FIRES, EXPLOSIONS, AND TOXIC GAS DISPERSIONS

Effects Calculation and Risk Analysis

Marc J. Assael
Konstantinos E. Kakosimos

Preface	xiii
Main Symbols List	xv

A. HAZARD IDENTIFICATION – EVENT FREQUENCY	1
<hr/>	
A1. HAZARD AND RISK	1
A2. HAZARD IDENTIFICATION TECHNIQUES	3
A2.1. "What-If" Analysis	5
A2.2. Hazard and Operability Analysis (HAZOP)	8
A2.3. Failure Modes and Effects Analysis (FMEA)	13
A2.4. Overview of Qualitative Evaluation Techniques	14
A2.4.1. Safety Review	14
A2.4.2. Checklist Analysis	14
A2.4.3. Preliminary Hazard Analysis	15
A2.4.4. Criticality Analysis	15
A2.4.5. Change Analysis	15
A2.4.6. Critical Incident Technique	15
A2.4.7. Energy Analysis	16
A2.4.8. Worst-Case Analysis	16
A2.4.9. Network Logic Analysis	16
A2.4.10. Scenario Analysis	16
A2.4.11. Systematic Inspection	16
A3. EVENT FREQUENCY TECHNIQUES	17
A3.1. Fault Tree Analysis (FTA)	18
A3.2. Event Tree Analysis (ETA)	21
A4. HUMAN FACTOR	23
A4.1. Some Definitions	23
A4.1.1. Human Factor	24
A4.1.2. Human Performance	24
A4.1.3. Human Error	24
A4.2. Incidents at Petroleum Refineries	25
A4.2.1. Data Collection	25
A4.2.2. Analysis Method	25
A4.3. Human Factors Checklists	28

B. OUTFLOW	31
<hr/>	
B1. INTRODUCTION	31
B2. OUTFLOW OF COMPRESSED GASES	33
B2.1. Gas Density	33
B2.2. Outflow from Vessels	35
B2.2.1. Small Outflow	35
a) <i>Outflow through Hole in Vessel's Wall</i>	36
b) <i>Outflow through Hole in Pipe Wall Connected to Vessel</i>	41
B2.2.2. Total Vessel Rupture	45
B2.3. Outflow Due to Total Pipe Rupture	46
B3. OUTFLOW OF LIQUIDS	51
B3.1. Outflow from Vessel	51
B3.1.1. Small Outflow	51
a) <i>Outflow through Hole in Vessel's Wall</i>	53
b) <i>Outflow through Hole in Pipe Wall</i>	56
B4. OUTFLOW OF PRESSURIZED LIQUEFIED GASES	57
B4.1. Description of Event	57
B4.2. Initial Flashing	59
B4.2.1. Cloud's Radius	60
B4.2.2. Cloud's Expansion Velocity	60
B4.2.3. Droplet Rain-out on the Ground	61
B4.2.4. Diameter of Deposited Droplets	62
B4.3. Air Entrainment and Atmospheric Dispersion	63
B4.3.1. Cloud's Radius and Velocity	63
a) <i>Initial Flashing</i>	65
b) <i>Air Entrainment</i>	66
C. EFFECTS AND CONSEQUENCES ANALYSIS	67
<hr/>	
C1. INTRODUCTION	67
C1.1. Definitions	71
C2. FIRES	75
C2.1. Pool Fire	79
C2.1.1. Burning Rate	80
a) <i>Zabetakis-Burgess Method</i>	81
b) <i>Burgess-Strasser-Grumer Method</i>	82
c) <i>Mudan Method</i>	83
C2.1.2. Maximum Surface Emitting Power	85
a) <i>Thomas Method</i>	86
b) <i>Pritchard-Binding Method</i>	86
C2.1.3. Actual Surface Emitting Power	89
a) <i>Mudan-Croce for Hydrocarbon Fuels Fire Method</i>	90
b) <i>Non-Hydrocarbon Fuels Fire Method</i>	90

