

Small Animal Bandaging, Casting, and Splinting Techniques

Steven F. Swaim, Walter C. Renberg, and Kathy M. Shike

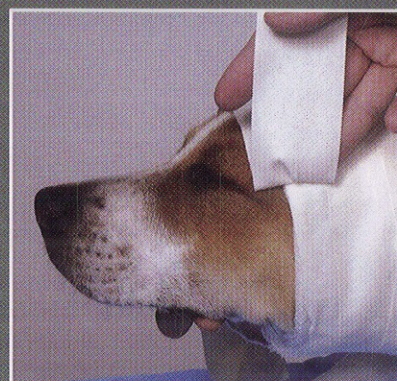

Table of Contents

Mission Statement	xi	Joint immobilization	11
Foreword	xiii	Maceration and excoriation	12
Preface	xv	Need for sedation or anesthesia during bandage change	12
Acknowledgments	xvii	Casts and splints	13
Chapter 1 – Basics of Bandaging, Casting, and Splinting		General information	13
Bandaging	3	Purposes and functions of casts and splints	13
Purposes and functions of a bandage	3	Materials	13
Components of a bandage	4	Splint rods	13
Primary-contact layer	4	Commercial splints	13
Highly absorptive dressings	4	Plastic splinting material	13
Gauze dressings	4	Stockinette	13
Hypertonic saline dressings	5	Casting tapes	14
Calcium alginate dressings	5	Chapter 2 – Head and Ear Bandages	15
Copolymer starch dressings	5	Emergency ear bandage	15
Moisture-retentive dressings	5	Indications	15
Polyurethane foam dressings	6	Technique	15
Polyurethane film dressings	6	Aftercare	16
Hydrogel dressings	7	Advantages and complications	16
Hydrocolloid dressings	7	Basic head and ear bandage	16
Nonadherent semioclusive dressings	7	Indications	16
Antimicrobial dressings	8	Technique	16
Extracellular matrix bioscaffold dressings	8	Aftercare	22
Secondary-intermediate layer	9	Advantages and complications	23
Tertiary-outer layer	9	Chapter 3 – Thoracic, Abdominal, and Pelvic Bandages	25
Special considerations in bandaging, casting, and splinting	10	Thoracic, abdominal bandages	25
Frequency of changes	10	Circumferential thoracic, abdominal bandage	25
Security	10	Indications	25
Pressure relief	11		

Technique	26	Advantages and complications	55
Aftercare	29	Interdigital and interpad areas	55
Advantages and complications	29	Primary bandage layer	56
Windowed thoracic, abdominal bandage	29	Secondary bandage layer	56
Indications	29	Tertiary bandage layer	56
Technique	29	Basic paw and distal limb bandage	56
Aftercare	29	Indications	56
Advantages and complications	29	Technique	56
Thoracic, abdominal tie-over bandage	29	Interdigital/interpad areas	56
Indications	29	Primary bandage layer,	
Technique	30	“donut” pads, and “stirrups”	58
Aftercare	31	Secondary bandage layer	62
Advantages and complications	31	Tertiary bandage layer	64
Pelvic bandages	32	Aftercare	67
Circumferential pelvic bandage	32	Bandage removal	67
Indications	32	Bandage replacement	67
Technique	33	Advantages and complications	68
Aftercare	35	Interdigital/interpad area	68
Advantages and complications	35	Primary bandage layer	68
Windowed pelvic bandage	36	Secondary bandage layer	68
Indications	36	Tertiary bandage layer	69
Technique	36	Paw pad pressure relief	69
Aftercare	38	Indications	69
Advantages and complications	38	Technique—moderate wounds	
Pelvic tie-over bandage	39	on small to medium-sized dogs	69
Indications	39	Metacarpal/metatarsal pad	69
Technique	39	Digital pads	70
Aftercare	39	Aftercare—moderate wounds on	
Advantages and complications	39	small to medium-sized dogs	71
Pelvic extension splints	39	Advantages and complications—	
Indications	39	moderate wounds on small to	
Technique	40	medium-sized dogs	71
Aftercare	41	Techniques—major reconstructive	
Advantages and complications	41	or salvage paw surgery, especially	
Chapter 4 – Extremity Bandages, Casts, and Splints	43	on large dogs	71
Tail bandages	43	“Clamshell” splints	71
Indications	43	One-half “clamshell” splint	72
Technique	44	Aftercare—major reconstructive	
Aftercare	47	or salvage paw surgery, especially	
Advantages and complications	47	on large dogs	73
Forelimb bandages, casts, and splints	47	Advantages and complications—	
Basic soft padded limb bandage	47	major reconstructive or salvage	
Indications	48	paw surgery, especially on	
Technique	48	large dogs	73
Aftercare	54	Dorsal paw pressure relief	73
Bandage removal	54	Indications	73
Bandage replacement	55	Technique	74
		Aftercare	75
		Advantages and complications	75
		Carpal sling	75
		Indications	75

Technique	76	Aftercare	99
Aftercare	78	Advantages and complications	99
Advantages and complications	78	Ehmer sling	100
Basic forelimb splint	78	Indications	100
Indications	78	Technique	100
Technique	78	Aftercare	104
Aftercare	83	Advantages and complications	104
Advantages and complications	83	90/90 sling	104
Basic forelimb cast	83	Indications	104
Spica bandage and lateral splint	83	Technique	105
Indications	83	Aftercare	108
Technique	84	Advantages and complications	108
Aftercare	87	Tie-over bandage	108
Advantages and complications	87	Indications	108
Aluminum rod loop elbow splint	88	Technique	108
Indications	88	Aftercare	108
Technique	88	Advantages and complications	109
Aftercare	89		
Advantages and complications	89	Chapter 5 – Restraint	111
Velpeau sling	89	Elizabethan collar	111
Indications	89	Plastic wrap-around collar	113
Technique	89	Towel collar	113
Aftercare	92	Muzzles	114
Advantages and complications	92	Side braces	114
Pelvic limb bandages, casts, and splints	92	Topical chemical deterrents	118
Basic soft padded limb bandage	92	Electronic devices	119
Basic pelvic limb splint	93		
Basic pelvic limb cast	93	Suggested Reading	121
Indications	93	Index	123
Technique	93
