Preface

Chapter 1 Preliminaries	1
1.1 Partially ordered sets	1
1.2 Lattices	5
1.3 Boolean algebras	11
Chapter 2 Propositional Calculus	21
2.1 Propositions and their symbolization	21
2.2 Semantics of propositional calculus	23
2.3 Syntax of propositional calculus	35
Chapter 3 Semantics of First Order Predicate Calculus	52
3.1 First order languages	53
3.2 Interpretations and logically valid formulas	59
3.3 Logical equivalences	73
Chapter 4 Syntax of First Order Predicate Calculus	76
4.1 The formal system $\mathbf{K}_{\mathcal{L}}$	76
4.2 Provable equivalence relations	83
4.3 Prenex normal forms	90
4.4 Completeness of the first order system $\mathbf{K}_{\mathcal{L}}$	96
*4.5 Quantifier-free formulas	105
Chapter 5 Skolem's Standard Forms and Herbrand's Theorems	113
5.1 Introduction	113
5.2 Skolem standard forms	116
5.3 Clauses	122
*5.4 Regular function systems and regular universes	124
5.5 Herbrand universes and Herbrand's theorems	128
5.6 The Davis-Putnam method	139
Chapter 6 Resolution Principle	144
6.1 Resolution in propositional calculus	145
6.2 Substitutions and unifications	148
6.3 Resolution Principle in predicate calculus	155
6.4 Completeness theorem of Resolution Principle	160
6.5 A simple method for searching clause sets S	166

Chapter 7	Refinements of Resolution	173
7.1	Introduction	173
7.2	Semantic resolution	176
7.3	Lock resolution	183
7.4	Linear resolution	189
Chapter 8	Many-Valued Logic Calculi	200
8.1	Introduction	200
8.2	Regular implication operators	203
8.3	MV-algebras	210
8.4	Łukasiewicz propositional calculus	219
8.5	R_0 -algebras	229
8.6	The propositional deductive system $\mathcal{L}^*$	241
Chapter 9	Quantitative Logic	257
9.1	Quantitative logic theory in two-valued propositional logic system $\mathbf{L}$	258
9.2	Quantitative logic theory in Łukasiewicz many-valued propositional logic systems $\mathbf{L}_n$ and $\mathbf{Luk}$	276
9.3	Quantitative logic theory in many-valued R_0 -propositional logic systems $\mathcal{L}_n^*$ and $\mathcal{L}^*$	298
9.4	Structural characterizations of maximally consistent theories	311
9.5	Remarks on Gödel and Product logic systems	323
	Bibliography	325
	Index	327