C2.1.4.	View Factor	92
C2.1.5.	Heat Flux	95
C2.2.	Fire Ball	99
C2.2.1.	Dimensions and Duration of a Fire Ball	100
a)	<i>Roberts Method</i>	100
b)	<i>TNO Method</i>	101
C2.2.2.	Burning Rate	102
C2.2.3.	Maximum Surface Emitting Power	102
C2.2.4.	Actual Surface Emitting Power	103
C2.2.5.	View Factor	103
C2.2.6.	Heat Flux	104
C2.3.	Jet Fire	107
C2.3.1.	Exit Velocity of the Expanding Jet	108
a)	<i>Sonic - Supersonic Flow $M_j \geq 1$</i>	108
b)	<i>Subsonic Flow $M_j < 1$</i>	109
C2.3.2.	Source Equivalent Diameter	110
C2.3.3.	Flame Dimensions	110
C2.3.4.	Maximum Surface Emitting Power	117
C2.3.5.	Actual Surface Emitting Power	117
C2.3.6.	View Factor	118
C2.3.7.	Heat Flux	119
C2.4.	Flash Fire	121
C2.5.	Effects of Heat Radiation	123
C2.5.1.	Human Skin Burns	124
C2.5.2.	Thermal Radiation Intensity Limits	125
C2.5.3.	Effects on People	127
a)	<i>Thermal Radiation Dose</i>	127
b)	<i>Probability of Injury or Death</i>	129
c)	<i>Overall Effects</i>	131
C2.5.4.	Effects on Materials	134
C2.6.	Examples	137
C2.6.1.	Case Study: Fire in a Gasoline Tanker in a City	137
C2.6.2.	Major Industrial Accidents Caused by Fires	143
C3.	VAPOR CLOUD EXPLOSIONS (VCEs)	149
C3.1.	Cloud Expansion Mechanism	151
C3.2.	Equivalent TNT Mass Method	153
C3.2.1.	Equivalent TNT Mass and Overpressure	153
C3.3.	Multi-Energy Method	159
C3.3.1.	Cloud Dimensions	160
C3.3.2.	Obstructed Regions	160
C3.3.3.	Strength of Explosion Blast and Overpressure	162
C3.4.3.	Positive Phase Duration	165
C3.4.	Baker-Strehlow Method	171
C3.4.1.	Cloud Dimensions	171
C3.4.2.	Flame Speed	172
C3.4.3.	Strength of Explosion Blast and Overpressure	173

C3.5. Effects of Explosions	179
C3.5.1. Effects on People	181
a) <i>Lung Damage</i>	182
b) <i>Eardrum Rupture</i>	184
c) <i>Head Impact</i>	184
d) <i>Whole-Body Displacement Impact</i>	184
e) <i>Fragments and Debris</i>	185
C3.5.2. Effects on Structures	187
a) <i>Building Collapse</i>	187
b) <i>Major Structural Damage</i>	187
c) <i>Minor Damages</i>	187
d) <i>Breakage of Window Panes</i>	187
C3.6. Examples	189
C3.6.1. Case Study: the Flixborough Accident	189
a) <i>Equivalent TNT Mass Method</i>	190
b) <i>Multi-Energy Method</i>	192
c) <i>Baker-Strehlow Method</i>	193
d) <i>Results Comparison</i>	194
C3.6.2. Major Industrial Accidents Caused by Explosions	195
C4. BLEVE	207
C4.1. Estimation	210
C4.2. Examples	211
C4.2.1. Major Industrial Accidents Caused by a BLEVE	211
C5. TOXIC GAS DISPERSION	213
C5.1. Types of Toxic Gases	213
C5.1.1. Toxic Gases from Industrial Accidents	213
a) <i>Seveso, Italy, 1976</i>	214
b) <i>Bhopal, India, 1984</i>	214
C5.1.2. Toxic Gases in Terrorist Actions	215
a) <i>Nerve Agents</i>	215
b) <i>Choking Agents</i>	217
c) <i>Blister Agents</i>	217
d) <i>Blood Agents</i>	217
e) <i>Tear Agents</i>	218
f) <i>Vomiting Agents</i>	218
g) <i>Incapacitating Agents</i>	218
C5.2. Introduction to Cloud Dispersion	219
C5.2.1. Meteorological Conditions	219
a) <i>Air Circulation</i>	219
b) <i>Atmospheric Stability</i>	221
c) <i>Wind Speed</i>	223
d) <i>Temperature Inversion</i>	223
C5.2.2. Dispersion Models	225
a) <i>Empirical Models</i>	225
b) <i>Lagrangian Models</i>	226
c) <i>Eulerian Models</i>	226

