

CLEAN COAL

ENGINEERING TECHNOLOGY

Bruce G. Miller

Contents

Preface

xiii

Part I – Background Information

1	Coal as Fuel	1
1.1	Organization of this Book	1
1.2	The History of Coal Use	2
1.3	Coal Use before the Industrial Revolution	2
1.3.1	The Early History of U.S. Coal Mining and Use	3
1.4	Coal Use during the Industrial Revolution	4
1.5	The Post-Industrial Revolution Use of Coal	5
1.6	An Overview of Energy in the United States	6
1.7	Coal Production in the United States	12
1.8	Coal Consumption in the United States	20
1.9	U.S. Coal Exports and Imports	22
1.10	World Primary Energy Production and Consumption	24
1.10.1	World Primary Energy Production	24
1.10.2	World Primary Energy Consumption	31
1.11	Projections of Energy Use and Coal's Contribution to the Energy Mix	35
1.11.1	World Consumption of Liquid Fuels	38
1.11.2	World Consumption of Natural Gas	39
1.11.3	World Consumption of Coal	39
1.11.4	World Consumption of Nuclear Energy	44
1.11.5	World Consumption of Renewable Energy	45
1.11.6	Energy Outlook for the United States	46
1.12	Coal's Role in the U.S.'s 2001 Energy Policy	49
2	The Chemical and Physical Characteristics of Coal	53
2.1	The Definition of Coal	53
2.2	Origin of Coal	53
2.3	Coalification	54
2.4	The Classification of Coal	57
2.4.1	Basic Coal Analysis	57
2.4.2	The Ranks of Coal	59
2.4.3	The Types of Coal	61
2.4.4	The Grades of Coal	63
2.4.5	Classification Systems	63

3	The Worldwide Distribution of Coal	69
3.1	Coal Distribution and Resources	69
3.1.1	Coal Reserves throughout the World	70
3.2	Major Coal-Producing Regions in the World	74
3.2.1	North America	74
3.2.2	Eurasia	78
3.2.3	Middle East, Asia, and Oceania	80
3.2.4	Europe	81
3.2.5	Africa	82
3.2.6	Central and South America	83
4	The Effect of Coal Usage on Human Health and the Environment	85
4.1	Coal Mining	86
4.1.1	Underground Mining	86
4.1.2	Surface Mining	96
4.1.3	Legislation and Reclamation	99
4.2	Coal Preparation	100
4.2.1	Water Contamination from Preparation Plants	102
4.2.2	Air Contamination from Preparation Plants	102
4.2.3	Refuse Contaminants from Preparation Plants	102
4.2.4	Health and Safety Issues	103
4.3	Coal Transportation	104
4.4	Coal Combustion By-Products	105
4.5	Emissions from Coal Combustion	107
4.5.1	Sulfur Oxides	107
4.5.2	Nitrogen Oxides	110
4.5.3	Particulate Matter	112
4.5.4	Organic Compounds	116
4.5.5	Carbon Monoxide	116
4.5.6	Trace Elements	117
4.5.7	Greenhouse Gases–Carbon Dioxide	124

Part II – Coal Utilization Technologies

5	Introduction to Coal Utilization Technologies	133
5.1	Coal Combustion	133
5.1.1	Brief History of Boilers and Coal Combustion Systems	134
5.1.2	Basic Steam Fundamentals and their Application to Boiler Development	142
5.1.3	The Chemistry of Coal Combustion	144
5.1.4	Coal Combustion Systems	149
5.1.5	Influence of Coal Properties on Utility Boiler Design	166

