# SEMICONDUCTOR NANOMATERIALS FOR FLEXIBLE TECHNOLOGIES

From Photovoltaics and Electronics to  
Sensors and Energy Storage

Micro & Nano Technologies Series

# Contents

CONTACT INFORMATION .....	xi
PREFACE .....	xv
ACKNOWLEDGMENT .....	xvii

## **CHAPTER 1** Flexible Organic Single-Crystal Field-Effect Transistors ..... 1

*Alejandro L. Briseno*

Introduction .....	1
Macroscopic organic single crystals .....	3
Growth via physical vapor transport .....	3
Growth of ultrathin single crystals .....	5
Flexible single-crystal transistors .....	8
Micropatterned organic single crystals .....	12
Substrate patterning and crystal growth .....	12
Flexible devices .....	15
Organic single-crystal nanowires .....	17
Flexible nanowire devices .....	18
Conclusion .....	24
References .....	25

## **CHAPTER 2** Chemically Synthesized Semiconductor Nanowires for High-Performance Electronics and Optoelectronics ..... 27

*Xiangfeng Duan and Yu Huang*

Introduction .....	27
Semiconductor nanowire building blocks .....	29
Synthesis of semiconductor nanowires .....	31
Assembly of nanowires .....	35
Properties of nanowires .....	40
Nanowire nanoelectronics .....	41
Single nanowire transistors .....	41
Crossed nanowire devices .....	44

Nanoscale logic gates and computational circuits	46
Nanoscale photonics and optoelectronics	47
Nanoscale light-emitting diode and diode array	47
Single nanowire waveguide, Fabry–Perot cavity and laser	51
Nanowire thin-film electronics	55
Nanowire thin-film transistors: underlying concept	56
Nanowire thin-film transistors using single-crystal silicon nanowires	57
Group III–V and II–VI nanowire materials for high-performance macroelectronics	59
Nanowire thin-film transistors on plastics	61
Conclusion	61
References	62

<b>CHAPTER 3</b>	<b>Fast Flexible Electronics Made from Nanomembranes</b>	
	Derived from High-Quality Wafers	67
	<i>Zhenqiang Ma and Guoxuan Qin</i>	
	Introduction	67
	Strained silicon nanomembranes	69
	Device fabrication	69
	Strained silicon thin-film transistor performance	71
	Summary	76
	Doping of silicon nanomembranes	77
	Sample preparation	77
	Doping profiles	78
	Doping results	78
	Summary	80
	Microwave thin-film transistors	81
	Device fabrication	81
	Device performance	83
	Performance boost by layout optimization	85
	Summary	88
	Hybrid complementary thin-film transistors	89
	Device fabrication	91
	Results and discussion	92
	Summary	93

Microwave flexible pin diodes and switches .....	93
Device fabrication .....	94
Radiofrequency switch performance .....	95
Summary .....	97
High-frequency flexible passives .....	98
Device fabrication .....	98
Results and discussion .....	99
Summary .....	101
References .....	102

## **CHAPTER 4** Thin Films of Single-Walled Carbon Nanotubes for Flexible Electronic Device Applications .....

*Congjun Wang and Qing Cao*

Introduction .....	105
Preparation of single-walled carbon nanotube thin films .....	106
Chemical vapor deposition growth of SWNT random networks ...	107
Growth of SWNT aligned arrays .....	108
Forming SWNT films on flexible substrates .....	110
Modeling properties of single-walled carbon nanotube films .....	110
Stick-percolation modeling of SWNT films .....	110
Theory and practice of striping scheme to improve device on/off ratio .....	112
Capacitance coupling of SWNT films .....	114
Single-walled carbon nanotube film as a flexible transparent conductive coating .....	115
Flexible single-walled carbon nanotube thin-film type electronic devices .....	117
Gate dielectrics for flexible SWNT thin-film transistors .....	117
Integrated circuits based on flexible SWNT thin-film transistors .....	118
High-performance devices based on aligned single-walled carbon nanotube arrays .....	120
SWNT thin-film transistors based on aligned arrays .....	120
Frequency response of SWNT thin-film transistors .....	121
SWNT transistor radio: demonstration of a functional system .....	122
Conclusion .....	124
References .....	124

