

HAZARD MITIGATION AND PREPAREDNESS

ANNA K. SCHWAB | KATHERINE ESCHELBACH | DAVID J. BROWER

CONTENTS

1	Hazards vs. Disasters	1
	Introduction	2
1.1	Hazards: Part of the Natural Environment	2
1.1.1	Natural Hazards Are Inevitable and Unstoppable	2
1.1.2	The Earth's Dynamic Equilibrium	3
1.1.3	Types of Natural Hazards	3
1.1.4	Are Natural Hazards Becoming More Frequent?	4
1.1.5	Man-Made Hazards	5
	<i>Self-Check</i>	6
1.2	Hazards and Disasters: Not the Same	6
1.2.1	The Official Definition of <i>Disaster</i>	6
1.2.2	The Intersection of the Human Environment and a Natural Hazard	7
1.2.3	Why Are There More and Bigger Natural Disasters?	8
	<i>Self-Check</i>	10
1.3	The Many Costs of Disasters	11
1.3.1	Direct Financial Costs	11
1.3.2	Long-Term Economic Costs	11
1.3.3	Environmental Costs	14
1.3.4	Societal Costs	14
1.3.5	Human Lives Lost	15
1.3.6	Top Ten Natural Disasters in the United States	17
	<i>Self-Check</i>	17
1.4	Mitigation and Preparedness for Resilient Communities	17
1.4.1	Taking Action to Prevent Disasters	17
1.4.2	The Emergency Management System	18
1.4.3	Preparedness	19
1.4.4	Mitigation	22
1.4.5	The Difference between Preparedness and Mitigation	22
	<i>Self-Check</i>	23
1.5	Mitigation Strategies	24
1.5.1	A Mitigation Toolbox	24
1.5.2	Strategies to Mitigate Man-Made Hazards	25
1.5.3	Risk Assessment and Mapping	26

	1.5.4	Managing Community Growth and Development	27
	1.5.5	Protecting the Environment	27
	1.5.6	Tying It All Together with Mitigation Planning	27
		<i>Self-Check</i>	28
1.6		The Value of Mitigation and Preparedness	29
	1.6.1	Mitigation Contributes to Sustainable Communities	30
	1.6.2	Mitigation Pays	30
	1.6.3	Mitigation Calls for Environmental Integrity	31
	1.6.4	Window of Opportunity	32
	1.6.5	There's More to Be Done	33
		<i>Self-Check</i>	33
		Summary	33
		Key Terms	34
		Summary Questions	36
		Review Questions	37

2		Meteorological and Hydrological Hazards	40
		Introduction	41
	2.1	Weather-Related Natural Hazards	41
		<i>Self-Check</i>	43
	2.2	Hurricanes	43
	2.2.1	Hurricane Formation	43
	2.2.2	Hurricane Characteristics	43
	2.2.3	Measuring a Hurricane: The Saffir-Simpson Scale	45
	2.2.4	Landfall	46
	2.2.5	Patterns of Hurricane Activity	49
	2.2.6	Explaining the Increase	51
	2.2.7	Patterns of Human Activity	51
	2.2.8	2005: A Record-Breaking Season	52
	2.2.9	What's In a Name?	52
		<i>Self-Check</i>	53
	2.3	Flooding	54
	2.3.1	Floodplains, River Basins, and Watersheds	55
	2.3.2	Types of Flooding	55
	2.3.3	Flash Flooding	56
	2.3.4	General Flooding	57
	2.3.5	Flood Mapping	57
	2.3.6	Low-Level Flood Risks	59
		<i>Self-Check</i>	60

2.4	Tornadoes	61
2.4.1	Tornado Formation	61
2.4.2	The Fujita-Pearson Tornado Scale	62
2.4.3	Tornado Activity in the United States.	63
	<i>Self-Check.</i>	65
2.5	Severe Winter Weather.	65
2.5.1	Blizzards	65
2.5.2	Snowstorms.	66
2.5.3	Freezing Rain.	67
2.5.4	Windchill and Extreme Cold	68
2.5.5	Impacts of Severe Winter Weather.	69
	<i>Self-Check.</i>	71
2.6	Wildfires	71
	<i>Self-Check.</i>	72

3	Geological Hazards.	81
	Introduction	82
3.1	Geological Hazards	82
	<i>Self-Check.</i>	83
3.2	Earthquakes.	83
3.2.1	Stress Release.	83
3.2.2	Tectonic Plate Movement: A Constant Wrestling Match	83
3.2.3	Earthquake Motion	84
3.2.4	Rating Earthquakes: Scales of Magnitude, Intensity, and Acceleration	84
3.2.5	Earthquake Impacts on People and Property	87
3.2.6	Earthquake Experience in the United States.	87
3.2.7	Lessons Learned	89
	<i>Self-Check.</i>	91
3.3	Volcanoes.	91
3.3.1	Reaching the Boiling Point.	91
3.3.2	Types of Volcanic Eruptions.	92
3.3.3	Volcanic Hot Spots.	93

