

# Treated Wastewater in Agriculture

USE AND IMPACTS ON THE SOIL ENVIRONMENT AND CROPS

EDITED BY

GUY J. LEVY | PINCHAS FINE | ASHER BAR-TAL

 WILEY-BLACKWELL

# Contents

<b>Preface</b>	<b>xi</b>
<b>Contributors list</b>	<b>xv</b>
<b>Part I GENERAL ASPECTS</b>	<b>1</b>
<b>Chapter 1 Sources and composition of sewage effluent; treatment systems and methods</b>	<b>3</b>
<i>Renato Iannelli and David Giraldi</i>	
1.1 Sources of usable wastewater	3
1.1.1 Domestic and municipal wastewater	4
1.1.2 Municipal, combined, and dedicated stormwater sewers	4
1.1.3 Industrial wastewater	4
1.2 Main characteristics of usable wastewater	6
1.2.1 Potentially beneficial substances	8
1.2.2 Harmful substances in sewage effluent	10
1.2.3 Quantity considerations	12
1.3 Wastewater treatments	13
1.3.1 Classification of treatment stages	13
1.3.2 Preliminary and primary treatments	15
1.3.3 Secondary biological treatments	16
1.3.4 Nutrient removal	26
1.3.5 Disinfection	30
1.3.6 Other tertiary chemico-physical treatments	34
1.3.7 Membrane technologies and quaternary processes	38
1.3.8 Natural treatments	42
1.4 Framework for the selection of the optimal treatment train	44
References	48
<b>Chapter 2 Health considerations in the recycling of water and use of treated wastewater in agriculture and other non-potable purposes</b>	<b>51</b>
<i>Hillel Shuval</i>	
2.1 Introduction	51
2.2 Rationale: why should society allow, regulate, and thus encourage exposure of the population to known health risks?	52
2.3 Persistence of pathogenic microorganisms in water, soil, and on crops from wastewater-irrigation	53
2.4 Disease transmission by wastewater-irrigation	55
2.4.1 Illness associated with wastewater-irrigation of crops eaten raw	55
2.4.2 Cattle grazing on wastewater-irrigated pastures	56

2.4.3	Exposure of wastewater farmers	57
2.4.4	Exposure of residents in the vicinity of wastewater farms	58
2.4.5	Epidemiological evidence of beneficial effects from wastewater treatment in reducing exposure to pathogens	58
2.4.6	Critical review of epidemiological evidence of health effects of wastewater and excreta use in agriculture	59
2.4.7	Conclusions from the analysis of the epidemiological studies	60
2.5	Control of crops and irrigation methods to reduce health risks	63
2.5.1	Regulating the type of crops	63
2.5.2	Controlling irrigation methods	63
2.6	Development of health standards and guidelines for wastewater use	64
2.6.1	The importance of health guidelines and standards for reuse	64
2.6.2	The USEPA/USAID initiative for wastewater use health guidelines	65
2.6.3	Impact of highly restrictive reuse guidelines and standards	66
2.6.4	The World Bank/WHO initiative to re-evaluate wastewater use guidelines	67
2.6.5	Evaluating the WHO's 2006 health guidelines for wastewater reuse in agriculture	68
2.6.6	WHO guidelines for monitoring and validation	70
2.7	Conclusions	74
	References	74
<b>Chapter 3</b>	<b>Irrigation with recycled water: guidelines and regulations</b>	<b>77</b>
	<i>Nikolaos V. Paranychianakis, Miquel Salgot and Andreas N. Angelakis</i>	
	Terminology definitions	77
3.1	Introduction	78
3.2	Historical development of water recycling and reuse regulations	79
3.3	Water recycling in agriculture: quality issues	81
3.3.1	Pathogens	81
3.3.2	Biodegradable organic matter	84
3.3.3	Total suspended solids	84
3.3.4	Residual chlorine	85
3.3.5	Toxic organic compounds	85
3.3.6	Nutrients	85
3.3.7	Salinity	86
3.3.8	Trace elements	86
3.4	Treatment requirements and TWW quality monitoring	87

