

BLENDER FOUNDATIONS

The Essential Guide to Learning Blender 2.6

Roland Hess

Contents

Preface

xi

Chapter 1 An Introduction to 3D: Recreating the World Inside Your Computer, or Not

Form	1
Surfacing	2
Light	4
Motion	7
Rendering	8
	9

Chapter 2 Understanding Blender's Interface

A Little Bit of History	13
Spend the Time	13
Getting and Installing Blender	14
The Parts of the Interface	15
Changing Window Sizes	15
Headers	16
Merging and Splitting Windows	16
Window Swap	18
Creating a New Application Window	18
Using Different Screens	19
Maximizing a View	19
A Tour of the Common Window Types	20
3D View	21
Outliner	21
Timeline	22
Graph Editor	23
Dope Sheet	23
Properties	23
File Browser	27
How to Find the Tools You Need	28

Chapter 3 Object and Animation Basics

Finding Your Way in 3D	31
Perspective and Orthographic View	31
Display Modes	33
Working with Objects	35
Transformation Basics	36
	38

Selection Basics	39
Transformation Manipulator	41
3D Cursor	43
Moving in Time	44
Basic Keyframe Animation	45
Object Relationships and Management	52
Layers	52
Parenting	54
Empties	55
Instancing and Duplicating	55
Data Blocks	56
Summary	57
What We Missed	58
Chapter 4 Modeling: A Million to One	61
The Building Blocks of Mesh Modeling	61
Free Modeling: Polygon by Polygon	62
Tools	78
Box Modeling	82
Modeling with Modifiers	89
Putting the Table Together	99
Assembling the Room	100
What We Missed	100
Chapter 5 Lighting: The Easiest Thing That's Tough	101
The Tools: Directional Lighting	102
Point Lamp	102
Color	102
Energy	103
Distance	104
Sun Lamp	105
Hemi Lamp	105
Area Lamp	106
Spot Lamp	107
Size	109
Samples	110
Soft	111
Bias	111
Clipping	111

Filter Type	114
Deep Shadow Maps	114
Nondirectional Lighting	114
Ray-Based Gathering	115
Approximate Environment Lighting	116
An Effective General Outdoor Lighting Setup	117
An Effective General Indoor Lighting Setup	122
Generalizing	128
Chapter 6 Character Creation	129
An Overview of Character Creation	129
Starting from a Base Head	130
Refining Facial Features	132
Cheeks	133
Lips	134
Eyes and Eyelids	134
Asymmetry	140
Modeling Joints	141
Hands and Other Exposed Parts	142
Techniques for Adding Clothes	145
Shirt	146
Pants	155
Shoes and Feet	158
Adding Hair	158
Hair Styling and Digital Rogaine	163
What We Missed	166
Chapter 7 Surfacing	167
Targets for Building Believable Materials	167
Basic Material and Texture Settings: Walls and Floor	167
Varying Material Properties with Textures	170
Adding a Second Material and Using Image Textures	179
Adding an Image Texture	181
Extremely Basic UV Mapping	182
The Table: Cheap, Fast Unwrapping and Real Reflection	188
The Vase: Transparency and the Faked Reflection	193
The Character: High-Quality UV Unwrapping, Subsurface Scattering, and Projection Painting	195
The Easy Way: Pinning and Live Unwrap	198
Defining the Material	201

Adding UV Channels	203
Creating UV Unwraps for Different Views	203
Projection Painting	205
Completing the Head Texturing	206
Hair Materials	209
Materials for Clothes	211
Painting Custom Textures	213
Combining Painted Textures with Procedurals	217
Live Mattes: Camera Projection	217
Finishing Up	226
What We Missed	226
Chapter 8 Sculpting	227
An Alternative to Traditional Modeling	227
Basic Sculpting Tools	227
Shaping Existing Models	228
Detailing and Normal Maps	230
Using the Multiresolution Modifier	231
Baking to a Normal Map	243
Sculpting from Scratch	244
Sculpting and Performance	245
Chapter 9 Rigging: Digital Orthopedia	247
Preparing to Rig	247
Creating the Initial Skeleton	248
Rig Testing and Adjustment	255
Adding Basic Controls with Parenting	255
Rigging with Constraints	256
The Reverse Foot	257
Adding a Pole Target	259
Finishing the Foot Rig	262
More High-Level Control	262
Hands	263
Toggle IK and Other Constraints	266
Drivers	269
Skinning	272
Too Much Influence	273
Spikes, or No Influence	278
A Hard Break	280
Helping Deformation with Extra Bones	281

Conclusion	284
What We Missed	284
Chapter 10 Shapes and Morphing	285
Creating a Shape Key	285
Creating Effective Shape Keys	290
Preparing Shapes for Animations	291
Chapter 11 Character Animation: The Fun Part	299
What We Missed	299
Pose Mode and the Dope Sheet	299
Recording the Starting Pose	307
Creating a New Pose, or Animation	308
Walking	318
Grabbing the Chair	325
Throwing the Cube	327
Checking Your Arcs	328
Chapter 12 Rendering: Faster, Processor!	331
Rendering Basics	331
Render Options	331
Speeding Up Test Renders	334
Finding the Sweet Spot for Final Renders	336
The Compositor	337
Getting Familiar with the Compositor	337
Overall Effects	341
Depth of Field	342
Motion Blur	343
Glow and Glare	345
Color Changes	347
Color Grading	347
Render Layers and the Compositor	353
Conclusion	361
What We Missed	362
Chapter 13 Environmental Animation	365
This Is Not a Physics Class	365
Cloth and Force Fields	365
Soft Bodies, or Bouncy, Squishy Things	369
Particles	373

The Halo Material	376
Smoking Is Good for You	379
Smoke Materials	380
What We Missed	383
Chapter 14 Video Compilation and Final Output	385
Creating Animation Files	385
Rendering to Still Frames	385
Creating an Animation from Stills	387
What We Missed	392
<i>Index</i>	393
