# **Computational Methods for Agricultural Research**

Advances and Applications

Hercules Antonio do Prado, Alfredo Jose Barreto Luiz & Homero Chaib Filho

# Table of Contents

|                      |     |
|----------------------|-----|
| <b>Preface</b> ..... | xix |
|----------------------|-----|

|                             |       |
|-----------------------------|-------|
| <b>Acknowledgment</b> ..... | xxiii |
|-----------------------------|-------|

## **Chapter 1**

|                                                                                                                                  |   |
|----------------------------------------------------------------------------------------------------------------------------------|---|
| Scientific Computing in the Context of a Successful Agricultural Research Enterprise .....                                       | 1 |
| <i>Geraldo da Silva e Souza, Brazilian Agricultural Research Corporation - Secretariat for Strategic Planning, Brazil</i>        |   |
| <i>Eliseu Roberto de Andrade Alves, Brazilian Agricultural Research Corporation - Secretariat for Strategic Planning, Brazil</i> |   |

## **Chapter 2**

|                                                                                        |   |
|----------------------------------------------------------------------------------------|---|
| Concentration and Dynamics of the Brazilian Agriculture.....                           | 6 |
| <i>Fernando Luis Garagorry, Embrapa - Secretariat for Strategic Management, Brazil</i> |   |
| <i>Homero Chaib Filho, Embrapa Cerrados, Brazil</i>                                    |   |

## **Chapter 3**

|                                                                                  |    |
|----------------------------------------------------------------------------------|----|
| Land Cover Change: Statistical Indexes Using the Enhanced Transition Matrix..... | 30 |
| <i>Carlos Pérez-Hugalde, Universidad Politécnica de Madrid, Spain</i>            |    |
| <i>Patricia Delgado-Pérez, Universidad Politécnica de Madrid, Spain</i>          |    |
| <i>Raúl Romero-Calcerrada, Universidad Rey Juan Carlos, Spain</i>                |    |

## **Chapter 4**

|                                                                                                                                      |    |
|--------------------------------------------------------------------------------------------------------------------------------------|----|
| Mining Climate and Remote Sensing Time Series to Improve Monitoring of Sugar Cane Fields.....                                        | 50 |
| <i>Luciana A. S. Romani, University of Sao Paulo at Sao Carlos, Brazil &amp; Embrapa Agriculture Informatics at Campinas, Brazil</i> |    |
| <i>Elaine P. M. de Sousa, University of Sao Paulo at Sao Carlos, Brazil</i>                                                          |    |
| <i>Marcela X. Ribeiro, Federal University of Sao Carlos, Brazil</i>                                                                  |    |
| <i>Ana M. H. de Ávila, University of Campinas, Brazil</i>                                                                            |    |
| <i>Jurandir Zullo Jr., University of Campinas, Brazil</i>                                                                            |    |
| <i>Caetano Traina Jr., University of Sao Paulo at Sao Carlos, Brazil</i>                                                             |    |
| <i>Agma J. M. Traina, University of Sao Paulo at Sao Carlos, Brazil</i>                                                              |    |

## Chapter 5

- Objective Sampling Estimation of Crop Area Based on Remote Sensing Images ..... 73  
*Alfredo José Barreto Luiz, Embrapa, Brazil*  
*Antonio Roberto Formaggio, INPE, Brazil*  
*José Carlos Neves Epiphany, INPE, Brazil*

## Chapter 6

- Study of Potential Climate for Sugarcane Production in the State of Rio Grande Do Sul, Brazil,  
by Means of Geoprocessing ..... 96  
*Fernando Uhlmann Soares, Federal Institute of Education, Science and Technology of Goiás,  
Brazil*  
*José Maria Filippini Alba, Embrapa Temperate Climate Research Center, Brazil*  
*Elódio Sebem, Federal University of Santa Maria, Brazil*  
*Marcos Silveira Wrege, Embrapa Forest Research Center, Brazil*

