

Adhesion and Bonding to Polyolefins

D.M. Brewis and I. Mathieson

Volume 12, Number 11, 2001

Rapra Review Reports

*Expert overviews covering the science and
technology of rubber and plastics*

Contents

Abstract	3
1. Introduction	3
2. Principles	4
2.1 Theories of Adhesion	4
2.2 Wettability	4
2.3 Diffusion	5
3. Methods Used to Study Surfaces	6
3.1 Introduction	6
3.2 X-Ray Photoelectron Spectroscopy XPS	6
3.3 Static Secondary Ion Mass Spectrometry	9
3.4 Reflection IR	9
4. Pretreatments and Primers for Polyolefin Plastics	10
4.1 Introduction	10
4.2 Flame Treatment	11
4.3 Corona Treatment	13
4.4 Low Pressure Plasma Treatment	13
4.5 Chromic Acid Treatment	14
5. Pretreatments and Primers for Polyolefin Elastomers	15
5.1 Introduction	15
5.2 Ethylene-Propylene Copolymers	15
5.3 Butyl Rubber	16
5.4 Unsaturated Hydrocarbon Elastomers	16
5.4.1 Natural Rubber	16
5.4.2 Styrene-Butadiene Copolymers	18
6. Discussion	19
7. Conclusions	23
References	23
Abbreviations and Acronyms	25
Abstracts from the Polymer Library Database	27
Subject Index	121
