Preface Contributors			xi xii	
1	Intr	oducti	on: Challenges to the Fish-Processing	
			n a Resource-Starved World	1
		rge M.		
	1.1		luction	1
		1.1.1	2	1
			Sustainable development concepts for FPI	4
	1.2		inability tools	8
			Carbon footprinting	9
			Carbon labelling	9
			Life cycle assessment	10
			The supply chain	14
	1.3 Climate change		· ·	15
	1.4		apture fishery	17
			Current production levels	17
			Future trends and fisheries management	17
	1.5		ibution of aquaculture	19
			Current production levels	19
			Future trends	19
			Barriers to increased production	20
	1.6		trial fish production	21
			Current levels	21
			Future trends	22
			Redefining 'industrial species'	22
	1.7	_	cations for the processing industry	22
			Efficiency in processing	22
			Food security and trade	23
			Introducing new food species	24
			Post-harvest losses	25
			Environmental impact of fish processing	26
	1.8		lusion: sustainability in the fish-processing industry	27
		Refere	ences	28

		Contents	vii
Fre	ezing and Chilling of Fish and Fish Products		77
Geo	orge M. Hall		
4.1	Introduction		77
	4.1.1 Freezing time calculations		77
	4.1.2 Effect of freezing on micro-organisms and parasites		79
	4.1.3 Physico-chemical effects during freezing		79
	4.1.4 Temperature modelling in fish transportation		81
4.2	Freezing systems		82
	4.2.1 The refrigeration cycle		82
	4.2.2 Classification of freezers		83
	4.2.3 Air-blast freezers		84
	4.2.4 Immersion freezers		86
	4.2.5 Plate freezers		86
	4.2.6 Cryogenic freezers		86
4.3	Environmental impact of freezing operations		87
	4.3.1 Energy efficiency of freezing systems		87
	4.3.2 Cold storage systems		88
	4.3.3 Refrigerants and cryogens		89
	4.3.4 New refrigeration techniques		90
	4.3.5 Environmental impact of freezer/cold storage buildin	σς	9
4.4	Life cycle assessment and the supply chain	69	92

On-board Fish Processing	On	-board Fish Processing	16

167

8.1 Introduction

			Contents	i>
	8.2	On-board processing		168
		8.2.1 Types of plants processing at sea		168
		8.2.2 Tenders		171
		8.2.3 History of on-board processing		172
		8.2.4 Species and products processed at sea		173
	8.3	Advantages of on-board processing		174
	8.4	Quality issues related to on-board processing		175
		8.4.1 Introduction to quality issues for fisheries products		175
		8.4.2 Receiving and handling raw materials		176
		8.4.3 Quality issues during processing		187
		8.4.4 Quality issues during storage and transport		202
	8.5	Sustainable issues		203
		Acknowledgements		203

9		meal Production and Sustainability		207
	Geo	rge M. Hall		
	9.1	Introduction		207
		9.1.1 Fishmeal production		207
		9.1.2 Conversion efficiency of fishmeal and fish oil		210
		9.1.3 Nutritional value of fishmeal and fish oil		212
	9.2	The fishmeal process		215
		9.2.1 Raw material unloading		216
		9.2.2 The cooker		217
		9.2.3 The press		218
		9.2.4 The decanter		218
		9.2.5 Separators and purifiers		219
		9.2.6 Evaporators		219
		9.2.7 The drier		220
		9.2.8 Post-production operations		220
		9.2.9 Conclusions		221
	9.3	Sustainability issues		221
		9.3.1 Energy		222
		9.3.2 Water		222
		9.3.3 Effluents		222
		9.3.4 By-products		223
		9.3.5 Cleaner production		223
		9.3.6 Life cycle assessment of the fishmeal and fish oil process		224
	9.4	Alternatives to fishmeal		226
		9.4.1 Fish silage		227
		9.4.2 Fish protein hydrolysates		229
		9.4.3 Plant-based alternatives to fishmeal		231
	9.5	Conclusions		232