## Chapter 7

- Using Self-Organizing Maps for Rural Territorial Typology ..... 107  
*Marcos Aurélio Santos da Silva, Brazilian Agricultural Research Corporation, Embrapa Coastal  
Tablelands, Brazil*  
*Edmar Ramos de Siqueira, Brazilian Agricultural Research Corporation, Embrapa Coastal  
Tablelands, Brazil*  
*Olívio Alberto Teixeira, Federal University of Sergipe, Department of Economy, Cidade  
Universitária, Brazil*  
*Maria Geovania Lima Manos, Brazilian Agricultural Research Corporation, Embrapa Coastal  
Tablelands, Brazil*  
*Antônio Miguel Vieira Monteiro, National Institute for Space Research, Image Processing  
Division, Brazil*

## Chapter 8

- Zoning Based on Climate and Soil for Planting Eucalyptus in Southern Region of Rio Grande  
do Sul State, Brazil ..... 127  
*José Maria Filippini Alba, Embrapa Temperate Climate Research Center, Brazil*  
*Marcos Silvera Wrege, Embrapa Forest Research Center, Brazil*  
*Carlos Alberto Flores, Embrapa Temperate Climate Research Center, Brazil*  
*Marilice Cordeiro Garrastazu, Embrapa Forest Research Center, Brazil*

## Chapter 9

- A Mixed Integer Programming Approach for Sugar Cane Cultivation and Harvest Planning ..... 144  
*Sanjay Dominik Jena, Pontifícia Universidade Católica do Rio de Janeiro, Brazil*  
*Marcus Vinicius Soledade Poggi de Aragão, Pontifícia Universidade Católica do Rio de Janeiro,  
Brazil*

## Chapter 10

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| An Application of a Positive Mathematical Programming Model to Analyse the Impact of Agricultural Policy Measures in the Spanish Agricultural Sector ..... | 175 |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|

*Lucinio Júdez Asensio, ETSIA/UPM, Spain*

*Rosario de Andrés Gómez de Barreda, CSIC, Spain*

*Miguel Angel Ibáñez Ruiz, ETSIA/UPM, Spain*

*José-Luis Miguel de Diego, COAG, Spain*

*Elvira Urzainqui Miqueleiz, CSIC, Spain*

## Chapter 11

|                                                                                                                                          |     |
|------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Mathematical-Modelling Simulation Applied to Help in the Decision-Making Process on Environmental Impact Assessment of Agriculture ..... | 199 |
|------------------------------------------------------------------------------------------------------------------------------------------|-----|

*Maria Conceição Peres Young Pessoa, Embrapa Environment, Jaguariúna/SP, Brazil*

*Elizabeth Nogueira Fernandes, Embrapa Dairy Cattle, Juiz de Fora/MG, Brazil*

*Sonia Cláudia do Nascimento de Queiroz, Embrapa Environment, Jaguariúna/SP, Brazil*

*Vera Lúcia Ferracini, Embrapa Environment, Jaguariúna/SP, Brazil*

*Marco Antonio Ferreira Gomes, Embrapa Environment, Jaguariúna/SP, Brazil*

*Manoel Dornelas de Souza, Embrapa Environment, Jaguariúna/SP, Brazil*

## Chapter 12

|                                                                                                 |     |
|-------------------------------------------------------------------------------------------------|-----|
| A Linear Optimization Approach for Increasing Sustainability in Vegetable Crop Production ..... | 234 |
|-------------------------------------------------------------------------------------------------|-----|

*Lana Mara R. dos Santos, Universidade Federal de Viçosa, Brazil.*

*Marcos N. Arenales, Universidade de São Paulo, Brazil*

*Alysson M. Costa, Universidade de São Paulo, Brazil*

*Ricardo H. S. Santos, Universidade Federal de Viçosa, Brazil*

## Chapter 13

|                                                                            |     |
|----------------------------------------------------------------------------|-----|
| Pesticide Leaching Models in a Brazilian Agricultural Field Scenario ..... | 266 |
|----------------------------------------------------------------------------|-----|

*Rômulo Penna Scorza Júnior, Embrapa Western Region Agriculture, Brazil*

*Renê Luís de Oliveira Rigitano, Federal University of Lavras (UFLA), Brazil*

*Jos J. T. I. Boesten, Wageningen University and Research Centre (WUR), The Netherlands*

