AUTOMATED BEER FERMENTATION CONTROLLER

A computer-controlled micro-brewing process

LAMBERT
Academic Publishing

Table of Contents

1. Introduction
 - 1.1. History of Beer Brewing
 - 1.2. System Requirements
 - 1.3. Organization of the Report
2. System Overview
3. Hardware
 - 3.1. PC
 - 3.2. Chest Freezer
 - 3.3. Heater
 - 3.4. iPal Network Controlled Power Switch
 - 3.5. Alicat Mass Flow Meter
 - 3.6. Beer Equipment
4. Software
 - 4.1. OS and Supporting Software
 - 4.2. proj_d ' Project Daemon
 - 4.2.1. Work Flow
 - 4.3. Daemon Client Scripts
 - 4.4. Database
 - 4.5. PHP Web pages
 - 4.6. Graph Generation

5. Integration

5.1. Reading the Flow Meter

5.2. Power Control

5.3. Website to Daemon Communication

6. Testing and Results

6.1. Component Testing

6.2. System Tuning

6.3. Complete System Testing

7. Conclusion

7.1. System Optimization

7.2. Future Work

7.3. Modeling Systems
