

OCCUPATIONAL AND ENVIRONMENTAL LUNG DISEASES

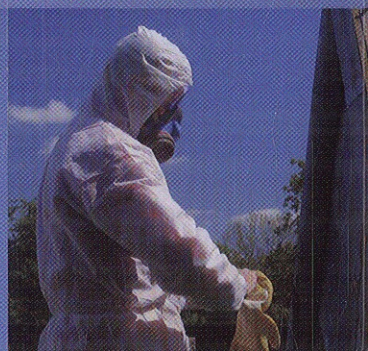

Diseases from Work, Home, Outdoor and Other Exposures

Editors

Susan M. Tarlo, Paul Cullinan and Benoit Nemery

 WILEY-BLACKWELL

Contents

Contributors	xv
Preface	xxiii
Introduction	1
<i>Paul Cullinan and Susan M. Tarlo</i>	
Asthma	1
Hypersensitivity pneumonitis (extrinsic allergic alveolitis)	3
COPD	4
Bronchiolitis	5
Pneumoconiosis	5
Lung cancer and mesothelioma	7
Attribution	8
Further reading	10
 Part I The personal environment	 11
 1 Cosmetics and personal care products in lung diseases	 13
<i>Howard M. Kipen</i>	
1.1 Introduction: historical context of cosmetics and respiratory illness	13
1.2 Epidemiological context	14
1.3 Description of exposures	15
1.4 Respiratory diseases associated with exposure to cosmetics and personal care products	17
1.5 Diagnosis and management of occupational asthma in hairdressers	19
References	21
Further reading	21
 2 Passive smoking	 23
<i>Maritta S. Jaakkola</i>	
2.1 Introduction	23
2.2 Exposure to second-hand smoke	24
2.3 Health effects of passive smoking in children	27
2.4 Health effects of passive smoking in adults	33
2.5 Diagnostic and management issues related to passive smoking	39
2.6 Prevention of SHS-related diseases	40
References	41

3	Emissions related to cooking and heating	45
	<i>Debbie Jarvis</i>	
3.1	Introduction	45
3.2	Description of exposures	46
3.3	Pollutants produced when using gas appliances in the home	46
3.4	Diseases associated with exposures	50
	References	54
	Further reading	54
4	Cleaning and other household products	55
	<i>Jan-Paul Zock</i>	
4.1	Introduction	55
4.2	Description of exposures	56
4.3	Diseases associated with exposures	61
4.4	Diagnosis and management issues	65
4.5	Summary and conclusions	67
	References	67
	Further reading	67
5	Building materials and furnishing	69
	<i>Jouni J.K. Jaakkola and Reginald Quansah</i>	
5.1	Introduction to building materials and furnishing as sources of indoor air pollution	69
5.2	Emission of formaldehyde from building and interior surface materials	70
5.3	Emissions of volatile organic compounds	72
5.4	Emission of phthalates from PVC building and interior surface materials	74
5.5	Damp buildings and emissions of biological particles	75
5.6	Specific diseases associated with exposures from building materials and furnishing	76
5.7	Diagnosis and management issues	77
	References	78
	Further reading	79
6	Mites, pets, fungi and rare allergens	81
	<i>Frederic de Blay, Magdalena Posa, Gabrielle Pauli and Ashok Purohit</i>	
6.1	Introduction	81
6.2	Mites	81
6.3	Cat and dog allergens	82
6.4	Rodents and other pets	84
6.5	Cockroaches	85
6.6	Fungi (molds)	86
6.7	Rare allergens	90
6.8	Diagnosis and management issues	92
	Further reading	93

7	Hobby pursuits	95
	<i>Paul D. Blanc</i>	
7.1	Definitions and general approach	95
7.2	Arts, crafts, and related activities in the plastic arts	96
7.3	Hobbies and pastimes involving pets and other animals	99
7.4	Sports and the performing arts	100
7.5	Miscellaneous hobbies, pastimes and avocations	102
7.6	Specific diseases associated with hobby activities	104
7.7	Diagnosis and management	104
	Further reading	105
Part II	Other indoor environments	107
8	Day-care and schools	109
	<i>Eva Rönmark and Greta Smedje</i>	
8.1	Introduction	109
8.2	Description of exposures	110
8.3	Diseases associated with exposures in the school environment	114
8.4	Viral infections	115
8.5	Ventilation	115
8.6	Room temperature	115
8.7	Diagnosis and management issues	117
8.8	Summary	119
8.9	Recommendations	119
	Further reading	119
9	Secondhand smoke exposure and the health of hospitality workers	121
	<i>Mark D. Eisner</i>	
9.1	Introduction	121
9.2	Exposure of hospitality workers to SHS	121
9.3	Diseases and health conditions associated with exposures	123
9.4	Diagnosis and management issues	127
9.5	Conclusions	127
	References	128
10	Health effects of environmental exposures while in automobiles	129
	<i>Madeline A. Dillon and David B. Peden</i>	
10.1	Environmental exposures in automobiles	129
10.2	Air pollution exposure while driving in cars	130
10.3	Smoking exposure	132
10.4	Other exposures in cars	132
10.5	Diseases associated with exposures	133
10.6	Diagnosis and management issues	134
10.7	Helpful websites	135
	Further reading	135

