

Handbook of Toxicology of Chemical Warfare Agents

EDITED BY

Ramesh C. Gupta

T+

Contents

List of Contributors	xii	
Foreword	xvii	
Tetsuo Satoh		
SECTION I		
Introduction, Historical Perspective, and Epidemiology		
1. Introduction	3	
Ramesh C. Gupta		
2. Historical Perspective of Chemical Warfare Agents	7	
Nathan H. Johnson, Joseph C. Larsen, and Edward Meek		
3. Global Impact of Chemical Warfare Agents Used Before and After 1945	17	
Jiri Bajgar, Josef Fusek, Jiri Kassa, Kamil Kuca, and Daniel Jun		
4. The Tokyo Subway Sarin Attack: Toxicological Whole Truth	25	
Tetsu Okumura, Kenji Taki, Kouichiro Suzuki, and Tetsuo Satoh		
5. Epidemiology of Chemical Warfare Agents	33	
Linda A. McCauley		
SECTION II		
Agents that can be Used as Weapons of Mass Destruction		
6. Organophosphate Nerve Agents	43	
Annetta Watson, Dennis Opreksa, Robert Young, Veronique Hauschild, Joseph King, and Kulbir Bakshi		
7. Russian VX	69	
Andrey Radilov, Vladimir Rembovskiy, Igor Rybalchenko, Elena Savelieva, Ekaterina Podolskaya, Vladimir Babakov, Elena Ermolaeva, Sergey Dulov, Sergey Kuznetsov, Igor Mindukshev, Alexey Shpak, Ilia Krasnov, Natalia Khlebnikova, Richard Jenkins, and Nikolay Goncharov		
8. Mustards and Vesicants		
Robert A. Young and Cheryl Bast		
9. Arsenicals: Toxicity, their Use as Chemical Warfare Agents, and Possible Remedial Measures	109	
Swaran J.S. Flora, Govinder Flora, and Geetu Saxena		
10. Psychotomimetic Agent BZ (3-Quinuclidinyl Benzilate)	135	
Josef Fusek, Jiri Bajgar, Jiri Kassa, Kamil Kuca, and Daniel Jun		
11. Onchidal and Fasciculins	143	
Arturo Anadón, María Rosa Martínez-Larrañaga, and Luis G. Valero, Jr.		
12. Riot Control Agents	153	
Corey J. Hilmas, Melissa J. Poole, Alexandre M. Katos, and Patrick T. Williams		
13. Fluoroacetate	177	
Nikolay Goncharov, Lidia Glashkina, Elena Savelieva, Valeriy Zinchenko, Sergey Kuznetsov, Maxim Vinokurov, Igor Mindukshev, Peter Avdonin, Richard Jenkins, and Andrey Radilov		
14. Strychnine	199	
Jiri Patocka		
15. Superwarfarins	207	
Michael J. Murphy and Andres M. Lugo		
16. Thallium	225	
Larry J. Thompson		
17. Polycyclic Aromatic Hydrocarbons: Exposure from Emission Products and from Terrorist Attacks on US Targets – Implications for Developmental Central Nervous System Toxicity	229	
Darryl B Hood, Aramandla Ramesh, and Michael Aschner		

SECTION III	
Target Organ Toxicity	
32. The Nervous System as a Target for Chemical Warfare Agents Linnzi Wright, Carey Pope, and Jing Liu	463
SECTION IV	
Special Topics	
33. Behavioral Toxicity of Nerve Agents Jiri Kassa, Jiri Bajgar, Kamil Kuca, and Daniel Jun	481
34. Cardiovascular System as a Target of Chemical Warfare Agents Csaba K. Zoltani	493
35. Skeletal Muscle Ramesh C. Gupta, Wolf-D. Dettbarn, and Dejan Milatovic	509
36. Reproductive Toxicity and Endocrine Disruption of Potential Chemical Warfare Agents Timothy J. Evans	533
37. Liver Toxicity of Chemical Warfare Agents Shashi K. Ramaiah and Atrayee Banerjee	549
38. Renal Toxicity Manu Sebastian	561
39. Ocular Toxicity of Sulfur Mustard Marion K. Gordon, Robert W. Enzenauer, and Michael C. Babin	575
40. Immunotoxicity Kavita Gulati and Arunabha Ray	595
41. Dermal Toxicity of Sulfur Mustard Donald R. Gerecke, Joshua P. Gray, Michael P. Shakarjian, and Robert P. Casillas	611
42. Excitotoxicity, Oxidative Stress, and Neuronal Injury Dejan Milatovic, Ramesh C. Gupta, Snjezana Zaja-Milatovic, and Michael Aschner	633
43. Neuropathologic Effects of Chemical Warfare Agents Randall L. Woltjer	653
44. Molecular and Transcriptional Responses to Sarin Exposure T.V. Damodaran	665
45. The Effects of Organophosphates in the Early Stages of Human Muscle Regeneration Tomaz Mars, Katarina Mis, Sergej Pirkmajer, and Zoran Grubic	683
46. Organophosphate Intoxication: Molecular Consequences, Mechanisms and Solutions Brian C. Geyer, Tama Evron, Hermona Soreq, and Tsafir S Mor	691

