# LIGHT & SKIN INTERACTIONS

Simulations for Computer Graphics Applications

# Contents

Acknowledgements .....	v
List of figures .....	xi
Nomenclature .....	xix
Acronyms .....	xxiii
<b>CHAPTER 1 Introduction .....</b>	<b>1</b>
<b>CHAPTER 2 Light, optics, and appearance .....</b>	<b>5</b>
2.1 Light as radiation .....	5
2.2 Optics concepts .....	8
2.3 Light interactions with matter .....	13
2.3.1 Emission .....	13
2.3.2 Scattering .....	15
2.3.3 Absorption .....	16
2.4 Radiometric quantities .....	19
2.5 Tissue optics definitions and terminology .....	20
2.6 Measurement of appearance .....	25
2.6.1 Measuring the spectral distribution of light .....	27
2.6.2 Measuring the spatial distribution of light .....	29
<b>CHAPTER 3 Image-synthesis context .....</b>	<b>33</b>
3.1 Global light transport .....	35
3.1.1 Monte Carlo concepts .....	37
3.1.2 Path tracing overview .....	38
3.2 Local light transport .....	41
3.2.1 The Kubelka–Munk methods .....	42
3.2.2 Monte Carlo methods .....	43
3.3 Techniques for model evaluation .....	48
3.3.1 Actual and virtual spectrophotometry .....	48
3.3.2 Actual and virtual goniophotometry .....	53
3.4 Color conversion .....	56
<b>CHAPTER 4 Bio-optical properties of human skin .....</b>	<b>61</b>
4.1 Structural and biophysical characteristics .....	61
4.2 Spectral signatures .....	67
4.3 Scattering profiles .....	69

<b>4.4</b>	Interactions with invisible light .....	74
<b>4.4.1</b>	Ultraviolet domain .....	74
<b>4.4.2</b>	Infrared domain .....	77
<b>4.4.3</b>	Terahertz domain .....	79
<b>CHAPTER 5</b>	<b>Simulations in health and life sciences .....</b>	<b>81</b>
<b>5.1</b>	Scope of applications .....	82
<b>5.2</b>	Kubelka-Munk theory-based models .....	83
<b>5.3</b>	Diffusion theory-based models .....	86
<b>5.4</b>	Radiative transport models .....	89
<b>5.5</b>	Monte Carlo-based models .....	91
<b>CHAPTER 6</b>	<b>Biophysically inspired approach .....</b>	<b>99</b>
<b>6.1</b>	The multiple-layer scattering model .....	100
<b>6.1.1</b>	Overview .....	100
<b>6.1.2</b>	Scattering simulation .....	101
<b>6.1.3</b>	Implementation issues .....	103
<b>6.1.4</b>	Strengths and limitations .....	104
<b>6.1.5</b>	Extensions .....	105
<b>6.2</b>	The discrete-ordinate model .....	106
<b>6.2.1</b>	Overview .....	106
<b>6.2.2</b>	Scattering simulation .....	107
<b>6.2.3</b>	Implementation issues .....	109
<b>6.2.4</b>	Strengths and limitations .....	110
<b>CHAPTER 7</b>	<b>First principles approach .....</b>	<b>113</b>
<b>7.1</b>	Overview .....	114
<b>7.2</b>	Scattering simulation .....	114
<b>7.2.1</b>	Surface reflection .....	116
<b>7.2.2</b>	Subsurface reflection and transmission .....	117
<b>7.3</b>	Absorption simulation .....	118
<b>7.4</b>	Implementation issues .....	121
<b>7.5</b>	Strengths and limitations .....	121
<b>CHAPTER 8</b>	<b>Diffusion approximation approach .....</b>	<b>129</b>
<b>8.1</b>	Overview .....	130
<b>8.2</b>	Scattering simulation .....	131
<b>8.3</b>	Implementation issues .....	133
<b>8.4</b>	Strengths and limitations .....	134
<b>8.5</b>	Evolution of diffusion approximation-based models .....	136

<b>CHAPTER 9</b>	<b>Simulation challenges .....</b>	<b>141</b>
9.1	Input data issues .....	141
9.2	Modeling issues.....	143
9.3	Evaluation issues .....	143
9.4	Performance issues .....	145
<b>CHAPTER 10</b>	<b>Beyond computer graphics applications.....</b>	<b>147</b>
