

Environmental Stress Cracking of Plastics

D.C. Wright

RAPRA
TECHNOLOGY LTD.

Table of Contents

1	INTRODUCTION	3
1.1	The Cause of ESC	4
1.2	Stress Cracking Agents	7
2	PREDICTION OF ESC AND ASSESSMENT BY TESTING	9
2.1	Prediction	9
2.2	Assessment by Testing	13
2.2.1	Bending Beam Tests	13
2.2.1.1	Single Cantilever for Rigid Materials	13
2.2.1.2	Three Point Bending for Rigid Materials	14
2.2.1.3	The Bell Telephone Test for Flexible Materials	15
2.2.2	Tensile Tests	16
2.2.2.1	Tensile Creep Rupture	16
2.2.2.2	Tensile Creep	19
2.2.2.3	Monotonic Creep	20
2.2.3	Micro-hardness Measurement	22
2.2.3.1	ABS and Dipropylene Glycol Monomethyl Ether (DPM)	23
2.2.3.2	UPVC and PMMA in a Range of Fluids	23
	REFERENCES	26
3	FACTORS THAT INFLUENCE ESC	27
3.1	The Strength of Thermoplastics	27
3.1.1	Short Term Strength	27
3.1.1.1	Yielding	27
3.1.1.2	Brittle Fracture	31
3.1.2	Long Term Strength	31
3.2	Crazing in Air	35
3.2.1	Stress Strain and Time for Initiation	35
3.2.2	Sites for Initiation	41
3.2.3	Craze Growth in Air	42
3.2.4	Crack Initiation and Growth in Air	43
3.3	EAC Theoretical Considerations	44
3.3.1	Stress, Strain, Time and Temperature	44
3.3.2	Influential Fluid Parameters	46
3.3.2.1	The Thermodynamics of Mixing	46
3.3.2.2	Hansen Solubility Parameters	62
3.3.2.3	Solubility Parameters of Plastics	72

3.3.2.4	Solubility at Equilibrium	74
3.3.2.5	Tg Depression due to Partial Solvation	79
3.3.2.6	Post Immersion Time	79
REFERENCES		79
4	DATA ON SPECIFIC PLASTICS	81
4.1	Amorphous Thermoplastics	81
4.1.1	Polystyrene	81
4.1.2	Styrene Acrylonitrile (SAN)	87
4.1.3	Polycarbonate	87
4.1.4	Polyvinylchloride (PVC).....	96
4.1.5	Polymethylmethacrylate (PMMA).....	101
4.1.6	PVC and PMMA - Assessment of ESC Damage Initiation using the Monotonic Creep Technique	106
4.1.6.1	Results	106
4.1.6.2	Correlation with Fluid Parameters	110
4.1.6.3	Rate and Temperature Effects	111
4.1.6.4	Discussion	113
4.2	Semi-crystalline Thermoplastics	118
4.2.1	Polyethylene	118
4.2.1.1	Crazing and Cracking in Air	118
4.2.1.2	Crazing and Cracking in Active Fluids	124
4.2.1.3	Influence of Material Variables	132
4.2.2	PEEK	135
4.2.3	Polyamides	138
4.2.4	Other Semi-crystallines	139
