Introduction.....	1
1 Classification of Polymers with respect to Reactivity toward Nitrogen Oxides	3
1.1 Interaction of Carbon-chain Polymers with NO ₂	4
1.2 Interaction of Rubbers with NO ₂	7
1.3 Interaction of NO ₂ with Aliphatic Polyamides and Polyurethanes	10
2 Properties and Applications of Aminoxy Radicals in Polymer Chemistry	15
2.1 Structure and Physical Properties of Stable Radicals	15
2.2 ESR Spectroscopy of ARs	17
2.3 Chemical Properties of ARs	20
2.4 Applications of ARs.....	26
2.5 Generation of ARs in Reactions of Spin Trapping.....	28
2.6 Synthesis of Polymers Containing Stable ARs	33
3 Interaction of Polymers with Nitric Oxide.....	55
3.1 Interaction of NO with Organic Compounds	56
3.2 Reactions of NO with Macroradicals Generated by the Photolysis and Radiolysis of Polymers	70
3.2.1 Synthesis of Spin-Labelled Fluorinated Polymers by Free-Radical Reaction in the Presence of NO	70
3.2.2 Photolysis of Polymethylmethacrylate and Acetyl Cellulose in NO.....	80

3.2.3	Radiolysis of Acetyl Cellulose and Polymethylmethacrylate in NO	82
3.3	Interaction of Polymeric Hydroperoxides with NO	82
4	Free-Radical Conversions of Polymers Initiated by Nitrogen Trioxide.....	93
4.1	Methods of Generation of NO ₃	93
4.2	Photochemistry of NO ₃	98
4.3	Interaction of NO ₃ with Organic Compounds	99
4.4	Cross-linking of Macromolecules via the Photoreactions of NO ₃	110
5	Reactions of Nitrogen Dioxide with Organic Compounds	125
5.1	Reactions of NO ₂ with Alkanes	125
5.2	Reactions of NO ₂ with Aromatic Compounds.....	132
5.3	Reactions of NO ₂ with Phenols	150
5.4	Interaction of NO ₂ with Alkenes, Dienes and Polyenes...	161
5.5	Radical Conversions of p-benzoquinones in Reactions with NO ₂	171
6	Nitrogen Dioxide Monoradicals in Reactions of Modification and Degradation of Macromolecules.....	185
6.1	Formation of Spin-Labelled Polymers in Reactions of NO ₂ with the Double Bonds of Macromolecules	185
6.2	ESR Imaging in Studies of the Spatial Distribution of the Reaction Front of NO ₂ in Polymers	191
6.3	Polymer Degradation in Reactions of Peroxide Macroradicals with NO ₂	193
7	Role of Nitrogen Dioxide Dimers in Reactions with Polymers.....	199
7.1	Formation of Nitrosonium Complexes from Organic Compounds and NO ₂	199

7.2	Direct Experimental Detection of Primary Radical Cations and Products of Their Decomposition in the Reactions of Nitrosyl Nitrate.....	206
7.3	Oxidative Generation of Stable Nitrogen-Containing Radicals in Aliphatic Polyamides and Polyvinylpyrrolidone	216
7.4	Ion-Radical Conversions of Aromatic Polyamides in the Presence of NO ₂	219
7.5	Oxidative Radical Generation via NO ₂ Dimer Conversions Induced by the Amide Groups of Macromolecules	229
7.6	Interaction of Aromatic Polyimides with NO ₂	234
	Abbreviations.....	249
	Index	253