## Chapter 14

|                                                                  |     |
|------------------------------------------------------------------|-----|
| A Computational Agent Model of Flood Management Strategies ..... | 296 |
|------------------------------------------------------------------|-----|

*Lisa Brouwers, The Royal Institute of Technology, Sweden*

*Magnus Boman, The Royal Institute of Technology, School of ICT, Sweden & The Swedish Institute of Computer Science (SICS), Sweden*

## Chapter 15

|                                                                                                                                                            |     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Computational Techniques for Biologic Species Distribution Modeling .....                                                                                  | 308 |
| <i>Pedro Luiz Pizzigatti Corrêa, Agricultural Automation Laboratory, Polytechnic School of the University of Sao Paulo, EPUSP, Brazil</i>                  |     |
| <i>Mariana Aparecida Carvalhaes, Brazilian Agricultural Research Corporation, EMBRAPA Middle-North, Brazil</i>                                             |     |
| <i>Antonio Mauro Saraiva, Agricultural Automation Laboratory, Polytechnic School of the University of Sao Paulo, EPUSP, Brazil</i>                         |     |
| <i>Fabício Augusto Rodrigues, Agricultural Automation Laboratory, Polytechnic School of the University of Sao Paulo, EPUSP, Brazil</i>                     |     |
| <i>Elisângela Silva da Cunha Rodrigues, Agricultural Automation Laboratory, Polytechnic School of the University of Sao Paulo, EPUSP, Brazil</i>           |     |
| <i>Ricardo Luis de Azevedo da Rocha, Laboratory of Languages and Adaptive Techniques, Polytechnic School of the University of Sao Paulo, EPUSP, Brazil</i> |     |

## Chapter 16

|                                                                            |     |
|----------------------------------------------------------------------------|-----|
| Seasonal Precipitation Forecast Based on Artificial Neural Networks .....  | 326 |
| <i>Adriano Rolim da Paz, Federal University of Paraíba, Brazil</i>         |     |
| <i>Cintia Bertacchi Uvo, Lund University, Sweden</i>                       |     |
| <i>Juan Martín Bravo, Federal University of Rio Grande do Sul, Brazil</i>  |     |
| <i>Walter Collischonn, Federal University of Rio Grande do Sul, Brazil</i> |     |
| <i>Humberto Ribeiro da Rocha, University of São Paulo, Brazil</i>          |     |

## Chapter 17

|                                                                                                             |     |
|-------------------------------------------------------------------------------------------------------------|-----|
| Descriptive Methods and Compromise Programming for Promoting Agricultural Reuse of Treated Wastewater ..... | 355 |
| <i>Hella Ben Brahim, University of Tunis - El Manar, Tunisia</i>                                            |     |
| <i>Lucien Duckstein, University of Arizona, USA</i>                                                         |     |

## Chapter 18

|                                                                         |     |
|-------------------------------------------------------------------------|-----|
| Towards Spatial Decision Support System for Animals Traceability .....  | 389 |
| <i>Marcos Visoli, Embrapa Agriculture Informatics, Campinas, Brazil</i> |     |
| <i>Sandro Bimonte, Cemagref, TSCF, Clermont Ferrand, France</i>         |     |
| <i>Sônia Ternes, Embrapa Agriculture Informatics, Campinas, Brazil</i>  |     |
| <i>François Pinet, Cemagref, TSCF, Clermont Ferrand, France</i>         |     |
| <i>Jean-Pierre Chanet, Cemagref, TSCF, Clermont Ferrand, France</i>     |     |

## **Chapter 19**

**Construction of Agri-Environmental Data Using Computational Methods:**

**The Case of Life Cycle Inventories for Agricultural Production Systems ..... 412**

*Susumu Uchida, National Agriculture and Food Research Organization, Japan*

*Kiyotada Hayashi, National Agriculture and Food Research Organization, Japan*

*Masaei Sato, National Agriculture and Food Research Organization, Japan*

*Shingo Hokazono, National Agriculture and Food Research Organization, Japan*

**Compilation of References ..... 434**

**About the Contributors ..... 480**

**Index..... 494**
