Preface .....	1
1 The Need for Good Mixing in Single Screw Extrusion .....	3
1.2 Examples of Mixing Problems .....	9
1.2.1 Polyethylene Pipes and Cables.....	9
1.2.2 Blow Moulded Bottles.....	11
1.2.3 Chalk Filled Polypropylene Pipe.....	12
1.2.4 Blown Film .....	13
1.2.5 Industrial Blow Mouldings.....	13
1.2.6 Production Scrap Re-use .....	13
1.2.7 Agglomerates and Gels in Thin Extrusions.....	14
1.2.8 Transparent Polycaprolactone/SAN Blends .....	15
1.2.9 Decorative Wood Grain Effects .....	15
References .....	16
2 Dispersive and Distributive Mixing .....	17
2.1 Definitions and Illustrations.....	17
2.2 Dispersive Mixing.....	20
2.2.1 Dispersive Mixing Mechanisms .....	20
2.2.2 Dispersive Mixing of Additive Powders Such as Pigments.....	24
2.3 Distributive Mixing .....	29
2.3.1 Laminar Shear Flow Mixing .....	29
2.3.2 Measurement of Distributive Mixing Achieved by Laminar Shearing.....	32

2.3.3	Limitations of Lamina Flow Mixing .....	34
2.3.4	Eliminating Laminar Striations .....	36
	References .....	55
3	Measurement of Mixing .....	59
3.1	The Need for Measurement of Mixing .....	59
3.2	Striation Thickness Measurement .....	60
3.3	Agglomerate Measurement .....	61
3.3.1	Microscopy Examination of Thin Samples .....	61
3.3.2	Agglomerate Count for Blown Film .....	62
3.3.3	Screen Pack Filtration Test .....	62
3.4	Influences of Mixing on Product Properties .....	68
3.5	Preparation of Thin Sections for Optical Microscopy Assessment.....	69
	References .....	69
4	Single Screw Extruder Stages: Effects on Mixing .....	71
	References .....	75
5	Pellet Handling: A Source of Variable Composition .....	77
5.1	Introduction .....	77
5.2	Hopper Design .....	78
5.2.1	Mass Flow Hopper .....	78
5.2.2	Non-mass Flow Hopper .....	79
5.2.3	Round Hoppers .....	80
5.2.4	Square and Rectangular Hoppers .....	81
5.2.5	Ledges and Corners .....	81
5.3	Composition Variations .....	82
5.3.1	Example 1 .....	82
5.3.2	Example 2 .....	82
5.3.3	Example 3 .....	82

5.3.4	Other Systems .....	83
5.4	Measurement of Particulate Properties .....	84
5.4.1	Hopper Flow Tests.....	84
	References .....	85
6	Solids Conveying in the Feed/Transport Zone .....	87
6.1	Smooth Feed Zones .....	87
6.2	Grooved Feed Zones.....	90
6.3	Particulate Friction Measurements.....	96
6.4	Friction in the Feed Zone.....	99
	References .....	100
7	Melting.....	101
7.1	Melting Mechanism.....	101
7.2	Variations in Melting Rate.....	103
7.3	Solids Bed Break-up.....	105
7.4	Melting Devices .....	107
7.5	Barrier Flight Melting Screws .....	115
7.5.1	The Barrier Screw Concept .....	115
7.5.2	Maillefer Barrier Screw .....	117
7.5.3	North American Barrier Screws .....	118
7.5.4	Combined Barrier Screws and Grooved Feed Zones.....	123
7.5.5	Barrier Screw Developments .....	124
7.6	Other Melting Screws .....	125
7.6.1	Double Wave Screw .....	125
7.6.2	Barr Energy Transfer Screws .....	126
7.6.3	Stratablend Mixing Screw .....	126
7.6.4	Shear-Ring Screw .....	127