<b>CHAPTER 5</b>	Flexible Field Emitters Based on Carbon Nanotubes and Other Materials .....	129
	<i>Soo-Hwan Jeong and Kun-Hong Lee</i>	
	Introduction .....	129
	Field emission and carbon nanotubes as field emitters .....	131
	Principles of field emission .....	131
	Fowler–Nordheim equation .....	133
	Field enhancement and work function effects .....	134
	Field emission from carbon nanotubes .....	135
	Flexible field emitters based on carbon nanotubes .....	137
	Attachment method .....	137
	Composite/matrix method .....	140
	Direct growth method .....	143
	Flexible field emitters based on other materials .....	148
	Conclusion .....	151
	References .....	152
<b>CHAPTER 6</b>	Flexible Solar Cells Made of Nanowires/Microwires .....	159
	<i>Jongseung Yoon, Yugang Sun and John A. Rogers</i>	
	Introduction .....	159
	Basic operating principles of solar cells .....	160
	p–n Junction solar cells .....	161
	Photoelectrochemical solar cells .....	163
	Flexible p–n Junction solar cells .....	169
	Fabrication of arrays of ultrathin monocrystalline silicon microsolar cells .....	169
	Transfer printing, planarization and interconnect formation .....	172
	Photovoltaic characteristics of printed microcells .....	176
	Integration of mechanically flexible modules and photovoltaic characteristics .....	178
	Future directions for transfer-printed flexible p–n Junction solar cells .....	180
	Flexible photoelectrochemical cells .....	182
	Arrays of aligned TiO <sub>2</sub> nanotubes .....	183
	Arrays of aligned ZnO nanowires .....	186
	Arrays of aligned silicon nanowires .....	189
	Future directions for flexible photoelectrochemical cells .....	191

Conclusion .....	192
References .....	192

**CHAPTER 7** Zinc Oxide Nanowire Arrays on Flexible Substrates: Wet Chemical Growth and Applications in Energy Conversion ... 197

*Sheng Xu, Benjamin Weintraub and Zhong Lin Wang*

Introduction .....	197
History of nanowires .....	197
History of ZnO nanostructures .....	198
Growth of zinc oxide nanowires on flexible substrates .....	199
Growth of ZnO nanowires on flat substrates .....	199
Growth of ZnO nanowire arrays on microfibers .....	204
Growth mechanism .....	206
Applications in energy conversion: nanogenerator .....	214
Fundamentals of piezoelectricity .....	214
Nanogenerator based on atomic force microscope .....	215
Nanogenerator based on microfibers .....	217
Current obstacles and future work .....	221
Conclusion .....	223
References .....	224

**CHAPTER 8** Flexible Energy Storage Devices Using Nanomaterials ..... 227

*Victor L. Pushparaj, Subbalakshmi Sreekala, Omkaram Nalamasu and Pulickel M. Ajayan*

Introduction .....	227
Nanomaterials for flexible electrodes and separators .....	228
Carbon nanotubes .....	229
Nanocomposites .....	232
Nanoparticles and non-carbon-based nanotubes .....	236
Hybrid nanostructures .....	237
Nanomaterials for cathodes .....	239
Conclusion .....	240
References .....	240

**CHAPTER 9** Flexible Chemical Sensors ..... 247

*H. Hau Wang*

Introduction .....	247
--------------------	-----

Materials for flexible chemical sensors .....	248
Carbon nanotubes .....	248
Graphene .....	252
Nanoscale materials: nanowires, nanotubes and nanoparticles .....	254
Types of flexible chemical sensors .....	256
Chemiresistive sensors .....	256
Chemical field-effect transistors .....	258
Chemocapacitance sensors .....	259
Optical sensors .....	261
Integration .....	262
Assembly and alignment: nanowires and carbon nanotubes .....	262
Integrated package .....	266
Conclusion .....	266
References .....	267

<b>CHAPTER 10</b> Mechanics of Stiff Thin Films of Controlled Wavy Geometry on Compliant Substrates for Stretchable Electronics .....	275
<i>Jianliang Xiao, Hanqing Jiang, Yonggang Huang and John A. Rogers</i>	
Introduction .....	275
Controlled buckling of semiconductor nanoribbons .....	276
Fabrication of buckled nanoribbons .....	276
Mechanics of controlled buckling of nanoribbons on elastomeric substrate .....	279
Stretchable and compressible stiff thin films on compliant wavy substrates .....	282
Fabrication of stiff thin films on compliant wavy substrates .....	282
Mechanics of stiff thin films on compliant wavy substrates .....	284
Conclusion .....	289
References .....	289
INDEX .....	293
