae when the Debt's Book Value (N) is not Equal to its Market Value (D)	393
17.8.3. Impact of the Use of the Simplified Formulae	394
17.9. Examples of Companies with Constant Growth	395
17.10. Tax Risk and DVTS with Constant Growth	399
17.11. Valuation of Companies by Discounted Cash Flow, General Case	400
17.12. Company Valuation Formulae, General Case	400
17.13. Relationships Obtained from the Formulae, General Case	401
17.14. An Example of Company Valuation	402
17.15. Valuation Formulae when the Debt's Book Value (N) and its Market Value (D) are not Equal	407
17.16. Impact on the Valuation when $D \neq N$, Without Cost of Leverage	408
17.17. Impact on the Valuation when $D \neq N$, with Cost of Leverage, in a Real-Life Case	408
Appendix 17.1: Main Valuation Formulae	415
Appendix 17.2: A Formula for the Required Return to Debt	417
Summary	417
References	418

Chapter 18

Optimal Capital Structure: Problems with the Harvard and Damodaran Approaches

18.1. Optimal Structure According to a Harvard Business School Technical Note	420
18.2. Critical Analysis of the Harvard Business School Technical Note	425

18.2.1. Present Value of the Cash Flows Generated by the Company and Required Return to Assets	425
18.2.2. Leverage Costs	427
18.2.3. Incremental Cost of Debt	427
18.2.4. Required Return to Incremental Equity Cash Flow	429
18.2.5. Difference Between K_e and K_d	429
18.2.6. Price Per Share for Different Debt Levels	429
18.2.7. Adding the Possibility of Bankruptcy to the Model	431
18.2.8. K_e and K_d if there are no Leverage Costs	432
18.2.9. K_e and K_d with Leverage Costs	434
18.2.10. Influence of Growth on the Optimal Structure	434
18.3. Boeing's Optimal Capital Structure According to Damodaran	437
References	441

Chapter 19

Financial Literature about Discounted Cash Flow Valuation

19.1. A Brief Review of the Most Significant Papers	444
19.2. Main Formulae in the Most Significant Papers	451
19.2.1. Different Expressions of the Discounted Value of the Tax Shield and of the Required Return to Equity	451
19.2.2. Different Expressions of WACC and $WACC_{BT}$	454
19.2.3. Different Expressions of the Levered Beta	455
19.3. The Basic Problem: The Value of the Tax Shield Due to the Payment of Interest (DVTS)	455
19.3.1. Adjusted Present Value (APV) in a World Without Cost-of-Leverage	455
19.3.2. Appropriate Discount Rate for Taxes in Perpetuities	456

19.3.3. Appropriate Discount Rate for Taxes and DVTS in a World Without Cost-of-Leverage with Constant Growth	458
19.3.4. Analysis of the Theories for Perpetuities	459
19.3.5. Analysis of Competing Theories in a World Without Cost-of-Leverage and With Constant Growth	461
19.4. Differences in the Valuation According to the Most Significant Papers	462
19.4.1. Growing Perpetuity with a Preset Debt Ratio of 30%	462
19.4.2. Growing Perpetuity with Preset Debt	467
Appendix 19.1: In a World with No Leverage Cost the Value of Tax Shields is PV[Ku; D T Ku]	467
References	469

Chapter 20

Application of the Different Theories to RJR Nabisco

20.1. Valuation According to No-Cost-of-Leverage Theory	471
20.2. Valuation According to Damodaran (1994)	479
20.3. Valuation from the CCF According to Ruback	482
20.4. Valuation from the APV According to Myers	482
20.5. Differences in the Valuations, Summary	490
References	490

Chapter 21

Eight Methods and Seven Theories for Valuing Companies by Cash Flow Discounting

21.1. Eight Methods for Valuing Companies by Cash Flow Discounting	492
21.2. An Example: Valuation of the Company Delta Inc.	496
21.3. How is the Company Valued when it Reports Losses in One or More Years	501
Appendix 21.1: Valuation Formulae According to the Main Theories (Market Value of the Debt = Nominal Value)	506

Appendix 21.2: Valuation Formulae According to the Main Theories when the Debt's Market Value (D) does not Match its Nominal or Book Value (N)	508
References	511

Part IV

Real Options and Brands

Chapter 22

Real Options. Valuing Flexibility: Beyond Discounted Cash Flow Valuation

22.1. Real Options	516
22.2. Exploitation of Oil Reserves	518
22.2.1. With an Obligation to Extract	518
22.2.2. With the Option of Extracting	519
22.3. Black and Scholes' Formula for Valuing Financial Options	521
22.4. Factors that Determine a Financial Option's Value	523
22.5. Replication of the Call	524
22.6. The Expectations Regarding an Increase in the Share's Price do not Affect the Value of a Replicable Call	526
22.7. Value of a Call if it Cannot be Replicated	528
22.8. Differences Between a Financial Option and a Real Option	529
22.9. Applying Options Theory in a Firm	532
22.10. Use of the Binomial Method for Valuing Real Options	534
22.10.1. Valuation of a Project	534
22.10.2. Valuation of the Option to Expand the Project	536
22.10.3. Valuation of the Option to Defer the Investment	537
22.10.4. Valuation of the Option to Use the Investment for Alternative Purposes	539
22.11. Frequently Made Errors When Valuing Real Options	540

22.12. Methods for Valuing Real Options	546	
Appendix 22.1: A Derivation of Black and Scholes' Formula		549
Summary	553	
References	553	

Chapter 23

Valuation of Brands and Intangibles

23.1. Methods Used for Valuing Brands	559	
23.2. Valuation of the Brand "For Whom" and "For What Purpose"	560	
23.3. Valuation of the Brand Using the Difference in the Price to Sales Ratios	562	
23.4. Valuations of the Kellogg and Coca-Cola Brands by Damodaran	564	
23.5. Analysis of Damodaran's Valuations	564	
23.6. Interbrand's Valuation Method	568	
23.7. Comment on Interbrand's Method	576	
23.8. Financial World's Valuation Method	577	
23.9. Houlihan Valuation Advisors' Method	577	
23.10. Other Methods Proposed by Different Consulting Firms		579
23.11. Brand Value Drivers, Parameters Influencing the Brand's Value	580	
23.12. What is the Purpose of Valuing Brands?	582	
23.13. Brand Value as a Series of Real Options	582	
23.14. Brand Accounting	583	
23.15. Valuation of Intellectual Capital	584	
References	586	

Appendix A

Capital Asset Pricing Model (CAPM)

A.1. An Investor Forms an Optimal Portfolio	587
