

ESSENTIAL PUBLIC HEALTH

Essentials of
**Environmental
Health**

Robert H. Friis

Series Editor: Richard Riegelman

Table of Contents

Prologue	xi
Series Page	xiii
Preface	xv
Acknowledgments	xvii
About the Author	xix
Introduction	xxi
Abbreviations	xxiii

Part I. Background of the Field

Chapter 1. Introduction: The Environment at Risk	3
Introduction	3
Significance of the Environment for Human Health	5
Population and the Environment	7
Definitions Used in the Environmental Health Field	14
Historical Background	16
Careers in the Environmental Health Field	20
Conclusion and Overview of the Text	22
Study Questions and Exercises	23

Chapter 2.	Environmental Epidemiology	25
	Introduction	25
	Definition of Environmental Epidemiology	26
	Contributions of Epidemiology to Environmental Health	27
	Brief History of Environmental Epidemiology	29
	Strategies of Environmental Epidemiology	31
	Causality in Epidemiologic Studies	36
	Bias in Environmental Epidemiologic Studies	38
	Limitations and Deficiencies of Environmental Epidemiology	39
	Conclusion	40
	Study Questions and Exercises	42
Chapter 3.	Environmental Toxicology	45
	Introduction	45
	Description of Toxicology	46
	Terminology Used in the Field of Toxicology	47
	The Concept of a Dose and Related Terms	48
	Factors That Affect Responses to a Toxic Chemical	51
	Links between Toxicology and Risk Assessment	54
	Conclusion	59
	Study Questions and Exercises	60
Chapter 4.	Environmental Policy and Regulation	63
	Introduction	63
	Overview of the Environmental Policy Process	64
	Risk Assessment and Policy Development	68
	Case Studies: Environmental Policies to Protect Human Health	70
	Agencies Involved in the Adoption, Implementation, and Enforcement of Environmental Policies	74
	Major U.S. Environmental Health Laws	77
	Conclusion	81
	Study Questions and Exercises	82

Part II. Agents of Environmental Disease

Chapter 5.	Zoonotic and Vector-Borne Diseases	87
	Introduction	87
	Terminology Used in the Context of Zoonotic and Vector-Borne Diseases	87
	Examples of Vector-Borne Diseases	88
	Arthropod-Borne Viral Diseases (Arboviral Diseases)	100
	Emerging Zoonoses	101
	Other Zoonotic Diseases	110
	Control and Prevention of Mosquito-Borne Diseases	114
	Conclusion	116
	Study Questions and Exercises	117
Chapter 6.	Toxic Metals and Elements	119
	Introduction	119
	The Top 20 Hazardous Substances	119
	Overview of Sources and Effects of Exposure to Metals	120
	Toxic Heavy Metals	124
	Essential Metals with Potential for Toxicity	134
	Metals for Use in Medical Therapy	136
	Conclusion	136
	Study Questions and Exercises	137
Chapter 7.	Pesticides and Other Organic Chemicals	141
	Introduction	141
	Chemicals in the ATSDR List of Top 20 Hazardous Substances	143
	Pesticides	145
	Dioxins	154
	Polychlorinated Biphenyls (PCBs)	155
	Organic Solvents	157
	Chemicals Used in the Manufacture of Plastics	159
	Cleaning and Household Products	159
	Environmental Estrogens	159
	Conclusion	161
	Study Questions and Exercises	162

Chapter 8.	Ionizing and Nonionizing Radiation	165
	Introduction	165
	Overview of Ionizing Radiation	166
	Types of Ionizing Radiation	166
	Measurement of Ionizing Radiation Dose Units	167
	Health Effects of Exposure to Ionizing Radiation	168
	Sources of Environmental Exposure to Ionizing Radiation	171
	Medical Uses of Ionizing Radiation	178
	Nuclear Waste Disposal	179
	Nonionizing Radiation	179
	Sources of Exposure to Nonionizing Radiation	180
	Conclusion	188
	Study Questions and Exercises	189

Part III. Applications of Environmental Health

Chapter 9.	Water Quality	195
	Introduction	195
	The Water Supply	197
	Treatment of Water for Residential Consumption	204
	Drinking Water Contamination	208
	Beach and Coastal Pollution	219
	Conclusion	225
	Study Questions and Exercises	226
Chapter 10.	Air Quality	229
	Introduction	229
	Notorious Air Pollution Episodes in History	231
	Sources and Causes of Air Pollution	232
	Components of Air Pollution	237
	Air Quality Standards	243
	Health Effects of Air Pollution	244
	Indoor Air Quality	249
	Global Climate Change and Global Warming	253
	Controlling Air Pollution and Global Warming	259
	Conclusion	259
	Study Questions and Exercises	261

Chapter 11.	Food Safety	265
	Introduction	265
	The Global Burden of Foodborne Illness	266
	Categories of Food Hazards	267
	Common Microbial Agents of Foodborne Illness	267
	Bacterial Agents	268
	Worms	279
	Viral Agents	281
	Other Agents	283
	Chemically Related Foodborne Hazards	285
	Regulation of Food Safety	291
	Foodborne Disease Prevention	294
	Conclusion	299
	Study Questions and Exercises	300
Chapter 12.	Solid and Liquid Wastes	303
	Introduction	303
	Historical Background—Solid Waste Disposal	303
	Components of the Municipal Solid Waste Stream	305
	Solid Waste Management	305
	Disposal of Hazardous Materials and Wastes	311
	Sewage Processing and Disposal	314
	Animal Wastes	319
	Conclusion	321
	Study Questions and Exercises	322
Chapter 13.	Occupational Health	325
	Introduction	325
	Background and History	325
	Significance of the Occupational Environment for Health	329
	Overview of Agents of Occupational Disease	331
	Specific Occupationally Associated Diseases and Conditions	334
	Prevention of Occupational Disease	348
	Conclusion	350
	Study Questions and Exercises	352
Glossary		355
Index		367