11	Indoor sports	137
	<i>Harman S. Paintal and Ware G. Kuschner</i>	
11.1	Introduction	137
11.2	Ice sports and arenas	139
11.3	Ice arena air pollution: exposures and practical hints when taking a history	139
11.4	Indoor ice arena toxicant syndromes	140
11.5	Standards, guidelines and public health considerations	143
11.6	Cold air-exacerbated asthma and dyspnea	144
11.7	Water sports	144
11.8	Exposures	145
11.9	Diseases and health effects	147
11.10	Extrinsic allergic alveolitis (hypersensitivity pneumonitis)	149
11.11	Infections	151
11.12	Swimming-induced pulmonary edema	151
11.13	Trauma	152
11.14	Equestrian arenas and horseback riding	152
11.15	Gymnastics, weightlifting, athletics (track and field) and rock wall climbing	155
11.16	Further reading	155
Part III	The work environment	159
12	Agricultural environments and the food industry	161
	<i>Jakob Hjort Bønløkke, Yvon Cormier and Torben Sigsgaard</i>	
12.1	Introduction	161
12.2	Agriculture and agribusiness	161
12.3	Case 1	166
12.4	Case 2	166
12.5	Symptoms not related to allergen exposure	167
12.6	Other agrobusiness	169
12.7	Seafood and meat processing	170
12.8	Case 3	172
12.9	Bakeries	172
12.10	Other food industry	173
12.11	International perspective	174
	References	175
13	Mining	177
	<i>Robert L. Cowie</i>	
13.1	Introduction	177
13.2	Population at risk	178
13.3	The mine environment	178
13.4	Pneumoconiosis	179
13.5	Obstructive pulmonary disease	184
13.6	Tuberculosis and nontuberculous mycobacterial diseases	185

13.7	Malignant disease	185
13.8	Pleural disease	186
13.9	Connective tissue and renal diseases	186
13.10	Mining and tobacco smoking	187
13.11	Acute lung and airway inhalational injury	188
13.12	Trauma	189
13.13	Conclusion	189
	Further reading	189
14	Metal industry and related jobs (including welding)	191
	<i>William S. Beckett</i>	
14.1	Introduction	191
14.2	Metals defined	191
14.3	Workplace hazards from metals	192
14.4	Metal industry processes	192
14.5	Pulmonary responses to metals	193
14.6	Beryllium: lung and systemic effects	195
14.7	Cobalt disease (hard metal pulmonary disease)	197
14.8	Welding-related lung disease	197
	Acknowledgment	201
	Further reading	201
15	Automobile maintenance, repair and refinishing	203
	<i>Meredith H. Stowe and Carrie A. Redlich</i>	
15.1	Introduction – the industry	203
15.2	Exposures from automobile maintenance and repair	204
15.3	Exposures in auto body workshops	204
15.4	Respiratory diseases in auto mechanics and repair workers	205
15.5	Work-related asthma	205
15.6	Other lung diseases in auto mechanics and repair workers	209
15.7	Other nonpulmonary occupational diseases among auto repair workers	210
	Further reading	210
16	Automotive industry	211
	<i>Kenneth D. Rosenman</i>	
16.1	Introduction	211
16.2	Respiratory hazards and disease	213
16.3	Vehicle parts manufacturing	213
	Further reading	222
17	Wood and textile industries	223
	<i>Kjell Torén</i>	
17.1	Wood industry	223
17.2	The pulp and paper industry	226
17.3	The textile industry	227

17.4	Prevention	231
	References	231
	Further reading	231
18	Chemical, coatings and plastics industries	233
	<i>Oyebode A. Taiwo and Carrie A. Redlich</i>	
18.1	Introduction and definitions	233
18.2	Overview of the chemical, coatings and plastics industry	234
18.3	Major types of paints, coatings and plastics	235
18.4	Major respiratory disorders in chemical, coatings and plastics workers	241
18.5	Diagnosis and management	244
	Further reading	245
19	Work with electronics	247
	<i>Sherwood Burge</i>	
19.1	Introduction	247
19.2	The history of soldering	247
19.3	Diseases in those exposed to soft soldering flux fumes	248
19.4	Epidemiological context	248
19.5	Definition of scope (and limitations)	249
19.6	Exposures and processes in the electronics industry	249
19.7	Practical hints (and pitfalls) when taking a history from patient	249
19.8	How to document exposure, including biomonitoring	251
19.9	Diseases associated with colophony and isocyanate exposure in the electronics industry	252
19.10	Diagnosis and management issues	254
19.11	Management and prevention	256
19.12	Medicolegal considerations and compensation	256
19.13	Public health issues	257
19.14	The spectrum of occupational diseases in electronics workers	257
	Further reading	258
20	The services industry	259
	<i>George L. Delclos, Lea Ann Tullis and Arch I. Carson</i>	
20.1	Introduction	259
20.2	Health diagnosing and treating occupations	260
20.3	Personal care and service – cosmetology professionals	265
20.4	Protective services	266
20.5	Food preparation and serving-related occupations	268
20.6	Building and grounds cleaning and maintenance occupations – janitors/cleaners	269
20.7	Conclusions	270
	Further reading	270