SECTION V**Risks to Animals and Wildlife**

47. Chemical Warfare Agents and Risks to Animal Health Tina Wismer	721	57. Biomarkers and Biosensors of Delayed Neuropathic Agents Rudy J. Richardson, R. Mark Worden, and Galina F. Makhaeva	859
48. Potential Agents that Can Cause Contamination of Animal Feedstuffs and Terror R.W. Copcock	739	58. Monitoring of Blood Cholinesterase Activity in Workers Exposed to Nerve Agents Daniel Jun, Jiri Bajgar, Kamil Kuca, and Jiri Kassa	877
49. Threats to Wildlife by Chemical Warfare Agents R.W. Copcock	747	SECTION VIII	

SECTION VI**Toxicokinetics and Physiologically Based Pharmacokinetics**

50. Toxicokinetics of Chemical Warfare Agents: Nerve Agents and Vesicants Harald John, Frank Balszuweit, Kai Kehe, Franz Worek, and Horst Thiermann	755	59. Strategies to Enhance Medical Countermeasures After the Use of Chemical Warfare Agents on Civilians David A. Jett and David T. Yeung	889
51. Physiologically based Pharmacokinetic Modeling of Chemical Warfare Agents Jeffery M. Gearhart, Peter J. Robinson, and Edward M. Jakubowski	791	60. Medical Countermeasures and Other Therapeutic Strategies for Sulfur Mustard Toxicity R. Vijayaraghavan, Anshoo Gautam, and Manoj Sharma	897
52. Metabolism of Warfare Nerve Agents Milan Jokanović	799	61. Medical Management of Chemical Toxicity in Pediatrics Elora Hilmas and Corey J. Hilmas	919
		62. Physiologically Based Pharmacokinetic/ Pharmacodynamic Modeling of Countermeasures to Nerve Agents Elaine Merrill, Chris Ruark, Jeff Gearhart, and Peter Robinson	951

SECTION VII**Analytical Methods, Biosensors, and Biomarkers**

53. On-Site Detection of Chemical Warfare Agents Yasuo Seto	813	63. Prophylactic and Therapeutic Measures in Nerve Agent Poisoning Trond Myhrer	965
54. Laboratory Analysis of Chemical Warfare Agents and Metabolites in Biomedical Samples M.J. van der Schans	827	64. Pharmacological Prophylaxis Against Nerve Agent Poisoning: Experimental Studies and Practical Implications Jiri Bajgar, Josef Fusek, Jiri Kassa, Kamil Kuca, and Daniel Jun	977
55. Biosensors for the Detection of OP Nerve Agents Jun-ichi Anzai	837	65. Pyridinium Oximes as Cholinesterase Reactivators in the Treatment of OP Poisoning Dejan Milatović and Milan Jokanović	985
56. Biomarkers of Exposure to Organophosphorus Poisons: A New Motif for Covalent Binding to Tyrosine in Proteins that have No Active Site Serine Oksana Lockridge, Lawrence M. Schopfer, and Patrick Masson	847	66. Novel Oximes Kamil Kuca, Kamil Musilek, Daniel Jun, Jiri Bajgar, and Jiri Kassa	997
		67. Paraoxonase (PON1) and Detoxication of Nerve Agents Lucio G. Costa and Clement E. Furlong	1023

68. Role of Carboxylesterases in Therapeutic Intervention of Nerve Gas Poisoning Sigrun Hanne Sterri and Frode Fonnum	1033
69. Protection of Acetylcholinesterase from Organophosphates: Kinetic Insight into Bioscavengers R.J. Kern, M.E. Wales, E. Tiffany-Castiglioni, and J.R. Wild	1041
70. Catalytic Bioscavengers: The Next Generation of Bioscavenger-Based Medical Countermeasures Patrick Masson and Daniel Rochu	1053

SECTION IX**Decontamination of Chemical Warfare Agents**

71. Rapid Decontamination of Chemical Warfare Agents Richard K. Gordon and Edward D. Clarkson	1069
72. Detoxification of Arsenic Kiran Kalia and Dhaval N. Joshi	1083
