

# Advanced Rail Geotechnology - Ballasted Track

**Buddhima Indraratna**

Wadud Salim & Cholachat Rujikiatkamjorn

# Contents

<i>Preface</i>	XI
<i>Foreword</i>	XV
<i>About the Authors</i>	XVII
<b>1 Introduction</b>	<b>1</b>
1.1 Nature of Track Substructure	2
1.2 Carbon Footprint and Implications	11
1.3 Scope	12
<b>2 Track Structure and Rail Load</b>	<b>15</b>
2.1 Types of Track Structure	15
2.2 Components of a Ballasted Track	17
2.3 Track Forces	25
2.4 Load Transfer Mechanism	35
2.5 Stress Determination	37
<b>3 Factors Governing Ballast Behaviour</b>	<b>47</b>
3.1 Particle Characteristics	47
3.2 Aggregate Characteristics	53
3.3 Loading Characteristics	57
3.4 Particle Degradation	67
<b>4 State-of-the-art Laboratory Testing and Degradation Assessment of Ballast</b>	<b>81</b>
4.1 Monotonic Triaxial Testing	81
4.2 Single Grain Crushing Tests	87
4.3 Cyclic Triaxial Testing	88
4.4 Impact Testing	97

<b>5</b>	<b>Behaviour of Ballast with and without Geosynthetics and Energy Absorbing Mats</b>	<b>107</b>
5.1	Ballast Response under Monotonic Loading	107
5.2	Single Particle Crushing Strength	124
5.3	Ballast Response under Cyclic Loading	126
5.4	Ballast Response under Repeated Loading	134
5.5	Effect of Confining Pressure	136
5.6	Energy Absorbing Materials: Shock Mats	138
<b>6</b>	<b>Existing Track Deformation Models</b>	<b>145</b>
6.1	Plastic Deformation of Ballast	145
6.2	Other Plastic Deformation Models	147
6.3	Modelling of Particle Breakage	158
<b>7</b>	<b>A Constitutive Model for Ballast</b>	<b>163</b>
7.1	Modelling of Particle Breakage	163
7.2	Constitutive Modelling for Monotonic Loading	170
7.3	Constitutive Modelling for Cyclic Loading	184
7.4	Model Verification and Discussion	190
<b>8</b>	<b>Track Drainage and Use of Geotextiles</b>	<b>203</b>
8.1	Drainage	203
8.2	Fouling Indices	206
8.3	Geosynthetics in Rail Track	208
8.4	Use of Geosynthetic Vertical Drains as a Subsurface Drainage	213
<b>9</b>	<b>Role of Subballast, its Drainage and Filtration Characteristics</b>	<b>219</b>
9.1	Subballast Selection Criteria	220
9.2	Empirical Studies on Granular Filtration	225
9.3	Mathematical Formulations in Drainage and Filtration	228
9.4	Constriction Size Distribution Model	234
9.5	Constriction Based Criteria for Assessing Filter Effectiveness	238
9.6	Implications on Design Guidelines	240
9.7	Steady State Seepage Hydraulics of Porous Media	242
9.8	Subballast Filtration Behaviour under Cyclic Conditions	244
9.9	Time Dependent Geo-Hydraulic Filtration Model for Particle Migration under Cyclic Loading	258
<b>10</b>	<b>Field Instrumentation for Track Performance Verification</b>	<b>273</b>
10.1	Site Geology and Track Construction	273
10.2	Field Instrumentation	276

10.3	Data Collection	282
10.4	Results and Discussion	282
<b>11</b>	<b>DEM Modelling of Ballast Densification and Breakage</b>	<b>293</b>
11.1	Discrete Element Method and PFC <sup>2D</sup>	294
11.2	Modelling of Particle Breakage	298
11.3	Numerical Simulation of Monotonic and Cyclic Behaviour of Ballast using PFC <sup>2D</sup>	299
11.4	Breakage Behaviour	307
11.5	Mechanism of CF Chains Developed during Cyclic Loading	314
<b>12</b>	<b>FEM Modelling of Tracks and Applications to Case Studies</b>	<b>321</b>
12.1	Use of Geocomposite under Railway Track	321
12.2	Design Process for Short PVDS under Railway Track	327
<b>13</b>	<b>Non-destructive Testing and Track Condition Assessment</b>	<b>335</b>
13.1	Laboratory Model Track	335
13.2	GPR Method	338
13.3	Multi-channel Analysis of Surface Wave Method	348
<b>14</b>	<b>Track Maintenance</b>	<b>357</b>
14.1	Track Maintenance Techniques	357
14.2	Track Geotechnology and Maintenance in Cold Regions	361
<b>15</b>	<b>Recommended Ballast Gradations</b>	<b>367</b>
15.1	Australian Ballast Specifications	368
15.2	International Railway Ballast Grading	370
15.3	Gradation Effects on Settlement and Ballast Breakage	371
15.4	Recommended Ballast Grading	373
15.5	Conclusions	374
<b>16</b>	<b>Bio-Engineering for Track Stabilisation</b>	<b>377</b>
16.1	Introduction	377
16.2	Conceptual Modelling	378
16.3	Verification of the Proposed Root Water Uptake Model	381

X Contents

<b>Appendices</b>	<b>389</b>
<i>Appendix A: Derivation of Partial Derivatives of <math>g(p, q)</math> with respect to <math>p</math> and <math>q</math> from a First Order Linear Differential Equation</i>	391
<i>Appendix B: Determination of Model Parameters from Laboratory Experimental Results</i>	393
<i>Appendix C: A Pictorial Guide to Track Strengthening, Field Inspection and Instrumentation</i>	399
<i>Appendix D: Unique Geotechnical and Rail Testing Equipment</i>	405
<b>Subject Index</b>	<b>411</b>
