

PREMIER REFERENCE SOURCE

Computational Neuroscience for Advancing Artificial Intelligence

Models, Methods and Applications

Eduardo Alonso & Esther Mondragón

Table of Contents

Preface	xii
---------------	-----

Section 1 Neuroscience and Computation

Chapter 1

Application of Connectionist Models to Animal Learning: Interactions between Perceptual Organization and Associative Processes	1
<i>Robert C. Honey, Cardiff University, UK</i>	
<i>Christopher S. Grand, Cardiff University, UK</i>	

Chapter 2

Using Computational Modelling to Understand Cognition in the Ventral Visual-Perirhinal Pathway	15
<i>Rosemary A. Cowell, University of California - San Diego, USA</i>	
<i>Timothy J. Bussey, University of Cambridge, UK</i>	
<i>Lisa M. Saksida, University of Cambridge, UK</i>	

Chapter 3

Temporal Uncertainty during Overshadowing: A Temporal Difference Account.....	46
<i>Dónhnall J. Jennings, Newcastle University, UK</i>	
<i>Eduardo Alonso, City University London, UK</i>	
<i>Esther Mondragón, Centre for Computational and Animal Learning Research, UK</i>	
<i>Charlotte Bonardi, University of Nottingham, UK</i>	

Section 2 Computational Models in Neuroscience

Chapter 4

An Associative Approach to Additivity and Maximality Effects on Blocking	57
<i>Néstor A. Schmajuk, Duke University, USA</i>	
<i>Munir G. Kutlu, Duke University, USA</i>	

Chapter 5

Empirical Issues and Theoretical Mechanisms of Pavlovian Conditioning	81
<i>Edgar H. Vogel, Universidad de Talca, Chile</i>	
<i>Fernando P. Ponce, Universidad de Talca, Chile</i>	

Chapter 6

A Primer on Reinforcement Learning in the Brain: Psychological, Computational, and Neural Perspectives	111
<i>Elliot A. Ludvig, University of Alberta, Canada</i>	
<i>Marc G. Bellemare, University of Alberta, Canada</i>	
<i>Keir G. Pearson, University of Alberta, Canada</i>	

Chapter 7

APECS: An Adaptively Parameterised Model of Associative Learning and Memory	145
<i>I.P.L. McLaren, University of Exeter, UK</i>	

Section 3

From Neuroscience to Robotics and AI

Chapter 8

Using Myoelectric Signals to Manipulate Assisting Robots and Rehabilitation Devices	165
<i>Mohammadreza Asghari-Oskoei, University of Essex, UK</i>	
<i>Huosheng Hu, University of Essex, UK</i>	

Chapter 9

Modelling and Analysis of Agent Behaviour	186
<i>Ulrich Nehmzow, University of Ulster, UK</i>	

Chapter 10

Artificial Neural Systems for Robots	214
<i>Phil Husbands, University of Sussex, UK</i>	
<i>Andy Philippides, University of Sussex, UK</i>	
<i>Anil K. Seth, University of Sussex, UK</i>	

Section 4

Neuroscience and Business

Chapter 11

Designing Useful Robots: Is Neural Computation the Answer?	250
<i>David Biss��t, iTechnic Ltd, UK</i>	

Chapter 12

Neural-Symbolic Processing in Business Applications: Credit Card Fraud Detection	270
--	-----

Nick F. Ryman-Tubb, City University London, UK

Epilogue

Chapter 13

Computational Models of Learning and Beyond: Symmetries of Associative Learning	316
---	-----

Eduardo Alonso, City University London, UK

Esther Mondragón, Centre for Computational and Animal Learning Research, UK

Compilation of References	333