3.5	Water reuse criteria: irrigation of agricultural crops and landscapes	88
3.5.1	World Health Organization	89
3.5.2	USEPA guidelines	92
3.5.3	California regulations (Title 22)	92
3.5.4	Florida	96
3.5.5	Other states of America	97
3.5.6	Canada	98
3.5.7	Australian guidelines	98
3.5.8	Europe	99
3.5.9	Non-European Mediterranean countries	104
3.6	Conclusions	108
	References	110
<b>Chapter 4</b>	<b>Economic aspects of irrigation with treated wastewater</b>	<b>113</b>
	<i>Efrat Hadas and Yoav Kislev</i>	
4.1	Introduction	113
4.2	Wastewater in agriculture	114
4.3	Wastewater and the regulation of its reuse	114
4.4	Treatment	115
4.5	Cost	116
4.6	Replacement of fertilizers	116
4.7	Cost allocation and prices	118
4.7.1	The role of prices	119
4.7.2	The model economy	119
4.7.3	Prices	120
4.7.4	Cost recovery	121
4.8	Further considerations and alternatives	121
4.8.1	Will the polluter pay?	122
4.8.2	Scarcity rents and extraction levies	122
4.9	Agreements	123
4.9.1	Nash bargaining solution	123
4.9.2	Remarks	124
4.10	The role of the government	125
4.11	Concluding comments	125
	References	126
<b>Part II</b>	<b>IMPACTS ON THE SOIL ENVIRONMENT AND CROPS</b>	<b>129</b>
<b>Chapter 5</b>	<b>Major minerals</b>	<b>131</b>
5.1	<b>Nitrogen in treated wastewater-irrigation</b>	<b>131</b>
	<i>Asher Bar-Tal</i>	
5.1.1	Introduction	131
5.1.2	Nitrogen transformations	132
5.1.2.1	Mineralization and immobilization	132
5.1.2.2	Ammonium and ammonia reactions	136

5.1.2.3	Nitrification	143
5.1.2.4	Denitrification	146
5.1.3	TWW-N availability to plants	150
5.1.4	TWW-N leaching and environmental pollution	152
5.1.5	Modeling TWW-N fate	156
5.1.6	Conclusions	157
	References	159
<b>5.2</b>	<b>Phosphorus</b>	<b>166</b>
	<i>Bnayahu Bar-Yosef</i>	
5.2.1	Introduction	166
5.2.2	Phosphorus forms and species in effluents	167
5.2.3	Sorption, transport and transformations of effluent P in soil	168
5.2.3.1	Inorganic P	168
5.2.3.2	Organic P	173
5.2.3.3	Transport	176
5.2.4	Treated wastewater irrigation	179
5.2.4.1	Phosphorus application versus consumption rate	179
5.2.4.2	Phosphorus losses from wastewater-irrigated soils	181
5.2.5	Case studies	185
5.2.5.1	Long-term studies with a single soil	185
5.2.5.2	Long term wastewater irrigation survey	186
5.2.6	Conclusions and outlook	195
	References	196
<b>5.3</b>	<b>Calcium and carbonate</b>	<b>203</b>
	<i>Gil Eshel and Michael J. Singer</i>	
5.3.1	Introduction	203
5.3.2	Sources and distribution	204
5.3.3	Carbonate system in the soil environment	205
5.3.3.1	Soil $p\text{CO}_2$	205
5.3.3.2	Soil pH	207
5.3.3.3	Stable isotopes	209
5.3.4	The effect of irrigation on soil carbonate	210
5.3.5	Environmental aspects	210
5.3.6	Summary	212
	References	212
<b>Chapter 6</b>	<b>Toxic elements</b>	<b>216</b>
<b>6.1</b>	<b>Boron</b>	<b>216</b>
	<i>Uri Yermiyahu, Alon Ben-Gal and Rami Keren</i>	
6.1.1	Introduction	216
6.1.2	Boron in TWW	217
6.1.3	Boron chemistry in aqueous media	218