3.3.4	The Volcano-Earthquake Connection.	93
3.3.5	Types of Volcanoes.	94
3.3.6	Impacts of Volcanic Activity on People and Property	94
	<i>Self-Check</i>	96
3.4	Landslides/Debris Flows	96
	<i>Self-Check</i>	98
3.5	Coastal Erosion	98
	<i>Self-Check</i>	100
3.6	Subsidence and Collapse	102
3.6.1	Causes of Land Subsidence	102
3.6.2	Mine Collapse	103
3.6.3	Sinkholes.	104
	<i>Self-Check</i>	104

4	Man-Made Hazards.	114
	Introduction	115
4.1	The American Experience	115
4.1.1	Distinguishing Between Man-made and Natural Hazards	116
4.1.2	The All-Hazards Approach.	117
4.1.3	Important Man-Made Events in the United States	118
	<i>Self-Check</i>	122
4.2	Terrorism.	122
4.2.1	Defining Terrorism.	122
4.2.2	Types of Terrorism	123
4.2.3	Terrorism Tactics and Weapons	124
4.2.4	Biological and Chemical Weapons	125
4.2.5	Impacts of Terrorism	125
	<i>Self-Check</i>	126
4.3	Civil Unrest	126
4.3.1	Race Riots	127
4.3.2	Looting	127
	<i>Self-Check</i>	128

4.4	Technological Hazards	128
4.4.1	What Makes Hazardous Materials Hazardous?	129
4.4.2	Sources of Hazardous Materials	130
	<i>Self-Check</i>	132
4.5	Community Impacts from Technological Hazards	132
4.5.1	Transportation Accidents	132
4.5.2	Leaks During Storage and Disposal	132
4.5.3	Nuclear Accidents	133
4.5.4	Releases During Natural Hazard Events	136
4.5.5	Dangers Lurking at Home	137
	<i>Self-Check</i>	137
4.6	Public Perception of Man-Made Hazards	137
4.6.1	Media Coverage	138
4.6.2	Individual Experience	138
4.6.3	A Range of Strong Responses	139
4.6.4	Mitigating and Preparing for Man-Made Hazards	139
	<i>Self-Check</i>	140
	Summary	140
	Key Terms	140

6	The Role of the Federal Government	178
	Introduction	179
6.1	Evolution of Emergency Management at the Federal Level	179
6.1.1	Federal Involvement: A Slow Trickle	179
6.1.2	FEMA Incapable of Major Disaster Response	183
6.1.3	Project Impact	185
6.1.4	The Disaster Mitigation Act of 2000	185
6.1.5	The Threat of Terrorism Initiates Major Agency Reorganization	186
6.1.6	Hurricane Katrina: Enough Stink to Go Around	186
	<i>Self-Check</i>	187
6.2	Federal Hazard Mitigation Programs	187
6.2.1	The Role of FEMA	188
6.2.2	The National Flood Insurance Program (NFIP)	188
6.2.3	The Community Rating System	193
6.2.4	Hazard Mitigation Grant Program	194
6.2.5	Disaster Mitigation Act of 2000	194
6.2.6	Pre-Disaster Mitigation Program	195
6.2.7	The National Hurricane Program	196
6.2.8	National Earthquake Hazards Reduction Program	196

6.2.9	The Flood Mitigation Assistance Program	197
6.2.10	Coastal Barrier Resources Act (CBRA)	197
6.2.11	United States Army Corps of Engineers	199
	<i>Self-Check</i>	200
6.3	Federal Programs That Indirectly Manage Hazard Impacts	200
6.3.1	Clean Water Act	200
6.3.2	The Coastal Zone Management Act	202
6.3.3	The National Environmental Policy Act	206
	<i>Self-Check</i>	207
6.4	Federal Incentives for Development in Hazard Areas: Driving With the Brakes On.	207
6.4.1	The Internal Revenue Code as a De Facto Management Tool	207
6.4.2	Federal Infrastructure Programs	208
	<i>Self-Check</i>	209
6.5	Federal Disaster Assistance: Creating a Moral Hazard?	209
6.5.1	Federal Subsidies of Hazard Risks	210
6.5.2	Posing Solutions That Lead to More Questions	211
	<i>Self-Check</i>	213
	Summary	214
	Key Terms	214
	Summary Questions	215

7	Mitigating Hazards at the State Level	220
	Introduction	221
7.1	Divergent State Approaches to Hazardous Land Management	221
	<i>Self-Check</i>	222
7.2	State Emergency Management	222
7.2.1	State Offices of Emergency Management	223
7.2.2	Effectiveness of State Emergency Management Offices	223
7.2.3	The State Hazard Mitigation Officer (SHMO)	223
7.2.4	Funding for State Mitigation and Preparedness Activities	224
	<i>Self-Check</i>	225