5.2	Carbonization	172
5.2.1	Brief History of Carbonization (High-Temperature)	174
5.2.2	Coking Processes	175
5.2.3	Coal Properties for Coke Production	178
5.2.4	Coking Conditions	179
5.2.5	Low-Temperature Carbonization	179
5.3	Gasification	183
5.3.1	Brief History of Coal Gasification	183
5.3.2	Principles of Coal Gasification	184
5.3.3	Gasifier Types	185
5.3.4	Influence of Coal Properties on Gasification	189
5.3.5	Regional Distribution of Gasification Systems	191
5.3.6	Commercial Gasification Systems	194
5.4	Liquefaction	205
5.4.1	The Beginning of the Synthetic Fuel Industry	206
5.4.2	Indirect Liquefaction—Fischer-Tropsch Synthesis	207
5.4.3	Direct Liquefaction	209
6	Anatomy of a Coal-Fired Power Plant	219
6.1	Coal Transport to the Power Plant	219
6.2	Coal Handling, Storage, and Processing	223
6.2.1	Coal Handling	224
6.2.2	Coal Storage	225
6.2.3	Coal Processing/Size Reduction	226
6.3	Steam Generation	236
6.3.1	Furnace and Convection Pass	236
6.3.2	Steam Superheaters and Reheaters	237
6.3.3	Economizers	237
6.3.4	Steam Drums	237
6.3.5	Steam Temperature Controls	239
6.3.6	Air Heaters (Preheaters)	239
6.4	Steam Turbines and Electricity Generation	239
6.4.1	Steam Turbines	239
6.4.2	Electric Generators	242
6.5	Steam Condensers and Cooling Towers	242
6.5.1	Steam Condensers	242
6.5.2	Cooling Towers	243
6.6	Water Treatment	243
6.7	Environmental Protection	246
6.8	Ash and By-Product Handling	247
6.8.1	Bottom Ash Systems	247
6.8.2	Convective Pass/Economizer Ash Systems	247
6.8.3	Fly Ash Systems	248
6.8.4	Scrubber Sludge Systems	249

7	Clean Coal Technologies for Advanced Power Generation	251
7.1	Power Cycles	251
7.1.1	Rankine Cycle	251
7.1.2	The Brayton Cycle	253
7.1.3	Combined Cycle	253
7.2	Pulverized Coal-Fired Power Plants	254
7.2.1	Advanced Pulverized Coal-Fired Plants	255
7.2.2	Advanced Ultra-Supercritical Research and Development	260
7.2.3	Oxy-Fuel Firing in Pulverized Coal-Fired Boilers	261
7.3	Fluidized-Bed Combustion	264
7.3.1	Introduction	264
7.3.2	Heat Transfer	266
7.3.3	Combustion Efficiency	267
7.3.4	Fuel Flexibility	267
7.3.5	Pollutant Formation and Control	269
7.3.6	Supercritical Fluidized-Bed Boilers and Oxy-Coal Firing in Fluidized-Bed Boilers	282
7.4	Integrated Gasification Combined Cycle	282
7.4.1	Introduction	283
7.4.2	Gasification Island	284
7.4.3	Gas Treatment and Sulfur Recovery	285
7.4.4	Combined Cycle Power Plant	290
7.4.5	IGCC with Carbon Capture	290
7.4.6	Benefits and Limits of IGCC	291
7.4.7	Commercial Status	294
7.5	IGCC Research Needs	296
 Part III – Emissions and Carbon Management		
8	Coal-Fired Emissions and Legislative Action	301
8.1	Major Coal-Related Health Episodes	301
8.1.1	Pre-Industrial Revolution	301
8.1.2	Post-Industrial Revolution	302
8.2	History of Legislative Action for Coal-Fired Power Plants	303
8.2.1	Pre-1970 Legislation	303
8.2.2	The Clean Air Act Amendments of 1970	305
8.2.3	Clean Air Act Amendments of 1977 and Prevention of Significant Deterioration	315
8.2.4	Clean Air Act Amendments of 1990	317
8.2.5	Additional NO _x Regulations and Trading Programs	324
8.2.6	Clean Air Interstate Rule	327
8.2.7	Clean Air Mercury Rule	328