6.1.4	Boron – soil interactions	219
6.1.4.1	Solution B – adsorption processes	219
6.1.4.2	Boron – salinity interactions	221
6.1.4.3	Leaching B from soils	221
6.1.5	Boron – crop interactions	223
6.1.5.1	Plant function and B nutrition	223
6.1.5.2	Excess B and toxicity	223
6.1.5.3	Boron – Salinity interactions in plants	224
6.1.6	Irrigation with TWW containing high B levels: a case study	225
	References	229
<b>6.2</b>	<b>Chlorides in treated wastewater and their effects on plants</b>	<b>234</b>
	<i>Uzi Kafkafi</i>	
6.2.1	Introduction	234
6.2.2	Chloride in plants	235
6.2.2.1	Deficiency	235
6.2.2.2	Sufficiency	235
6.2.2.3	Toxicity	236
6.2.3	Absorption mechanisms of chloride by plant roots	238
6.2.4.	Effects of irrigation with TWW containing high Cl concentrations on crops	239
6.2.4.1	Hazards of long-term irrigation with recycled effluents	241
6.2.5	Foliar damage by Cl in sprinkler irrigated TWW	242
6.2.6	Concluding comments	243
	References	243
<b>Chapter 7</b>	<b>Heavy metals in soils irrigated with wastewater</b>	<b>247</b>
	<i>Amir Hass, Uri Mingelgrin and Pinchas Fine</i>	
	List of acronyms	247
7.1	Introduction	248
7.2	Heavy metals in effluents	248
7.3	Organic matter: composition in wastewater effluents and behavior in soil	254
7.4	Attenuation of heavy metals in soils irrigated with effluents	256
7.5	Loading limits of metals	256
7.6	Metals: interaction with soil components	259
7.7	Distribution of metals among the soil's solid fractions	259
7.8	The stability, pH and Eh of free oxides, and their effect on the geochemical distribution of metals	261
7.9	Heavy metal solubility and speciation in the soil solution	266
7.10	Mobility of heavy metals in the soil profile	269
7.11	Availability to plants	271
7.12	Summary and conclusions	275
	References	276

<b>Chapter 8</b>	<b>Salinity</b>	<b>286</b>
	<i>Nico E. Marcar, Tivi Theiveyanathan and Daryl P. Stevens</i>	
8.1	The nature of salinity	286
8.2	Measuring salinity	287
	8.2.1 Water salinity	287
	8.2.2 Soil salinity	287
8.3	Mechanism of soil salinisation	288
8.4	Salinity in wastewater	288
	8.4.1 Chemical characterization of treated wastewater	289
	8.4.2 Managing salinity in TWW	290
8.5	Effects of salinity on plant growth and water use	290
	8.5.1 Physiological growth responses	291
	8.5.2 Growth responses to saline water irrigation	291
8.6	Water use	293
	8.6.1 Irrigation with saline water	294
	8.6.2 Irrigation scheduling	294
	8.6.3 Managing saline drainage water from irrigation of recycled water	296
8.7	Managing root-zone salinity	296
	8.7.1 Field evidence	296
	8.7.2 Leaching fractions	298
	8.7.3 Modeling predictions	302
8.8	Summary and conclusions	302
	References	303
<b>Chapter 9</b>	<b>Physical aspects</b>	<b>306</b>
	<i>Guy J. Levy and Shmuel Assouline</i>	
9.1	Introduction	306
9.2	Soil structural stability	307
9.3	Soil hydraulic properties	309
	9.3.1 Water retention curve	309
	9.3.2 Hydraulic conductivity (saturated and unsaturated)	310
9.4	Soil surface sealing, infiltration and runoff	314
9.5	Soil erosion	317
9.6	Water repellency	319
9.7	Concluding comments	321
	References	322
<b>Chapter 10</b>	<b>Fouling in microirrigation systems applying treated wastewater effluents</b>	<b>328</b>
	<i>Carlos G. Dosoretz, Jorge Tarchitzky, Ilan Katz, Elisha Kenig and Yona Chen</i>	
10.1	Introduction	328
10.2	Quality of treated effluents as a source of irrigation water	329
10.3	Emitter clogging in relation to irrigation water quality	332
	10.3.1 Suspended material	333