C5.2.3.	Selection of Gaussian Model for Light Gas Dispersion	227
C5.2.4.	Selection of Empirical Models for Heavy Gas Dispersion	228
C5.3.	Light Gas Dispersion from Continuous Source	229
C5.3.1.	Plume Rise	229
a)	<i>Plume Rise Due to Buoyancy or Momentum</i>	230
b)	<i>Distance of Maximum Plume Rise</i>	231
c)	<i>Gradual and Final Plume Rise</i>	232
C5.3.2.	Dispersion Equation	235
a)	<i>Concentration Equation</i>	236
b)	<i>Dispersion Coefficients</i>	238
C5.3.3.	Chemical Deposition Mechanism	242
C5.4.	Light Gas Dispersion from an Instantaneous Source	243
C5.4.1.	Puff Rise	243
C5.4.2.	Dispersion Equation	246
a)	<i>Concentration Equation</i>	246
b)	<i>Dispersion Coefficients</i>	247
c)	<i>Mean Wind Speed</i>	247
d)	<i>Puff Arrival and Departure Time</i>	248
C5.5.	Heavy Gas Dispersion	253
C5.5.1.	Heavy Gas Dispersion from a Continuous Source	255
C5.5.2.	Heavy Gas Dispersion from an Instantaneous Source	259
C5.6.	Dispersion of Solid Particles (e.g., PM₁₀)	263
C5.7.	Effects of Toxic Gas Dispersion	265
C5.7.1.	Toxic Exposure Limits	265
a)	<i>LC₅₀ (Lethal Concentration 50)</i>	267
b)	<i>LC₁ (Lethal Concentration 1)</i>	268
c)	<i>LD₅₀ (Lethal Dose 50)</i>	268
d)	<i>IDLH (Immediately Dangerous to Life and Health)</i>	270
e)	<i>LOC (Level of Concern)</i>	271
f)	<i>PEL (Permissible Exposure Level)</i>	271
C5.7.2.	Special Atmospheric Pollutants Limits	273
C5.7.3.	Risk Zones	274
C5.8.	Examples	275
C5.8.1.	Case Study: Toxic Gas Emissions at the City of Kamini	275
C5.8.2.	Major Industrial Accidents Caused by Toxic Gas Dispersion	279

D. CAUSES OF DESTRUCTION **285**

D1. INTRODUCTION **285**

D2. FACILITIES AND EQUIPMENT **287**

D2.1. Storage Tanks **287**

D2.1.1. Technical Specifications 288

D2.1.2. Probable Events 288

a) *Ground Pool from Overflowing* 288

b) *Outflow Because of Over- or Under-Pressure* 290

c) *Gas Explosive Mixtures* 292

D2.2. Pipes, Valves, and Related Equipment	293
D2.2.1. Technical Specifications	293
D2.2.2. Probable Events	294
a) <i>Pipe Corrosion</i>	294
b) <i>Metal Fatigue</i>	295
c) <i>Water Hammer</i>	296
d) <i>Pipe Reusability</i>	297
e) <i>Flexible and Rubber Pipes</i>	297
f) <i>Valves and Other Equipment</i>	297
D2.3. Stacks	299
D2.3.1. Technical Specifications	300
D2.3.2. Probable Events	300
D2.4. Other Equipment and Procedures	302
D2.4.1. Pumps and Centrifugal Systems	302
D2.4.2. Heat Exchangers	304
D2.4.3. Furnaces	305
D2.4.4. Maintenance, Cleaning, and Painting	306
D3. IGNITION	307
D3.1. Ignition Sources	307
D3.1.1. Construction and Maintenance Tools	307
D3.1.2. Hot and Electric Appliances	308
D3.1.3. Natural Phenomena	309
D3.2. Ignition Characteristics	311
D3.2.1. Flammability Limits	311
D3.2.2. Mixture Flammability Limits	312
D3.2.3. Autoignition Temperature	313
D3.2.4. Flash Temperature	314
REFERENCES	315
