

# THE HANDBOOK OF SAFETY ENGINEERING

*Principles and Applications*

FRANK R. SPELLMAN | NANCY E. WHITING

# Contents

Preface	xi
---------	----

## **PART I: INTRODUCTION**

1	Introduction	3
	Safety Engineering?	3
	Safety Engineering: A Closer Look	3
	Why a Generalist?	4
	Education and the Safety Engineer	4
	<i>The Three Es Paradigm</i>	12
	The Safety Engineer's Duties	14
	Review Questions	16
	References and Recommended Reading	17
2	Safety: A Historical Perspective	19
	Introduction	19
	Preindustrial Safety	20
	Industrial Safety	21
	Disasters Give Safety a Push	23
	Safety Evolves via Safety-Related Acts	23
	Review Questions	25
	References and Recommended Reading	25
3	Safety Terminology	27
	Introduction	27
	Safety Terms	27
	Review Questions	36
	References and Recommended Reading	36

## **PART II: MATHEMATICS**

4	Conversion Factors and Units of Measurement	39
	Introduction	39
	Conversion Factors	39
	Weight, Concentration, and Flow	51

Fire Science Hydraulics and General Science Conversions	53
Temperature Conversions	56
Conversion Factors: Air Pollution Measurements	57
Conversion Tables: Air Pollution Measurements	59
Soil Test Results Conversion Factors	62
Review Questions	63
5 Basic Math Operations	65
Basic Math Terminology and Definitions	65
Key Words	66
Sequence of Operations	66
Percent	67
Significant Digits	70
Powers and Exponents	71
Averages (Arithmetic Mean)	73
Ratio	74
Dimensional Analysis	76
Geometrical Measurements	81
Force, Pressure, and Head Calculations	89
Review of Advanced Algebra Key Terms and Concepts	94
Review Questions	96
6 Quadratic Equations	97
The Quadratic Equation and Safety Engineering	97
Quadratic Equations: Theory and Application	97
Review Questions	100
Reference and Recommended Reading	100
7 Trigonometric Ratios	101
Trigonometric Functions and the Safety Engineer	101
Trigonometric Ratios	101
Review Questions	103
Reference and Recommended Reading	103
8 Statistics Review	105
Statistical Concepts	105
Measure of Central Tendency	105
Distribution	107
Standard Deviation	109
Summary	111
Review Questions	111
Reference and Recommended Reading	111
9 Boolean Algebra	113
Why Boolean Algebra?	113
Technical Overview	114

Boolean Synthesis	116
Review Questions	117
References and Recommended Reading	118
<b>10 Engineering Economy</b>	<b>119</b>
Safety Engineering and Economics	119
Capital-Recovery Factor (Equal-Payment Series)	120
Uniform Series Present Worth (Value) Factor	121
Future Value	121
Annual Payment (Uniform Series Sinking Fund)	122
Present Value of Future Dollar Amount	123
Future Value of a Present Amount	123
Review Questions	124
References and Recommended Reading	124

### **PART III: SAFETY ENGINEERING CONCEPTS**

<b>11 Fundamental Engineering Concepts</b>	<b>127</b>
Introduction	127
Resolution of Forces	128
Slings	131
Inclined Plane	135
Properties of Materials	137
Principles of Mechanics	144
Noise	152
Radiation	161
Soil Mechanics	167
Structural Failures	175
Review Questions	176
References and Recommended Reading	177
<b>12 Fire Science Concepts</b>	<b>179</b>
Introduction	179
Fire Tetrahedron	181
Fire: A Chemical Reaction	182
Type of Fuel	182
Water Hydraulics	184
Properties of Water	186
Hydrostatic Pressure	189
Head	191
Potential Energy	193
Flow/Discharge Rate: Water in Motion	194
Piezometric Surface and Bernoulli's Theorem	197
Friction Head Loss	203

Major Head Loss	204
C Factor	207
Basic Piping Hydraulics	208
Piping Networks	208
Flow Measurement	209
Water Hydraulics Calculations	210
Review Questions	215
References and Recommended Reading	215
<b>13 Electrical Safety and Electricity for Engineers</b>	<b>217</b>
Electricity	217
Electrical Conductors	219
Simple Electric Circuit	227
Ohm's Law	230
Electrical Power	233
Electrical Energy	235
Series DC Circuits	235
Parallel DC Circuits	242
Series-Parallel Circuits	252
Electromagnetism	252
Magnetic Units	256
Properties of Magnetic Materials	258
Electromagnets	258
AC Theory	259
Basic AC Generator	260
Characteristic Values of AC Voltage and Current	263
Resistance in AC Circuits	266
Inductance	269
Self-Inductance	270
Mutual Inductance	275
Calculation of Total Inductance	276
Capacitance	277
The Capacitor	278
Dielectric Materials	281
Unit of Capacitance	281
Capacitors in Series and Parallel	285
Types of Capacitors	288
Review Questions	288
References and Recommended Reading	289
<b>14 Engineering Site Security</b>	<b>291</b>
Introduction	291
Safety and Upgrading Security	291
Security Engineering	292

Security Engineering Training	292
Physical Security	293
Hazard Assessment	293
What to Implement: Hazard Control and Prevention	294
On-site Hazardous Materials Security	298
Physical Asset Monitoring and Control Devices	301
Computer and Data Security	314
Threats to Computer System Security	321
Networks and Stand-alones	322
The Human Error Factor	324
Computer Security Auditing	326
Data Protection	327
Automated Tools for Data Security Systems	330
Computer Security ... Cradle to Grave ...	331
In-house or Outsourced Security?	331
Review Questions	332
References and Recommended Reading	333
15 Safety Engineering Management Aspects	335
Introduction	335
The Right Way	336
Total Quality Management (TQM) Paradigm	341
The Safety Engineer's Toolbox: System Safety	342
Review Questions	347
References and Recommended Reading	347
Appendix: Chapter Review Answers	349
Index	355
About the Authors	363
