Contents

Preface.....	ix
Editor.....	xi
Contributors.....	xiii

Section I General

1. Introduction	3
<i>Charles E. Baukal, Jr.</i>	
2. Testing Safety	41
<i>Charles E. Baukal, Jr.</i>	
3. Experimental Design	63
<i>Joseph Colannino</i>	
4. Fluid Flow	77
<i>Wes Bussman and Joseph Colannino</i>	
5. Temperature	97
<i>Charles E. Baukal, Jr.</i>	
6. Heat Flux	117
<i>Charles E. Baukal, Jr.</i>	
7. Pollution Emissions	141
<i>Charles E. Baukal, Jr.</i>	
8. Combustion Noise	183
<i>Mahmoud M. Fleifil, Carl-Christian Hantschk, and Edwin Schorer</i>	
9. Flame Impingement Measurements	211
<i>Charles E. Baukal, Jr.</i>	
10. Physical Modeling in Combustion Systems	241
<i>Christopher Q. Jian</i>	
11. Virtual Testing	251
<i>Eddy Chui, Allan M. Runstedtler, and Adrian J. Majeski</i>	

Section II Advanced Diagnostics

12. Laser Measurements	269
<i>Michele Marrocco and Guido Troiani</i>	
13. CARS Temperature Measurements in Flames in Industrial Burners	289
<i>Patrick M. Hughes, Thangam Parameswaran, and Richard J. Lacelle</i>	

14. Diode Laser Temperature Measurements	311
<i>Thomas P. Jenkins and John L. Bergmans</i>	
15. Image-Based Techniques for the Monitoring of Flames	337
<i>Javier Ballester and Ricardo Hernández</i>	
16. High Temperature Cameras	355
<i>William J. Lang</i>	
17. Liquid Fuel Atomization Testing	369
<i>Khaled A. Sallam</i>	

Section III Burner Testing

18. Process Burners	377
<i>Jeffrey Lewallen, Thomas M. Korb, Jaime A. Erazo, Jr., and Erwin Platvoet</i>	
19. Commercial Boiler Burners	395
<i>Yaroslav Chudnovsky and Mikhail Gotovsky</i>	
20. Power Burners	411
<i>Vit Kermes, Petr Bělohradský, Petr Stehlík, and Pavel Skryja</i>	
21. Regenerative Combustion Using High Temperature Air Combustion Technology (HiTAC)	429
<i>Ashwani K. Gupta, Susumu Mochida, and Tsutomu Yasuda</i>	
22. Characterization of Ribbon Burners	449
<i>Colleen Stroud Alexander and Melvyn C. Branch</i>	
23. Flameless Burners	471
<i>Joachim G. Wünning and Ambrogio Milani</i>	
24. Radiant Tube Burners	487
<i>Michael Flamme, Ambrogio Milani, Joachim G. Wünning, Włodzimierz Blasiak, Weihong Yang, Dariusz Szewczyk, Jun Sudo, and Susumu Mochida</i>	

25. Metallic Mat Gas Combustion	505
<i>Giuseppe Toniato, Andrea Zambon, and Andrea D'Anna</i>	
26. Performance Prediction of Duct Burner Systems via Modeling and Testing	517
<i>Steve Londerville</i>	
27. Oxy-Fuel and Oxygen-Enhanced Burner Testing	529
<i>Lawrence E. Boul, III, Nicolas Docquier, Chendhil Periasamy, and Lee J. Rosen</i>	

Section IV Flare Testing

28. Large-Scale Flare Testing	553
<i>Charles E. Baukal, Jr., Jianhui Hong, Roger Poe, and Robert Schwartz</i>	
29. Flare Experimental Modeling	571
<i>Chendhil Periasamy and Subramanyam R. Gollahalli</i>	

30. Flare Radiation.....	595
<i>Wes Bussman and Jianhui Hong</i>	

Section V Testing in Combustors

31. Cement Kilns.....	615
<i>Eugen Dan Cristea and Givanni Cinti</i>	
32. Glass Furnaces.....	671
<i>R. Robert Hayes and Charles E. Baukal, Jr.</i>	
33. Thermal Oxidizer Testing	691
<i>Bruce C. Johnson and Nate Petersen</i>	
34. Utility Boilers	705
<i>Giuseppe Toniato and Silvio Rudi Stella</i>	
Appendix A: F-Distribution (99%, 95%, & 90% Confidence).....	729
Appendix B: EPA Sample Methods.....	733
Appendix C: Common Conversions	735
Index.....	737