7.3	Hazard Mitigation Planning at the State Level	226
7.3.1	Mitigation Planning Under the Disaster Mitigation Act of 2000	226
7.3.2	DMA Planning Requirements.	227
7.3.3	Consequences of Not Preparing a State Hazard Mitigation Plan	228
	<i>Self-Check</i>	228
7.4	State Mandates for Local Land Use Planning	229
	<i>Self-Check</i>	230
7.5	State Building Codes	230
7.5.1	State Approaches to Building Codes	231
7.5.2	Building Code Enforcement	231
7.5.3	State Support for Local Code Enforcement	232
	<i>Self-Check</i>	233
7.6	State Regulation of Hazard Insurance.	233
7.6.1	Problems with Catastrophic Losses	234
7.6.2	State Insurance Regulation	234
	<i>Self-Check</i>	235
7.7	State Regulation in Environmentally Sensitive Areas	235
7.7.1	Combating Coastal Erosion and Storm Impacts	236
7.7.2	Regulatory Setbacks	236
7.7.3	Post-Storm Reconstruction	238
7.7.4	State Wetlands Protection	239
7.7.5	Areas of Particular Concern	240
	<i>Self-Check</i>	241
7.8	Increasing State Mitigation Capabilities	241
	<i>Self-Check</i>	243

9	Community Resilience and The Private Sector	289
	Introduction	290
9.1	Resilient Economies, Resilient Communities	290
9.1.1	The Foundations of a Resilient Economy	290
9.1.2	Community Resiliency Depends on Business Resiliency	291
	<i>Self-Check</i>	292

9.2	Private Land Ownership in the United States	293
9.2.1	Location, Location, Location	293
9.2.2	The Role of Developers and Investors	293
9.2.3	Public Sector Actions to Influence Private Sector Decisions	296
	<i>Self-Check</i>	297
9.3	Economic Resiliency: Protecting Businesses From Hazards	297
9.3.1	Economic Impacts of Natural Hazards	301
9.3.2	Community Resiliency Depends on Business Resiliency	302
	<i>Self-Check</i>	303
9.4	Business Risk Assessment and Impact Analysis	304
9.4.1	Types of Business Protection Plans	305
9.4.2	Business Risk Assessment	306
9.4.3	Hazard Identification	307
9.4.4	Vulnerability Assessment	308
9.4.5	Business Impact Analysis	309
	<i>Self-Check</i>	311
9.5	Preparing a Plan to Minimize Losses	311
9.5.1	Reviewing the Business Impact Analysis	311
9.5.2	Property Protection	312
9.5.3	Business Contingency Planning	314
9.5.4	Preparing a Business Relocation Plan	316
9.5.5	Protecting Employees and Their Families	317
9.5.6	Business Protection through Insurance	319
	<i>Self-Check</i>	322
9.6	Private Sector Participation in Community Mitigation	322
9.6.1	Using Incentives to Promote Community Resiliency	323
	<i>Self-Check</i>	325

10.1	The Purpose of a Risk Assessment	334
	<i>Self-Check</i>	336

10.2	Steps in the Risk Assessment Process	337
10.2.1	Mapping and Data Collection	338
10.2.2	Creating a Base Map	339
	<i>Self-Check</i>	340
10.3	Risk Assessment Step One: Identifying Hazards	340
10.3.1	Finding the Information	340
10.3.2	Finding Information on Man-Made Hazards	341
	<i>Self-Check</i>	341
10.4	Risk Assessment Step Two: Profiling Hazards	342
10.4.1	Creating a Hazard History	342
10.4.2	Identifying the Extent of Each Hazard	343
10.4.3	Determining the Probability of Each Hazard	345
10.4.4	Identifying the Location of Each Hazard	345
10.4.5	Profiling Man-Made Hazards	349
10.4.6	Completing Steps One and Two	350
	<i>Self-Check</i>	350
10.5	Risk Assessment Step Three: Inventorying Vulnerable Assets and Populations	350
10.5.1	Tasks in Step Three	351
10.5.2	Sources of Information	351
10.5.3	Task One: Inventorying Assets and Populations in the Community	352
10.5.4	Task Two: Inventorying Assets and Populations in Each Hazard Area	353
10.5.5	Task Three: Calculating the Proportion of Assets Located in Hazard Areas	353
10.5.6	Inventorying Assets for Man-Made Hazards	355
10.5.7	Mapping Assets and Populations	356
	<i>Self-Check</i>	356
10.6	Risk Assessment Step Four: Estimating Potential Losses	357
10.6.1	Calculating Human Losses	357
10.6.2	Using HAZUS Software to Estimate Hazard Losses	358
10.6.3	Estimating Losses from Man-Made Hazards	359
	<i>Self-Check</i>	359
10.7	Risk Assessment Step Five: Describing Future Land Use and Development Trends	359
10.7.1	Describing Undeveloped Areas	360
10.7.2	Describing Scheduled Infrastructure Areas	360
10.7.3	Determining Where Undeveloped Areas Intersect with Hazardous Areas	361
	<i>Self-Check</i>	362

10.8	Risk Assessment Step Six: Forming Conclusions (Determining Acceptability)	362
10.8.1	Each Community Must Decide for Itself	363
10.8.2	Creating a Mitigation Plan Based on the Risk Assessment	363
	<i>Self-Check</i>	364