21	The construction industry	273
	<i>Gary M. Liss, Edward L. Petsonk and Kenneth D. Linch</i>	
21.1	Introduction	273
21.2	Inhalation hazards in the construction industry	274
21.3	Diseases associated with exposures in construction work	276
21.4	Asthma and selected immunologic conditions	280
21.5	Occupational cancers	283
21.6	Other conditions	287
	Further reading	288
22	Police, firefighters and the military	291
	<i>Aaron M. S. Thompson and Stefanos N. Kales</i>	
22.1	Introduction	291
22.2	First responders: potential exposures common to police, firefighters and the military	292
22.3	Police	302
22.4	Firefighters	303
22.5	Military	306
22.6	Compensation	309
	Further reading	310
23	Office workers and teachers	313
	<i>Jean M. Cox-Ganser, Ju-Hyeong Park and Kathleen Kreiss</i>	
23.1	Introduction	313
23.2	Exposures in office buildings and schools	316
23.3	Diseases associated with exposures	330
23.4	Diagnosis and management issues	333
	Further reading	336
24	Research workers	337
	<i>Paul Cullinan</i>	
24.1	Introduction	337
24.2	Respiratory hazards and diseases	338
24.3	Respiratory sensitization: asthma and rhinitis	340
24.4	Making a diagnosis of respiratory sensitization	341
24.5	Management of respiratory sensitization in the research setting	345
24.6	Respiratory disease arising from exposures to irritant substances	347
24.7	Immediate effects of acute exposures to respiratory irritants at relatively high intensity	348
24.8	Management of the acute effects of high-dose irritant exposure	350
24.9	Longer-term effects of acute exposures at relatively high intensity	350
24.10	Nonasthmatic diseases	350
24.11	Asthma	351
24.12	Management of irritant-induced asthma	352
24.13	Other respiratory diseases in research workers	353
24.14	Other occupational diseases among research workers	354
	Further reading	354

25	Work in hyperbaric environments	357
	<i>Mark Glover</i>	
25.1	Introduction	357
25.2	Respiratory hazards, diseases and their management	361
25.3	Further information	373
	Further reading	374
26	Effects of travel or work at high altitudes or low pressures	377
	<i>Michael Bagshaw</i>	
26.1	Introduction	377
26.2	Physics of the high-altitude environment	378
26.3	Physiology of flight	379
26.4	Altitude illness	385
	Further reading	388
	Part IV The general environment	389
27	Natural sources – wildland fires and volcanoes	391
	<i>Sverre Vedal</i>	
27.1	Introduction	391
27.2	Biomass burning	392
27.3	Volcanoes	399
27.4	Management/prevention	402
	Further reading	404
28	Traditional urban pollution	405
	<i>Sam Parsia, Ameer Patrawalla and William N. Rom</i>	
28.1	Introduction	405
28.2	Particulate matter	407
28.3	Sulfur oxides	411
28.4	Nitrogen oxides	413
28.5	Ozone	415
28.6	Air toxics	417
	References	418
	Further reading	418
29	Traffic-related urban air pollution	421
	<i>Steven M. Lee and Mark W. Frampton</i>	
29.1	Introduction	421
29.2	History of traffic-related air pollution	422
29.3	Engines and emissions	425
29.4	Traffic-related air pollutants	428
29.5	Health effects of traffic-related air pollution	430
29.6	Conclusions	439
	References	440
	Further reading	442

30 Outdoor sports	445
<i>Kai-Håkon Carlsen</i>	
30.1 Introduction	445
30.2 Epidemiological context	446
30.3 Definition of exposures related to asthma and respiratory disorders in athletes – pathogenetic mechanisms	447
30.4 Diseases related to physical activity, training and competition in sports	448
30.5 Diagnostic considerations and medicolegal issues	450
30.6 Treatment of asthma and exercise-induced bronchoconstriction in athletes	450
30.7 International regulations for use of asthma drugs in sports	451
30.8 Controller treatment of EIA	452
30.9 Reliever treatment of EIA	453
30.10 Recommendations for the treatment of exercise induced asthma in athletes	454
References	455
Further reading	456
Index	457