10.3.2	Chemical deposition	333
10.3.3	Biological deposition	336
10.3.4	Biofouling	336
10.4	Management of emitter clogging	339
10.4.1	Filtration of particulate material	340
10.4.2	Biofouling control	341
10.4.3	Control of chemical and biological deposition	344
10.4.4	Flushing of the irrigation line	345
10.5	Recovery of clogged emitters	345
10.6	Concluding remarks and future prospects	346
	References	347
<b>Chapter 11</b>	<b>Effects of treated municipal wastewater irrigation on soil microbiology</b>	<b>351</b>
	<i>Dror Minz, Rachel Karyo and Zev Gerstl</i>	
11.1	Introduction	351
11.2	Soil microbial ecology and activities	352
11.2.1	Nitrogen fixation	357
11.2.2	Denitrification	357
11.2.3	Organic matter	358
11.2.4	Pesticides	359
11.2.5	Pharmaceuticals	360
11.2.6	Heavy metals	361
11.2.7	pH	363
11.2.8	Salinity	364
11.2.9	Boron	364
11.3	Human pathogens	365
11.4	Summary and conclusions	367
	References	368
<b>Chapter 12</b>	<b>Impact of irrigation with treated wastewater on pesticides and other organic microcontaminants in soils</b>	<b>382</b>
	<i>Zev Gerstl and Ellen R. Graber</i>	
12.1	Introduction	382
12.2	The effect of DOM on the chemical behavior of organic xenobiotics	382
12.2.1	DOM binding with xenobiotic organic chemicals (XOCs)	382
12.2.2	Binding constant – DOM relationships	387
12.2.3	Effect of DOM on sorption and transport of XOCs	388
12.3	Effluent-borne organic contaminants	391
12.4	Summary and conclusions	396
	References	396

<b>Chapter 13</b>	<b>Organic matter in wastewater and treated wastewater-irrigated soils: properties and effects</b>	<b>400</b>
	<i>Yona Chen, Carlos G. Dosoretz, Ilan Katz, Elizabeth Jüeschke, Bernd Marschner and Jorge Tarchitzky</i>	
13.1	Introduction	400
13.2	Organic matter in wastewater	400
	13.2.1 Particle-size distribution	401
	13.2.2 Chemical composition	402
13.3	Soil organic matter (SOM)	405
13.4	The influence of treated-wastewater-borne organic matter on soil organic matter	406
13.5	The influence of treated-wastewater-borne organic matter on soil properties	410
13.6	Concluding remarks	413
	References	414
<b>Chapter 14</b>	<b>Analysis of transport of mixed Na/Ca salts in a three-dimensional heterogeneous variably saturated soil</b>	<b>418</b>
	<i>David Russo</i>	
14.1	Introduction	418
14.2	Modeling of transport of mixed Na/Ca salts in spatially heterogeneous, variably saturated soils	420
	14.2.1 The coupling-interaction parameters	420
	14.2.2 The governing partial differential equations	421
	14.2.3 Characterization of the flow and transport parameters	422
14.3	Simulation of transport of mixed Na/Ca salts in spatially heterogeneous, variably saturated soils	424
	14.3.1 Results of the transport simulation of Russo et al. (2004)	424
	14.3.2 Discussion of the results of the transport simulation of Russo et al. (2004)	432
14.4	Summary and concluding remarks	433
	References	435