8.2.8	New Source Review	330
8.2.9	Fine Particulate Matter	332
8.2.10	Impending Legislation and Pollutants under Consideration for Regulation	333
8.3	Emissions Legislation in Other Countries	337
8.3.1	Sulfur Dioxide	337
8.3.2	Nitrogen Oxides	341
8.3.3	Particulate Matter	345
8.3.4	Trace Elements/Mercury	346
8.3.5	Carbon Dioxide	348
8.4	Air Quality and Coal-Fired Emissions	349
8.4.1	Six Principal Pollutants	351
8.4.2	Acid Rain	362
8.4.3	Hazardous Air Pollutants	366
8.4.4	Carbon Dioxide	369
9	Emissions Control Strategies for Power Plants	375
9.1	Currently Regulated Emissions	376
9.1.1	Sulfur Dioxide	377
9.1.2	Nitrogen Oxides	413
9.1.3	Particulate Matter	437
9.2	Pollutants with Pending Compliance Regulation	459
9.2.1	Mercury	459
9.3	Multipollutant Control	472
9.3.1	ECO Process	473
9.3.2	Airborne Process	474
9.3.3	Multipollutant Control for Smaller Coal-Fired Boilers	474
9.3.4	Nalco Mobotec Systems	474
9.3.5	Others	475
10	CO₂ Capture and Storage	483
10.1	CO ₂ Capture Technologies	485
10.1.1	Precombustion (IGCC) CO ₂ Capture	486
10.1.2	Oxy-Fuel Combustion	487
10.1.3	Postcombustion CO ₂ Capture	487
10.1.4	Biomass Cofiring	496
10.2	Transport of CO ₂	497
10.3	CO ₂ Storage	498
10.3.1	Geologic Storage	498
10.3.2	Ocean Storage	500
10.3.3	Terrestrial Storage	501
10.3.4	Mineral Carbonation	501
10.4	Economics of CO ₂ Sequestration	502

10.4.1	Capture Costs	502
10.4.2	Costs of Transporting CO ₂	507
10.4.3	Storage Costs	508
10.5	Permanence and Monitoring, Mitigation, and Verification	509

Part IV – Clean Coal Technology Programs and Energy Security

11	U.S. and International Activities for Near-Zero Emissions during Electricity Generation	513
11.1	Introduction to U.S. Clean Coal Technology Programs	513
11.2	Clean Coal Technology Demonstration Program	514
11.2.1	CCTDP Evolution	515
11.2.2	CCTDP Funding and Costs	516
11.2.3	CCTDP Projects	516
11.2.4	CCTDP Accomplishments	537
11.3	Power Plant Improvement Initiative	541
11.3.1	PPII Projects	542
11.3.2	Benefits of the PPII	546
11.4	Clean Coal Power Initiative	547
11.4.1	Program Importance	547
11.4.2	Round 1 CCPI Projects	548
11.4.3	Round 2 CCPI Projects	553
11.4.4	Round 3 CCPI (CCPI-3A and CCPI-3B) Projects	556
11.4.5	CCPI Benefits	558
11.5	Benefits of DOE's Clean Coal Technology Programs	559
11.6	Vision 21	563
11.6.1	Vision 21 Technologies	563
11.6.2	Vision 21 Benefits	565
11.7	FutureGen	565
11.8	DOE Carbon Sequestration Program	568
11.9	International Carbon Sequestration Programs	572
11.10	International Clean Coal Technology and Carbon Sequestration Activities	572
11.10.1	Canada	573
11.10.2	Australia	574
11.10.3	Germany	576
11.10.4	Japan	576
11.10.5	China	577
11.10.6	Others	578
12	Coal and Energy Security	585
12.1	Overview of U.S. Energy Security Issues	586
12.2	The Future of Energy in the United States	588
12.3	Energy and the Economy	589

12.4	Natural Gas Use in Power Generation	592
12.5	Coal's Potential to Reduce U.S. Dependence on Imported Crude Oil	594
12.6	Coal's Role in Future U.S. Electric Power Generation	596
12.7	Production of Hydrogen from Coal	603
12.8	Coal's Role in International Energy Security and Sustainable Development	604
	12.8.1 International Demand for Electricity	604
	12.8.2 Advanced Coal Technology Application Support for Sustained Coal Utilization	606
	12.8.3 Energy Security	607
	12.8.4 Sustainable Development	608
12.9	Concluding Statements	609

Part V – Supporting Information

Appendix A	Regional Definitions	613
A.1	Organization for Economic Cooperation and Development (OECD)	613
A.2	Non-Organization for Economic Cooperation and Development (Non-OECD)	613
A.3	European Union (EU)	614
A.4	Organization of Petroleum Exporting Countries (OPEC)	614
Appendix B	Commercial Gasification Facilities Worldwide	615
Appendix C	Coal-Fired Emission Factors	625
Appendix D	Original List of Hazardous Air Pollutants	651
Appendix E	Initial 263 Units Identified in Phase I (SO₂) of the Acid Rain Program	657
	Index	661