7.7	Barrier Flight Screws <i>versus</i> Conventional Screws .....	127
	References .....	131
8	Screw Channel Mixing and the Application of Mixing Sections .....	135
8.1	Striations: Their Formation and Mixing in the Screw Channel .....	135
8.2	Mixing During Melting .....	137
8.3	Mixing in the Melt Filled Screw Channel .....	137
8.4	Residence Time Distribution (RTD).....	144
8.4.1	Concentration Smoothing .....	147
8.4.2	Variation of Residence Time with Channel Position.....	147
8.4.3	Implications of Pressure/Drag Flow Effects .....	147
8.5	Mixing Sections .....	148
8.5.1	Maddock Mixer.....	148
8.5.2	Pins and Slots.....	149
8.5.3	Mixer Evaluation Using an Independent Drive.....	152
	References .....	164
9	Interacting Rotor/Stator Mixers .....	167
9.1	Overview .....	167
9.2	Turbine Mixing Heads.....	168
9.2.1	Stanley (ICI) Mixer .....	168
9.2.2	Other Turbine Mixers .....	170
9.3	Woodroffe Key Slot Mixers .....	171
9.3.1	Gerber (Metal Box) Mixer .....	171
9.3.2	Renk (Barmag) Mixer .....	172
9.4	Rounded Cavity Mixers.....	176
9.4.1	Rapra Cavity Transfer Mixer .....	176
9.4.2	Reifenhauser Staromix .....	184
	References .....	186

10	Floating Ring Mixing Devices .....	189
10.1	Introduction .....	189
10.2	Injection Moulding Check-ring Mixers.....	189
10.3	Adaption of the Check Ring Mixer to Extrusion .....	193
	References .....	196
11	Static (or Motionless) Mixers .....	197
11.1	Mixing Mechanism.....	197
11.2	Static Mixers Used in plastics extrusion .....	197
11.2.1	Helical Mixers .....	198
11.2.2	Honeycomb Mixers .....	199
11.3	Application in Heat Exchangers .....	200
11.4	Disadvantages.....	200
	References .....	202
12	Incorporation of Liquid Additives and Dispersions by Direct Addition .....	203
12.1	Viscosity Differences.....	204
12.2	Incorporating Liquid Additives .....	204
12.3	Some Examples of Liquid Injection Processes .....	208
12.3.1	Polybutene in Pallet-wrap and Silage-wrap Film .....	208
12.3.2	Injection of Liquid Colours (General) .....	208
12.3.3	Wire Insulation Colouring .....	209
12.3.4	Fibre Extrusion .....	213
12.3.5	Skin Colouring Pipes and Profiles.....	214
12.3.6	Crosslinking Polyethylenes.....	216
12.3.7	Silicone Lubricant Injection .....	220
12.3.8	Extrusion Foaming.....	220
	References .....	227

13	Dispersive Mixing of Fillers and Pigments .....	229
13.1	Formation of Agglomerates .....	229
13.3	Starved Feeding to Avoid Agglomerate Formation .....	234
13.4	Dispersive Mixing Using Polymer Powders .....	239
13.5	Dispersive Mixing Using Polymeric Waxes .....	239
	References .....	242
14	Dispersive Mixing Applied to Polymer Blending.....	243
14.1	Polymer Blends .....	243
14.2	Polymer Scrap.....	246
14.3	Polymer Waste .....	246
14.4	Blending Immiscible Viscous Fluids .....	246
14.5	Polymer Blending Mechanisms in a Single Screw Extruder .....	250
14.6	Break-up of Fibrils into Droplets .....	252
14.7	<i>Polymer Blending in Single Screw Extrusion: Overall Mechanism.....</i>	<i>254</i>
14.8	Mixing by Controlled Continuous Chaotic Advection .....	257
14.9	Blending Mixed Polymer Waste: Comparison of Twin Screw and Single Screw Extruders.....	259
14.10	Elongational Flow Mixing .....	261
14.11	<i>Elimination of Gels.....</i>	<i>262</i>
	References .....	263
15	Compounding with Single Screw Extruders.....	269
	References .....	270
	Appendix – Preparation of Microtome Sections for Assessment of Dispersive and Distributive Mixing .....	273
	Flattening Sections.....	273

Trimming the Block.....	274
Flattening the Rolled Sections.....	276
Holey Sections.....	276
Brushing Flat.....	276
Distortion.....	276
Washing and Mounting.....	277
Abbreviations.....	279
Index.....	281
