

Foods for Health in the 21st Century

A Roadmap for the Future

ISSUE EDITORS

M. Eric **GERSHWIN**

M.R.C. **GREENWOOD**

| | |
|---|----|
| Introduction: Foods for health: A roadmap for the future | |
| <i>By M.R.C. Greenwood and M. Eric Gershwin</i> | ix |

Part I. Meeting the obesity challenge

| | |
|---|----|
| The importance of dietary modulation of cAMP and insulin signaling in adipose tissue and the development of obesity | |
| <i>By Lise Madsen and Karsten Kristiansen</i> | 1 |
| Fructose consumption: recent results and their potential implications | |
| <i>By Kimber L. Stanhope and Peter J. Havel</i> | 15 |
| Can bioactive foods affect obesity? | |
| <i>By A. Astrup, M. Kristensen, N.T. Gregersen, A. Belza, J.K. Lorenzen, A. Due, and T.M. Larsen</i> | 25 |

Part II. Nutrigenomics

| | |
|--|----|
| Phytanic acid—an overlooked bioactive fatty acid in dairy fat? | |
| <i>By Lars I. Hellgren</i> | 42 |
| Toward tailored synthesis of functional polysaccharides in plants | |
| <i>By Naomi Geshi, Bent Larsen Petersen, and Henrik Vibe Scheller</i> | 50 |
| Effect of walnut (<i>Juglans regia</i>) polyphenolic compounds on ovalbumin-specific IgE induction in female BALB/c mice | |
| <i>By Sarah S. Comstock, Laurel J. Gershwin, and Suzanne S. Teuber</i> | 58 |

Part III. Improving human health

| | |
|---|----|
| Dietary fibers as immunoregulatory compounds in health and disease | |
| <i>By René Wismar, Susanne Brix, Hanne Frøkiær, and Helle Nygaard Lærke</i> | 70 |

| | |
|---|-----|
| Ellagic acid and polyphenolics present in walnut kernels inhibit <i>in vitro</i> human peripheral blood mononuclear cell proliferation and alter cytokine production <i>By Koren C. Anderson and Suzanne S. Teuber</i> | 86 |
| Dairy proteins and the response to pneumovax in senior citizens: a randomized, double-blind, placebo-controlled pilot study <i>By Samara L. Freeman, Laura Fisher, J. Bruce German, Patrick S. Leung, Harry Prince, Carlo Selmi, Stanley M. Naguwa, and M. Eric Gershwin</i> | 97 |
| Public safety and dietary supplementation <i>By M. Eric Gershwin, Andrea T. Borchers, Carl L. Keen, Sheldon Hendler, Frank Hagie, and M.R.C. Greenwood</i> | 104 |
| The dogmas of nutrition and cancer: time for a second (and maybe third) look <i>By Ralph de Vere White, Robert M. Hackman, and Joel Kugelmass</i> | 118 |

Part IV. Functional foods

| | |
|--|-----|
| Enzyme technology for precision functional food ingredient processes <i>By Anne S. Meyer</i> | 126 |
| Mass spectrometric-based protein chips for detection of food-derived bioactive components <i>By Jan Stagsted, Ann Louise W. Jørgensen, and Helle R. Juul-Madsen</i> | 133 |
| Enrichment of foods with omega-3 fatty acids: a multidisciplinary challenge <i>By Charlotte Jacobsen</i> | 141 |
| The traditional Japanese formula keishibukuryogan reduces liver injury and inflammation in patients with nonalcoholic fatty liver disease <i>By Makoto Fujimoto, Koichi Tsuneyama, Hideki Kinoshita, Hirozo Goto, Yasuo Takano, Carlo Selmi, Carl L. Keen, M. Eric Gershwin, and Yutaka Shimada</i> | 151 |

Part V. Consumer response

| | |
|---|-----|
| Artificial sweetener as a historical window to culturally situated health <i>By Carolyn de la Peña</i> | 159 |
| European consumers' acceptance of functional foods <i>By Klaus G. Grunert</i> | 166 |
| Consumer response: the paradoxes of food and health <i>By Charlotte Biltekoff</i> | 174 |

Part VI. Emerging technologies

| | |
|--|-----|
| Translational nutrition research at UC Davis—the key role of the Clinical and Translational Science Center <i>By Sidika Kasim-Karakas, Dianne Hyson, Charles Halsted, Marta van Loan, Erica Chedin, and Lars Berglund</i> | 179 |
|--|-----|

| | |
|---|-----|
| The future of sustainable food production | |
| <i>By Pamela Ronald and Raoul Adamchak</i> | 184 |
| Microfluidics: an emerging technology for food and health science | |
| <i>By Gisela Lin and Abraham P. Lee</i> | 186 |
| Corrigendum for Ann. N. Y. Acad. Sci. 880: 110–121 | 193 |
